Editorial Comment.

The International Joint Commission has before it the consideration of a proposed lease in which the Michigan-Lake Superior Power Company and the United States are the contracting parties. The power company desires to divert, for power development purposes, a flow of water from the St. Mary's River, to the extent of 25,000 to 30,000 cubic feet per second, and proposes to construct compensating works opposite Sault Ste. Marie, Mich. Under the new conservation policy adopted by the United States, the government proposes to lease the water for power with a view to ultimately owning the development works constructed by the company. In the lease at present under consideration the latter offer to pay a yearly rate of \$2.50 per cubic foot per second up to a flow of 25,000 cubic feet, in excess of which \$1 per cubic foot per second is the charge it offers to meet. The question being of boundary water, and there-finding of the International Joint Commission will govern the situation, and its report will be awaited with interest.

Building conditions for the month of July throughout the country show about the same relative situation that was exhibited during the month of June. Reports from about sixty different cities throughout the country, made to the American Contractor, Chicago, show a loss of about 15 per cent as compared with the same month last year. The weather in the central West has been generally hot and dry and there is a shortage of crops in the agricultural districts. The prospectus legislation in regard to the tariff has tended to curtail buying in commercial circles and as a result there is a stagnation of business. This is necessarily reflected in the money market and as a result it is felt in building conditions as well as anywhere else. Particulars are found in the following tabulated report:

	July, 1912.	July, 1913.
Akron	\$ 707,265	\$ 664,130

Total

The fluctuations in temperature produce quite a bit of discomfort. But, after all, the earth is a fairly stable institution in the matter of heat—fortunately for the human race. A few miles above the surface it is too cold for life to exist, and a few miles below the surface it is too hot. On the surface, however, the temperatures show a comparatively moderate variation.

In the United States the greatest range of temperature is along the northern boundary, where the mercury sometimes goes to 55 degrees below zero in the winter and to 108 above in the summer—a difference of 163 degrees. The hottest recorded temperature in the United States is 128 degrees at Mammoth Tank, in the Colorado Desert, in July, 1887. India and the desert of Sahara have records above 130, while Siberia has reported a temperature of 90 below zero.

These are really moderate ranges, and the human body is able to accommodate itself to them without serious difficulty.

The Master Builder—Past, Present and Future.

By P. MacKissock in Western Canada Contractor.

The Greek word "architecton," from which is derived the modern term "architect," means—A Master Builder. The definition given in the Encyclopedia Britannica of the term of "architecture" is: "The art of building in such a way as to accord with principles determined not merely by the ends the edifice is intended to serve, but by high considerations of beauty and harmony." In the past the master builder designed and carried out his work. In the present, designing is the work of the architectural profession, which has fallen heir to all the higher branches of the master builder's art, the master builder still retaining, by courtesy, the original title.

To help us to understand in some degree the master builder of the past, permit me to emulate the witch of Endor, and call up for our survey, and use, one or two of the spirits of the mighty dead.

From the far distant past I would call upon one who reigned over Babylon some 4,100 years ago. His name was Hammurabi, and his record and code of laws were first made known to us by archaeological research and translation some ten years since. The record of his history and life's work, and his detailed code of laws, prove him to have been a successful warrior, a profound statesman, and a very great builder.

In the words of the record, "He built temples, constructed canals, fortified cities, and made statues of the god with great diligence."

He designed the work and he carried it out.

He also took care that the work of other builders should be properly carried out, and he devoted a section of his code to this purpose. Let me quote a part:

"If a builder built a house for a man and did not make its construction firm, and if the house which he has built collapse, and cause the death of the owner of that house, that builder shall be put to death."

Hammurabi being, as I have said, a master builder, a profession which, I have no doubt, he found much more interesting than that of being a mere legislator, and experiences of the administration of law, and of those who did not do strange and merry luxury. Ample, with many parallels to the modern law as recorded as follows:

Sumeru-bellah hath reported unto me, saying, that he hath taken place in the office of a metal worker, and the men who look the able, and the wise men, and the knowledge of these things, are all mine. Now, when thou art in the office, thou shalt set a seal upon the money and cause it to be brought to me, and the offenders shall be sent unto me."

Hammurabi, evidently, thought that the law was going on the form of a seal, and being a master builder, he would quite easily use the money. Suggestive says a writer in the Athenaeum on this subject, of the ways of

legal officials generally, and of those in particular who "returned to the litigant, on the royal order, the 400 ounces of gold they had fined him, only they retained 398 for legal expenses and the servants still expected fees."

As a master builder, one may be permitted to envy Hammurabi his fine opportunities for independent conception and execution, and to conclude that the work he did, of lasting benefit to his age and country, was only rendered possible by the fact that as a master builder of the distant past he had a tolerably free hand.

Let us next briefly notice another great master builder, this time of the not-so-distant past. We move forward some 3,500 years, recalling as we hurriedly pass something of what has been done by master builders in that time, and are arrested by the mighty figure of Michael Angelo Buonarroti. His period was from 1475 to 1564 of the present era, and he was, and is, pre-eminent as a painter, sculptor and master builder, and he was no mean poet. After duly serving his apprenticeship in the workshop of Domenico Ghirlandio, he studied in the school of sculpture at Florence, which enjoyed the illustrious and cultured patronage of Lorenzo de Medici. His mental development was also greatly affected by his coming under the influence of Savonarola. After fame had come to him, he spent a winter at the quarries at Carrara, superintending the getting out and shipment of the marble for his work in Rome. He was working for Pope Julius at that time, and when he approached him for progress estimates his holiness threatened him with death.

Michael Angelo's greatest work as a master builder was, of course, the designing and carrying out of the main features of St. Peter's at Rome, whose dome is one of the noblest monuments. Then follow the reconstruction of St. Mary's Church from the old Roman Baths of Diocletian, the long-ruined cloister of the Museum delle Terme, and many others. It was ordained that painting should become his best gift, but he himself said "paint is not my business." Popes, cardinals and magnifices used him and exploited his genius, and beat him down in his price, and kept him out of his balances with almost modern calumnies. "His history," says a writer in the Encyclopedia Britannica, "is one of indomitable will and almost superhuman energy, yet of will that hardly ever had its way, and of energy continually at war with circumstances."

The most salient feature about these two extreme types I have glanced at so briefly and superficially is their breadth of culture, their freedom from the modern error of over-specialization. I might have cited others innumerable, of all nations, filling the 3,500 years gap referred to, amongst whom the churchmen of the Middle Ages could merit considerable mention, all, or nearly all, of them bearing out more or less my contention that the

great master builders of the past attained their still unsurpassed excellence because their breadth of culture made them capable of great conception allied with great power of execution.

From these by-gone days, of which I have given you the merest hint, I pass to the master builder of the present. I have given you my idea, somewhat fanciful, perhaps, but ethically, in my opinion, wholly correct, of the evolution through specialization, and he is now, not in theory only, but also in practice, very largely subservient to the architect. And this phenomenon is worth consideration. No more than our present competitive industrial system is pre-ordained. It is merely that we have taken a wrong turning, have gone up a blind alley, and are not yet in quite bad enough case to rectify our error. What horrible waste of time do we all suffer as a consequence! It would be interesting to know how much time has been lost by the men represented by this body in the resultless figuring of plans, and the unprofitable reading of specification.

That a man should be an expert in his work no one will attempt to deny, but between such expertness and over-specialization there is a vital difference. Let me illustrate in the simplest way. Some time ago a middle-aged workman came to me looking for work. He was a new arrival from Britain, and he had that repressed and detached look in his face which one may see in the faces of recently released convicts after a long term of penal servitude. I asked him where he had worked, and what he had worked at. He replied that he had been with the Fairfield Shipbuilding and Engineering Co., on the Clyde, for the last eighteen years, and that all that time he was a "hole-borer," and "hole-borer" only. Imagine it! One of us "a little lower than the angels" engaged for eighteen years in creating vacancy through steel plates, and vacancy in his own poor mind. He was beautifully specialized! Might I venture to suggest over-specialized?

I need not elaborate the point any further. Present conditions are well known to all of us, and their continual scramble quite prevents any possibility of the master builder of the present attaining, under such conditions, to the dignity which once was his. That happiness is reserved, I am absolutely satisfied, for the master builder of the future.

Already the movement in the right direction has begun, and that movement I, towards the payment of net cost by the owner, plus an assured commission for his work to the master builder, in the future, when this method is common, the antagonism between architect and builder will cease for lack of reason for its continuing. The architect and builder, if not one in person, ought certainly to be one in their united efforts to attain the best possible results for the owner. The advantages are self-evident, and the principal is acknowl-

Wednesday, Aug. 20, 1913.

edged by the highest bodies in the civilized world.

These bodies are the world's governments, and what are their largest operations in building at the present moment, Dreadnoughts, of course. And how do they build them? As the Clyde in Scotland, alone produced in 1912 as much shipping at the whole of Germany, and considerably more than the whole of the United States of America, I may perhaps be pardoned for confining the rest of my illustration to that effete land known as the United Kingdom. Dreadnoughts have to be built so that they can be depended upon, and they have to be built on time. The British Admiralty knows the condition and capacity of every shipbuilding yard, which can handle Dreadnoughts, in the United Kingdom, and orders are placed in these yards to suit their capacity. The terms are on the basis of net cost, plus commission to the builders.

The country must have Dreadnoughts, and it has been realized that the country has a right to pay for all that it gets, and that the builder must be assured of his margin of commission. Why is this? That the work may be done as efficiently and as economically as possible, and that the builder, assured of his wages, may be able to devote himself and his organization wholly to that combination of results.

Briefly, the foregoing is the result of proper organization of that portion of society represented by the Admiralty on the one hand, and the shipbuilders on the other. Our master builder of the future will have the advantage over us of living and working when organization is more general. In his day it will be wholly conceded that building for the land is equally worthy of national organization as is building for the sea, and that buildings for conserving, educating and expanding life are, after all, more desirable and more important than levathans of destruction. But that time is not yet. For us the most hopeful sign of those times is the increasing tendency towards building upon the cost-plus-a-fixed-sum basis. The architect and builder will realize their independence, and that true union is true strength. The new conditions will call for increased efficiency on the part of the master builder, no doubt, and much more breadth of outlook, as they will bring the architect into closer touch with actualities. The master builder of the future will be freed from the degrading, but very natural tendency, to squeeze a bit more out of it than he is entitled to. He will devote himself more and more to increasing his own knowledge of his business in all its scope and all its degrees, in perfecting his organization, plant and methods. Modern architects of the inefficient type will be eliminated, and the remaining 25 per cent will be recognized and honored as the master builders they truly are.

Over-specialization will correct itself, and design will not be ministered by a close corporation only. What can be done by builders' exchanges to bring nearer that condition of things under which the master builder of the future will exist? I would answer, organization built upon fellowship. Break down the barriers, obliterate the frontiers, get to know what solid-

BUILDING AND INDUSTRIAL NEWS

ity really means, and fellowship will follow. If every builders' exchange in Canada were possessed of a good social club, with all the requirements of the best class, the business of the master builder would be revolutionized in a generation. The master builder of the future will have such a club, and it will be to him both a solace and an inspiration.

I should further add that we master builders should be honored to think that we are working in harmonious

conjunction with the Grand Architect of the Universe, for the coming of that time when, as a great poet has nobly said:

"The war drum throbbed no longer,
And the battle-flags were furled,
In the Parliament of Man, the

Federation of the world."

Or, as another poet has more nobly said, when

"Man to man the world o'er
Shall brithers be for a' that."

Firms dealing news on special clauses of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 4 story and base, reinforced concrete, \$30,000. Architects, Ross & Burgren, 316 California St., S. F. Owner, S. Zuseman. The building will be erected on the north side of Post street west of Larkin, covering an area of 24 feet 3 inches by 120 feet. Suites will consist of two and three rooms with private bath and wall beds. Interior finish will be of pine with some elm panels and hardwood floors. Plans provide for steam heat, automatic elevator, a vacuum cleaning system and hot water plant. Bath rooms will have composition floors and tile wainscot. Entrance of the building will be finished in marble and tile. Exterior will be faced with cement plaster. Plans are being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$24,000. Architect, none. Owners, McKillop Bros., 540 Cole St., S. F. The building will be erected on the west side of Taylor street north of Clay and will cover a ground area of 30x150 feet. There will be in the neighborhood of 20 suites of two and three rooms. Interior finish will be of pine, elm panels and some hardwood floors. All suites will be equipped with wall beds and will have private bath rooms. Plans provide for steam heat, vacuum cleaning system and hot and cold running water. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be covered with rustic and brick veneer. Plans are in the hands of the owners and the work will be done by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Apartment house, 3 story and base, frame. Cost not stated. Architect, Arthur G. Scholz, Phelan Bldg., S. F. Owner, F. Mertens. The building will contain in the neighborhood of 12 suites arranged in two and three rooms, and is to be erected on the south side of Fulton street east of Gough. Interior finish will be of pine with some elm panels. All suites will have private bath rooms and will be equipped with wall beds. Bath rooms will have composition floors and tile wainscot. Plans provide for a central heating system. Entrance vestibule will be finished in marble. Exterior of the building will be covered with rustic, cement plaster on metal lath and brick veneer. Plans are complete and have been out for figures. Contracts will be awarded this week.

SAN FRANCISCO—Apartment house, 3 story and base, reinforced concrete.

Cost not stated. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owners, Talbot Estate. This building will be erected on the north side of Mission street west of Seventh, covering an area of 31 feet 4 inches by 165 feet. Plans show a large store on the first floor and a number of two and three room suites on the upper floors. Interior finish will be of pine throughout. There will be steam heat. All suites will have private baths and wall beds. There will be patent store fronts. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$12,000. Architects, Fabre & Bearwald, Merchant National Bank Bldg., S. F. Owner's name withheld. The building will be erected on upper Sacramento street, and has been designed to contain nine suites of three rooms and bath. Interior finish will be of pine with elm panels and some hardwood floors. There will be steam heat and an automatic elevator. Bath rooms will have cement floors and tile wainscot. Hot and cold running water will be supplied to all rooms. Suites will be equipped with wall beds. Marble and tile will be used in the entrance vestibule. Exterior of the building will be covered with brick veneer and cement plaster on metal lath. Plans are now being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$25,000. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner, Mrs. A. Dorland. The building is to be erected on the west side of Valencia street north of 17th street and will cover an area of 60x78 feet. Plans show a total of 14 suites, arranged in two and three rooms with private baths and wall beds. Interior finish will be of pine throughout. Some hardwood floors will be used. There will be steam heat and elevator service. Bath rooms will have composition floors and tile wainscot. Marble and tile will be used in the entrance. Exterior of the building will be covered with rustic, shiplap and brick veneer. Plans are now being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$35,000. Architect, none. Owner, D. Curtin, 4019 24th St., S. F. The building has been designed to contain twelve large suites and will be erected at the northeast corner of Castro and 24th streets, covering an area of 30x80 feet. Interior finish will be largely of pine with some redwood and elm used. Plans provide for steam heat, automatic elevator, a

vacuum cleaning plant and hot and cold water system. All suites will have wall beds and private bath rooms. Bath rooms will be finished with composition floors and tile wainscot. Exterior of the building will be covered with shiplap and brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$15,000. Architect, none. Owner, A. W. Ward, 405 Columbus avenue, S. F. The building will cover an area of 40x60 feet 8 inches, and will be erected at the southeast corner of Broadway and Leavenworth streets. The building has been designed to contain nine suites of two and three rooms, all with private bath rooms and wall beds. Interior finish will be of pine with some elm panels and hardwood floors. There will be steam heat and a hot water system. Bath rooms will have composition floors and tile wainscot. Tile and marble will be used in the entrances. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owners, D. Edwards & Sons. This building, designed to contain eight suites and covering an area of 30x73 feet, will be erected on the west side of Gough street south of Oak. Suites will be arranged in two and three room apartments with private bath and wall beds. Interior finish will be of pine throughout with some hardwood floors. There will be steam heat and hot and cold running water will be supplied to all rooms. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$16,000. Architects, McDougall Bros., Russ Bldg., S. F. Owner, W. E. Roberts. The building will be erected on the south side of California street east of Broderick, covering an area of 27½x112 feet. There will be one store on the first floor besides the entrance and bookkeeper's suite. Upper floors will be arranged for ten apartments of two and three rooms. All suites will have wall beds and private bath rooms. Interior finish will be largely of pine with some elm panels and hardwood floors. There will be steam heat and a hot water system. Entrance will be finished in marble and tile. Exterior of the building will be faced with rustic cement plaster on metal lath and a glazed terra cotta tile base. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architect, none. Owner, Dr. C. S. Mann, 375 Golden Gate Ave., S. F. The building will be erected at the southeast corner of Golden Gate Court and Sacramento street, and will cover an area of 28x68 feet. Interior has been arranged for six suites of three rooms and bath. Interior finish will be of pine throughout. All suites will have private bath rooms and wall beds. Plans provide for a central heating system and hot water supply. Bath

rooms will have composition floors and tile wainscot. Entrance vestibule will be wainscotted with marble. Exterior of the building will be covered with shingles and klinker brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick and steel. Cost not stated. Architects, J. Martyn Haenke and W. J. Dodd, Story Bldg., L. A. Owner Dr. Bosworth. The building will be erected at the corner of Shatto and Lucas streets, covering an area of 100x175 feet. Plans provide for a total of 125 rooms which will be arranged in two and three room suites with wall beds and private bath rooms. There will be steam heat, elevator service, a vacuum cleaning system and hot and cold water supply. Interior finish will be of pine, birch and some hardwood floors. Bath rooms will have tile floors and wainscot. Metal window sash and frames are specified. Marble and tile will be used in the lobby and entrance. Exterior of the building will be faced with pressed brick. Plans are being prepared.

HOLLYWOOD, LOS ANGELES CO., CAL.—Apartment house, 3 story and base, frame, \$65,000. Architect, Rudolph P. Schering, 329 West 8th St., L. A. Owners, Coast Utilities Investment Co. The building will be erected at the corner of Garfield Place and Hollywood street, covering an area of 88x185 feet. Besides the lobby, sun parlor and amusement rooms the building will contain a total of 210 rooms, which will be arranged in two, three and four room suites. Interior finish will be of pine throughout. All apartment will have private bath rooms and will be equipped with wall beds. Bath rooms will have cement floors and tile wainscot. Plans provide for steam heat and a vacuum cleaning system. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 3 story and base, frame, \$22,000. Architect, P. A. Noyes, Jr., California Bldg., L. A. Owner, Dr. L. E. Wyckoff. The building will cover an area of 43x100 feet, and has been designed to contain 53 suites arranged in suites of two and three rooms. Interior will be finished in pine with some elm panels and hardwood floors. There will be steam heat and an automatic elevator. Bath rooms will have cement floors and tile wainscot. All suites will be equipped with wall beds and will have private bath rooms. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and work will be started at once.

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 3 story and base, Class C construction, \$60,000. Architect, Fernand Parmentier, Byrne Bldg., L. A. Owner, Mrs. Harvey Ingerson, Contractor, Milton A. Fly, Los Angeles Investment Bldg., L. A. Contract price not stated. Note: The contract has been taken on a percentage basis.

LOS ANGELES, CAL.—Apartment house, 3 story and base, frame, \$20,000. Architect, A. S. Heineman, San Fernando Bldg., L. A. Owners, Architectural Construction Co. Contractors

Architectural Construction Co., Story Bldg., L. A. Contract price, \$30,000.

LOS ANGELES, CAL.—Apartment house, 3 story and base, frame, \$12,000. Architect's name not given. Owner, Charles H. Lewis, Contractors, E. H. MacGibbon Co., Los Angeles Investment Bldg., L. A. Contract price, \$13,900.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick and steel, \$66,750. Architects, M. S. Yeager & Co., Trust and Savings Bldg., L. A. Owner, Howard W. Squires, Contractors, Pacific States Investment Co., 125 South Broadway, L. A. Contract price, \$66,750.

BANKS.

SHERIDAN, ORE.—Bank, 2 story and base, brick and tile. Cost not stated. Architects, L. R. Bailey Co., Abington Bldg., Portland. Owners, Sheridan State Bank. The structure will cover an area of 25x90 feet, and will be modern in every respect. The first floor will be arranged for banking quarters, directors' room, clock rooms and lavatories. Interior finish will be of mahogany. Upper floor will be arranged for offices and will be finished in hardwoods. There will be a special fireproof vault, metal window sash and frames and steam heat. Some ornamental plaster and ornamental bronze will be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

ROSEBURG, ORE.—Bank alterations, 2 story and base, brick and steel. Cost not stated. Architects, J. H. Vogt and Frank T. Griffith, Portland. Owners, Douglas National Bank. The first work to be undertaken will be the rearrangement of the present banking quarters and installation of new interior finish. Italian marble and mahogany will be used. New electric work, plumbing and vaults will also be installed. After this work has been completed the directors will authorize the construction of two additional stories, making the building four stories high. Plans are being prepared.

BRIDGES AND DAMS.

SAN MATEO, SAN MATEO CO., CAL.—Culverts, reinforced concrete. Cost not stated. Engineer, County Engineer Neuman, Redwood City. Owners, San Mateo County. Plans for two reinforced concrete culverts with end walls have been completed and approved. Bids are now being called for by the Board of Supervisors and will be opened on September 2nd. Plans can be secured from the Clerk of the Board of Supervisors. Official proposals appear in another column of this issue. Bids were opened on Monday last by the San Mateo Board of Supervisors for two bridges, one a reinforced concrete structure and the other a frame bridge. Bids will appear in the next issue.

SAN FRANCISCO—Concrete abutments, \$8,500. Engineer, City Department of Engineering, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened by the Board of Public Works for constructing concrete abutments under the Southern Pacific Co.'s tracks at Santa Rosa avenue show Otto Recknagel low at \$8,587. A complete list of these bids

will be found under the heading of San Francisco in this issue.

SACRAMENTO, CAL.—Bridge, steel and reinforced concrete, \$66,350. Engineer County Surveyor, Sacramento. Owners, Sacramento County. Due to the fact that the Ross Construction Company was awarded a contract to construct the concrete bridge across the American River under the old law, which allowed County Supervisors to expend only \$50,000 in any one fiscal year for any one purpose, and the fact that the new law removing the restriction went into effect Monday, the Board of Supervisors rescinded the action awarding the contract and will readvertise for bids. The bids will be opened September 12th. On the advice of the District Attorney and with the consent of attorneys for the Ross Construction Company the action was rescinded, because it was feared some person might enjoin the county when the second payment on the contract was made. According to the original plan the Ross Construction Company was to have been paid \$50,000 in one fiscal year after the completion on the bridge and the remaining \$33,357 in the following fiscal year. This would have avoided the law, but would have left a loop-hole for an injunction restraining the county from paying the second installment.

NAVAJO INDIAN RESERVATION, NEW MEXICO.—Bridge, steel and concrete. Cost not stated. Engineers, U. S. Indian Department, Washington, D. C. Owners, United States Government. Plans have been completed and bid will be opened on September 15th for the construction of a steel and concrete bridge over the San Juan River. Plans can be secured from the Commissioner of Indian Affairs in Washington, D. C.

CHURCHES.

SAN FRANCISCO.—Chapel, 1 story, frame. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, S. F. Owner, City and County of San Francisco. Plans for a small frame chapel which is to be erected at the Relief Home Tract, have been completed. The building will contain a main assembly hall seating 150 to 200 people. Interior finish will be of pine and redwood. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures will be opened by the Board of Public Works on August 20th.

PORTLAND, ORE.—Church, 2½ story and base, brick and reinforced concrete. Cost not stated. Architects, Tourtellette & Hummel, Bethel African Methodist Church. The new church will be erected at the corner of 10th and Davis streets, and will cover an area of 25x100 feet. The main floor will contain the pastor's residence, study and Sunday school rooms. Second floor will be arranged for the main auditorium and lecture halls. Interior finish will be of pine throughout. There will be a central heating system. Ornamental plaster will be used in the auditorium. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

Contracts Awarded.

PORTLAND, ORE.—Mausoleum, stone and reinforced concrete, \$35,000. Architects, Ellis F. Lawrence and William C. Holford, Chamber of Commerce Bldg., Portland. Owners, Portland Mausoleum Co. Contractors, Burgoyne Stone Co. Westminster Church, East Side, Portland. Contract price, \$35,000.

GLENORA, LOS ANGELES CO., CAL.—Church, 2 story and base, reinforced concrete, \$25,000. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, Methodist Episcopal Church of Glendora. Contractor, H. G. Baker, Glendora. Contract has been taken on a percentage basis.

FACTORIES & WAREHOUSES.

SAN FRANCISCO.—Brewery plant, brick and steel construction, \$1,000,000. Architect, V. Wyss Thalman, David Hewes Bldg., S. F. Owner's name withheld. Preliminary plans have been prepared for one of the largest brewery plants in the west. The name of the owners and the exact location of the property have not been made public, although it is understood that one of the largest of the Eastern breweries is behind the project. Preliminary plans show a group of buildings of brick and steel construction which will cover over a city block. A location has been partly settled upon in the district south of Market street and where spur track facilities are afforded by both the Southern Pacific and Western Pacific roads. Further mention will be made of this work as plans progress.

PORTLAND, ORE.—Factory, 2 story and base, brick and steel. Cost not stated. Architects, L. R. Bailey Co., Abington Bldg., Portland. Owners, Puritan Manufacturing Co. The building will be erected at the corner of East 8th street and Oak, and will cover an area of 50x100 feet. A portion of the first floor will be used for offices and will be finished in pine. Balance of this floor will be occupied by the shipping department and storage space. Upper floor will contain the manufacturing space and machinery. There will be metal window sash and frames. Exterior of the building will be faced with stock brick. Plans are complete and segregated figures are being taken on the various parts of the work.

Contracts Awarded.

SEATTLE, WASH.—Grain elevator, 8 story, reinforced concrete and steel, \$25,000. Architect's name not given. Owners, Charles H. Lilly Co. Contractors, Brayton Engineering Co., Lumbermen's Bldg., Portland, Ore. Contract price, \$25,000.

SALEM, ORE.—Laundry, 2 story and base, brick. Cost not stated. Architect's name not given. Owners, Cascade Laundry Co. Contractors, Hurley-Mason Co., Board of Trade Bldg., Portland. Contract price not given.

SEATTLE, WASH.—Warehouse, 2 story and base, brick. Cost not stated. Architects, Saunders & Lawton, Alaska Bldg., Seattle. Owners, Schwabacher Land Co. Contractors, Pearson Construction Co., New York Bldg., Seattle. Contract price not stated.

VAN NUYS, LOS ANGELES CO., CAL.—Factory, 1 story and base, brick, \$32,500. Architect's name not given. Owners, Johnston Plano and Organ

Manufacturing Co. Contractors, F. O. Engstrom Co., 5th and Seaton Sts., L. A., general construction, \$32,500.

FIRE HOUSES.

FRESNO, FRESNO CO., CAL.—Detention home, 2 story and base, brick and steel, \$35,000. Architects, Swartz, Hotchkin & Swartz, Rowell Bldg., Fresno. Owners, Fresno County. This work has been mentioned here before when the architects were first commissioned to prepare plans. The building will contain class rooms, dormitories for males and females, dining rooms and manual and domestic science departments. Interior finish will be of pine with some maple floors. There will be a central heating system. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Bids will be opened by the Board of Supervisors on September 8th. Plans can be secured from the architects or from D. M. Barnwell, County Clerk.

FLATS.

SAN FRANCISCO.—Flats, 3 story and base, frame, \$7,000. Architect, none. Owners, C. J. and W. J. Keenan, 300 Webster St., S. F. The building will be erected at the southwest corner of Grove and Central avenue and will cover a considerable area. Plans provide for six large, and modern flats with all conveniences. Interior finish will be of pine with some elm panels and hardwood floors. Each flat will have a large open fire place with brick or tile mantel. Bath rooms will be finished in tile and tile wainscot will also be used in the kitchens. Entrances will be finished in tile and terrazzo. Exterior of the building will be covered with shiplap and rustic. Plans are in the hands of the owners and the work will be done by Day Labor.

SAN FRANCISCO.—Flats, 2 story and base, frame, \$4,000. Architects, Rhodes & Marish, 237 1/2 16th St., S. F. Owner, Patrick Keene. The building will be erected at the southeast corner of Rivoli and Schrader streets, covering an area of 30x60 feet. There will be two modern flats of five and six rooms with bath. Interior finish will be of pine throughout with some hardwood floors. Tile will be used in the bath rooms and kitchens. There will be an open fire place with brick or tile mantel in each living room. Exterior of the building will be covered with shingles and brick veneer base. Plans are complete and figures are being taken.

SAN FRANCISCO.—Flats, 3 story and base, frame, \$6,000. Architect, none. Owner, James F. Long, 209 Acadia St., S. F. The building will be erected on the south side of 25th street west of Church, covering an area of 24x58 feet. Plans have been arranged for three flats of five and six rooms with bath. Interior finish will be of pine throughout except in the living and dining rooms where elm panels will be used. There will be open fire places and stock mantels. Tile will be used in the bath rooms and kitchens. Entrances will be finished in tile and terrazzo. Exterior of the building will be covered with rustic, shiplap and brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

GARAGES.

SAN FRANCISCO—Garage, 1 story and base, brick and steel, \$20,000. Architect C. A. Meusdorffer, Humboldt Bank Bldg., S. F. Owners, D. Samuels Realty Co. This building, which is to be erected on the south side of Post street west of Jones, has been mentioned here before. The structure will cover an area of 77'x137½ feet. Front portion of the building will be used as an office, and balance of the structure for storage space and repair shop. There will be steel roof trusses, cement floor and metal window sash and frames. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken. Engineer L. M. Hausman, Nevada Bank Bldg., will be in charge of the work.

STOCKTON, SAN JOAQUIN CO., CAL.—Garage, 1 story, brick. Cost not stated. Architect, Ralph P. Morrell, Old Fellows Bldg., Stockton. Owner, F. W. Rothenbush. The garage will be erected on a lot adjoining the Imperial Hotel and will cover an area of 50x75 feet. There will be a cement floor, pine interior finish, steel oil tanks and a vacuum cleaning system. Metal window sash and frames are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

GOVERNMENT WORK AND SUPPLIES.

San Francisco, Cal., Subtreasury.

Grant Pee, 2440 16th street, San Francisco, Cal., will install without change in contract price vacuum cleaning system made by the Atwood Vacuum Cleaner Co. in lieu of the F. R. S. Prentiss system. Two separator tanks, each having a capacity of 9 cubic feet, to be provided. Bed plate of the outfit to be provided with raised lip to prevent the drip from flowing on to the floor.

The following bids were received by the Lighthouse inspector, eighteenth district, San Francisco, Cal., for echo board at Junction Point, Solano County, Cal.:

Merry-Elwell Co., \$925.
Heady-Tibbatts Construction Co., \$1,670.
M. L. Islam, Rio Vista, Cal., \$837.50; accepted.

Cylinder and Valve Gear.

A street of bids for hydraulic cylinder and valve gear, Salt River project, opened at Los Angeles, Cal.:

Moine Machine Works, Los Angeles, Cal., \$109; time 15 days.
Llewellyn Iron Works, Los Angeles, Cal., \$175.50; time 20 days.

Bellingham, Wash., Screens.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for furnishing door and window screens for the U. S. post office and court house, Bellingham, Wash.:

The E. T. Burrows Co., Portland, Me., \$1,225, conditional.
Wilder Mfg. Co., Milwaukee, Wis., \$1,340.
The Robbins Mfg. Co., Chicago, Ill., \$1,375.

A. E. McKenzie, Bellingham, Wash., \$1,975.

Montague & McHugh, Bellingham, Wash., \$3,241.

Western Woodworking Co., Bellingham, Wash., \$3,285.

Naval Station, San Francisco, Water Pipe.

The following bids were received by the chief, bureau of yards and docks, Navy Department, Washington, D. C., for water pipe from Yerba Buena Island to Oakland, Cal., at the U. S. Naval Training Station, San Francisco:

Item 1, work complete, using cast iron pipe; 2, do, using galvanized steel pipe.
George J. Henry, Jr., Rialto Building, San Francisco, Cal., item 2, \$9,400.
Marshall C. Harris, 23 California street, San Francisco, Cal., item 2, \$9,927.50.

Contra Costa Construction Co., 314 Sheldon Building, San Francisco, Cal., item 1, \$9,875; 2, \$8,350.

Lower Brule Indian School, Heating.

The contract for the installation of a central heating plant in the Lower Brule Indian School has been awarded to J. L. Stevens, Chamberlain, S. D., at \$6,370.

Scoop-Wheel Material.

The following bids were opened at the office of the U. S. Reclamation Service, Los Angeles, Cal., for furnishing material for one scoop wheel for the Minidoka project, Idaho:

Advance Machine Co., Los Angeles, Cal., \$790; 77 days.
Fulton Engine Works, Los Angeles, Cal., \$1,068; 75 days.
Llewellyn Iron Works, Los Angeles, Cal., \$1,245; 45 days.
Baker Iron Works, Los Angeles, Cal., \$1,533; 35 days.

All bidders propose to make delivery f. o. b. Los Angeles.

Air-Brake Switches.

The following bids were received at the office of the Reclamation Service, Los Angeles, Cal., under advertisement No. 217, for furnishing air-brake switches for the Salt River project, Ariz.:

Railway & Industrial Engineering Co., Pittsburgh, Pa., \$180; 10 days, at Pittsburgh.

General Electric Co., Los Angeles, Cal., \$210; 90 days, at Schenectady.

Pacific Electric Mfg. Co., Los Angeles, Cal., \$246; 15 days, at San Francisco.

Boilers, Port Townsend, Wash.

The following is a correct abstract of the bids received by the supervising architect for new heating boilers, etc., at the U. S. post office, Port Townsend, Wash.:

Ward-Sheper, Seattle, Wash., \$3,176; October 1, 1913.

Jones & Cronen, Port Townsend, Wash., \$2,150; 60 days.

Bautman Plumbing & Heating Co., Seattle, Wash., \$2,290; November 1, 1913.

Insulators, Reclamation Service.

The following bid was opened by the U. S. Reclamation Service, Los Angeles, Cal., for furnishing insulators for the Minidoka project, Idaho:

Western Electric Co., Los Angeles, Cal., item 1, \$833.25; 2, \$392.60.

The one bid received under the original opening on July 7 was rejected.

Electrical Equipment, Reclamation Service.

The following bids were opened at the office of the U. S. Reclamation Service, Los Angeles, Cal., for furnishing the following electrical equipment:

Item 1, 3 75-K. V. A. transformers; 2, 12 35-K. V. A. transformers; 3, 1 watt-hour meter; 4, 4 automatic oil switches; 5, 1 air-brake switch; 6, 4 lighting arresters; 7, 2 3-phase do.

Allis-Chalmers Co., Los Angeles, Cal., item 1, \$1,800; 2, \$2,760; 3, \$165; 4, \$600; 5, \$544; 6, \$126; 7, \$25.

General Electric Co., Los Angeles, Cal., item 1, \$1,995; 2, \$2,340; 3, \$173; 4, \$648; 5, \$1,170; 6, \$210; 7, \$30.

Westinghouse Electric Mfg. Co., Los Angeles, Cal., item 1, \$2,470; 2, \$2,770; 3, \$89.30; 4, \$612.75; 5, \$335; 6, \$227.40; 7, \$16.40.

Wagner Electric Mfg. Co., St. Louis, Mo., item 1, \$2,025; 2, \$2,280.

Pittsburgh Transformer Co., Pittsburgh, Pa., item 1, \$2,184; 2, \$2,100 and \$1,800.

Railway Industrial Engineering Co., Pittsburgh, Pa., item 1, \$335.

Pacific Electric Mfg. Co., Los Angeles, Cal., item 5, \$153.40.

B. P. Kierulff, Jr., & Co., Los Angeles, Cal., item 1, \$2,280.

Sluice and Penstock Gates.

The following bids were opened at the office of the U. S. Reclamation Service, Elephant Butte, N. Mex., for furnishing sluice and penstock gates at Elephant Butte, as follows:

Hinman Hydraulic Mfg. Co., Denver, Colo., item 1, \$19,874; 2, \$27,600; 3, \$1002; 4, \$109; 5, \$10; total \$47,693.

Coffin Valve Co., Boston, Mass., item 1, \$18,786; 2, \$25,719; 3, \$156; 4, \$150; 5, \$30.25; total, \$44,791.25.

Stacey-Smith Mfg. Co., York, Pa., item 1, \$22,450; 2, \$31,920; 3, \$205; 4, \$139; 5, \$30; total, \$54,744.

Rosedale Foundry & Machine Co., Pittsburgh, Pa., item 1, \$25,600; 2, \$36,400; 3, \$280; 4, \$218; 5, \$28; total \$62,526. Alternative bid, if cast steel cylinders may be substituted for rolled steel cylinders the amounts of items 1 and 2 will be reduced \$532 and \$7196, respectively, making the total, \$61,196.

Vulcan Iron Works, Chicago, Ill., item 1, \$24,886; 2, \$33,100; 3, \$263; 4, \$190; 5, \$64; total, \$58,808.

Fulton Engine Works, Los Angeles, Cal., item 1, \$29,300; 2, \$55,117; 3, \$251; 4, \$191; 5, \$49; total, \$94,908.

Cylinder and Valve Gear.

The following bids were received under advertisement No. 218 by the U. S. Reclamation Service, Los Angeles, Cal., for one hydraulic cylinder for screen operating device:

Maine Engine Works, \$100; Los Angeles delivery, 15 days.

Llewellyn Iron Works, \$178.50; net; Los Angeles delivery, 20 days.

Motor-Driven Pumps for Colon.

The original plan for furnishing the power in the operation of the pumps at the new Colon water works was to utilize the three boilers, two stacks, and three pumps in the old station, but upon examination it was found that their condition would not justify their installation in a new plant. It has now been decided to substitute electrical for steam energy, and to

install three motor-driven, single-stage pumps, using 2,200 volts. The average loads on these pumps will probably be less than 200 horse power a day. It is believed that the operating expense will be considerably less with motor-driven than with steam-driven pumps, while the electrical installation will leave a space approximately 28 by 35 feet available for the installation of oil pumps for the fuel oil pipe line system. Power will be obtained from the hydroelectric station at Gatun, when it is in operation, otherwise from the Miraflores steam plant.

PEARL HARBOR, HAWAII.—Magazine buildings, reinforced concrete construction, \$120,000. Architects, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Plans for a number of reinforced concrete magazine buildings which are to be erected at Pearl Harbor have been completed and approved. Bids will be opened by the Bureau of Yards and Docks in Washington on September 20th. Plans can be secured from either the Bureau or from the Commandant at Pearl Harbor. An official proposal appears in another column of this issue.

—HALLS & SOCIETY BLDGS.—

BAKERSFIELD, KERN CO., CAL.—City hall, 2 story and base, brick and steel, \$15,000. Architect, Thomas B. Wiseman, Producers' Bank Bldg., Bakersfield. Owners, City of Bakersfield. The old County Court House will be remodeled into a City Hall. Plans for this work are now being prepared. The work will include new interior finish, plastering, electric work, plumbing and painting. There will also be a large amount of cabinet work, office fixtures, etc. Exterior of the building will not be changed. Plans are being prepared.

NORTH YAKIMA, WASH.—Armory, 2 story and base, reinforced concrete, \$65,000. Architect's name not given. Owners, State of Washington. Plans for the new armory building which is to be erected at North Yakima have been completed. The plans are now on file in the office of Adj. General Llewellyn, Armory Bldg., Seattle. Bids are being taken and will be opened on September 16th.

HOTELS.

SAN FRANCISCO.—Hotel, 5 story and base, reinforced concrete, \$80,000. Architects, Fabre & Bearwald, Merchants' National Bank Bldg., S. F. Owners, Vassie Bros. The building will be erected at the corner of Seventh and Stevenson streets, covering an area of 75 feet square. There will be five stories besides the hotel entrance on the first floor. Upper floors will be divided into 100 guest rooms and a number of public and private baths. Interior finish will be of pine throughout. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will have cement floors and tile wainscot. There will be metal window sash and frames. Patent store fronts and sidewalk doors and light are specified. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

SAN FRANCISCO.—Hotel, 7 story and base, brick and steel, \$60,000. Architect, A. J. Barnett, 583 California St., S. F. Owners, Zellerbach & Levison. This building was mentioned here sometime ago under another architect's name. The structure will be erected on Turk street east of Mason and will cover an area of 34 feet 4½ inches by 137½ feet. There will be one store on the first floor besides the hotel lobby. Upper floors will contain in the neighborhood of 100 rooms and a number of public and private baths. Interior finish will be largely of pine with some elm panels and ornamental plaster in the lobby. There will be steam heat, elevator service and hot water plant. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. There will be patent store fronts, sidewalk doors and lights and metal window sash and frames. Plans are complete and construction will be carried out by Theo. Hoin, 1449 Hyde street.

SAN FRANCISCO.—Hotel and stores 3 story and base, brick and steel. Cost not stated. Architects, Shea & Lofquist, 550 Montgomery street, S. F. Owners, Mary C. and Joseph B. Kennedy. The building will be erected at the southwest corner of Ellis and Larkin streets, covering an area of 48x87½ feet. There will be stores on the first floor and a number of single rooms and baths on the upper floors. Plans provide for steam heat and elevator service. Interior finish will be of pine throughout. Hot and cold running water will be supplied to all rooms. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. Stores will have large display windows in patent front. Plans are being prepared and contracts will be let shortly.

OAKLAND, CAL.—Hotel, 7 story and base, Class C construction, \$100,000. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owner, M. Friedman, 253 Post St., S. F. Preliminary plans have been prepared for a large store and hotel building which will be erected on the property at the southwest corner of 16th and Clay streets. Only preliminary plans have been prepared and details of the construction are not available. The lot to be improved covers a large area. First floor of the new building will be arranged for stores and upper floors will contain in the neighborhood of 150 rooms. Interior finish will probably be of pine throughout. Bath rooms will have cement floors and tile wainscot. There will be steam heat, elevator service and a hot water plant. Exterior will probably be faced with pressed brick.

LOS ANGELES, CAL.—Hotel, 4 story and base, Class B construction, Cost not stated. Architect, Anton Reiff, Higgins Bldg., L. A. Owners, John G. Orth, Susan B. Campbell and Benj. Weingert. The building will be erected on an inside lot with a street frontage of 67 feet and a depth of 117 feet. Upper floors of the building will contain a total of 202 guest rooms, a large per cent of which will have connecting baths. Interior finish will be of pine and hardwoods with ornamental plaster in the lobby and offices. There will be steam heat, elevator service, vacuum cleaning system and a hot water

supply. Bath rooms will have cement floors and tile wainscot. Metal lath and plaster interior partitions will be used and metal window sash and frames. Exterior will be faced with pressed brick. Plans are being figured.

Contracts Awarded.

SAN FRANCISCO.—Hotel, 5 story and base, reinforced concrete, \$40,000. Architects, MacDonald & Kahn, Holbrook Bldg., S. F. Owner, H. Baker Fisher. Contractors, MacDonald & Kahn, Bialto Bldg., S. F. Contract price, \$40,000.

STOCKTON, SAN JOAQUIN CO., CAL.—Hotel, 2 story and base, brick, \$23,000. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owner, Mr. Rossi. Contractor, Frank Tucker, North Sierra Nevada street, Stockton. Contract price, \$23,000. Note: The building will cover an area of 101 feet square.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and stone, \$25,000. Architects, Richards-Neustadt Construction Co., Wright and Callender Bldg., L. A. Owner, N. C. Cramer. Contractors, Richards-Neustadt Construction Co., Wright and Callender Bldg., L. A. Contract price, \$25,000.

LOS ANGELES, CAL.—Hotel, 3 story and base, Class C construction, \$90,000. Architect's name not given. Owner, Walter H. Fisher, Union Oil Bldg., L. A. Contractor, Alex. Grant, L. A. The contract has been taken on a percentage basis. Building will cover an area of 100x150 feet.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel, \$35,000. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, Sydney Goldpian. Contractors, Milwaukee Building Co., Wright and Callender Bldg., L. A. Contract price, \$35,000.

Exterior of the dwelling will be covered with cement plaster on metal lath.

Plans are complete and figures are being taken.

ALAMEDA, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$5,000. Architect, E. B. Hurt, 521 Cottage St., Oakland. Owner, Leo A. Cockerton. The house will be erected on Rand avenue near Cottage street, and has been designed to contain seven rooms and bath. Interior will be finished in pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Bungalow, 1 story and base, frame, \$2,300. Architect, Frank S. Forester, 1417 Arch St., Berkeley. Owner, W. R. Klink. The bungalow will be erected on Ivywood street, and has been designed to contain six rooms and bath. All interior finish will be of pine or redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be a large open fire place with brick mantel in the living room. Tile wainscot will be used in the bath room and kitchen. Exterior of the bungalow will be covered with shingles. Plans are complete and figures are being taken.

SAN JOSE, SANTA CLARA CO., CAL.—Bungalow, 1 story and base, frame, \$2,300. Architect, S. G. Pelton, 445 South 3rd St., San Jose. Owner, Mable Pelton. The dwelling has been designed to contain five rooms and bath. Interior will be finished in pine throughout with some hardwood floors in the living room and dining room. A large open fire place with brick mantel will be a feature of the living room. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster. The same architect is also preparing plans for the same owner for a second dwelling, similar in design to the one above described, and will shortly take figures on both buildings.

REDWOOD CITY, SAN MATEO CO., CAL.—Bungalow, 1 story and base, frame, \$3,000. Architects, National Architectural and Engineering Co., First National Bank Bldg., S. F. Owner, G. L. Breeze, Redwood City. The house has been designed to contain six rooms bath and sleeping porch. Interior finish and floors will be of pine. There will be a large open fire place in the living room with brick mantel. An automatic water heater will be installed. Tile will be used in the bath room. Exterior of the dwelling will be covered with rustic and shingles. Plans are complete and the work will be done by Day Labor.

STOCKTON, SAN JOAQUIN CO., CAL.—Residences, 1 and 2 story and base, frame. Cost not stated. Architect, none. The following Day Labor jobs are reported as about to be started in Stockton: William T. Weber, 1022 South Aurora street, 1 story frame cottage, \$1,500; D. Burgess, 1642 South San Joaquin street, 1 story frame cottage, \$1,500; L. Lagoria, California and North streets, 1 story frame cottage, \$1,500, and Volunteers of America, Stockton, 1 story frame dwelling, \$2,000.

STOCKTON, SAN JOAQUIN CO., CAL.—Bungalow, 1 story and base, frame, \$1,200. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owner, Mr. Alapas. The dwelling has been designed for a five-room house with bath. Interior finish will be of pine throughout. Some hardwood floors will be used. There will be an open fire place in the living room with tile or brick mantel. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic, shingles and shiplap. Plans are complete and figures are being taken.

STOCKTON, SAN JOAQUIN CO., CAL.—Residence, 2 story and base, frame, \$1,000. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owner, Mrs. McInnes. The dwelling has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for steam heat and open fire places. Mantels will be of tile and brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic. Plans are now being prepared.

SACRAMENTO, CAL.—Residences, 1 and 2 story, frame. Cost not stated. Architect, none. The following Day Labor jobs are reported as about to be started in Sacramento: D. J. Jenkins, Elmhurst, Sacramento, 1 story frame cottage, \$2,000; E. A. Pierce, 3525 Park avenue, 1 story frame cottage, \$2,800; P. F. Reed, 2613 28th street, 1 story frame dwelling, \$2,000; E. Ball, Ohio avenue, 1 story frame cottage, \$1,500; M. B. Coreschia, 521 T street, 1 story frame dwelling, \$1,800; Manuel Azevedo, 2020 4th street, alterations to dwelling, \$1,000, and J. H. Dischler, 4018 G street, 1 story frame dwelling, \$1,500.

SACRAMENTO, CAL.—Residence, 2 story and base, frame and terra cotta tile, \$29,000. Architect, A. D. Nicholson, Whittell Bldg., S. F. Owner, J. B. Edwards. The dwelling will contain in the neighborhood of twelve rooms, several baths and sleeping porches. Interior finish will be of pine and hardwoods. There will be a central heating system, probably hot water, and open fire places. Mantels will be of tile and brick. Hardwood floors will be used in the principal rooms. Plans include tile bath room floors and wainscot in the baths and kitchen, an automatic water heater and vacuum cleaning system. Exterior of the dwelling will be faced with terra cotta. Plans are complete and figures are being taken for the work.

SCHOOLS.

BRAWLEY, IMPERIAL CO., CAL.—School, 2 story and base, brick, \$15,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Brawley High School District. This is the first of a group of buildings which will eventually comprise the Brawley High School. The building has been designed as an administration building, and will cover an area of 104x115 feet, containing ten class room, auditorium room, domestic science department, physical and chemical laboratories, of-

fice and rest rooms. Interior finish will be of pine with some maple floors. Plans provide for steam heat and a vacuum cleaning system. Exterior of the building will be faced with sand lime brick. Plans are being prepared.

CLAREMONT, LOS ANGELES CO., CAL.—Music hall, 2 story and base, reinforced concrete, \$90,000. Architect, Myron Hunt, Hiernian Bldg., L. A. Owners, Pomona College. The building has been designed in the shape of a letter Y and will have a total frontage of 260 feet and an average width of 45 feet. The main auditorium will seat 1,000 people. Besides this room plans provide for 8 studios and 16 practice rooms. Interior will be finished in pine and hardwood. There will be steam heat, hollow tile interior partitions and metal window sash and frames. A clay tile roof will be used. Exterior of the building will be faced with cement plaster. Plans will be complete and figures called for within a month.

Contracts Awarded.

PORTLAND, ORE.—School, 2 story and base, brick and steel. Cost not stated. Architect, F. A. Baramore, Tilford Bldg., Portland. Owners, City of Portland. Contractors, The Litherland-Abrey Co., Beck Bldg., Portland. Contract price not stated.

COTTAGE GROVE, ORE.—School, 2 story and base, brick, \$26,900. Architects, Tourtellotte & Hummel, Rothchild Bldg., Portland. Owners, Cottage Grove School District. Contractors, W. O. Heckart, Eugene. Contract price, \$26,900.

LOS ANGELES, CAL.—School, 2 story and base, brick, \$30,000. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, Woman's Board of Home Missions of the Presbyterian Church. Contractor, E. Gardner, 469 East 4th street, L. A. Contract price, \$30,000.

BAKERSFIELD, KERN CO., CAL.—School, 1 story and base, frame, \$13,000. Architect, J. M. Saffell, Bakersfield. Owners, Beardsley School District. Contractors, Dupes & Hansen, Bakersfield. Contract price, \$13,000.

PULLMAN, WASH.—School group, mechanical arts, agriculture and two minor buildings. Class A construction. Cost not stated. Architect's name not given. Owners, Washington State College. Contractor, J. B. Sweatt, Spokane, general construction, \$198,580.

SEWERS, STREET WORK AND WATER SYSTEMS.

SAN FRANCISCO—Grading reservoir site. Cost not stated. Engineer, Engineering Dept. Spring Valley Water Co., 375 Sutter St., S. F. Owners, Spring Valley Water Co. Bids are now being called for and will be opened on September 1st for grading the property known as the Market Street Reservoir site. Plans can be secured from the engineering department of the water company. An official proposal appears in another column of this issue.

GRADING RESERVOIR SITE—Cost not stated. San Francisco, Engineer, Engineering Dept. Spring Valley Water Co., 375 Sutter St., S. F. Owners, Spring Valley Water Co. Bids are now being called for and will be opened on September 1st for grading the property known as the Market Street Reservoir site. Plans can be

secured from the water company. An official proposal appears in another column of this issue.

STORE.

SAN FRANCISCO—Stores and offices, 30 story and base. Class A construction. Cost not stated. Architects, Reid Bros., California-Pacific Bldg., S. P. Owner, John D. Spreckels. The architects have detail plans completed for the new Call Building, which is to be erected at the southeast corner of Fourth and Market streets. Probably the most interesting announcement in this connection is the statement that these plans call for a 30 story structure instead of 25 stories as was first announced. Moulds for the terra cotta work are now being made and steel is being fabricated. One lease on the premises runs until December 1st of this year and actual construction work will start next morning.

LOS ANGELES, CAL.—Lofts, 5 story and base. Class B construction. Cost not stated. Architect, A. F. Rosenheim, H. W. Hellman Bldg., L. A. Owners, Besinger Estate. The building will be erected on Los Angeles street near 9th, and has been designed for a high class commercial building. There will be four elevators, metal window sash and frames, fireproof doors and a steam heating system. Interior finish and floors will be of pine. Patent store fronts will be installed. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

PORTLAND, ORE.—Stores, 1 story and base, brick. Cost not stated. Architect, Earl A. Roberts, Selling Bldg., Portland. Owners, William Mall et al. The building will be erected on a corner site, covering an area of 50x100 feet. There will be six stores. Interior finish will be of pine throughout. Patent store fronts and plate glass windows are specified. Exterior of the building will be faced with white glazed terra cotta. Plans are complete and figures are being taken.

THEATRES.

Contracts Awarded.

SEATTLE, WASH.—Theatre remodeling, brick and steel construction, \$50,000. Architect, Francis W. Grant, Globe Bldg., Seattle. Owners, Star Theatre. Contractor, James Murdock, 726 14th Ave., Seattle. Contract price, \$50,000. Note: The contractor is now taking sub-figures on all parts of this work.

SEALED PROPOSALS.

PROPOSALS FOR CANAL SUPPLIES.—CANAL, CIRCULAR 788—Steel Turntable, Vitrified Conduit, Vitrified Sewer Pipe, Galvanized Iron or Steel, steel Wire, Horse-hoes, Nails, Nuts, Wire Rope, Clips, Chisels, Hammers, Yellow Metal, Hops, Hinges, Files, Hack-saw Blades, Bronze Wire Cloth, Tool Handles, Paint Brushes, Whitewash Brushes, Coal Baskets, Water Coolers, Metallic Tapes, Manila Rope, Marline, Rawhide Belt Lacing, Hoses, Packing, Cotton Canvas, Railway Flags and Bunting, Lumber, Crayons, Calcium Carbide, Chloride of Lime, Rock Salt, Soap, San. Polish, Linseed Oil, Gasoline, Turpentine, Varnish, Japan Primer, Lampblack, Shellac, Paints, Crescoted Lumber and Crescoted Pipes.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washing-

tion, D. C., until 10:30 a. m., August 29, 1913, at which time they will be opened in public, for furnishing the above mentioned articles. Plans and general information relating to this circular (No. 789) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR PIPE.

PIPE—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Los Angeles, Cal., until 2 o'clock p. m., September 3, 1913, for furnishing semi-steel pipe for Arrowrock Dam, Boise project, Idaho. For particulars apply to the U. S. Reclamation Service, 605 Federal Building, Los Angeles, Cal., or Washington, D. C. J. M. MCKINLEY, acting director.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 755—Proposals for furnishing and erecting a movable span or trestle over the French Canal at Cristobal.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m., September 5, at which time they will be opened in public, for furnishing and erecting the above mentioned movable span, the date of opening originally set for this circular at August 6 being postponed, as stated above, to September 5. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR PIER TIMBER.

PIER TIMBER—U. S. Engineer Office, Chicago, Ill.—Sealed proposals for furnishing fir timber for use in Chicago, Ill., district, f. o. b. cars at mills, will be received at this office until 10 a. m., September 5, 1913, and then publicly opened. Information on application to this office or to U. S. engineer office, Seattle, Wash. GEO. A. ZINN, Lt. Col. Engrs.

PROPOSALS FOR PIER WORK.

PIER WORK—Sealed proposals in closed "Proposals for Extension to Pier" will be received at the bureau of yard and dock, Navy Department, Washington, D. C., until 11 o'clock a. m., September 13, 1913, and then and there publicly opened, for construction of elevated pile and timber trestle to Pier No. 5, at the navy yard, Puget Sound, Wash. Amount available, \$10,000. Plans and specifications can be obtained on application to the bureau or the commandant of the navy yard named. H. R. STANFORD, chief of bureau.

PROPOSALS FOR DREDGING.

DREDGING—U. S. Engineer Office, 723 Central Building, Los Angeles, Cal.—Sealed proposals for dredging at San Diego Harbor, Cal., will be received here until 1 o. m., August 29, 1913, and then publicly opened. Information on application to H. MCKINSTRY, engineer.

PROPOSALS FOR MAGAZINE BUILDING.

BUILDING—Sealed proposals in closed "Proposals for Magazine Buildings" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m., September 20, 1913, and then and there publicly opened. Information on application to the United States naval station, Pearl Harbor, Hawaii, Est. mated cost, \$125,000. Plans and the specifications can be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

PROPOSALS FOR STEEL RODS.

STEEL RODS—U. S. Engineer Office, Portland, Ore.—Sealed proposals for furnishing 1,500,000 pounds of steel rods for concrete reinforcement will be received here until 11 a. m., August 30, 1913, and then publicly opened. Information on application. JAY J. MORROW, major, engineers.

PROPOSALS FOR REINFORCED CONCRETE CULVERTS.

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors of the County of San Mateo, State of California, up to the hour of 10 o'clock a. m. on Tuesday, September 2, 1913, for constructing a reinforced concrete culvert and end walls on county road leading from San Bruno to Crystal Springs, being third bridge west of Mission road, in the First Road District, as per plan and specifications prepared by the county surveyor and adopted by the Board of Supervisors on Monday, August 1, 1913, which said plans and specifications are now on file in the office of the clerk of said Board where same may be inspected.

All bids must be addressed to the Clerk of said Board of Supervisors at Redwood City, and each bid must be accompanied by a certified check on some reliable bank in a sum equal to at least 10 per cent of bid, made payable to the undersigned Clerk of said Board of Supervisors, same to be forfeited to the County of San Mateo as liquidated damages in case the party to whom the contract shall be awarded shall fail, neglect or refuse to execute and file, within ten days after the award of said contract, a bond to be approved by the Chairman of the Board of Supervisors of said county, in an amount not exceeding the contract price, or to enter into a written contract with said county in accordance with said plans and specifications and the bid thereon. All bids from contractors must specify the time for the completion of said work, also the cost of concrete in place, per cubic yard, to be used in estimating the value of extra work, if required.

The right is reserved to reject any and all bids. JOS. H. NASH.

PROPOSALS FOR REINFORCED CONCRETE CULVERT.

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors of the County of San Mateo, State of California, up to the hour of 10 o'clock a. m. on Tuesday, September 2, 1913, for constructing a reinforced concrete culvert and end walls on county road leading from San Bruno to Crystal Springs, being second bridge west of Mission road, in the First Road District, as per plan and specifications prepared by the county surveyor and adopted by the Board of Supervisors on Monday, August 1, 1913, which said plans and specifications are now on file in the office of the clerk of said Board where same may be inspected.

All bids must be addressed to the Clerk of said Board of Supervisors at Redwood City, and each bid must be accompanied by a certified check on some reliable bank in a sum equal to at least 10 per cent of bid, made payable to the undersigned Clerk of said Board of Supervisors, same to be forfeited to the County of San Mateo as liquidated damages in case the party to whom the contract shall be awarded shall fail, neglect or refuse to execute and file, within ten days after the award of said contract, a bond to be approved by the Chairman of the Board of Supervisors of said county in an amount not exceeding the contract price, or to enter into a written contract with said county in accordance with said plans and specifications and the bid thereon. All bids from contractors must specify the time for the completion of said work, also the cost of concrete in place, per cubic yard, to be used in estimating the value of extra work, if required.

The right is reserved to reject any and all bids. JOS. H. NASH.

PROPOSALS FOR REMOVAL AND RECONSTRUCTION OF SAFETY.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at the office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 27th day of August, 1913, for doing the following work, to wit:

The removal and reconstruction of a safety station adjacent to the northerly street car tracks at the junction of

Market, Ellis and Stockton streets.

Said work must be done in accordance with the plans and specifications therefor on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within seven (7) calendar days and completed within twenty-five (25) calendar days from the date of the contract to be made and entered into therefor.

The amount of bond for faithful performance has been fixed at \$500.00.

All proposals offered shall be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors of said City and County, for an amount not less than ten per centum of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Board of Public Works, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works, F. J. CHURCHILL, Secretary.

NOTICE TO GRADING CONTRACTORS.

PROPOSAL SOLICITED FOR GRADING OF MARKET STREET RESERVOIR PROPERTY OF SPRING VALLEY WATER COMPANY.

San Francisco, Cal., August 12, 1913. PROPOSALS will be received at the office of the Secretary of the Spring Valley Water Company, No. 375 Sutter Street, San Francisco, on or before September 1st, 1913, for grading to adjacent blocks of the Market Street Reservoir Property of said Company, comprehending a portion of Western Addition Block No. 215, the whole of Western Addition Block No. 220, a portion of Western Addition Block No. 233 and a portion of Mission Block No. 80 in the City and County of San Francisco, State of California.

It is estimated that approximately 322,000 cubic yards must be graded and moved from the blocks aforesaid and from adjoining streets.

Alternate proposals for completing work of grading and removal of earth within twelve months, within eighteen months and within twenty-four months from date of signing contract will be considered. Process of payment on contract will be made in accordance with standard practice.

The Spring Valley Water Company reserves the right to reject any or all proposals submitted in accordance herewith.

Proposal forms may be obtained at the office of the Secretary of the Spring Valley Water Company, and applications or will be mailed upon request and full information will be given intending bidders by the Engineering Department of said Company.

SPRING VALLEY WATER COMPANY, John E. Behan, Secretary. (*)

The San Francisco Call has been purchased by M. H. De Young and will be merged with the Chronicle. After an existence of more than half a century the oldest newspaper in the city goes out of existence. And this for the reason that there is not room for three personal organs in a city the size of San Francisco.

The people will gain nothing by the consolidation. The news no doubt will be given with the same bias toward special privilege that has characterized the Chronicle in the past. And it is doubtful if the Examiner will lose anything in circulation by the combination, but rather gain by that fact.

It will now be Hearst and De Young who will be the purveyors of our morning's news and will mold public opinion by their bat eyed editorials. Surely the newspaper business needs some government regulation or something else when the whole people have to depend upon newspapers that represent the public only when they have a private ax to grind.

Firms dealing news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

APARTMENT HOUSE—4 story and base, reinforced concrete, \$30,000. San Francisco. Architects, Ross & Burgren, 310 California St., S. F. Owner, S. Zuseman. The building will be erected on the north side of Post street west of Larkin, covering an area of 24 feet 2 inches by 120 feet. Suites will consist of two and three rooms with private baths and wall beds. Interior finish will be of pine with some elm panels and hardwood floors. Plans provide for steam heat, automatic elevator, a vacuum cleaning system and hot water plant. Bath rooms will have composition floors and tile wainscot. Entrance of the building will be finished in marble and tile. Exterior will be faced with cement plaster. Plans are being prepared.

APARTMENT HOUSE—3 story and base, frame, \$24,000. San Francisco. Architect, none. Owners, McKillop Bros., 540 Cole street, S. F. The building will be erected on the west side of Taylor street north of Clay and will cover a ground area of 30x150 feet. There will be in the neighborhood of 20 suites of two and three rooms. Interior finish will be of pine, elm panels and some hardwood floors. All suites will be equipped with wall beds and will have private bath rooms. Plans provide for steam heat, vacuum cleaning system and hot and cold running water. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be covered with rustic and brick veneer. Plans are in the hands of the owners and the work will be done by Day Labor. All materials are now being purchased.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. San Francisco. Architect, Arthur G. Scholz, Phelan Bldg., S. F. Owner, F. Mertens. The building will contain in the neighborhood of 12 suites arranged in two three rooms, and is to be erected on the south side of Fulton street east of Gough. Interior finish will be of pine with some elm panels. All suites will have private bath rooms and will be equipped with wall beds. Bath rooms will have composition floors and tile wainscot. Plans provide for a central heating system. Entrance vestibule will be finished in marble. Exterior of the building will be covered with rustic, cement plaster on metal lath and brick veneer. Plans are complete and have been out for figures. Contracts will be awarded this week.

APARTMENT HOUSE—3 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owners, Talbot Estate. This building will be erected on the north side of Mission street west of Seventh, covering an area of 31 feet 4 inches by 165 feet. Plans show a large store on the first floor and a number of two and three room suites on the upper floors. Interior finish will be of pine throughout. There will be steam heat. All suites will have private baths and wall

beds. There will be patent store fronts. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

APARTMENT HOUSE—3 story and base, frame, \$12,000. San Francisco. Architects, Fabre & Bearwald, Merchants' National Bank Bldg., S. F. Owner's name withheld. The building will be erected on upper Sacramento street, and has been designed to contain nine suites of three rooms and bath. Interior finish will be of pine with elm panels and some hardwood floors. There will be steam heat and an automatic elevator. Bath rooms will have cement floors and tile wainscot. Hot and cold running water will be supplied to all rooms. Suites will be equipped with wall beds. Marble and tile will be used in the entrance vestibule. Exterior of the building will be covered with brick veneer and cement plaster on metal lath. Plans are now being prepared.

APARTMENT HOUSE—3 story and base, frame, \$2,000. San Francisco. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner, Mrs. A. Dorland. The building is to be erected on the west side of Valencia street north of 17th street, and will cover an area of 60x78 feet. Plans show a total of 14 suites arranged in two and three rooms with private baths and wall beds. Interior finish will be of pine throughout. Some hardwood floors will be used. There will be steam heat and elevator service. Bath rooms will have composition floors and tile wainscot. Marble and tile will be used in the entrance. Exterior of the building will be covered with rustic, ship-lap and brick veneer. Plans are now being prepared.

APARTMENT HOUSE—3 story and base, frame, \$35,000. San Francisco. Architect, none. Owner, D. Curtin, 4040 24th street, S. F. The building has been designed to contain twelve large suites, and will be erected at the northeast corner of Castro and 24th streets, covering an area of 30x80 feet. Interior finish will be largely of pine with some redwood and elm used. Plans provide for steam heat, automatic elevator, a vacuum cleaning plant and hot and cold water system. All suites will have wall beds and private bath rooms. Bath rooms will be finished with composition floors and tile wainscot. Exterior of the building will be covered with ship-lap and brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$15,000. San Francisco. Architect, none. Owner, A. W. Ward, 495 Columbus avenue, S. F. The building will cover an area of 40x60 feet 8 inches and will be erected at the southeast corner of Broadway and Leavenworth streets. The building has been designed to contain nine suites of two and three rooms, all with private bath rooms and wall beds. Interior finish will be of pine with some elm panels and hardwood floors. There will be

steam heat and a hot water system. Bath rooms will have composition floors and tile wainscot. Tile and marble will be used in the entrance. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

APARTMENT HOUSE—3 story and base, frame, \$10,000. San Francisco. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owners, D. Edwards & Sons. This building, designed to contain eight suites and covering an area of 38x73 feet, will be erected on the west side of Gough street south of Oak. Suites will be arranged in two and three room apartments with bath and wall beds. Interior finish will be of pine throughout with some hardwood floors. There will be steam heat and hot and cold running water will be supplied to all rooms. Entrance will be finished in marble and tile. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are being prepared.

APARTMENT HOUSE—3 story and base, frame, \$16,000. San Francisco. Architects, McDougall Bros., Russ Bldg., S. F. Owner, W. F. Roberts. The building will be erected on the south side of California street east of Broderick, covering an area of 27½x112 feet. There will be one store on the first floor besides the entrance and housekeeper's suite. Upper floors will be arranged for ten apartments of two and three rooms. All suites will have wall beds and private bath rooms. Interior finish will be largely of pine with some elm panels and hardwood floors. There will be steam heat and a hot water system. Entrance will be finished in marble and tile. Exterior of the building will be faced with rustic, cement plaster on metal lath and a glazed terra cotta tile base. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, frame, \$10,000. San Francisco. Architect, none. Owner, C. S. Mann, 378 Golden Gate avenue, S. F. The building will be erected at the southeast corner of Golden Gate Court and Sacramento street, and will cover an area of 28x88 feet. Interior has been arranged for six suites of three rooms and bath. Interior finish will be of pine throughout. All suites will have private bath rooms and wall beds. Plans provide for a central heating system and hot water supply. Bath rooms will have composition floors and tile wainscot. Entrance vestibule will be wainscoted with marble. Exterior of the building will be covered with shingles and klinker brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

CHAPEL—1 story, frame. Cost not stated. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans for a small frame chapel, which is to be erected on the Relief Home Tract, have been completed. The building will contain a main assembly hall, seating 150 to 200 people. Interior finish will be of pine and redwood. Exterior of the building will be covered with cement

plaster on metal lath. Plans are complete and figures will be opened by the Board of Public Works on August 20th.

BREWERY PLANT—Brick and steel construction, \$1,000,000. San Francisco, Architect, T. Wyss Thalman, David Hewes Bldg., S. F. Owner's name withheld. Preliminary plans have been prepared for one of the largest brewery plants in the west. The name of the owners and the exact location of the property have not been made public, although it is understood that one of the largest of the Eastern breweries is behind the project. Preliminary plans show a group of buildings of brick and steel construction which will cover over a city block. A location has been partly settled upon in the district south of Market street and where spur track facilities are afforded by both the Southern Pacific and Western Pacific roads. Further mention will be made of this work as plans progress.

FLATS—3 story and base, frame, \$7,000. San Francisco, Architect, none. Owners, C. J. and W. J. Keenan, 300 Webster St., S. F. The building will be erected at the southwest corner of Grove and Central avenue, and will cover a considerable area. Plans provide for six large and modern flats with all conveniences. Interior finish will be of pine with some elm panels and hardwood floors. Each flat will have a large open fire place with brick or tile mantel. Bath rooms will be finished in tile and tile wainscot will also be used in the kitchens. Entrances will be finished in tile and terrazzo. Exterior of the building will be covered with shipap and rustic. Plans are in the hands of the owners and the work will be done by Day Labor.

FLATS—2 story and base, frame, \$1,000. San Francisco, Architects, Rhodes & Marsh, 3372 16th St., S. F. Owner, Patrick Keene. The building will be erected at the southeast corner of Rivalto and Schrader streets, covering an area of 30x60 feet. There will be two modern flats of five and six rooms with bath. Interior finish will be of pine throughout with some hardwood floors. Tile will be used in the bath rooms and kitchens. There will be an open fire place with brick or tile mantel in each of the living rooms. Exterior of the building will be covered with shingles and tick veneer base. Plans are complete and figures are being taken.

FLATS—3 story and base, frame, \$6,000. San Francisco, Architect, none. Owner, James E. Long, 299 Acadia St., S. F. The building will be erected on the south side of 25th street west of Central, covering an area of 24x58 feet. Plans have been arranged for three flats of five and six rooms with baths. Interior finish will be of pine throughout except in the living and dining rooms where elm panels will be used. There will be open fire places and tile mantels. Tile will be used in the bath rooms and kitchens. Entrances will be finished in tile and terrazzo. Exterior of the building will be covered with rustic, shipap and tick veneer base. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

GARAGE—1 story and base, brick and steel, \$20,000. San Francisco, Architect, C. A. Messendorfer, Humboldt

Bank Bldg., S. F. Owners, D. Samuels Realty Co. This building, which is to be erected on the south side of Post street west of Jones, has been mentioned here before. The structure will cover an area of 77½x137½ feet. Front portion of the building will be used as an office and balance of the structure for storage space and repair shop. There will be steel roof trusses, cement floor and metal window sash and frames. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken. Engineer L. M. Hausman, Nevada Bank Bldg., will be in charge of the work.

CONCRETE ABUTMENTS—\$8,500. San Francisco, Engineer, City Department of Engineering, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened by the Board of Public Works for constructing concrete abutments under the Southern Pacific Co.'s tracks at Santa Rosa avenue show Otto Rehnogel low at \$8,587. A complete list of these bids will be found under the heading of San Francisco in this issue.

MAGAZINE BUILDINGS—Reinforced concrete construction, \$120,000. Pearl Harbor, Hawaii, Architects, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Plans for a number of reinforced concrete magazine buildings, which are to be erected at Pearl Harbor, have been completed and approved. Bids will be opened by the Bureau of Yards and Docks in Washington on September 20th. Plans can be secured from either the Bureau or from the Commandant at Pearl Harbor. An official proposal appears in another column of this issue.

HOTEL—5 story and base, reinforced concrete, \$80,000. San Francisco, Architects, Fabre & Bearwald, Merchants' National Bank Bldg., S. F. Owners, Vayssie Bros. The building will be erected at the corner of Seventh and Stevenson streets, covering an area of 75 feet square. There will be five stories besides the hotel entrance on the first floor. Upper floors will be divided into 100 guest rooms and a number of public and private baths. Interior finish will be of pine throughout. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will have cement floors and tile wainscot. There will be metal window sash and frames. Patent store fronts and sidewalk doors and lights are specified. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

HOTEL—7 story and base, brick and steel, \$60,000. San Francisco, Architect, A. J. Barnett, 382 California St., S. F. Owners, Zellerbach and Levison. This building was mentioned here sometime ago under another architect's name. The structure will be erected on Turk street east of Mason and will cover an area of 31 feet 1½ inches by 137½ feet. There will be one store on the first floor besides the hotel lobby. Upper floors will contain in the neighborhood of 100 rooms and a number of public and private baths. Interior finish will be largely of pine with some elm panels and ornamental plaster in the lobby. There will be steam heat, elevator service and hot

water plant. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. There will be patent store fronts, sidewalk lights and metal window sash and frames. Plans are complete and construction will be carried out by Theo. Hoin, 1449 Hyde street.

HOTEL AND STORES—3 story and base, brick and steel. Cost not stated. San Francisco, Architects, Shea & Lofquist, 559 Montgomery St., S. F. Owners, Mary C. and Joseph B. Kennedy. The building will be erected at the southwest corner of Ellis and Larkin streets, covering an area of 48x87½ feet. There will be stores on the first floor and a number of single rooms and baths on the upper floors. Plans provide for steam heat and elevator service. Interior finish will be of pine throughout. Hot and cold running water will be supplied to all rooms. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. Stores will have large display windows in patent fronts. Plans are being prepared and contracts will be let shortly.

RESIDENCES—3, 2 story and base, frame, \$2,500 each. San Francisco, Architect, none. Owner, E. Nelson, 30 Presidio Terrace, S. F. These houses will be erected on 10th and 15th avenues north of Clement street. Each house has been designed to contain six rooms and bath. Interior finish will be of pine throughout with some hardwood floors. All living rooms will have a large open fire place with brick or tile mantels. Tile wainscot will be used in the bath rooms and kitchens. Exteriors will be covered with rustic, shingles and cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

STORES AND OFFICES—20 story and base. Class A construction. Cost not stated. San Francisco, Architects, Reid Bros., California-Pacific Bldg., S. F. Owner, John D. Spreckels. The architects have detail plans completed for the new Call Building which is to be erected at the southeast corner of Fourth and Market streets. Probably the most interesting announcement in this connection is the statement that these plans call for a 26-story structure instead of 25 stories as was first announced. Moulds for the terra cotta work are now being made and steel is being fabricated. One lease on the premises runs until December 1st of this year and actual construction will start next morning.

SAFETY STATION REMOVAL AND RECONSTRUCTION—Cost not stated. San Francisco, Architect, City Architectural Department, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids are now being called for the removal and reconstruction of the safety station at the gore corner of Market and Ellis streets. Bids will be opened on August 27th. Plans and specifications can be secured on application to the Board of Public Works. An official proposal appears in this issue.

Contracts Awarded.

HOTEL—5 story and base, reinforced concrete, \$30,000. San Francisco, Architects, MacDonald & Kahn, Holbrook Bldg., S. F. Owner, H. Baker

fisher. Contractors, MacDonald & Kahn, Rialto Bldg., S. F. Contract price, \$40,000.

City Bids Opened.

Bids Opened For Concrete Abutment Under Southern Pacific Tracks at Santa Rosa Avenue.

Bids opened by the Board of Public Works at their meeting on Wednesday show Otto Rechnogel low for the construction of concrete abutment under the Southern Pacific tracks at Santa Rosa avenue. The low man's bid was for \$5,587. Following is a complete list of all figures submitted:

Concrete Abutments.

Robert C. Storie Co.....	\$ 8,700

OAKLAND AND ALAMEDA COUNTY.

BUNGALOW—1 story and base, frame, \$2,000. Oakland, Cal. Architect, Hiram K. Lovell, South Berkeley Bank Bldg., Berkeley. Owner, Mrs. Schuller. The dwelling, which has been designed for a four-room house with bath and sleeping porch, will be erected on Alcatraz avenue. Interior will be finished in pine with some hardwood floors. There will be a large open fire place in the living room with brick mantel. Tile will be used in the bath room and kitchen. Exterior of the bungalow will be covered with rustic. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$5,000. Oakland, Cal. Architect, C. J. Struby. Owner, Mrs. N. Connelly, 606 Jones street, Oakland. The house will be erected at the corner of Wickson street and Walker avenue and will contain seven rooms and bath. Interior finish will be of pine, redwood and some elm. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath room will have tile wainscot and tile will also be used in the kitchen. Exterior of the dwelling will be covered with rustic and shingles. Plans are complete and figures are now being taken.

BUNGALOW—1½ story and base, frame, \$2,000. Oakland, Cal. Architect, none. Owner, P. H. Franks, 2709 McGee avenue, Berkeley. The house will be erected at the southeast corner of Lawton and Clifton streets, and has been designed to contain seven rooms and bath. Interior will be finished in pine with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$4,300. Oakland, Cal. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner, Joseph C. Hicklingbotham. The house will be erected on Walla Vista and will contain seven rooms, bath and sleeping porch. Interior will be finished in pine with some white enamel and elm panels. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Tile will be used in the bath room. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

HOTEL—7 story and base. Class C construction, \$100,000. Oakland, Cal. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owner, M. Friedman, 253 Post St., S. F. Preliminary plans have been prepared for a large store and hotel building which will be erected on the property at the southwest corner of 16th and Clay streets. Only preliminary plans have been prepared and details of the construction are not available. The lot to be improved covers a large area. First floor of the new building will be arranged for stores and upper floors will contain in the neighborhood of 150 rooms. Interior finish will probably be of pine throughout. Bath rooms will have cement floors and tile wainscot. There will be steam heat, elevator service and a hot water plant. Exterior will probably be faced with pressed brick.

BUNGALOW—1½ story and base, frame, \$3,000. Oakland, Cal. Architect, Harvey Partridge Smith, Blake Bldg., Oakland. Owner, M. B. Nichols. The house will be erected in the Diamond Vista Tract and has been designed to contain six rooms, bath and sleeping porch. Interior finish will be of pine with hardwood floors in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile, the sum of \$60 being allowed. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the bungalow will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Harris Allen, 2514 Hillgass avenue, Berkeley. Owner, Dudley Baird. The house will be erected at the corner of Dwight Way and Prospect avenue, and is designed to contain seven rooms, bath and sleeping porch. Interior will be finished in pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Bath room will have a composition floor and tile wainscot. Tile will also be used in the kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$5,000. Alameda, Alameda Co., Cal. Architect, E. B. Hurt, 521 Cottage St., Oakland. Owner, Leo A. Cocker-ton. The house will be erected on Rand avenue near Cottage street, and has been designed to contain seven rooms and bath. Interior will be finished in pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BUNGALOW—1 story and base, frame, \$2,300. Oakland, Cal. Architect, Frank S. Forester, 1417 Arch St., Berkeley. Owner, W. R. Klink. The bungalow will be erected on Ivywood street, and has been designed to contain six rooms and bath. All interior finish will be of pine or redwood. Hard-

wood floors will be used in the living room, dining room and reception hall. There will be a large open fire place with brick mantel in the living room. Tile wainscot will be used in the bath room and kitchen. Exterior of the bungalow will be covered with shingles. Plans are complete and figures are being taken.

SAN JOSE & SANTA CLARA CLARA VALLEY.

CULVERTS — Reinforced concrete.
Cost not stated. San Mateo, San
Mateo Co., Cal. Engineer. County En-
gineer Neuman, Redwood City. Own-
ers, San Mateo County. Plans for two
reinforced concrete culverts with end
walls have been completed and ap-
proved. Bids are now being called for
by the Board of Supervisors and will
be opened on September 2nd. Plans
can be secured from the Clerk of the
Board of Supervisors. Official propo-
sals appear in another column of
this issue. Bids were opened on Mon-
day last by the San Mateo Board of
Supervisors for two bridges, one a re-
inforced concrete structure and the
other a frame bridge. Bids will ap-
pear in the next issue.

BUNGALOW — 1 story and base,
frame, \$2,300. San Jose, Santa Clara
Co., Cal. Architect, S. G. Pelton, 415
South 3rd St., San Jose. Owner, Mable
Pelton. The dwelling has been de-
signed to contain five rooms and bath.
Interior will be finished in pine

throughout with some hardwood floors
in the living room and dining room.
Tile will be used in the bath room and
kitchen. Exterior of the house will
be covered with cement plaster. The
same architect is also preparing plans
for the same owner for a second dwell-
ing, similar in design to the one above
described, and will shortly take figures
on both buildings.

BUNGALOW — 1 story and base,
frame, \$3,000. Redwood City, San
Mateo Co., Cal. Architects, National
Architectural and Engineering Co.,
First National Bank Bldg., S. P. Own-
er, G. L. Breeze, Redwood City. The
houses have been designed to contain
six rooms, bath and sleeping porch.
Interior finish and floors will be of
pine. There will be a large open fire
place in the living room with brick
mantel. An automatic water heater
will be installed. Tile will be used in
the bath room. Exterior of the dwell-
ing will be covered with rustic and
shingles. Plans are complete and the
work will be done by Day Labor.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

BRIDGE—Steel and reinforced con-
crete, \$86,350. Sacramento, Cal. En-
gineer, County Surveyor, Sacramento.
Owners, Sacramento County. Due to
the fact that the Ross Construction
Company was awarded a contract to
construct the concrete bridge across
the American River under the old law,
which allowed County Supervisors to
expend only \$50,000 in any one fiscal
year for any one purpose, and the fact
that the new law removing this re-
striction went into effect Monday, the
Board of Supervisors rescinded the
action awarding the contract and will
readvertise for bids. The bids will be
opened September 12th. On the ad-
vice of the District Attorney and with
the consent of attorneys for the Ross
Construction Company the action was
rescinded, because it was feared some
person might enjoin the county when
the second payment on the contract
was made. According to the original
plan the Ross Construction Company
was to have been paid \$50,000 in one
fiscal year after the completion on the
bridge and the remaining \$33,957 in
the following fiscal year. This would
have avoided the law, but would have
left a loop-hole for an injunction re-
straining the county from paying the
second installment.

GARAGE—1 story, brick. Cost not
stated. Stockton, San Joaquin Co., Cal.
Architect, Ralph P. Morrell, Odd Fel-
lows Bldg., Stockton. Owner, F. W.
Rothenbush. The garage will be
erected on a lot adjoining the Imperial
Hotel, and will cover an area of 50x75
feet. There will be a cement floor,
pine interior finish, steel oil tanks and
a vacuum cleaning system. Metal
window sash and frames are specified.
Exterior of the building will be faced
with pressed brick. Plans are com-
plete and figures are being taken.

RESIDENCES—1 and 2 story and
base, frame. Cost not stated. Stock-
ton, San Joaquin Co., Cal. Architect,
none. The following Day Labor jobs
are reported as about to be started in
Stockton: William T. Weber, 1032
South Aurora St., 1 story frame cot-
tage, \$1,500; D. Burgess, 1643 South
San Joaquin street, 1 story frame cot-
tage, \$1,500; L. Lagoria, California and
North streets, 1 story frame cottage,
\$1,900, and Volunteers of America,
Stockton, 1 story frame dwelling, \$2,-
000.

BUNGALOW — 1 story and base,
frame, \$1,200. Stockton, San Joaquin
Co., Cal. Architect, Ralph P. Morrell,
Odd Fellows Bldg., Stockton. Owner,
Dr. Mapas. The dwelling has been de-
signed for a five-room house with
bath. Interior finish will be of pine
throughout. Some hardwood floors will
be used. There will be an open fire
place in the living room with tile or
brick mantel. Tile will be used in the
bath room and kitchen. Exterior of
the dwelling will be covered with rus-
tic, shingles and shiplap. Plans are
complete and figures are being taken.

RESIDENCE — 2 story and base,
frame, \$1,000. Stockton, San Joaquin
Co., Cal. Architect, Ralph P. Morrell,
Odd Fellows Bldg., Stockton. Owner,
Mrs. McInness. The dwelling has been
designed for a seven-room house with
bath and sleeping porch. Interior fin-
ish will be of pine and hardwood.

Hardwood floors will be used in the
living room, dining room and recep-
tion hall. Plans provide for steam
heat and open fire places. Mantels
will be of tile and brick. Tile wain-
scot will be used in the bath room
and kitchen. An automatic water heat-
er will be installed. Exterior of the
dwelling will be covered with rustic.
Plans are now being prepared.

RESIDENCES—1 and 2 story, frame.

Sacramento, Cal. Architect, A. D.
Nicholson, Whittell Bldg., S. P. Own-
er, J. B. Edwards. The dwelling will
contain in the neighborhood of 12
rooms, several baths and sleeping
porches. Interior finish will be of pine
and hardwoods. There will be a cen-
tral heating system, probably hot
water, and open fire places. Mantels
will be of tile and brick. Hardwood
floors will be used in the principal
rooms. Plans include tile bath room
doors and wainscot in the baths and
kitchen. An automatic water heater
and vacuum cleaning system. Exterior
of the dwelling will be faced with
terra cotta. Plans are complete and
figures are being taken for the work.

base, frame, \$65,000. Hollywood, Los
Angeles Co., Cal. Architect, Rudolph
P. Scherling, 529 West 8th street, L. A.
Owners, Coast Utilities Investment Co.
The building will be erected at the
corner of Garfield Place and Holly-
wood street, covering an area of 88x
185 feet. Besides the lobby, sun par-
lor and amusement rooms the building
will contain a total of 210 rooms,
which will be arranged in two, three
and four room suites. Interior finish
will be of pine throughout. All apart-
ments will have private bath rooms
and will be equipped with wall beds.
Bath rooms will have cement floors and
tile wainscot. Plans provide for steam
heat and a vacuum cleaning system.
Exterior of the building will be cov-
ered with cement plaster on metal
lath. Plans are being prepared.

HOTEL—4 story and base, Class B
construction. Cost not stated. Los
Angeles, Cal. Architect, Anton Reif,
Higgins Bldg., L. A. Owners, John G.
Outh, Susan R. Campbell and Benj.
Weingert. The building will be erected
on an inside lot with a street front-
age of 67 feet and a depth of 147 feet.
Upper floors of the building will con-
tain a total of 202 guest rooms, a
large per cent of which will have cov-
erning baths. Interior finish will be
of pine and hardwoods with orna-
mental plaster in the lobby and offices.
There will be steam heat, elevator
service, vacuum cleaning system and
hot water supply. Bath rooms will
have cement floors and tile wainscot.
Metal lath and plaster interior parti-
tioning will be used and metal window
sash and frames. Exterior will be

faced with pressed brick. Plans are
being figured.

LOFTS—5 story and base. Class B
construction. Cost not stated. Los
Angeles, Cal. Architect, A. F. Rosen-
heim, H. W. Bellman Bldg., L. A. Own-
ers Besinger Estate. The building will
be erected on Los Angeles street near
9th and has been designed for a high
class commercial building. There will
be four elevators, metal window sash
and frames, fireproof doors and a steam
heating system. Interior finish and
floors will be of pine. Patent store
fronts will be installed. Exterior of
the building will be faced with pressed
brick and terra cotta. Plans are com-
plete and figures are being taken.

APARTMENT HOUSE—3 story and
base, frame, \$22,000. Los Angeles, Cal.
Architect, F. A. Noyes, Jr., California
Bldg., L. A. Owner, Dr. L. E. Wyckoff.
The building will cover an area of 43x
100 feet, and has been designed to con-
tain 53 suites arranged in suites of two
and three rooms. Interior will be fin-
ished in pine with some elm panels and
hardwood floors. There will be steam
heat and an automatic elevator. Bath
rooms will have cement floors and tile
wainscot. All suites will be equipped
with wall beds and will have private
bath rooms. Exterior of the building
will be covered with cement plaster on
metal lath. Plans are complete and
work will be started at once.

MUSIC HALL—2 story and base, re-
inforced concrete, \$90,000. Claremont,
Los Angeles Co., Cal. Architect, Myron
Hunt, Hillerman Bldg., L. A. Owners,
Pomona College. The building has
been designed in the shape of a letter
Y, and will have a total frontage of
260 feet and an average width of 45
feet. The main auditorium will seat
1,000 people. Besides this room plans
provide for 8 studios and 16 practice
rooms. Interior will be finished in pine
and hardwoods. There will be steam
heat, hollow tile interior partitions
and metal window sash and frames. A
clay tile roof will be used. Exterior of
the building will be faced with cement
plaster. Plans will be complete and
figures called for within a month.

SCHOOL—2 story and base, brick,
\$45,000. Brawley, Imperial Co., Cal. Ar-
chitect, Norman F. Marsh, Broadway
Central Bldg., L. A. Owners, Brawley
High School District. This is the first
of a group of buildings which will
eventually comprise the Brawley High
School. The building has been de-
signed as an administration building,
and will cover an area of 104x145 feet,
containing ten class rooms, auditor-
ium, domestic science departments,
physical and chemical laboratories, of-
fice and rest rooms. Interior finish will
be of pine with some maple floors.
Plans provide for steam heat and a
vacuum cleaning system. Exterior of
the building will be faced with sand
lime brick. Plans are being prepared.

BRIDGE—Steel and concrete. Cost
not stated. Navajo Indian Reservation,
New Mexico. Engineers, U. S. Indian
Department, Washington, D. C. Own-
ers, United States Government. Plans
have been completed and bids will be
opened on September 15th for the con-
struction of a steel and concrete bridge
over the San Juan River. Plans can
be secured from the Commissioner of
Indian Affairs in Washington, D. C.

SCHOOL—2 story and base, brick, \$30,000. Los Angeles, Cal. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, Woman's Board of Home Missions of the Presbyterian Church. Contractor, E. Gardner, 469 East 4th street, L. A. Contract price, \$30,000.

PORTLAND AND OREGON.

BANK—2 story and base, brick and tile. Cost not stated. Sheridan, Ore. Architects, L. R. Bailey Co., Abington Bldg., Portland. Owners, Sheridan State Bank. The structure will cover an area of 25x90 feet and will be modern in every respect. The first floor will be arranged for banking quarters, directors' room, cloak rooms and lavatories. Interior finish will be of mahogany. Upper floor will be arranged for offices and will be finished in hardwoods. There will be a special fire-proof vault, metal window sash and frames and steam heat. Some ornamental bronze will be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

BANK ALTERATION AND ADDITION—2 story and base, brick and steel. Cost not stated. Roseburg, Ore. Architects, J. H. Vogt and Frank T. Griffith, Portland. Owners, Douglas National Bank. The first work to be undertaken will be the rearrangement of the present banking quarters and installation of new interior finish. Italian marble and mahogany will be used. New electric work, plumbing and vaults will also be installed. After this work has been completed the directors will authorize the construction of two additional stories, making the building four stories high. Plans are being prepared.

CHURCH—2½ story and base, brick and reinforced concrete. Cost not stated. Portland, Ore. Architects, Tourtellette & Hummel, Rothchild Bldg., Portland. Owners, Bethel African Methodist Church. The new church will be erected at the corner of 10th and Davis streets, and will cover an area of 25x100 feet. The main floor will contain the pastor's residence, study and Sunday school rooms. Second floor will be arranged for the main auditorium and lecture halls. Interior finish will be of pine throughout. There will be a central heating system. Ornamental plaster will be used in the auditorium. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

STORES—1 story and base, brick. Cost not stated. Portland, Ore. Archi-

tect, Earl A. Roberts. Selling Bldg., Portland. Owners, William Mall et al. The building will be erected on a corner site, covering an area of 50x100 feet. There will be six stores. Interior finish will be of pine throughout. Patent store fronts and plate glass windows are specified. Exterior of the building will be faced with white glazed terra cotta. Plans are complete and figures are being taken.

FACTORY—2 story and base, brick and steel. Cost not stated. Portland, Ore. Architects, L. R. Bailey Co., Abington Bldg., Portland. Owners, Puritan Manufacturing Co. The building will be erected at the corner of East 4th street and Oak, and will cover an area of 50x100 feet. A portion of the first floor will be used for offices and will be finished in pine. Balance of this floor will be occupied by the shipping department and storage space. Upper floor will contain the manufacturing space and machinery. There will be metal window sash and frames. Exterior of the building will be faced with stock brick. Plans are complete and segregated figures are being taken on the various parts of the work.

Contracts Awarded.

SCHOOL—2 story and base, brick and steel. Cost not stated. Portland, Ore. Architect, F. A. Baramore, Tilford Bldg., Portland. Owners, City of Portland. Contractors, The Litherland-Abrey Co., Beck Bldg., Portland. Contract price not stated.

LAUNDRY—2 story and base, brick. Cost not stated. Salem, Ore. Architect's name not given. Owners, Cascades Laundry Co. Contractors, Hurley-Mason Co., Board of Trade Bldg., Portland. Contract price not given.

MAUSOLEUM—Stone and reinforced concrete, \$35,000. Portland, Ore. Architects, Ellis F. Lawrence and William C. Holford, Chamber of Commerce Bldg., Portland. Owners, Portland Mausoleum Co. Contractors, Burgoyne Stone Co., Westminster Church, East Side, Portland. Contract price, \$35,000.

SCHOOL—2 story and base, brick, \$26,900. Cottage Grove, Ore. Architects, Tourtellette & Hummel, Rothchild Bldg., Portland. Owners, Cottage Grove School District. Contractor, W. O. Heckart, Eugene. Contract price, \$26,900.

SEATTLE AND WASHINGTON.

PASSENGER STATION—2 and 3 story and base, steel and reinforced concrete, \$500,000. Spokane, Wash. Architect's name not given. Owners, Oregon-Washington Railway and Navigation Co., Mr. J. R. Holman, representing the O.-W. R. and N. Co., Spokane, states that the opening date for bids on this work has been postponed from August 20th to September 9th. The building has been fully described in these columns before. Plans can be secured by applying to Mr. Holman, in care of the owners at Spokane.

ARMORY—2 story and base, reinforced concrete, \$65,000. North Yakima, Wash. Architect's name not given. Owners, State of Washington. Plans for the new armory building which is to be erected at North Yakima have been completed. These plans are now on file in the office of Adj. General Leewellyn, Armory Bldg., Se-

Contracts Awarded.—Brick and steel construction, \$50,000, Seattle, Wash. Architect, Francis W. Grant, Globe Bldg., Seattle. Owners, Star Theatre. Contractor, James Murdoch, 726 14th Ave., Seattle. Contract price, \$50,000. Note: The contractor is now taking sub-figures on all parts of this work.

GRAIN ELEVATOR—8 story, reinforced concrete and steel, \$25,000. Seattle, Wash. Architect's name not given. Owners, Charles H. Lilly Co. Contractor, Brayton Eng. Co., Portland, Ore. Contract price, \$25,000.

LIBRARY—1 story and 1/2, C. A. construction, \$30,000. Seattle, Wash. Architect, W. Marlbury Sommerville, White Bldg., Seattle. Owners, City of Seattle. Contractors, Shepard & Warnock, Downs Bldg., Seattle, general construction, \$24,915.25; Ne Page-McKenny Co., Prefontaine Bldg., electric wiring, \$285; Simpson-Pepper Co., 314 James street, plumbing, \$961, and T. J. Garrison, Hinkley Bldg., heating, \$1,561.

SCHOOL GROUP—Mechanical arts, agriculture and two minor buildings, Class A construction. Cost not stated. Pullman, Wash. Architect's name not given. Owners, Washington State College. Contractor, J. B. Sweet, Spokane, general construction, \$198,580.

WAREHOUSE—2 story and base, brick. Cost not stated. Seattle, Wash. Architects, Saunders & Lawton, Alaka Bldg., Seattle. Owners, Schwabacher Land Co. Contractors, Pearson Construction Co., New York Bldg., Seattle. Contract price not stated.

AMERICAN LOSSES IN MEXICO.

Statistics compiled from the latest Circular reports from Mexico show that about 20,000 of the 40,000 Americans in that country in 1912 are there today, and that the \$1,057,770,000 of American investments south of the Rio Grande have depreciated approximately 50 per cent. Of this nearly \$150,000,000 is estimated to be attributable to the ravages of the continuing factions.

North of parallel 26 are the states of Sonora and Chihuahua and portions of Lower California, Coahuila, Nuevo Leon and Durango.

In Sonora there are about 1200 Americans, and damage to American property is estimated at \$12,000,000; in Chihuahua 1600 Americans, property damages, \$18,000,000; Lower California, 800 Americans, property loss \$1,500,-

000; northern portion Coahuila, 1000 Americans, property loss \$10,000,000, and northern portion Nuevo Leon, 700 Americans, with a property loss of about \$500,000.

The loss in Northern Durango is negligible.

Immediately south of parallel 26 lie the greater portion of Sinaloa, Durango, Nuevo Leon, Tamaulipas and a small part of Coahuila. In Sinaloa there are about 500 Americans, and the property damage is figured at \$100,000; in Southern Durango, 175 Americans, property damage \$80,000; Southern Coahuila, 75 Americans, property loss \$10,000; Southern Nuevo Leon, 125 Americans, property loss \$15,000, and in Tamaulipas there are about 750 Americans, who have sustained a property loss of \$50,000.

It is in the e portions of Mexico that the most strenuous fighting has taken place. Statistics show that there are about 7000 Americans protecting property in this region at the present time, and the damage done to American holdings amounts to \$12,255,000.

South of this lie the eighteen remaining states of the Mexican republic. In this territory are about 1400 American citizens, who have sustained a property loss of approximately \$60,000,000.

The largest number of Americans in a restricted territory are in the Federal district surrounding the City of Mexico. Property losses here aggregate about \$35,000,000. There were 3015 Americans in that territory, according to the last report.—New York American.

WISCONSIN'S LAND TAX PROPOSAL.

Wisconsin at the last session of its legislature adopted a constitutional amendment which is intended to provide for the single tax.

The text of the amendment is as follows:

"The legislature shall have power to authorize counties, towns, cities and villages, by vote of the electors therein to exempt from taxation, in whole or in part, designated classes of property; but the value of such property exempted by any county shall be included in the assessment and equalization for state taxes, and the value of such property exempted by any town, city or village shall be included in the assessment and equalization for city and county taxes."

The amendment is so drawn as to leave discretionary power in the legislature as in the case of the income tax constitutional provision.

The history of the amendment is

politically interesting in a farming country which regularly gave 500 republican majority. A democratic farmer who was a homesteader there, ran on platform which consisted solely of his amendment. On it he won the democratic primary nomination and carried the election in the county by 700 majority, making a change of 1,300 votes. This amendment in the assembly was fathered by a republican committee and passed the assembly by a vote of 68 to 20. In the senate the vote first taken was a tie, but on reconsideration it carried by 20 to 10.

The question of exempting improvements from taxation is now the chief political issue in Wisconsin and one effect of passing the amendment already has been that big land speculators who have been holding for a rise are now trying to sell to actual settlers.

The progress of the Wisconsin campaign is bound to attract national attention. Single taxation has been experimented with in four American cities but Wisconsin is the first commonwealth in which it is to be a state issue. The result, if the amendment carries and should be successful, will be even more far reaching than any other of Wisconsin's reforms.

INVESTMENT COMPANIES ACT.

The Investment Companies Act, better known as the blue sky law, against which referendum petitions have been filed, will be voted upon by the electorate at the State election in November, 1914. It was to have gone into effect November 1, 1913.

An "Investment company," under the Act, includes every private corporation, association, co-partnership and company, which sells, offers for sale, negotiates for the sale of or takes subscriptions for any stock, certificates, bonds or other evidence of indebtedness. The Act applies to all investment enterprises except where the Railroad Commission already has control.

The investment company shall file with the Commissioner of Corporations an application for permission to sell its securities, accompanied by an itemized statement of financial condition, in form and detail as the Commissioner may prescribe.

The Commissioner is given plenary powers of examination and investigation. If he finds that the proposed plan of business is not unfair, unjust or inequitable, he shall issue a certificate authorizing sale of securities. This certificate is permissive only and does not constitute indorsement of the

securities. The Commissioner may impose conditions as he sees fit and from time to time may amend the certificate.

Brokers and agents shall obtain authorization from the Commissioner before being permitted to sell securities authorized by him.

The Commissioner will have general supervision and control over investment companies and brokers, and they shall at all times be subject to investigation by him.

No company shall give out any advertisement, pamphlet, prospectus or statement without the Commissioner's approval.

The companies must file detailed reports as to sales of securities and disposition of proceeds.

Companies created under the law of another state, territory or government must file a written instrument appointing the Commissioner its true and lawful attorney, upon whom processes may be served.

The Act creates a "State Corporation Department," of which the chief shall be the Commissioner of Corporations. He is to be appointed by the governor and serve at his pleasure. The salary is fixed at \$5000 a year.

The Act is so designed that a clearly legitimate business will not be hampered by red tape. The Commissioner may allow it to proceed forthwith. He is, on the other hand, equipped with summary power to act promptly and effectively as regards unfair and dishonest companies. The commissioner's authority corresponds to that of the Railroad Commission over public utilities.

GREAT OUTPUT OF LIME.

Production for 1912 More Than Three and a Half Million Tons.

Figures obtained by the United States Geological Survey from the producers of lime throughout the country show that in 1912 the demand for lime was greater than ever before and that the resulting production was the largest in the history of the industry. The total production of lime in 1912 was 3,529,462 short tons, valued at \$13,970,114 as compared with 3,292,915 short tons, valued at \$13,689,054 in 1911, an increase of 136,547 short tons in quantity and \$281,660 in value.

The total number of plants operating in 1912 was 1,018, as compared with 1,133 in 1911. This decrease in the number of producers was due in large part to the inactivity of small kilns operated by farmers for burning lime for local use as a soil sweetener and in part to the tendency of the industry toward concentrating plants into fewer and larger units. The heaviest decrease in the number of producers was in Pennsylvania, a State in which it has been a common practice for many years for farmers to burn small quantities of limestone quarried on their own farms for private use, and this large decrease is due almost wholly to the farmers' later practice of buying their lime already burned and to their use of fertilizer in preference to lime.

The five leading States in 1912 were, in the order of production, Pennsylvania, Ohio, Wisconsin, West Virginia, and Maine. Maine has supplanted Missouri, which occupied fifth place in

1911. Pennsylvania, which has long held first rank in both the quantity and the value of lime produced, in 1912 made a total output of 819,159 short tons, valued at \$2,679,420.

The uses to which lime is put are many. The quantity of building lime used in 1912 was 1,556,446 short tons, which exceeded that of 1911 by 67,879 tons, but that the value, \$6,371,479, was \$184,410 less than the value in 1911. There was a slight increase in the use of lime by chemical works, paper mills, and tanneries, but a decrease in its use in sugar factories. The use of lime in fertilizers also increased, the figures for 1912 being 604,607, valued at \$1,852,530, compared with 596,661 short tons, valued at \$1,714,386, in 1911. This increase in the use of lime on the land may perhaps be attributed in part to the tendency in recent years of city people to go back to the farm or to take up agricultural pursuits on a scientific basis.

Lime is also used as a plant food; it has been the common practice for farmers in some part of the country to spread it upon the fields and plow it under in order to sweeten the soil. The use of lime renders available the plant food already contained in the soil.

ISLAND OF MAUI.

The island of Maui has an area of 728 square miles and it is the second largest of the Hawaiian group. Its greatest length is about 47 miles from northwest to southeast. The greatest width is about 25 miles and the least width, across the isthmus connecting East and West Maui, is 6 or 7 miles.

Erosion has produced some picturesque valleys and canyons on the island that are probably unsurpassed anywhere else in the Hawaiian group. The most notable of these is Iao Valley, whose broad amphitheatre at the head is 4,000 feet below the summit of Puu Kukui overlooking it. West Maui is much the older of the two Maui mountains. No trace of the original crater that must have formed is seems to exist. From the summit, at an elevation of 5,790 ft., many sharp ridges that have been worn almost to knife-edges radiate in nearly every direction.

East Maui is one of the younger mountains of the group. Its crater Haleakala, at the summit, 10,000 feet above the sea level, is the largest extinct crater in the world and is as well preserved as if its fires were extinguished but yesterday. The crater is 20 miles in circumference and 2,000 feet deep and contains many cinder cones, some of which rise 700 feet above its floor.

The shore line of Maui is fairly regular, there being no prominent points or capes. Cliffs exist on the northeastern coast, but they are not very high. Malakoa, on the south side of the isthmus, is the largest bay. The only harbor is Kahului, on the north side of the isthmus.

The rainfall varies greatly in different parts of the island. On the west and south coasts it ranges from 20 to 30 inches annually and semiarid conditions prevail. On the northeast coast the rainfall is heavy, ranging from 100 to 300 inches or more. Streams are numerous on the northeastern and southern slopes of East Maui, but the largest and most constant streams are

on West Maui. Practically all the streams are used to irrigate cane and taro. Taro, the staple root crop of the south Pacific islands, is grown in some of the valleys and a small quantity of rice is also grown, both requiring irrigation.

An interesting description of the island and records of stream and ditch flow gathered during the an investigation by the United States Geological Survey in cooperation with the Territory of Hawaii, are contained in Water Supply Paper 318, a copy of which may be obtained on application to the Director of the Survey at Washington, D. C.

AN EAST INDIAN IRRIGATION ENTERPRISE.

The greatest enterprise ever undertaken by British irrigation engineers, as just recalled, its completion. The Lower Bari Doab canal in the Punjab, the third and last section of the "Triple Canal Project," has been finished, and vast areas in the Punjab are receiving irrigation.

The Lower Bari Doab canal is unusual in its construction, for it actually crosses upon a level the important river Ravi. The canal has cost about \$7,500,000 and it is expected that it will irrigate over 511,000 acres of crops. The Chenab canal, which is another section of the Triple Project, alone irrigates an area equivalent to two-fifths of the whole cultivable area of Egypt. The great Punjab canals have done more, for they have liberally repopulated the desert wastes. The cultivators have been established in districts which were formerly quite useless. Their villages are thriving, their land is growing in value, and for them the desert sands have indeed proved golden.

The Triple Project cost \$35,000,000, but it yields to the government a return upon capital outlay of 7½ per cent. Yet it means affluence to the peasantry also, and life in the canal zone is so popular among the stalwart men of Northern India that the development of irrigation is seriously affecting the recruiting for the Indian army.—Pittsfield Telegram.

THE DESTRUCTIVE GOPHER.

The superintendent of the State Board of Agriculture of Nebraska recommends concentrated lye as a destroyer of pocket gophers. With a small iron rod he finds the runway of the gopher, makes a hole down into it, and pours a little dry powdered lye down into the gopher's highway. The gopher gets the lye on his feet, licks it off, and thus is poisoned. If this will work with pocket gophers, there would seem to be no reason why it will not destroy ground squirrels, prairie dogs, meadow moles, woodchucks and other burrowing pests. But first we must recognize the extent of the evil.

Few persons realize the millions of dollars in damages caused by these little animals, in meadows, lawns, orchards and cultivated fields. There are many ways of poisoning them, none of which will work all of the time, but some will help every day in the year. Use them all, and make the conditions unfavorable for the burrowers all through the season. The evil may be cut down, if not abolished.

Frank Neidick

Carpenter and Builder

Phone Mission 5126

2669A Howard St., Bet. 22nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout the city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Bind your copies of the Building and Industrial News in PERMANENT BOOK FORM

We have succeeded at last in securing a really practical binder. The Building and Industrial News contains a great deal of technical and statistical information that many of our readers find worth saving for future reference. There is no better way of preserving it than using the

"BIG BEN" BINDER

which preserves the magazine in permanent book form. This binder is handsome and durable, and makes the permanent filing of magazines as easy as filing ordinary papers. It opens flat like a regular book, and comes in fine art cloth with the name of our journal stamped in gold on the front cover and back. For persons who desire to

Save These Valuable Articles

this binder is just the thing, as it holds several numbers of our Journal and can be used again indefinitely year after year, simply by taking out the old Journals and inserting the new ones as they come to you.

By making special arrangement with the manufacturers of this best binder that has ever been put on the market, we are able to furnish them to you for **ONLY \$1.00 EACH.**

Merely send us your name and address and say: "Send us your binder. I enclose \$1.00," and we will send the binder promptly all charges prepaid.

Send in your orders now and begin saving the statistical and technical information, articles and valuable data, that will be published in The Building and Industrial News this year.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that go into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking. **IS YOUR ADVERTISEMENT AMONG THESE?**

Editorial Comment.

The question of the billboard advertising of San Francisco has become a question of present interest. The regulation of the poster advertising is now up to the supervisors. The newspapers are in favor of the regulation. The bill posting concerns claim that this is for their personal interest.

But the question that concerns the public is whether or not the billboard in its present form is a public nuisance. The plea of the bill posters that they give employment to labor should have little to do with the case. It is similar to the cry against labor saving machinery or that might be advanced in defence of any nuisance. Saloons and dance halls give employment to people. They might erect electric signs or paint advertisements on every bit of scenery on the peninsula and still have the same plea.

There must be a limit somewhere on the billboard, and the question is where to put it. One thing that the high billboard does which in some cases has been a benefit to San Francisco, but in most cases a detriment, is that it conceals the vacancy of the lot behind it. Since the fire in the downtown district there has been legitimate excuse for not rebuilding. But that excuse no longer holds. If the billboards were removed the vacant lot would show more ugly and there would be more of civic pressure for building on the vacant lots.

The billboards have helped property owners to pay taxes on the downtown property when the owners were unable to build. But they are just as often used by speculators to get a revenue on land and compel other people to advance the price of their property by building on adjacent lots.

Single taxers have proposed a tax on land which would make it impossible for any person to hold land unimproved and unused. There is an ancient increment tax on vacant property now in operation in London which seeks to accomplish the same purpose. So that the billboard question presents many different angles and the question is whether or not, as at present conducted, it is a nuisance and just where the limit should be placed.

Rudolph Spreckels has refused to pay his subscription to the Exposition, because he says he has no faith in two of the directors. That is hardly a legitimate ground of objection for if he was allowed to prevail on such a contention everybody else could perhaps advance the same thing and there would be no exposition. The thing for him to do is to get in and have some-

thing to say in the management if possible, and if not keep such a close watch that his own and other stockholders' money will be safeguarded. If an exposition depended upon the personal estimate of the directors by all the subscribers there would perhaps be no exposition at all.

The Chronicle laments the fact that some of our wild eyed supervisors refuse an offer of settlement of the telephone merger. It then goes on to state that the telephone business is a natural monopoly and that there should be but one telephone and telegraph company in the United States. It may be true that a monopoly in this line of public service is the best and most economical way of administering it. But if it is so it is very clear that it should be owned and administered by the government itself. For in no other way can the people get satisfactory service unless the rates are so controlled by industrial commissions and the service under such supervision practically amounts to government control.

The merger of the San Francisco telephone companies was effected by the most unlawful and indirect methods ever attempted or executed by any corporation. The Home Telephone company's plant has been practically dismantled. Its plant was the best in the world. Its service could easily have been made the best. In the face of a direct written contract with the city to the contrary, in the face of the express terms of the franchise, and in the face of two popular elections to the contrary the merger was effected and the Pacific States Telephone Company is now in possession of all the property of the Home Company.

Certainly in the face of these facts anybody has a right to "suspect" something. It has been calculated that under the present service the city loses about sixty years of time every day in getting numbers that the would not lose were there an up-to-date automatic system such as the Home Telephone in operation. And yet people who do not stand for the merger are denounced by the Chronicle as "wild-eyed."

The most effective ad of the Postal Telegraph, one that is on all their stations and printed on the windows of all their offices, is the representation of a telegram, addressed to "Everybody" everywhere, to the effect to consider telegraphic rates now and before the Postal Telegraph entered the field. What is true of the express companies and the telegraph is true of the telephone. A monopoly of such business is all right, but it depends on who has the monopoly.

Landscape Gardening.

The Art and Science of Landscape Gardening, for here we have both art and science combined, is of paramount importance to every land owner whether limited to a humble city of town lot, large estate, or the farm. The home surroundings can be vastly improved and values greatly enhanced by a judicious expenditure in landscape work, yielding a hundred fold in actual value besides affording a pleasure to the possessor and the public generally that can not be estimated in dollars and cents. Every beautifier of his grounds is a public benefactor.

The buildings may be ever so plain and even homely, yet with the grounds surrounding them nicely laid out and cared for, they are made charming; on the other hand a building ever so fine, if surrounded by ill designed and kept grounds, the effect is most unpleasant. It is manifest therefore, that if we would have a really beautiful home we must pay attention to its environment by a correct application of the means and material called for in the art of laying out grounds, and while this fact is so obvious, yet how often do we see this important work entrusted to those without taste and having little, if any, experience in this very important work of landscape gardening.

It is not every one who is possessed of the necessary qualifications for this branch of work, for, to meet success, artistic taste must be combined with practical knowledge and experience. The ordinary gardener may plant and prune and cultivate, yet be ignorant of the art of combining, blending and getting the most out of what nature has provided.

In landscape work no hard and fast rules can be laid down, as every place presents conditions peculiar to itself, requiring special and independent treatment. As well attempt to lay down a set rule or design for the landscape painter, except it may be said that landscape designing is divided into two general classes. The old style or Formal, sometimes called the geometrical, and the new style or Natural. The ancient and modern styles have each their admirers, and each has its place in the scheme of beautifying, and in fact on local conditions and what is best suited to the circumstances.

The modern style is essentially imitative, attempting to cope and reproduce the best in nature suited to the place, to correct its faults and cover its defects and enhance its beauties, by selecting the most slightly objects and arranging them in the most pleasing manner.

The first object of the landscape architect is to study the surroundings in relation to existing elevations and other existing conditions. If there is to be no material changes, it may be possible to derive some elevations and features of the land, if possible to be of artificial or natural lake at a reasonable cost, it is advisable to do

so, as it always adds vastly to the beauty and interest of the landscape. Roads and walks are important adjuncts and should be laid out with regard to utility as well as beauty. By utility we mean they should always lead to some object or for some purpose and not run at random, as is too often the case, and should follow easy, graceful curves without being too roundabout.

We now come to the most important feature of landscaping, the point requiring the greatest judgment and knowledge, and wherein most signal failures are made, either through want of experience or the fact that stock is purchased without reference to the requirements of the situation, and that is the proper selection of the nursery stock to be planted, for here the architect has to consider not the present but the future. He is not building for today only but for coming generations. The tree he plants today is growing in stateliness and beauty from year to year, becoming more and more a thing of beauty and a joy forever."

The most important element in producing a pleasing landscape is a proper blending of trees, shrubs, vines and plants, and here the greatest care has to be exercised both in the selection and the placing, as this is the finishing touch of the artist and makes or mar a job as a finished picture.

The house being the main feature, all planting must be done with reference to its character and position, care being exercised not to obstruct slightly views, unsightly objects must be screened, and principal masses showing irregular outlines so placed as to stretch along rising ground if possible, and so arranged that they will harmonize with the surrounding property.

The best effect of water in the landscape depends on trees and shrubbery as an accompaniment, with its receding forms, shady recesses and scintillating lights and shadows.

Planting should be general in groups and masses, with here and there individual specimens, but with plenty of open lawn for light, air and view.

Prospects of suburban homes would do well to consult the landscape engineer before the erection of buildings, as their location has much to do with the effectiveness of the future embellishment of their surroundings, and much would be gained in every way, for then exposures, soils, drainage, walks, roads, etc., could be taken into consideration, giving results not otherwise possible to obtain and generally at much less expense.

It is a peculiar fact that architects, almost without exception, ignore landscape effects, which do so much to enhance the beauty of their work, and rarely take this feature into consideration in locating buildings; but we believe the time is not distant when they will recognize its value and will first

seek the advice of the landscape architect, before determining these matters.

Where possible the main building should be located near the northern boundary of the plot, giving all principal rooms a southern and eastern exposure, with massed plantings on the northern and western boundaries, thus affording protection from the prevailing northwest wintry winds and shielding more sensitive and choicer plants and trees that grace the lawn.

Driveway, also used as a walk from the street or road, should approach the house and stable or garage beyond, with a graceful curve, from which may branch narrow walks among the shrubbery, etc., to the several points of interest, affording opportunity for plantings in the way of borders of perennials and annuals according to the individual taste.

For divisions between properties or separation from the highway there is nothing more economical and beautiful than a well kept hedge, which nature keeps freshly painted from year to year without cost, and is not subject to decay. For this purpose there are many beautiful and useful plants, but all things considered, California Privet (*Ligustrum ovalifolium*) is probably TWO—AUG. 20th—.....BEIRLY the best, as it is almost evergreen, retaining its shiny green foliage late in the winter, bears shearing well, may be trimmed to any form or size and is a rapid grower, forming a good close hedge in a short time, and where this is not found sufficiently hardy one of the more hardy varieties of this family may be substituted and will be found almost equally desirable. A close second to the Privet is the Thunberg Barberry (*Berberis Thunbergii*), a dense, low growing shrub forming an impenetrable hedge, being armed with sharp spines and bearing a profusion of brilliant red berries which remain all winter. This is preferred by many for the reason that it requires little or no trimming and also for the beauty of its autumnal foliage, which is most brilliant. There are many other useful and beautiful plants suitable for hedging, giving a wide range for individual tastes.

Where there is plenty of room, some of the evergreens are both useful and beautiful, giving protection from the winter winds and break the monotony of the winter landscape.

Where it is possible to do so it is sometimes most effective to completely screen the interior from the highway, arranging it so that a sudden turn in the drive brings it into view with all its beauty. We have in mind places of this kind where strangers coming upon it for the first time will stop in open-mouthed astonishment and give expression in such terms as "Oh, isn't this beautiful?" "What a lovely place!" etc., all of which makes the owner feel well repaid for the care and comparatively light expense expended upon it.

Where space is limited, as in the

Wednesday, Aug. 27 1913.

BUILDING AND INDUSTRIAL NEWS

case of an ordinary city or village lot, say 50x120 feet, the problem of beautifying that confronts the ambitious owner is one requiring careful consideration and judicious handling, especially where co-operation of neighbors is not possible with a view to a harmonious whole, as surroundings must be taken into consideration, and these are often such as to tax the ingenuity of the most skilled designer, and yet landscape gardening should be used, and is quite as valuable, in connection with the humble home as with the laying out of grounds of a park or vast estate, and its moral and elevating influence is even more pronounced and valuable for the reason that it comes more in touch with the masses, and its influence is contagious. Let one lot owner "fix up" and immediately his neighbors begin to "spruce up" also, unless, perchance, he be so unfortunate as to have utterly lost all sense of pride and ambition. Thus the move on the part of one to improve the exterior of his home, however humble, will often improve the tone of the neighborhood, with a corresponding improvement in its sanitary condition. And let it be borne in mind that no improvement is complete unless it takes in the back yard as well as the front, for this is quite as important and will afford quite as much satisfaction and pleasure, and what is more, may be made profitable, for here beauty may be combined with the practical, and the ground made to produce both luscious fruit and fragrant flower in company of the succulent vegetable, besides affording healthful and pleasurable exercise in caring for them, and no home is truly perfect without all these things.

Such a home will probably average \$3,500 (\$1,000 for lot and \$2,500 for building). One hundred dollars expended for stock and planting is less than 3 per cent. of the above amount, and if judiciously expended, will in two years' time increase the value from 10 to 25 per cent. and increase each year thereafter as trees and shrubbery increase in size and beauty. No other investment yields so great a return in value and satisfaction.

BIVALVE BUILDING.

Oyster Shells Replace Gravel in Concrete Building.

Branching out from the fields of stews, fries, cocktails, and other table delicacies in which it has long ranged supreme, the humble oyster, we see nervous system has of late caused Dr. Wiley so much concern, has entered the strenuous life as a chief component in a concrete from which a new business structure is to be built at Galveston, Texas.

A five-story building, designed for mercantile and office purposes and occupying a space of 120x43 feet in the heart of the Galveston business district adjoining the City Hall on its east side, has nearly reached completion. The face of the concrete on which the framework of the building is constructed is shell taken from the reefs of Galveston Bay. Generations of oysters for hundreds of years past,

have gone to the making of these massive reefs that now form one of the new monuments to Galveston's material progress.

The owners of the building met with much technical opposition in their plan, but are still firm in the belief that they have produced a building material of remarkable strength and cheapness. There is but approximately 10,000 pounds of metal reinforcement in the building, and Mr. Bohn, one of the proprietors, argues that the building could have been constructed with perfect safety with nothing but the oyster shell concrete in the walls. The concrete skeleton of the building contains about 26,423 cubic feet of material formed of one part cement, two parts sharp sand and four parts shell. An estimate based on the weight of the average common shell shows that approximately 5,500,000 bivalves sacrificed their outer garments that the five-story structure might rise in the Galveston business district.

Raising on a shell concrete foundation four feet wide, the walls of the first three stories are fourteen inches thick with 18-inch pilasters at frequent intervals to strengthen and support the walls of the five floors. After the third story the wall is reduced to 12 inches with 16-inch pilasters for one story, and for the fourth and fifth floors a still further reduction is made to 10-inch wall and 16-inch pilasters.

Expressing complete confidence in his plan of construction and the strength of the material used, Mr. Bohn says that he could, with perfect

safety, add three more stories to the building.

Material first used concrete mixed with shell in 1882, when he built a sidewalk curbing and foundation three feet wide and 336 feet long. Two years later a conflagration swept over this part of the city and against the wall of the curbing there was piled 25,000 feet of lumber. This was entirely consumed without a particle of damage resulting to the wall or the curbing. The same wall has stood the test of weather and water since that time, and today it is as firm and apparently as solid as the day it was constructed. In 1888 Mr. Bohn built a cistern and foundation for a two-story building, both of which are standing today, firm and solid, without a crack or evidence of a composition.

Shell is delivered in Galveston by barges at the wharf. After it has been sucked up and loaded by suction dredges at the wharf, hopper dredges are used to transfer the materials from the barges to the wagons on cars waiting for it, and it is delivered about the city at a cost of approximately 75 cents a cubic yard. Gravel costs, delivered, about 81 cents a yard. Shell from Galveston Bay has long been used as surfacing for streets, roads and railroad beds. There is now within the city limits approximately 25 miles of shell streets which have been greatly improved and given practically in asphalt finish by the use of crushed shell. Four big concerns with equipment valued at over \$1,500,000 are now exclusively engaged in the shell business at Galveston.—Dealer's Building Material Record.

Firms dealing news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$15,000. Architects, Righetti and Headman, Pheasant Bldg., S. F. Owner, Mr. Paville. The building will be erected on property at the corner of Green and Montgomery street, covering a considerable ground area. There will be stores on the first floor and a number of two- and three-room suites on the upper floors. Interior finish will be of pine throughout. All suites will have wall beds and private bath rooms. Plans provide for steam heat. Bath rooms will have cement floors and tile wainscot. Entrance will be finished in marble and tile. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 6 story and base, brick and steel, \$100,000. Architect, Fred H. Meyer, Bankers' Investment Bldg., S. F. Owners, Starr and Larsen. This building will be erected at the southeast corner of Sutter and Jones streets, covering an area of 71 feet 9 inches by 89 feet 9 inches. Interior has been arranged for 18 large suites besides stores and lobby on the first floor. Interior finish will be of pine with some elm

panels and hardwood floors. There will be a team heat, vacuum cleaning system, elevator service and a hot water supply. Bath rooms will have cement floors and tile wainscot. All apartments will be equipped with wall beds and will have private bath rooms. Exterior of the building will be faced with pressed brick. Contracts for the steel work and foundations have been let. Plans are now being taken on all other parts of the work. Contracts will be negotiated.

SAN FRANCISCO—Apartment house, 4 story and base, 2 story brick and frame, \$160,000. Architect, Henry H. Meyer, Koll Bldg., S. F. Owners, Goldberg, Bowen & Co. The building now occupied by the owners at the southwest corner of Haight and Masonic avenue will be added to and two additional stories constructed. Upper floors will be subdivided into modern apartment of two and three rooms. Interior finish will be of pine with some elm panels and hardwood floors. A central heating system will be installed. Tile will be used in the bath rooms. Present steel will be unchaned. Exterior of the building will be covered with brick veneer and terra cotta. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 4 story and base, frame, \$17,000. Architect, Frank S. Holland, 100 Haight

street, S. F. Owner's name withheld. The building has been mentioned in these columns before when plans were first started. The building will cover a considerable ground area and will be arranged with a store on the first floor and suites of two and three rooms above. Interior finish will be of pine throughout. All suites will have wall beds and private bath rooms. A central heating system, probably steam, will be installed. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with cement plaster and brick veneer base. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick and steel, \$10,000. Architect, L. L. Jones, 1. W. Hellman Bldg., L. A. Owner, C. W. Howard. The building will be erected on Pico street, having a frontage of 45 feet and a depth of 125 feet. Interior has been arranged to contain 65 rooms which will be divided into two and three room suites. All apartments will have private bath rooms and wall beds. Interior finish will be of pine with cement floors in the bath rooms and tile wainscot. Plans provide for steam heat, elevator service and a vacuum cleaning system. Marble and tile will be used in the entrance vestibule. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 3 story and base, Class A construction, \$10,000. Architect, C. F. Borton Co., Hybernian Bldg., L. A. Contract price, \$10,000.

LOS ANGELES, CAL.—Apartment house, 3 story and base, frame, \$36,000. Architects, Maine Building and Investment Co., Thorpe Bldg., L. A. Owner, R. P. Smith. Contractors, Maine Building and Investment Co., Thorpe Bldg., L. A. Contract price, \$36,000.

BANKS.

BANDON, ORE.—Bank, 2 story and base, reinforced concrete. Cost not stated. Architect, Ben Ostlund, First National Bank Bldg., Bandon. Owners, First National Bank of Bandon. This work has been mentioned here before when plans were first started. Working drawings have been completed and now a building for the first floor of which is to be devoted to the exclusive use of the bank. Upper floor will be subdivided into modern offices. Interior finish will be of pine and hardwood with some marble ornamental plaster and bronze. Cash and safe deposit room will be included. There will be steam heat. Exterior of the building will be of white cement plaster. Plans are complete and figures are being taken. Bids will be opened on September 10.

BRIDGES AND DAMS.

EDG SANDY CREEK, FRESNO CO., CAL.—Bridge, 1 story and base, frame. Cost not stated. Engineer and Architect, J. C. Beebe, Owners, Fresno County. Plans have been completed and have received the approval of the Board of Supervisors for concrete. A wooden bridge now crosses Edg Sandy Creek. Bids are now being taken for the construction and will be opened on Sept. 2nd. Plans

and specifications can be secured from the County Engineer or from County Clerk R. M. Barnwell, Fresno.

NESIKA, WASH.—Bridge, steel and concrete, \$25,000. Engineers, Bowerman and McElroy, Mutual Life Bldg., Seattle. Owners, Lewis County. The bridge is to be erected over the Cowitz river and will consist of a steel span 230 feet long with abutments. Plans are now being prepared and bids will shortly be called for by the State Highway Commission. Full particulars can be secured from the engineers.

Contracts Awarded.

VISALIA, TULARE CO., CAL.—Bridge, steel and concrete. Cost not stated. Engineers, Engineering Department Santa Fe R. R. Co., L. A. Owners, Santa Fe Railway Co. Contractors, Shattuck-Ehinger Const. Co., L. A. Contract price not stated.

CHURCHES.

SAN FRANCISCO—Relief Home Chapel, 1 story and base, frame, \$12,000. Architect, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids were opened at the last meeting of the Board of Public Works for the construction of a Chapel at the Relief Home Tract. The lowest figures were presented by J. W. Carr at \$9,182. A complete list of these bids appear under the heading of San Francisco, in this issue.

FRESNO, FRESNO CO., CAL.—Church, 1 story and base, reinforced concrete, \$26,000. Architect's name not given. Owners, Gregorian Catholic Church. Plans for a new church edifice which will be erected at the corner of Ventura and M streets have been accepted. Construction will be of the reinforced concrete type throughout. Further particulars will be given in the next issue of the Building and Industrial News.

LOS ANGELES, CAL.—Church, 1 story and base, frame, \$22,000. Architect, Robert H. Orr Van Nuys Bldg., L. A. Owners, Boyle Heights Christian Church. The building will be erected at the corner of Second and Broad streets and will cover an area of 60x120 feet. Besides the main auditorium, which will have a seating capacity of one hundred, plans provide for 12 class rooms. Interior finish will be of pine with maple floors. There will be a plenum system of heating. Art glass windows are specified. Exterior of the building will be covered with cement plaster on metal lath. A clay tile roof will be used. Plans are complete and figures will be called for early in September.

Contracts Awarded.

ROSEBURG, ORE.—Church, 2 story and base, frame, \$15,137. Architects, Tourtelotte and Hummel, Rothchild Bldg., Portland. Owners, First Methodist Church of Roseburg. Contractor H. O. Koepfman, 182 15th street, Portland. Contract price, \$15,137.

LONG BEACH, LOS ANGELES CO., CAL.—Church, 1 story and base, brick and steel, \$86,000. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, Long Beach Congregational Church. Contractor, J. C. Beebe, Long Beach, and Kling Co., Union League Bldg., L. A. Contract price, \$86,000. Note—the building will cover an area of 100x150 feet.

COURT HOUSES.

SAN FRANCISCO—City hall, 4 stories and base. Class A construction. Architects, Blackwell and Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Plans and specifications for the architectural terra cotta and masonry work on the new City Hall have been completed and have received the approval of the Board of Public Works. Bids are now being called for on this work. Figures will be opened on September 3 by the Board of Public Works. Plans and specifications can be obtained from the City Department of Architecture, Temporary City Hall Bldg. An official proposal for this work appears under the heading of Official Advertising in this issue.

FACTORIES & WAREHOUSES.

OAKLAND, CAL.—Warehouse, 1 story brick construction. Cost not stated. Architect, Alvin J. Stern, 1522 Broadway, Oakland. Owner, P. T. McHenry. The building will be erected at the corner of 19th street and Broadway and has been designed for a large warehouse. Construction will be of the heavy mill type. No interior finish is specified. There will be metal window sash and frames and fireproof doors. Exterior of the building will be faced with stock brick. Plans are complete and in the hands of the owners, who will shortly take figures for the general construction.

PORTLAND, ORE.—Warehouse, 2 story and base, brick. Cost not stated. Architects, Emil Schach and Sons, Commonwealth Bldg., Portland. Owners, D. P. Thompson Estate. The building will be erected on the East Side and will cover an area of 100x200 feet. Construction will be of the heavy mill type. There will be elevator service, spiral chutes and an automatic sprinkler system. Metal window sash and frames and fireproof doors are also specified. No interior finish will be used. Exterior of the building will be faced with stock brick. Plans are now being prepared.

Contracts Awarded.

PORTLAND, ORE.—Warehouse, 2 story and base, brick, \$10,000. Architect, Aaron Gould, Worcester Bldg., Portland. Owners National Cold Storage Co., Contractors, Bingham and McClelland, Lumberman's Bldg., Portland. Contract price, \$10,000.

PORTLAND, ORE.—Brewery addition, 2 story and base, brick and steel. Cost not stated. Architect, Joseph Jacobberger, Portland. Owners, Gambrinus Brewery Co., Contractors, The Fredberg Const. Co., Oregonian Bldg., Portland. Contract price not stated.

PORTLAND, ORE.—Warehouse, 2 story and base, reinforced concrete, \$60,000. Architects, Emil Schach and Sons, Commonwealth Bldg., Portland. Owners, Star Sand Co., Contractors, Hurley-Mason Co., Board of Trade Bldg., Portland. Contract price, \$60,000.

FIRE HOUSES.

SANTA ROSA, SONOMA CO., CAL.—Jail, 1 story and base, reinforced concrete. Cost not stated. Architect, J. W. Doherty, Royal Insurance Bldg., S. F. Owners, City of Santa Rosa. Preliminary plans for this building have been prepared by the architect

and approved by the City Council. There will be a cement floor, pine trim and a central heating system. A number of steel cages will be installed. Exterior of the building will be faced with cement plaster. Bids will be called for shortly.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, \$1,800. Architect, none. Owner, J. Harold Johnson, 732 9th avenue, S. F. The building, which has been designed to contain two modern flats, will be erected on the east side of 9th avenue south of Cabrillo, covering an area of 24 feet 10 inches by 57 feet. Interior will be finished in pine with some hardwood floors. There will be an open fire place with brick mantel in each of the living rooms. Some hardwood floors will be used. Tile will be used in the bath rooms and kitchens. Terrazzo will be used in the vestibule. Exterior of the building will be covered with rustic cement plaster on metal lath and brick veneer base. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$4,000. Architect, none. Owners, Leigh and Schultz, 330 5th avenue, S. F. The building will be erected on the east side of 15th avenue near Anza street and will cover an area of 28x52 feet. Interior has been arranged to contain two flats of four and five rooms each with bath. Interior finish will be of pine and redwood with some hardwood floors. Each living room will have an open fire place with brick or tile mantel. Bath rooms will have cement floors and tile wainscot. Tile will also be used in the kitchens. Entrance vestibule will be finished in terrazzo. Exterior of the building will be covered with rustic cement plaster on metal lath and an artificial stone base. Plans are complete and in the hands of the owners who will do the work by Day Labor. All materials are now being purchased.

OAKLAND, CAL.—Flats, 2 story and base, frame, \$5,000. Architect, J. Henry Boehr, Delger Bldg, Oakland. Owner F. G. Troy. The building will be erected on 41st street near Broadway, and has been designed to contain three and four room flats. Interior finish will be of pine with some elm panel and hardwood floors. There will be an open fire place in each of the living rooms. Mantels will be of brick. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner, who will do the work by Day Labor.

GARAGES.

SAN FRANCISCO—Garage, 1 story and base Class A construction, \$25,000. Architect, O'Brien Bros., 1400 13th St., S. F. Owner's name withheld. The building will be erected in the downtown district and has been designed for one of the largest commercial garages in the city. Construction will be fireproof. The structure will also be a storage area of 28,000 square feet. Plans provide for a complete steel frame, reinforced concrete walls, a concrete floor and steel roof trusses.

Metal window sash and frames and special gasoline storage tanks will be installed. Exterior of the building will be faced with cement plaster. Plans are being prepared.

OAKLAND, CAL.—Garage alterations 1 story frame. Cost not stated. Architect, none. Owners, Myers and White. The present frame building at the corner of 25th street and Broadway will be altered into a modern commercial garage. Plans provide for a cement floor. Exterior of the building will be covered with cement plaster on metal lath. Considerable machinery will be purchased. Plans are complete and in the hands of the owners. Work is now out for figures.

GOVERNMENT WORK AND SUPPLIES.

PROSPECTIVE BIDDERS. Supervising Architect.

Specifications for work under the office of the supervising architect have been furnished to the following firms in addition to those previously noted in these columns:

Pasadena, Cal., Construction, September 11.

King Lumber Co., Charlottesville, Va.
Hiram Lloyd Building and Construction Co., St. Louis, Mo.

J. E. & A. L. Pennock, 1003 Land Title Building, Philadelphia, Pa.
M. Yeager & Son, Danville, Ill.
Dieter & Wenzel Construction Co., Wichita, Kan.

J. W. Wiese, 1301 City National Bank Building, Omaha, Neb.

Wise Granite Co., Richmond, Va.
Sound Construction and Engineering Co., Central Building, Los Angeles, Cal.
Southwest Contractor and Manufacturing Co., 506 Douglas Building, Los Angeles, Cal.

J. W. Atkinson, Colorado Springs, Colo.

E. Schuler, Santa Barbara, Cal.

Sound Construction Co., Seattle, Wash.

F. J. Anweg, 214 Kearny street, San Francisco, Cal.

Campbell Building Co., Salt Lake City, Utah.

San Francisco, Cal., Vault Construction, September 2.

Diebold Safe and Lock Co., Canton, Ohio.

B. F. Sturtevant Co., Washington, D. C.

Skinker & Garrett, 417 Evans Building, Washington, D. C.

David Construction Co., Union Trust Building, Washington, D. C.

Wells Construction Co., 619 Witherspoon Building, Philadelphia, Pa.

Hygeis Contracting Co., 1133 Broadway, New York City.

Duplex Electric Co., 514 W. 57th street, New York City.

P. F. Gormley Co., Union Trust Building, Washington, D. C.

Carbon Steel Co., foot of 32d street, Pittsburgh, Pa.

E. A. Ohmer Co., 3 W. 29th street, New York City.

York Safe and Lock Co., York, Pa.

Hall's Safe Co., Spring Grove avenue, Cincinnati, Ohio.

Herring-Hall-Marvin Safe Co., 400 Broadway, New York City.

Manganese Steel Safe Co., 253 Broadway, New York City.

Mosier Safe Co., Hamilton, Ohio.

Remington & Sherman Co., 626 Richmond street, Philadelphia, Pa.

Crossarms, Insulators, etc., Boise Project.

The following bids were opened at the U. S. Reclamation Service, Los Angeles, Cal., for furnishing crossarms, insulators, etc., for the Boise project, Idaho:

Item 1, 530 crossarms; 2 galv. arm braces; 3, 1,600 insulator pins; 4, 1,600 insulators; 5, 90 strain insulators; 6, 150 galv. two bolt guy wire clamps; 7, 50 galv. guy anchors.

Pacific State Electric Co., Los Angeles, Cal., item 1, \$121.90; 2, \$145.52; 3, \$26.40; 4, \$60.40; 5, \$6.55; 6, \$15.30; 7, \$77.50.

B. P. Kieruff, Jr., & Co., Los Angeles, Cal., item 1, \$180.20; 2, \$125.88; 3, \$27.60; 4, \$52; 5, \$7.20; 6, \$23.65; 7, \$74.

Pierson Roeding Co., Los Angeles, Cal., item 1, \$209.88; 2, \$189.70; 3, \$26.40; 4, \$41.90; 5, \$6.53; 6, \$23.46; 7, \$515.50.

Electric Appliance Co., San Francisco, Cal., item 1, \$233.20; 2, \$112.04; 3, \$27.20; 4, \$41.00; 5, \$6.75; 6, \$11.94; 7, \$82.05.

Port Townsend, Wash., Boiler

The contract for installing two new heating boilers in the U. S. public building at Port Townsend, Wash., has been awarded to the Rautman Plumbing & Heating Co., Seattle, Wash., at \$2,290.

Earth Work and Structures, Eec. Service.

The following bids were opened August 6 at Malta, Mont., for earth work and structures, second unit, Dodson-North Canal, Milk River project, Mont.:

Item 1, excavation; 2, excavation; 3, structures, etc.

Hauer & Sim, Dooley Building, Salt Lake City, Utah, item 1, \$20,415; 2, \$22,700; 3, \$23,329.60.

J. E. Hilton Throat Bros. & Jolly, Billings, Mont., item 1, \$21,795; 2, \$23,470; 3, \$24,649.50.

Hayden Bros., Spaulding Building, Portland, Oreg., item 1, \$23,875; 2, \$26,000; 3, \$29,161.10.

Nelson & O'Neill Yankton, S. Dak., item 1, \$23,196.50; 2, \$23,481.50.

Tobbs & Taggart, Cowley, Wyo., item 1, \$23,270; 2, \$23,470.

Charles Wilbitt & Co., Malta, Mont., item 1, \$25,275; 2, \$26,575.

Lamoureux Bros. Co., Omaha, Neb., item 1, \$28,047.50; 2, \$39,487.50.

Denning, Congleton & Monson, Malta, Mont., item 2, \$26,610.

James Burton, Delhi, Iowa, item 2, \$23,343.

John S. Hanson, Wilbitt, N. Dak., item 3, \$39,651.70.

Spur and Side Track, Fort D. A. Russell.

The following is a schedule of the bids received at the office of the consulting Q. M. Fort D. A. Russell, Wyo., for the reconstruction of spur and side tracks at this post:

R. N. La Fontaine, Cheyenne, Wyo., approximately 6,547 lin ft. 80-lb. steel, \$29,000; 56-lb. steel, \$23,000.

McCarthy & Bartlett, Cheyenne, Wyo., 6,547 lin ft. 80-lb. steel, \$24,000; 56-lb. steel, \$19,510.

Mason Contracting & Mfg. Co., Fort Collins, Colo., 6,547 lin ft. 80-lb. steel, \$24,000; 56-lb. steel, \$20,522.21.

H. Stangs, Young & Dumm, Cheyenne, Wyo., 6,547 lin ft. 80-lb. steel, \$23,700; 56-lb. steel, \$22,000.

Hastings, Young & Dumm, Cheyenne, Wyo., "standard railroad crossing" is used, No. 16 steel, \$23,875; 56-lb steel, \$22,400.

FOUR—Aug. 20th.—BERRY Motor Truck, 1, S. Marine Corps.

Specifications are now in course of preparation at the office of the U. S. Marine Corps covering the purchase of a 6,000 lb. motor truck for use at the marine barracks, Naval Station, Pearl Harbor, T. H. It has not yet been definitely decided at what seaport delivery is to be made or the exact date when bid will be opened.

Building 59, Puget Sound, Wash.

The advertisement calling for bids to be opened September 6 at the bureau of yards and docks for particular construction and fire proofing building No. 59, at the navy yard, Puget Sound, has been withdrawn and the work indefinitely postponed.

—HALLS & SOCIETY BLDGS.—

SAN FRANCISCO Lodge hall, 3 story and base, brick and steel, \$35,000. Architect, Charles Paff, Merchants' Exchange Bldg., S. F. Owners, Carpenters' all Association. Working drawings for this building have been completed and bids are now being taken on the general contract. The structure has been designed with stores on the first floor and lodge halls and offices on the upper two floors. There will be a central heating system and elevator service. Stores will have patent fronts and plate glass windows. Modern plumbing and electric work will be installed. Exterior of the building will be faced with pressed brick. The building will be erected at the corner of McCoppin and Valencia streets. Interior finish will be largely of pine, with some hardwood. Plans and specifications can be secured from the Secretary of the Carpenters' Hall Association at 894 Mission street. Two propositions are being figured: Proposition A calling for a figure on the entire work and Proposition B calling for all work except carpentry.

OAKLAND, CAL.—Lodge hall and stores, 1 story and base, brick, steel and reinforced concrete, \$65,000. Architect, J. Henry Boehringer, Deiger Bldg., Oakland. Owners, L. O. P. Hall Association. This building has been mentioned here before when plans were first being prepared. The structure will be erected at the northwest corner of 11th and Franklin streets covering a considerable ground area. There will be a number of stores on the first floor and office and lodge rooms on the upper floors. Plans provide for steam heat and elevator service. Interior finish will be of pine and hardwood with some marble wainscot. There will be a large open fire place with brick mantel. Stores will have large glass display windows in patent fronts. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Bids are to be submitted on basis of the entire work and segregated contract. Bids will be opened on September 1st.

BERKELEY, CALIFORNIA Co., CAL.—Lodge hall, 3 story and base, reinforced concrete, \$120,000. Architect, William Ratcliff, First National Bank Bldg., Berkeley. Owners, Berke-

ley Elks' Hall Association. Preliminary plans only have been prepared for this work and details of construction are not available at this time. The organization has secured its site and as soon as all requirements of the building have been fully settled upon, working drawings will be started and contracts let. Further mention will be made of the work in those columns.

BURLINGAME, SAN MATEO CO., CAL.—City Hall, 2 story and base, brick and steel. Cost not stated. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owners, City of Burlingame. This building has been mentioned here before when the architect was first commissioned to prepare plans. The building will cover a considerable ground area. Provision has been made in the plans for housing all of the city officials, fire and police departments and for a large council chamber. There will be steam heat and a fireproof vault. Interior finish will be of pine and hardwood with some hardwood floors. Metal window sash and frames will be used. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are now being called. Bid will be opened on September 2nd. Plans can be secured from the architect or from the City Clerk. An official proposal appears under the heading of Official Advertising in this issue.

Contracts Awarded.

McMINNVILLE, ORE.—Lodge hall, 3 story and base, brick and steel. Cost not stated. Architect C. C. Robins, Ainsworth Bldg., Portland. Owners, McMinnville Ma-sonic Hall Association. Contractor Robert Shelley, Gerlinger Bldg., Portland. Contract price not stated.

HOSPITALS.

SAN RAFAEL, MARIN CO., CAL.—County Infirmary, 2 story and base, reinforced concrete, \$40,000. Architect, Thomas O'Connor, 104 D street, San Rafael. Owners, Marin County. The building has been designed in the Mission style and will be erected in the Lucas Valley, a short distance out of San Rafael. There will be a general administration section, two wards, dining rooms, kitchens and dormitories. Provision has also been made for a modern operating room. Interior finish will be of pine and redwood with considerable marble and tile. Plans provide for steam heat, a vacuum cleaning system and hot water supply. Exterior of the building will be faced with cement plaster and a clay tile roof will be used. Plans are complete and now out for figures. Bids will be opened by the Board of Supervisors on September 2nd. An official proposal appears in another column of this paper.

LOS ANGELES, CAL.—Hospital, 4 story and base, reinforced concrete. Cost not stated. Architects, Garrett and Farrell, Currier Bldg., L. A. Owners, Methodist Hospital Association. The building will be erected on South Hope street near Jefferson and will cover an area of 111x60 feet. Plans are so arranged that two additional wings, each four stories in height and 15x137 feet, may be added later. Construction will be fireproof throughout with reinforced concrete floors, hollow tile interior partitions and concrete

roof slabs. Interior finish will be of pine and white enamel. Tile will be used in the bath rooms and operating rooms. Plans provide for steam heat, two elevators, dumb waiters, hot and cold water supply, and vacuum cleaning. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

HOTELS.

SAN FRANCISCO—Hotel, 6 story and base, reinforced brick, \$65,000. Architect, G. Albert Lansburgh, 709 Mission street, S. F. Owner, A. Eisenberg. This work was mentioned here when the architect was first commissioned to prepare the plans. Working drawings are nearly complete and figures will be called for about the first of the month. The structure will be erected on the north side of Sutter street between Jones and Leavenworth streets, covering a considerable ground area. There will be a store besides the hotel lobby on the ground floor and in the neighborhood of 100 rooms on the upper floors. A large percentage of the rooms will have private baths. Interior finish will be of pine with some hardwood veneer. Ornamental plaster will be used in the lobby. Plans provide for steam heat, a hot and cold water supply, elevator service and a vacuum cleaning system. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. Bids will be called for early in September.

SAN FRANCISCO—Hotel, 6 story and base, Class C construction, \$40,000. Architects, O'Brien and Werner, Foxcroft Bldg., S. F. Owner, Thomas O'Bay. The building will be erected on the south side of O'Farrell street east of Larkin street, covering an area of 49x90 feet. There will be stores on the first floor and the entrance to the hotel lobby, which will be on the second floor. Upper floors will contain in the neighborhood of 90 rooms with several baths on each floor. Interior finish will be largely of pine. Bath rooms will have composition floors and tile wainscot. Hot and cold running water will be supplied to all rooms. Plans provide for steam heat, elevator service and a vacuum cleaning system. Exterior of the building will be faced with pressed brick. Plans are being prepared.

OAKLAND, CAL.—Hotel, 7 story and base, brick and steel. Cost not stated. Architect, F. D. Voorhees Central Bank Bldg., Oakland. Owner, H. A. Powell. The building has been mentioned in these columns before. Plans for the brick and carpentry work are now on the market for figures. There will be stores on the first floor and in the neighborhood of 110 guest rooms on the upper floors. Interior finish will be of pine throughout. Steam heat, elevators and a vacuum cleaning system will be installed. Exterior of the building will be faced with pressed brick.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architects Eisen and Son, Wilcox Bldg., L. A. Owner, Roy Blumenthal. This building is to be erected at the southwest corner of 3rd and Figueroa streets covering an area of 50x70 feet. There will be two stores

besides the hotel lobby and offices on the first floor. Upper floors will be subdivided into 45 guest rooms and a number of baths. Interior finish will be of pine and elm panels. Plans provide for steam heat, elevator service and a hot water supply. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. Stores will have plate glass display windows in patent store fronts. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architect, L. L. Jones, 1. W. Hellman Bldg., 12. A. Owner, D. F. Hill. The building will be erected at the corner of 6th and Wall street and will cover an area of 79x129 feet. There will be four stores on the first floor, the hotel lobby and office. Upper floors will contain a total of 129 guest rooms and a number of baths. Bath rooms will have cement floors and tile wainscot. Plans provide for steam heat, elevator service, vacuum cleaning system and hot water system. Interior finish will be largely of pine. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are complete and now out for figures.

ALKI POINT, WASH.—Hotel, 3 or 4 story and base, reinforced concrete, \$100,000. Architects, Beld and Mendel, Denny Bldg., Seattle. Owner, Ferdinand Schmitz. Construction will not be started before early in the spring and the site has not been fully determined. Construction will be deeproof with reinforced concrete walls, floors and roof slabs. Interior partitions will be of metal lath and plaster. Interior finish will be of pine with some hardwood veneer. There will be steam heat, elevator service and a vacuum cleaning system. Hot and cold running water will be supplied to all rooms. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

WATTS, LOS ANGELES, CAL.—Library, 1 story and base, brick, \$10,000. Architect, Elmore H. Jefferson. Citizens' National Bank Bldg., 12. A. Owners, Town of Watts. The building will be designed in the classic style and will cover an area of 70x30 feet. Plans provide for one large reading room, librarian's office and stack room. Metal shelves will be specified. Interior finish will be of pine with some hardwood. Maple floors will be used. A central heating system, probably furnace heat, will be installed. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

Contracts Awarded.

SAN FRANCISCO—Hotel, 2 story and base, brick and steel, \$20,000. Architect, MacDonald and MacDonald, Holbrook Bldg., S. F. Owner, Reuben Lloyd, Contractors, MacDonald and Kahn, Rialto Bldg., S. F. Contract price, \$50,000. Note the contractors are now taking subinquiries of the various parts of the work.

LIBRARIES.

BAKERSFIELD, KERN CO., CAL.—Library, 1 story and base, brick. Cost not stated. Architect, O. L. Clark, Crowder Bldg., Bakersfield. Owners, City of Bakersfield. The building has been mentioned in these columns be-

fore when plans were first started. Bids will be opened on August 27th. A complete list of these figures will appear in the next issue of the Building and Industrial News.

RAILROAD CONSTRUCTION—AND EQUIPMENT.

SAN FRANCISCO—Passenger station, 1 story, brick and steel. Cost not stated. Architect's name withheld. Owners, Ocean Shore Railway Co., 11th street, S. F. Plans have been prepared for a modern station which will be erected on the company's property on the west side of 11th street between Market and Mission streets. A petition is now before the Street Committee of the Supervisors for permission to cross the Mission street with the company tracks. Construction will be started as soon as this permission is granted. Further mention will be made of the work when bids are called.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, Theo. S. Boehm, David Hewes Bldg. S. F. Owners, Packman & Co. The dwelling has been designed to contain seven rooms and bath and will be erected on the south side of Anza street near 13th avenue. Interior finish will be of pine throughout with hardwood floors in the living room, dining room and reception hall. There will be furnace heat and large open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with rustic and brick veneer base. Plans are complete and the work will be done by day labor.

SAN FRANCISCO—Residence, 2 story and base, frame. Cost not stated. Architects, Righetti and Headman, Sherman Bldg., S. F. Owner, Mr. Ross. The house will be erected on Union street and has been designed for an eight-room dwelling with bath and sleeping porch. Interior finish will be of pine with some hardwood. Hardwood floors will be used in the principal rooms. Plans provide for a central heating system, probably hot air, and open fire place. Mantel will be of brick or tile. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Some brick veneer will also be used. Plans are complete and figures are now being taken.

SAN FRANCISCO—Residence, 2 story and base, frame, \$5,000. Architect, William H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, Westgate Park Co. and A. S. Cunningham. The dwelling will be erected in St. Francis Wood and has been designed for an eight room house with two baths and sleeping porch. Interior will be finished in pine and hardwood. There will be furnace heat and open fire places. Mantels will be of brick and tile. Hardwood floors will be used in the living room, dining room and reception hall. Tile will be used in the bath rooms. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Residence, 2, 2 story and base, frame, \$2,500 each. Architect, D. Olsen, 416 29th avenue, S. F. Owner, George C. Toddhunter, 449 29th avenue. These houses will be erected on the east side of Ashbury street north of 17th. Each house has been designed to contain seven rooms and bath. Interiors will be finished in pine with some elm veneer and hardwood floors. There will be furnace heat and open fire places. Mantels will be of brick. Bath rooms will have composition floors and tile wainscot. Tile will also be used in the kitchens. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner, who will do the work by Day Labor. All materials are now being purchased.

OAKLAND, CAL.—Bungalow, 1½ story and base, frame, \$5,000. Architect, Frank M. May, 2145 Center street, Berkeley. Owner, G. H. Harding. The house has been designed to contain seven rooms, bath and sleeping porch and will be erected on the south side of Keith avenue. All interior finish will be of pine. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the bungalow will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$7,000. Architects, United Home Builders, 1762 Broadway, Oakland. Owner, Dr. Moyer. This dwelling will contain eight rooms, two baths and sleeping porch. One of the most beautiful home sites in Piedmont has been selected for the residence and construction will be undertaken at once. Interior finish will be of pine, hardwood and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster and rustic. Plans are complete and work will be done by Day Labor under the direction of the architects. All materials are now being purchased.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Mrs. H. C. Newman. The dwelling will be erected in Craymont Park and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be largely of pine with some white enamel and hardwood. Hardwood floors will be used in the living room, dining room, and reception hall. There will be furnace heat and open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and now out for figures.

OAKLAND, CAL.—Bungalow, 1 story and base, frame, \$2,500. Architect, Edwin J. Stern, 1722 Broadway, Oakland. Owner, J. F. Chambers. The house will contain seven rooms and

bath and will be erected at the south-west corner of 61st street and Colby avenue. Interior finish will be entirely pine. Hardwood floors will be used in the two principal rooms. Plans provide for a large open fire place in the living room with tile or brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

ALAMEDA, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$3,000. Architect, William Dufour, 2326 Santa Clara avenue, Alameda. Owner's name withheld. The dwelling will be erected on Encinal avenue near Union street and has been designed to contain six rooms and bath. Interior will be finished with pine and elm panels. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustic. Plans are complete and figures are being taken.

OAKLAND, CAL.—Bungalows, 8, 1 story and base, frame, \$2,500 each. Architect Alvin J. Stern, 1522 Broadway, Oakland. Owner, Roger Coit, 1522 Broadway, Oakland. These houses will be erected at the corner of 52d and Shattuck avenue. Each has been designed to contain six rooms and bath. Interiors will be finished in pine with some redwood and elm panels. Hardwood floors will be used in the two principal rooms. All living rooms will have open fire places and tile or brick mantels. Tile will also be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster on metal lath, rustic and shingles. Plans are complete and in the hands of the owner, who is a well known Oakland builder, and will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, J. E. Kottle, 2578 23rd avenue, S. F. The dwelling has been designed for a six room house with bath. Interior finish will be of pine throughout. There will be a large open fire place in the living room with brick mantel. Some hardwood floors will be used. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic and shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

ALVARADO, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$5,000. Architect, Henry H. Myers, Kohl Bldg., S. F. Owner, Mr. A. May. The dwelling has been designed for a country home and will contain in the neighborhood of eight rooms, baths and sleeping porch. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will have the tile wainscot and tile will also be used in the kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath

plans are complete and figures are now being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, C. J. Pfirang, 5489 Claremont avenue, Oakland. The house will be erected on Kale avenue near College avenue and will contain seven rooms and bath. Interior finish will be largely of pine although some hardwood will be used in the living and dining rooms. There will be hardwood floors, brick or tile mantels and furnace heat. Open fire places will also be installed. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor. All material is now being purchased.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1½ story and base, frame, \$3,000. Architect, none. Owners, F. R. Peake Co., 2127 University avenue, Berkeley. The dwelling has been designed for a seven room house with bath and sleeping porch and will be erected on Yolo street near Bonita avenue. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the bungalow will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN JOSE, SANTA CLARA CO., CAL.—Bungalow, 1 story and base, frame, \$1,200. Architect, none. Owner, F. Sanfilippo, 1298 Orchard street, San Jose. The house will contain five rooms and bath. Interior finish will be of pine and redwood. There will be an open fire place in the living room with the mantel. Exterior of the dwelling will be covered with rustic and shingles. Plans are complete and work will be done by Day Labor.

LINDSAY, TULARE CO., CAL.—Residence, 2 story and base, frame, \$12,000. Architect, J. Carl Thayer, Fresno. Owner, Mrs. George Gibson. The dwelling will contain 14 rooms, baths and sleeping porch. Interior finish will be of pine, hardwood and white enamel. Hardwood floors will be used in the principal rooms. Bath rooms will have composition floors and tile wainscot. Plans provide for a central heating system, probably furnace heat, and open fire places. Mantels will be of brick and tile. Tile will be used in the kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

Contracts Awarded.

PROPOSALS FOR TERRA COTTA

MASSONIA WORKS.
OFFICE OF THE BOARD OF PUBLIC WORKS OF THE City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 3rd day of September, 1913, for doing the following work, including the furnishing of the necessary labor and materials therefor, to-wit:

The architectural terra cotta and masonry work for the City Hall.

Progressive payments will be made.

Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works, and completed within five hundred (500) calendar days thereafter. The amount of bond for faithful performance of contract has been fixed at \$30,000.00.

All proposals must be accompanied by a check, certified by a responsible bank, payable to the order of the clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposed work. Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms. The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works.

E. J. CHURCHILL, Secretary.

PROPOSALS

For Furnishing, Constructing and Installing a Complete Electric Starter and Lighting System for Automobile No. 9 of the San Francisco Fire Department.

OFFICE OF THE BOARD OF FIRE COMMISSIONERS, San Francisco, Cal.
In accordance with a resolution of the Board of Fire Commissioners duly passed August 1, 1913, sealed proposals will be received in the office of the Board of Fire Commissioners, August 29, 1913, between the hours of 8:30 and 9 o'clock a. m., for furnishing, constructing and installing a complete electric starter and lighting system for Automobile No. 9 of the San Francisco Fire Department.

In strict accordance with the specifications and conditions contained in the proposal blank prepared by the Board of Fire Commissioners on file, and copies of which may be obtained at the office of said Board, 1231 Market Street, San Francisco, Cal.

BOARD OF FIRE COMMISSIONERS
FRANK T. KENNELLY, Secretary.

PROPOSALS

For furnishing three (3) each of 65-foot and 50-foot trussed extension ladders each in raising device and equipment, for the San Francisco Fire Department.

OFFICE OF THE BOARD OF FIRE COMMISSIONERS, San Francisco, Cal.
In accordance with a resolution of the Board of Fire Commissioners, duly passed August 1, 1913, sealed proposals will be received in the office of the Board of Fire Commissioners, August 29, 1913, between the hours of 8:30 and 9 o'clock a. m., for furnishing and delivering three (3) each of 65-foot and 50-foot trussed extension ladders, for use of the San Francisco Fire Department.

The specifications and conditions contained in the proposal blank prepared by the Board of Fire Commissioners on file, and copies of which may be obtained at the office of said Board, 1231 Market Street, San Francisco, Cal.

BOARD OF FIRE COMMISSIONERS
FRANK T. KENNELLY, Secretary.

NOTICE TO CONTRACTORS.

NOTICE is hereby given that on Wednesday, the 3rd day of September, 1913, up to the hour of 2 o'clock p. m., the Board of Supervisors of Marin County will receive proposals for the construction of a Marin County Jail, to be located in Lucerne, California.

Sealed proposals for furnishing and erecting a brick and masonry building for a jail and furnace, to be located in Lucerne, California, and

plements necessary for the construction and completion of said "Marin County Jail" in strict accordance with the plans and specifications therefor adopted by this Board on the 13th day of August, 1913.

Each bid must be accompanied by a certified check for ten per centum of the amount bid.

The successful bidder must be prepared to execute a bond in a sum equal to one-half of the amount bid to be approved by this Board for the faithful performance of such contract, and a bond for an equal sum for the payment for all material, men and labor, furnishing material or labor for such work.

The Board reserves the right to reject any and all bids.

The plans hereinbefore referred to can be seen at the office of the County Clerk of Marin County.

Dated August 15th, 1913.
ROB. E. GRAHAM,
County Clerk and Clerk of the Board of Supervisors of Marin County.

NOTICE TO CONTRACTORS.

Sealed bids will be received at the office of the Comptroller, University of California, Berkeley, Calif., at or before 10:00 a. m., Monday, September 15th, 1913, for excavating, laying tile, placing 15" boxes, etc., and back-filling of about 21,000 lineal feet of drainage ditches on the Kearney Ranch, near Fresno, California, as per specifications on file at said office.

No bids will be received unless accompanied by a certified check or bond in favor of the undersigned, equal to ten per cent. of the bid, to secure execution of contract by successful bidder. The right is reserved to reject any or all bids.

THE REGENTS OF THE UNIVERSITY OF CALIFORNIA

NOTICE TO CONTRACTORS.

BURLINGAME CITY HALL.

Sealed proposals will be received by the Board of Trustees of the City of Burlingame, California, at 8:00 o'clock p. m., September 2nd, 1913, for all material and labor necessary for the construction of the Burlingame City Hall in accordance with the plans, specifications and general conditions for said City Hall which may be obtained from the Burlingame City Clerk at the office of Burlingame or at the office of Charles Peter Weeks, at the architect, Mutual Savings Bank Building, San Francisco, Cal.

A bond satisfactory to the owner in the sum of ten per cent of the contract price will be required for the faithful performance of the contract.

All bids shall be on the forms furnished with the plans and specifications.

The right is reserved to reject any and all bids.

Each bid shall be accompanied by a certified check for Twenty-five per cent of the amount bid, payable to R. Murphy, City Clerk of Burlingame, which check shall be forfeited to the City of Burlingame by the successful bidder if he fails to enter into a contract or to furnish acceptable work with said City or fails to furnish acceptable surety bonds within Ten (10) days after the award.

Non-fulfillment of the above conditions by the successful bidder's check shall be returned to him. All other checks shall be returned to the proper parties.

A deposit of Twenty-five (\$25.00) must be made for each set of plans and specifications, which Twenty-five (\$25.00) dollars will be refunded upon return of the plan and specifications.

R. MURPHY, City Clerk.

PROPOSALS FOR PIPE.

PIPE Department of the Interior, U. S. Reclamation Service, Washington, D. C. Engineer Office, Chicago, Ill.—Sealed proposals for furnishing fir timber for use in bridge, etc., will be received at this office until 10 a. m., September 5, 1913, and then publicly opened. Information on application to this office or to F. S. Engineer Office, Seattle, Wash. GEO. A. ZINN, Lt. Col. Engrs.

PROPOSALS FOR PIER WORK.

PIER WORK—Sealed proposals, indorsed "Proposals for Extension of Pier" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m., September 13, 1913, and then publicly opened, for construction of creosoted pile and timber extension to Pier No. 8, at the navy yard, Puget Sound, Wash. Amount available \$100,000. Plans and specifications can be obtained on application to the bureau or to the commandant of the navy yard named. H. R. STANFORD, chief of bureau.

PROPOSALS FOR MAGAZINE BUILDING.

BUILDING—Sealed proposals indorsed "Proposals for Magazine Buildings" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m., September 20, 1913, and then there publicly opened, for seven magazine buildings at the United States naval station, Pearl Harbor, Hawaii. Estimated cost, \$125,000. Plans and specifications can be obtained on application to the bureau or to the commandant of the station named. H. R. STANFORD, chief of bureau.

PROPOSALS FOR REINFORCED CONCRETE CULVERTS.

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors of the County of San Mateo, State of California, up to the hour of 10 o'clock a. m. on Tuesday, September 2, 1913, for constructing a reinforced concrete culvert, on and walls on county road leading from San Bruno to Crystal Springs, being third bridge west of Mission road, in the First Road District, as per plans and specifications prepared by the county surveyor and adopted by the Board of Supervisors on Monday, August 19, 1913, which said plans and specifications are now on file in the office of the clerk of said Board where same may be inspected.

All bids must be addressed to the clerk of said Board of Supervisors at Redwood City, and each bid must be accompanied by a certified check on some reliable bank in an amount equal to at least ten per cent of bid, made payable to the undersigned Clerk of said Board of Supervisors, same to be forfeited to the County of San Mateo as liquidated damages in case the party to whom the contract shall be awarded shall fail, neglect or refuse to execute and file within the time for the award of said contract, a bond to be approved by the Chairman of the Board of Supervisors of said county in an amount not exceeding the amount to be entered into a written contract with said county in accordance with said plans and specifications and the bid thereon.

All bids from contractors must be filed with the clerk for the completion of said work, also the cost of concrete in place, per cubic yard, to be used in estimating the value of extra work, if required.

The right is reserved to reject any and all bids.

JOS. H. NASH

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

APARTMENT HOUSE—3 story, and base, \$15,000. San Francisco, Architects, Righetti and Headman, Phelan Bldg., S. F. Owner, Mr. Faville. The building will be erected on property at the corner of Green and Montgomery streets, covering a considerable ground area. There will be stores on the first floor and a number of two and three room suites on the upper floors. Interior finish will be of pine throughout. All suites will have wall beds and private bath rooms. Plans provide for steam heat. Bath rooms will have cement floors and tile wainscot. Entrance will be finished in marble and tile. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and figures are being taken.

APARTMENT HOUSE—6 story and base, brick and steel, \$100,000. San Francisco, Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Starr and Larsen. This building will be erected at the southeast corner of Sutter and Jones streets, covering an area of 71 feet 9 inches by 89 feet 9 inches. Interior has been arranged for 18 large suites besides stores and lobby on the first floor. Interior finish will be of pine with some elm panels and hardwood floors. There will be steam heat, vacuum cleaning system, elevator service and a hot water supply. Bath rooms will have cement floors and tile wainscot. All apartments will be equipped with wall beds and will have private bath rooms. Exterior of the building will be faced with pressed brick. Contracts for the steel work and foundations have been let. Bids are now being taken on all other parts of the work. Contracts will be segregated.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco, Architect, Theo. S. Boehm, David Howes Bldg., S. F. Owners, Pockman and Co. The dwelling has been designed to contain seven rooms and bath and will be erected on the south side of Anza street near 13th avenue. Interior finish will be of pine throughout with hardwood floors in the living room, dining room and reception hall. There will be furnace heat and large open fire places. Mantels will be of oak. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with rustic and brick veneer base. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame. Cost not stated. San Francisco, Architects, Righetti and Headman, Phelan Bldg., S. F. Owner, Mr. Ross. This house will be erected on Union street and has been designed for an eight room dwelling with bath and sleeping porch. Interior finish will be of pine with some hardwood. Hardwood floors will be used in the principal rooms. Plans provide for a central heating system, probably hot air, and open fire place. Mantel will be of brick or tile.

Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Some brick veneer will also be used. Plans are complete and figures are now being taken.

RESIDENCE—2 story and base, frame, \$5,000. San Francisco, Architect, William H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, Westgate Park Co. and A. S. Cunningham. The dwelling will be erected in St. Francis Wood and has been designed for an eight room house with two baths and sleeping porch. Interior will be finished in pine and hardwood. There will be furnace heat and open fire places. Mantels will be of brick and tile. Hardwood floors will be used in the living room, dining room and reception hall. Tile will be used in the bathrooms. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCES—2, 2 story and base, frame, \$3,500 each. San Francisco, Architect, D. Olsen, 46 29th avenue, S. F. Owner, George C. Todhunter, 419 29th avenue. These houses will be erected on the east side of Ashbury street north of 17th. Each house has been designed to contain seven rooms and bath. Interiors will be finished in pine with some elm veneer and hardwood floors. There will be furnace heat and open fire places. Mantels will be of brick. Bath rooms will have composition floors and tile wainscot. Tile will also be used in the kitchens. Interiors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

APARTMENT HOUSE ALTERATIONS—2 story brick and frame, \$16,000. San Francisco, Architect, Henry H. Meyer, Kohl Bldg., S. F. Owners, Goldberg-Bowen & Co. The building now occupied by the owners at the southwest corner of Haight and Masonic avenue will be added to and two additional stories constructed. Upper floors will be subdivided into modern apartments of two and three rooms. Interior finish will be of pine with some elm panels and hardwood floors. A central heating system will be installed. Tile will be used in the bath rooms. Present store will be unchanged. Exterior of the new portion of the building will be covered with brick veneer and terra cotta. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, frame, \$17,000. San Francisco, Architect, Frank S. Holland, 100 Haight street, S. F. Owner's name withheld. The building has been mentioned in these columns before when plans were first started. The building will cover a considerable ground area and will be arranged with a store on the first floor and suites of two and three rooms above. Interior finish will be of pine throughout. All suites will have wall beds and private bath

rooms. A central heating system, probably steam, will be installed. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with cement plaster and brick veneer base. Plans are complete and figures are being taken.

RELIEF HOME CHAPEL—1 story and base, frame, \$12,000. San Francisco, Architect, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids were opened at the last meeting of the Board of Public Works for the construction of a chapel at the Relief Home Tract. The lowest figures were presented by J. W. Carr at \$9,482. A complete list of these bids appear under the heading of San Francisco, in this issue.

FLATS—2 story and base, frame, \$4,000. San Francisco, Architect, none. Owner, J. Harold Johnson, 732 9th avenue, S. F. The building, which has been designed to contain two modern flats will be erected on the east side of 9th avenue south of Cabrillo, covering an area of 24 feet 10 inches by 57 feet. Interior will be finished in pine with some hardwood floors. There will be an open fire place with brick mantel in each of the living rooms. Some hardwood floors will be used. Tile will be used in the bathrooms and kitchens. Terrazzo will be used in the vestibule. Exterior of the building will be covered with rustic, cement plaster on metal lath and brick veneer base. Plans are complete and in the hands of the owner who will do the work by Day Labor.

FLATS—2 story and base, frame, \$4,000. San Francisco, Architect, none. Owners, Leigh and Schultz, 330 8th avenue, S. F. The building will be erected on the east side of 15th avenue near Anza street and will cover an area of 28x52 feet. Interior has been arranged to contain two flats of four and five rooms each with bath. Interior finish will be of pine and redwood with some hardwood floors. Each living room will have an open fire place with brick or tile mantel. Bath rooms will have cement floors and tile wainscot. Tile will also be used in the kitchens. Entrance vestibule will be finished in terrazzo. Exterior of the building will be covered with rustic, cement plaster on metal lath and an artificial stone base. Plans are complete and in the hands of the owners who will do the work by Day Labor. All materials are now being purchased.

GARAGE—1 story and base, Class A construction, \$35,000. San Francisco, Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. The building will be erected in the downtown district and has been designed for one of the largest commercial garages in the city. Construction will be fireproof. The structure will have a storage area of 28,000 square feet. Plans provide for a complete steel frame, reinforced concrete walls, a concrete floor and steel roof trusses. Metal window sash and frames and special gasoline storage tanks will be installed. Exterior of the building will be faced with cement plaster. Plans are being prepared.

LOBBY HALL, 3 story and base, brick and steel, \$75,000. Architect, Charles Poff, Merchants' Exchange Bldg., S. F. Owners, Carpenters' Hall Association. Working drawings for

this building have been completed and bids are now being taken on the general contract. The structure has been designed with stores on the first floor and lodge halls and offices on the upper two floors. There will be a central heating system and elevator service. Stores will have patent fronts and plate glass windows. Modern plumbing and electric work will be installed. Exterior of the building will be faced with pressed brick. The building will be erected at the corner of McCoppin and Valencia streets. Interior finish will be largely of pine with some hardwood. Plans and specifications can be secured from the secretary of the Carpenters' Hall Association at 804 Mission street. Two propositions are being figured: Proposition A calling for a figure on the entire work and Proposition B calling for all work except carpentry.

COUNTY INFIRMARY—2 story and base, reinforced concrete \$10,000. San Rafael, Marin Co., Cal. Architect Thomas O'Connor, 104 D street, San Rafael, Owners, Marin County. The building has been designed in the Mission style and will be erected in the Lucas Valley, a short distance out of San Rafael. There will be a general administration section, two wards, dining rooms, kitchens and dormitories. Provision has also been made for a modern operating room. Interior finish will be of pine and redwood with considerable marble and tile. Plans provide for steam heat, a vacuum cleaning system and hot water supply. Exterior of the building will be faced with cement plaster and a clay tile roof will be used. Plans are complete and now out for figures. Bids will be opened by the Board of Supervisors on September 2nd. An official proposal appears in another column of this issue.

CITY HALL 4 story and base, Class A construction, \$4,500,000. San Francisco, Architects, Bakewell and Brown, 251 Kearny street S. F. Owners, City and County of San Francisco. Plans and specifications for the architectural terra cotta and masonry work on the new City Hall have been completed and have received the approval of the Board of Public Works. Bids are now being called for on this work. Figures will be opened on September 3rd by the Board of Public Works. Plans and specifications can be obtained from the City Department of Architecture, Temporary City Hall Bldg. An official proposal for this work appears under the heading of Official Advertising in this issue.

HOTEL 6 story and base, reinforced brick, \$65,000. San Francisco, Architects, G. Albert Linsburg, 709 Mission street S. F. Owner, A. Eisenberg. This work was mentioned here when the architect was first commissioned to prepare the plans. Working drawings are nearly complete and figures will be called for about the first of the month. The structure will be erected on the eastern side of Sutter street between Geary and Larkin streets, covering a considerable amount of ground area. There will be a store on the hotel lobby on the ground floor and in the neighborhood of 100 rooms on the upper floors. A large percentage of the rooms will be private. The interior finish will be of pine with some hardwood veneer. Ornamental plaster will

be used in the lobby. Plans provide for steam heat, a hot and cold water supply, elevator service and a vacuum cleaning system. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. Bids will be called for early in September.

HOTEL—6 story and base, Class C construction, \$10,000. San Francisco. Architects, O'Brien and Werner, Foxcroft Bldg., S. F. Owner, Thomas O'Day. The building will be erected on the south side of O'Farrell street east of Larkin street covering an area of 49x30 feet. There will be stores on the first floor and the entrance to the hotel lobby, which will be on the second floor. Upper floors will contain in the neighborhood of 90 rooms with several baths on each floor. Interior finish will be largely of pine. Bath rooms will have composition floors and tile wainscot. Hot and cold running water will be supplied to all rooms. Plans provide for steam heat, elevator service and a vacuum cleaning system. Exterior of the building will be faced with pressed brick. Plans are being prepared.

PASSENGER STATION—1 story, brick and steel. Cost not stated. San Francisco. Architect's name withheld. Owners, Ocean Shore Railway Co., 11th street, S. F. Plans have been prepared for a modern station which will be erected on the company's property on the west side of 11th street between Market and Mission streets. A petition is now before the Street Committee of the Supervisors for permission to cross Mission street with the company's tracks. Construction will be started as soon as this permission is granted. Further mention will be made of the work when bids are called.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, J. E. Kolbe, 2578 23rd avenue, S. F. The dwelling has been designed for a six room house with bath. Interior finish will be of pine throughout. There will be a large open fire place in the living room with brick mantel. Some hardwood floors will be used. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic and shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

CAFE DECORATIONS—Cost not stated. San Francisco. Architects, Rignetti and Headman, Thelen Bldg., S. F. Owners, Solari's Cafe. Mr. Solari, one of San Francisco's best known cafe men, will open a new cafe in the building at the southwest corner of Geary and Mason streets. Plans are now being prepared for interior decorations. Ornamental plaster, hardwoods and special light effects will be used. Plans will shortly be ready for figures.

STORES AND OFFICES—2 story and base, brick and steel, \$10,000. San Francisco. Architects, Holman and Schwartz, Nevada Bank Bldg., S. F. Owner, J. P. Sweeney. The building will be erected on the north side of Geary street just east of Van Ness avenue and has been designed for use by the New World, a Japanese newspaper. Upper floor will be used as offices. Interior finish will be of pine throughout. A cement floor will be used on the ground floor. There will

be modern plumbing and electric work. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures have been taken. A contract will be awarded at once.

SALOON—1 story and base, brick. Cost not stated. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners, Waterfront Realty Co. The building will be erected at the corner of East and Oregon streets and will cover an area of 60x15 feet. Interior finish will be of pine throughout. There will be patent store fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

HOTEL—5 story and basement, brick and steel, \$50,000. San Francisco. Architects, MacDonald and MacDonald, Holbrook Bldg., S. F. Owner, Reuben Lloyd, Contractors, MacDonald and Kahn, Bialto Bldg., S. F. Contract price, \$50,000. Note, the contractors are now taking sub-figures on the various parts of the work.

RESIDENCE—4, 2 story and base, frame, \$35,000. San Francisco. Architect, C. F. Whiteley, 553 Clayton street, S. F. Owner, H. P. Livermore, Merchants' National Bank Bldg., S. F. Contractor, Marcus Marcussen, 19 Divisadero street, S. F. Contract price, \$35,000.

Terra Cotta Works Visited by S. F. A. C.

N. Clark & Sons Hosts and Open Their
Alameda Shops to City Guests
on Saturday.

Last Saturday afternoon the members of the San Francisco Architectural Club and their friends paid a visit to the factory and pottery of Messrs. N. Clark & Sons in Alameda.

It is the desire of the Club this year to visit a number of the works of large industrial concerns with a view to familiarize its members with the processes of manufacture of the various materials connected and allied with the building trades. Knowing of this desire, Messrs. N. Clark & Sons extended invitations to the members to visit their works.

About 150 gentlemen accepted and were met at the Ferry Building by Mr. Gwynn, the firm's manager, who escorted the members across the bay to Alameda. A special S. F. Co. car was reserved for the club and thence run right into the works. Arrived there, the party was welcomed by Mr. A. V. Clark and Mr. Phillips, the works manager. Before inspecting the various departments connected with the making of architectural terra cotta and other clay products, the members were gathered together in the drafting department where an interesting lecture was given by Mr. Phillips and practical methods of the various stages of manufacture of architectural terra cotta were demonstrated by several of the employees of the firm.

Afterwards they dispersed for a couple of hours throughout the various buildings and viewed the plant and machinery.

The party was thereafter hospitably entertained by the firm. After spend-

ing a pleasant two and a half hours, the party returned to the city.

Before leaving the works, the president of the club, Mr. Harry E. Nye, made a few appreciative remarks and extended to Messrs. N. Clark & Sons a hearty vote of thanks for the opportunity given to inspect the works and for the instructive and entertaining afternoon, which everyone thoroughly enjoyed.

City Bids Opened.

Board of Public Works Opens Bids for Construction of Chapel at Relief Home Tract.

Bids were opened by the Board of Public Works at their afternoon meeting on Wednesday for the construction of a frame chapel which is to be erected at the Relief Home Tract. Plans for the building were prepared by the City Department of Architecture. J. W. Carr submitted the lowest figure at \$9,482. The following bids were opened:

Relief Home Chapel.

Robert Frost	\$19,541
Monson Bros.	19,500

BUILDING OPERATIONS.

Private building activities through-
out the city from August 5th to Au-
gust 15th, inclusive, as reported by
the Bureau of Building Inspection of
the Board of Public Works, John P.
Horgan, Chief Building Inspector,
shows a total of nearly half a million
dollars.

Complete report as follows:

Class	No. of Bldgs.	Amount.
"C"	7	\$225,960.00
Frames	46	151,411.00
Alterations	61	59,937.00
Total	114	\$437,308.00

STATE BUYS HARBOR BONDS.

SACRAMENTO, Aug. 18.—The State
Board of Control bought \$500,000 of
San Francisco harbor bonds today.
This step was taken to save the State
\$50,000 in commission, or bonus, that
had been appropriated by the legisla-
ture to stimulate sale of low interest
bonds.

GEARY ROAD RECEIPTS.

Receipts of the Geary street road for
17 days of August were \$27,583.70, an
average of \$1,622.55 a day, which is an
increase over the daily average in July
of \$111.65.

OAKLAND AND ALAMEDA COUNTY.

BUNGALOW—1½ story and base, frame, \$3,000. Oakland, Cal. Architect Frank M. May, 2145 Center street, Berkeley. Owner, G. H. Harding. The house has been designed to contain seven rooms, bath and sleeping porch and will be erected on the south side of Keith avenue. All interior finish will be of pine. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the bungalow will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

RESIDENCE—2 story and base, frame, \$7,000. Piedmont, Alameda Co., Cal. Architects, United Home Builders 1762 Broadway, Oakland. Owner, Dr. Moyer. This dwelling will contain eight rooms, two baths and sleeping porch. One of the most beautiful home sites in Piedmont has been selected for the residence and construction will be undertaken at once. Interior finish will be of pine, hardwood and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster and rustic. Plans are complete and work will be done by Day Labor under the direction of the architects. All materials are now being purchased.

RESIDENCE—2 story and base, frame. Cost not stated, Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Mrs. H. C. Newman. The dwelling will be erected in Cragmont Park and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be largely of pine with some white enamel and hardwood. Hardwood floors will be used in the living room, dining room, den and reception hall. There will be furnace heat and open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and show out for figures.

BUNGALOW—1 story and base, frame, \$2,500. Oakland, Cal. Architect, Alvin J. Stern, 1522 Broadway, Oakland. Owner, J. E. Chambers. The house will contain seven rooms and bath and will be erected at the south-west corner of 61st street and Colby avenue. Interior finish will be entirely of pine. Hardwood floors will be used in the two principal rooms. Plans provide for a large open fire place in the living room with tile or brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

BUNGALOW—1 story and base, frame, \$3,000. Alameda, Alameda Co., Cal. Architect, William Dufour, 2226 Santa Clara avenue, Alameda. Owner's

name withheld. The dwelling will be erected on Enomai avenue near Union street and has been designed to contain six rooms and bath. Interior will be finished with pine and elm panels. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustic. Plans are complete and figures are being taken.

BUNGALOWS—8, 1 story and base, frame, \$2,500 each. Oakland, Cal. Architect, Alvin J. Stern, 1522 Broadway, Oakland. Owner, Roger Coit, 1522 Broadway, Oakland. These houses will be erected at the corner of 75d and Shattuck avenue. Each has been designed to contain six rooms and bath. Interiors will be finished in pine with some reddish and elm panels. Hardwood floors will be used in the two principal rooms. All living rooms will have open fire places and tile or brick mantels. Tile will also be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster on metal lath, rustic and shingles. Plans are complete and in the hands of the owner, who is a well known Oakland builder, and will do the work by Day Labor. All materials are now being purchased.

WAREHOUSE—1 story, brick construction. Cost not stated, Oakland, Cal. Architect, Alvin J. Stern, 1522 Broadway, Oakland. Owner, F. T. McHenry. The building will be erected at the corner of 19th street and Broadway and has been designed for a large commercial warehouse. Construction will be of the heavy mill type. No interior finish is specified. There will be metal window cash and frames and fireproof doors. Exterior of the building will be faced with stock brick. Plans are complete and in the hands of the owners who will shortly take figures for the general construction.

GARAGE ALTERATIONS—1 story frame. Cost not stated, Oakland, Cal. Architect, none. Owners, Myers and White. The present frame building at the corner of 25th street and Broadway will be altered into a modern commercial garage. Plans provide for a cement floor. Exterior of the building will be covered with cement plaster on metal lath. Considerable machinery will be purchased. Plans are complete and in the hands of the owners. Work is now out for figures.

LODGE HALL AND STORES—4 story and base, brick, steel and reinforced concrete, \$65,000. Oakland, Cal. Architect, J. Henry Boehr, Delger Bldg., Oakland. Owners, I. O. O. F. Hall Association. This building has been mentioned here before when plans were first being prepared. The structure will be erected at the northwest corner of 11th and Franklin streets, covering a considerable ground area. There will be a number of stores on the first floor and offices and lodge rooms on the upper floor. Plans provide for steam heat and elevator service. Interior finish will be of pine and hardwood, with some marble wainscot. There will be a large open fire place with brick mantel. Stores will have plate glass display windows in patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being

taken. Bids are to be submitted on both the entire work and segregated contracts. Bids will be opened on September 1st.

FLATS—2 story and base, frame, \$5,000. Oakland, Cal. Architect, J. Henry Boehr, Delger Bldg., Oakland. Owner, F. G. Troy. The building will be erected on 11st street near Broadway and has been designed to contain three and four room flats. Interior finish will be of pine with some elm panels and hardwood floors. There will be an open fire place in each of the living rooms. Mantels will be of brick. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner, who will do the work by Day Labor.

LODGE HALL—3 story and base, reinforced concrete, \$120,000. Berkeley, Alameda Co., Cal. Architect, William H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, Berkeley Elks' Hall Association. Preliminary Plans only have been prepared for this work and details of construction are not available at this time. The organization has secured their site and as soon as all requirements of the building have been fully settled upon working drawings will be started and contracts let. Further mention will be made of the work in these columns.

HOTEL—7 story and base, brick and steel. Cost not stated, Oakland, Cal. Architect, F. D. Vouchers, Central Bank Bldg., Oakland. Owner, H. A. Powell. The building has been mentioned in these columns before. Plans for the brick and carpentry work are now on the market for figures. There will be stores on the first floor and in the neighborhood of 110 guest rooms on the upper floors. Interior finish will be of pine throughout. Steam heat, elevators and a vacuum cleaning system will be installed. Exterior of the building will be faced with pressed brick.

RESIDENCE—2 story and base, frame, \$5,000. Alvarado, Alameda Co., Cal. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owner, Mr. A. May. The dwelling has been designed for a country home and will contain in the neighborhood of eight rooms, baths and sleeping porch. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will have tile wainscot and tile will also be used in the kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

RESIDENCE—2 story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owner, C. J. Pfang, 5189 Claremont avenue, Oakland. The house will be erected on Kales avenue near College avenue and will contain seven rooms and bath. Interior finish will be largely of pine, although some hardwood will be used in the living and dining rooms. There will be hardwood floors, brick or tile mantels and furnace heat. Open fire places will also be installed. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans

are in the hands of the owner and the work will be done by Day Labor. All material is now being purchased.

BUNGALOW—1½ story, on base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, none. Owners, F. R. Peake Co., 2127 University Avenue, Berkeley. The dwelling has been designed for a seven room house with bath and sleeping porch and will be erected on Yolo street near Point Avenue. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the bungalow will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

CONVENT—2 story and base, frame, \$25,000. Berkeley, Alameda Co., Cal. Architect, John J. Foley, 46 Kearny street, S. F. Owners, St. Joseph's Convent. The building has been arranged to contain a number of class rooms, studios and music rooms. Interior finish will be entirely of pine. There will be furnace heat. Exterior of the building will be covered with stucco and sanded. Plans are complete and figures are now being taken.

SCHOOL—1 story, frame, \$12,700. Oakland, Cal. Architect, City Architect John J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Bids opened for the construction of the Fruitvale School No. 3 show Tieslau Bros. low at \$12,935. Three other sets of figures were submitted for the work. A complete list of these bids will be found under the heading of Oakland and Alameda in this issue.

STORES AND OFFICES—12 story and base. Class A construction, \$250,000. Oakland, Cal. Architect, Benj. McDougall, Sheldon Bldg., S. F. Owners, J. F. Carleton and A. J. Snyder. The building will be erected at the corner of Broadway and Telegraph, covering a considerable ground area. There will be a number of stores on the first floor and a large number of modern offices on the upper floors. Offices will be arranged for occupancy either as single offices or en suite. Interior finish will be of hard wood, metal trim and tile and marble wainscot. Plans provide for steam heat, freight and passenger elevators, a vacuum cleaning system and mail chutes. There will be a complete steel frame and exterior walls of brick, faced with terra cotta and glazed brick. Metal window sash and frames are specified. Contractors for the foundation work and structural steel have been awarded. Segregated figures on all other parts of the work are now being taken.

STORES—1 story, frame, \$10,000. Piedmont, Alameda Co., Cal. Architect, Albert Farr, Foxcroft Bldg., S. F. Owners, Piedmont Church Association. The building will be erected on property closely adjoining the residential part of Piedmont and will be designed for a number of stores. Interior finish will be of pine throughout. All stores will have large plate glass windows. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Bids Opened For Oakland School.

Four Bids Only Were Submitted for Construction of Fruitvale School No. 3—Tieslau Low.

Four sets of bids were received on Monday evening by the Oakland Board of Education for the construction of the frame school building known as Fruitvale School No. 3. Tieslau Bros. submitted the lowest figures at \$12,935. The following is a list of the figures received:

Fruitvale School No. 3.	
Tieslau Bros.	\$12,935
Alfred Olson	15,100
O. B. Ackerman & Son	14,325
C. Christensen	12,965

SAN JOSE & SANTA CLARA CLARA VALLEY.

CITY HALL—2 story and base, brick and steel. Cost not stated. Burlingame, San Mateo Co., Cal. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owners, City of Burlingame. This building has been mentioned here before when the architect was first commissioned to prepare plans. The building will cover a considerable ground area. Provision has been made in the plans for housing all of the city offices, fire and police departments and for a large council chamber. There will be steam heat and a fireproof vault. Interior finish will be of pine and hardwood with some hardwood floors. Metal window sash and frames will be used. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are now being called. Bids will be opened on September 2nd. Plans can be secured from the architect or from the City Clerk. An official proposal appears under the heading of Official Advertising in this issue.
BENGALOW—1 story and base, frame, \$1,200. San Jose, Santa Clara Co., Cal. Architect, none. Owner, P. Sanfilippo, 1238 Orchard street, San Jose. The house will contain five rooms and bath. Interior finish will be of pine and redwood. There will be an open fire place in the living room with the mantel. Exterior of the dwelling will be covered with rustic and shingles. Plans are complete and work will be done by Day Labor.

Contracts Awarded.

RESIDENCE—2 story and base, reinforced concrete and steel. Cost not stated. Burlingame, San Mateo Co.,

Cal. Architects, Howard and White, Lack Bldg., S. F. Owner, Charles Frederick, Contractor, John MacBain, Redwood City. Contract price not stated. Note—It is reported that this house will cost in the neighborhood of \$150,000.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

LIBRARY—1 story and base, brick. Cost not stated. Bakersfield, Kern Co., Cal. Architect, O. L. Clark, Brower Bldg., Bakersfield. Owners, City of Bakersfield. The building has been mentioned in these columns before when plans were first started. Bids will be opened on August 27th. A complete list of these figures will appear in the next issue of the Building and Industrial News.

RESIDENCE—2 story and base, frame, \$12,000. Lindsay, Tulare Co., Cal. Architect, J. Carl Thayer, Fresno. Owner, Mrs. George Gilson. The dwelling will contain 14 rooms, baths and sleeping porches. Interior finish will be of pine, hardwood and white enamel. Hardwood floors will be used in the principal rooms. Bath rooms will have composition floors and tile wainscot. Plans provide for a central heating system, probably furnace heat, and open fire places. Mantels will be of brick and tile. Tile will be used in the kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

SCHOOL—2 story and base, brick. Cost not stated. Bakersfield, Kern Co., Cal. Architect, O. L. Clark, Brower Bldg., Bakersfield. Owners, City of Bakersfield. This building will be erected at the corner of 18th and A streets and has been designed to contain nine standard sized class rooms and an auditorium. Plans have been completed and approved by the Board of Education. Interior will be finished in pine with maple floors. There will be steam heat and a modern system of ventilation. Plans include program clocks and vacuum cleaning system. Exterior of the building will be faced with pressed brick. Bids are now being taken and will be opened by the Board of Education on September 2nd.

BRIDGE—Concrete and frame. Cost not stated. Big Sandy Creek, Fresno Co., Cal. Engineer, County Engineer, Fresno. Owners, Fresno County. Plans have been completed and have received the approval of the Board of Supervisors for a concrete and wooden bridge.

over the Big Sandy Creek. Bids are now being taken for the construction and will be opened on September 2nd. Plans and specifications can be secured from the County Engineer or from County Clerk B. M. Barnwell, Fresno.

CHURCH—1 story and base, reinforced concrete, \$20,000. Fresno, Fresno Co., Cal. Architect's name not given. Owners, Gregorian Catholic Church. Plans for a new church edifice which will be erected at the corner of Ventura and M streets have been accepted. Construction will be of the reinforced concrete type throughout. Further particulars will be given in the next issue of the Building and Industrial News.

LOS ANGELES AND SOUTH-CALIFORNIA.

APARTMENT HOUSE—3 story and base, brick and steel, \$10,000. Los Angeles, Architect, L. L. Jones, I. W. Hellman Bldg., L. A. Owner, C. W. Howard. The building will be erected on Pico street, having a frontage of 15 feet and a depth of 125 feet. Interior has been arranged to contain 65 rooms which will be divided into two and three room suites. All apartments will have private bath rooms and wall beds. Interior finish will be of pine with cement floors in the bath rooms and tile wainscot. Plans provide for steam heat, elevator service and a vacuum cleaning system. Marble and tile will be used in the entrance and vestibule. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

HOSPITAL—1 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, Garrett and Ferrell, Currier Bldg., L. A. Owners, Methodist Hospital Association. The building will be erected on South Hope street near Jefferson and will cover an area of 114x60 feet. Plans are so arranged to include two additional wings, each four stories in height and 155x137 feet, may be added later. Construction will be fireproof throughout with reinforced concrete floors, hollow the interior partitions and concrete roof slabs. Interior finish will be of pine and white enamel. Tile will be used in the bath rooms and operating rooms. Plans provide for steam heat, two elevators, dumb waiters, hot and cold water supply and vacuum cleaning. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

HOTEL—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Eisen and Son, Wil-

cox Bldg., L. A. Owner, Roy Blumenthal. This building is to be erected at the southwest corner of 3rd and Figueroa streets covering an area of 50x70 feet. There will be two stories besides the hotel lobby and offices on the first floor. Upper floors will be subdivided into 15 guest rooms and a number of baths. Interior finish will be of pine and elm panels. Plans provide for steam heat, elevator service and a hot water supply. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. Stores will have plate glass display windows in patent store fronts. Plans are complete and figures are being taken.

HOTEL—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, L. L. Jones, I. W. Hellman Bldg., L. A. Owner, D. F. Hill. The building will be erected at the corner of 6th and Wall streets and will cover an area of 79x120 feet. There will be four stores on the first floor, the hotel lobby and office. Upper floors will contain a total of 120 guest rooms and a number of baths. Bath rooms will have cement floors and tile wainscot. Plans provide for steam heat, elevator service, vacuum cleaning system and hot water system. Interior finish will be largely of pine. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are complete and now out for figures.

SCHOOL—2 story and base, reinforced concrete, \$75,000. Santa Paula, Ventura Co., Cal. Architects, Allison and Allison, Hibernian Bldg., L. A. Owner, Santa Paula School District. The building has been designed for a High School and will cover a considerable ground area. Plans provide for domestic science and manual training departments in addition to a number of class rooms and a large auditorium. The structure is so designed that additions can be readily made in the future. Interior will be finished in pine with maple floors. There will be a central heating system, program clock and a vacuum cleaning system. Exterior will be faced with cement plaster. A clay tile roof will be used. Plans are now being prepared.

CHURCH—1 story and base, frame, \$22,000. Los Angeles, Cal. Architect, Robert H. Orr, Van Nys Bldg., L. A. Owners, Boyle Heights Christian Church. The building will be erected at the corner of Second and Breed streets and will cover an area of 60x120 feet. Besides the main auditorium, which will have a seating capacity of 600 people, plans provide for 13 class rooms. Interior finish will be of pine with maple floors. There will be a plenum system of heating. Art glass windows are specified. Exterior of the building will be covered with cement plaster on metal lath. A clay tile roof will be used. Plans are complete and figures will be called for early in September.

LIBRARY—1 story and base, brick, \$10,000. Watts, Los Angeles Co., Cal. Architect, Elmore R. Jeffery, Citizens National Bank Bldg., L. A. Owners, Town of Watts. The building will be designed in the classic style and will cover an area of 76x30 feet. Plans provide for one large reading room, librarian's office and stock room. Metal shelves will be specified. Interior fin-

ish will be of pine with some hardwood. Maple floors will be used. A central heating system, probably furnace heat, will be installed. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

Contracts Awarded.

APARTMENT HOUSE—2 story and base, Class C. Construction, \$10,000. Los Angeles, Cal. Architects, C. F. Borton, Hilberland Bldg., L. A. Owner, V. Y. Robertson. Contractors, C. F. Borton Co., Hilberland Bldg., L. A. Contract price, \$10,000.

APARTMENT HOUSE—3 story and base, frame, \$36,000. Los Angeles, Cal. Architects, Maine Building and Investment Co., Thorpe Bldg., L. A. Owner, R. P. Smith. Contractors, Main Building and Investment Co., Thorpe Bldg., L. A. Contract price, \$36,000.

CHURCH—1 story and base, brick and steel, \$80,000. Long Beach, Los Angeles Co., Cal. Architect, H. M. Patterson. O. T. Johnson, Bldg., L. A. Owners, Long Beach Congregational Church. Contractor, J. C. Borg. Long Beach, and Kling Co., Union League Bldg., L. A. Contract price, \$80,000. Note—the building will cover an area of 100x150 feet.

RESIDENCE—1 story and base, frame and concrete, \$75,000. Hollywood, Los Angeles Co., Cal. Architect, Walter Webber, Ferguson Bldg., L. A. Owner, Adolph Bernheimer, New York. Contractor, E. D. Tyler, Pasadena. carpentry work only. All other parts of the work will be sublet. Plans are complete and figures are being taken.

OFFICES—2 story and base, reinforced concrete, \$27,741. Riverside, Riverside Co., Cal. Architects, Kysor and Biggar, Wright and Giffender Bldg., L. A. Owners, Riverside Abstract Co. Contractors, Ochsner Manufacturing Co., Riverside. Contract price, \$27,741.

SEATTLE AND WASHINGTON.

Contracts Awarded.

RESIDENCE—2 story and base, terra cotta and concrete, \$100,000. Seattle, Wash. Architects, Curtiss and Malmgren, Spokane. Owner, C. S. Simpson. Contractors, Johnson Bros., 1000 Broadway Place, Seattle. Contract price, \$100,000. Note—Subfigure for now being taken on all parts of the work.

STORES AND OFFICES—2 story and base, reinforced concrete, \$200,000. Seattle, Wash. Architects, Saunders and Lawton, Alaska Bldg., Seattle. Owner, A. Hambach. The building will cover an area of 80x118 feet. Construction will be fireproof throughout. Several stores will occupy the first floor and upper floors will be subdivided into a large number of offices. Plans provide for steam and gas elevators, hollow tile interior partitions and some metal trim. Metal window sash and frames will be used. Vacuum cleaning system and mop rooms will be installed. Exterior of the building will be faced with terra cotta. Marble and tile wainscot will also be used in the halls. Plans are complete and figures are now being taken. Subcontracted contracts will be let.

BRIDGE—Steel and concrete, \$25,000. Nesika, Wash. Engineers, Bowerman and McCloy, Mutual Life Bldg., Seattle. Owners, Lewis County. The bridge is to be erected over the Cowlitz river and

will consist of a steel span 89 feet long with abutments. Plans are now being prepared and bids will shortly be called for by the State Highway Commission. Full particulars can be secured from the engineers.

HOTEL—3 or 4 story and base, reinforced concrete, \$100,000. Alki Point, Wash. Architects, Bohn and Menden, Denny Bldg., Seattle. Owner, Ferdinand Schmitz. Construction will not be started before early in the spring, and the site has not been fully determined. Construction will be fireproof with reinforced concrete walls, floor and roof slabs. Interior partitions will be of metal lath and plaster. Interior finish will be of pine with some hardwood veneer. There will be steam heat, elevator service and a vacuum cleaning system. Hot and cold running water will be supplied to all rooms. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

PORTLAND AND OREGON.

WAREHOUSE—2 story and base, brick. Cost not stated. Portland, Ore. Architects, Emil Schmit and Sons, Commonwealth Bldg., Portland. Owners, D. P. Thompson Estate. The building will be erected on the East Side and will cover an area of 100x250 feet. Construction will be of the heavy masonry type. There will be elevator service, spiral chutes and an automatic sprinkler system. Metal window sash and frames and fireproof doors are also specified. No interior finish will be used. Exterior of the building will be faced with stock brick. Plans are now being prepared.

BANK—2 story and base, reinforced concrete. Cost not stated. Bandon, Ore. Architect, Benj. Ostlund, First National Bank Bldg., Bandon. Owners, First National Bank of Bandon. This work has been mentioned here before when plans were first started. Working drawings have been completed and show a building the first floor of which is to be devoted to the exclusive use of the bank. Upper floor will be subdivided into modern offices. Interior finish will be of pine and hardwood with some marble, ornamental plaster and bronze. Coin and safe deposit vaults will be installed. There will be steam heat. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken. Bids will be opened on September 1st.

STORES—1 story and base, brick. Cost not stated. Portland, Ore. Architects, MacNaughton and Raymond, Concord Bldg., Portland. Owners, Gile Investment Co. The building will be erected at the corner of West Park and Oak streets, containing five large stores. Interior finish will be of pine with some hardwood. There will be a cement floor and a central heating system. Patent store fronts and plate glass windows are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

CHURCH—2 story and base, frame, \$15,437. Roseburg, Ore. Architects, Tourtelotte and Hummel, Rothchild Bldg., Portland. Owners, First Methodist Church of Roseburg. Contractor, H. O. Koeppe, 182 15th street, Port-

land. Contract price, \$15,437.

WAREHOUSE—2 story and base, brick, \$40,000. Portland, Ore. Architect, Aaron Gould, Worcester Bldg., Portland. Owners, National Cold Storage Co., Contractors, Ringham and McChelland, Lumbermen's Bldg., Portland. Contract price, \$40,000.

BREWERY ADDITION—2 story and base, brick and steel. Cost not stated. Portland, Ore. Architect, Joseph Goodberger, Portland. Owner, Gammon Brewery Co., Contractors, The Goodberger Const. Co., Oregonian Bldg., Portland. Contract price not stated.

LODGE HALL—3 story and base, brick and steel. Cost not stated. McMinnville, Ore. Architect, C. C. Robins, Am. work Bldg., Portland. Owners, McMinnville McMonie Hall Association. Contractor, Robert Shelley, Gerlinger Bldg., Portland. Contract price not stated.

GYMNASIUM—2 story and base, frame. Cost not stated. Portland, Ore. Architects, Doyle and Patterson, Worcester Bldg., Portland. Owners, Reed College. Contractor, John Altmeyer, Builders' Exchange Bldg., Portland. Contract price not stated.

Protecting The Edge Of Concrete Curb.

By George Nelson, C. E.

The attractiveness of a well improved and well kept street is always manifest in the better class of buildings, both residential and business, that line such a street in those of our towns that are awake to the fact that improvements pay big dividends.

A well-built and well-kept concrete curb is an essential to the good looks of a street as anything else, and too much care cannot be taken in the selection of the aggregates and in the choice of protective measures to keep the curb from deteriorating either by inside inherent fault or outside aggressive agencies.

The early types of curb made out of stone or redwood are rapidly being discarded and their place is being taken by either concrete or granite. Granite is supposed to be the strongest and is found particular favor in cities where the stone-curers' union is strong, but its price is so high that it more than counterbalances its advantages, which, indeed, are few, and as applied to a residence street absolutely none.

The concrete curb has always—as originally built—lacked strength at certain points. On the curved returns at street intersections it will, owing to the sliding action of the wheels of vehicles, abrade greatly, and in many instances entirely wear out.

The open rounded edge is particularly open to attack, and is usually battered up badly before the curb is even finished. Watsons banking up against the curb to unload are the

Carpenter and Builder

Phone Mission 5126

2669A Howard St., Bet. 22nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Bind your copies of the Building and Industrial News in PERMANENT BOOK FORM

We have succeeded at last in securing a really practical binder. The Building and Industrial News contains a great deal of technical and statistical information that many of our readers find worth saving for future reference. There is no better way of preserving it than using the "BIG BEN" BINDER.

It preserves the magazine in permanent book form. This binder is handsome and durable, and makes the permanent filing of magazines as easy as filing ordinary papers. It opens flat like a regular book, and comes in the art cloth with the name of our Journal stamped in gold on the front cover and back. For persons who desire to

Save These Valuable Articles

this binder is just the thing, as it holds several numbers of our Journal and can be used again indefinitely year after year, simply by taking out the old Journals and inserting the new ones as they come to you.

By making special arrangement with the manufacturers of this best binder that has ever been put on the market, we are able to furnish them to you for **ONLY \$1.00 EACH**. Merely send us your name and address and say: "Send us your binder. I enclose \$1.00," and we will send the binder promptly all charges prepaid.

Send in your orders now and begin saving the statistical and technical information, articles and valuable data, that will be published in The Building and Industrial News this year.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

Nailing BEAVER BOARD to the wall and ceiling-beams of a new room, quickly and without titer or confusion.

Same room finished in one of many beautiful designs possible with BEAVER BOARD walls and ceilings.

BEAVER BOARD

takes the place of lath, plaster and wall-paper for the walls and ceilings of every type of building, new or remodeled.

It costs less; is more quickly and easily put up; is durable, sanitary and artistic.

It will not crack, chip or deteriorate with age; it deadens sound, keeps out heat and cold, retards fire, and withstands strain or vibration.

Made entirely of selected woods, reduced to fibrous form and pressed into panels of uniform thickness, with handsome pebbled surface.

We furnish all convenient sizes for every purpose, with full directions for application. Can also supply small quantities for making many useful and decorative household articles.

Editorial Comment.

The Examiner states that it is about time to clean house. And starts in by saying that the whole police department is crooked, and that the present chief and the present police commission is incompetent. And it goes on to say that the public is sick and tired of the present management of the police force as it is at present managed and its apparent partnership with plunderers and panderers.

This is a broad statement and if the Examiner is in earnest it should set about to get specific facts sufficient to have a charge upon. There was no great howl made by the Examiner when Chief White was appointed. The Examiner has the largest circulation of any morning paper. If it is properly in earnest and dealing in good faith it can accomplish more in influencing public opinion than any other single influence.

What is needed in the police department of this and every other city is the rooting out of the political influence that controls the appointment of police chiefs and the officers generally. It is altogether probable that Augustus White would not have been chief of police had he not been a trusted friend of the Gas Company—and so on down the line, the officers in responsible positions are placed there by political powers that are hidden and that deal by indirection. If an ordinary policeman deals out even-handed justice and arrests some rich and powerful citizen for speeding or violating the traffic ordinance he soon finds himself transferred to the fog belt and placed upon the most undesirable beat in the city. He soon finds that he must do as the powers that be want him to do and if he does right and fairly by everybody he usually gets a kick for his pains.

If the Examiner would take up this phase of the question and give publicity to such facts as these it would accomplish a good service. Not only does the alliance of crooks and crooked policemen want to be broken up but the honest and fearless officer must be protected in the discharge of his duty as well.

The Call has been sold back to John D. Spreckels and F. W. Kellogg according to announcements and will be run as an evening paper hereafter with the Hearst news service and the Associated Press franchise that de Young formerly held. So that about the only change that will be effected is that it will be changed from a morning to an evening newspaper.

So it seems that de Young did not buy the Call but what amounts to

agreement to quit the morning field. Meanwhile the mystery is who the real parties are behind the new venture, whether it is Hearst, or Spreckels or Kellogg or what other person. Until that mystery is raised there will be a hoodoo on the paper which seems to have always existed. The ordinary person will not stand for indirect proceedings in this field. If responsibility is to be taken by a public newspaper let the public know who is really responsible.

The new paper will perhaps find a field for itself. Its only competitor is the Bulletin. The Post represents a private interest that is now discredited, and the Daily News is hardly in the same field. But the success of the new paper will depend upon the field it attempts to fill and how it fills it.

If the paper is to live it will have to be an individual and not merely a colossus merchant of the news.

The jury in the Caminetti case has been completed. So far as newspaper comment is concerned it is a representative jury. The attitude of the presiding judge in his instructions seems to leave Caminetti without a leg to stand on. But it is often said that God Almighty himself does not know what twelve men will do, so in this case the verdict of the jury, as it is constituted, is awaited with interest by the public.

The United States government through the navy department will shortly begin the construction of the largest radio station at Caimeto, Panama, which will be known as the Daren Radio Station. It will have three towers arranged in the form of a triangle, 300 feet apart, and each tower will be 600 feet in height. This station will be of the same power as the one at Arlington, West Virginia, but the towers at Arlington are only 450 feet high for two and 600 feet for the third one.

The base of the towers at the Daren station will be 150 feet above the sea level and the sending and receiving apparatus will have about 3,000 miles direct reach, which will include the Arlington station, San Francisco, Valparaiso, 120 miles south of Valparaiso on the Pacific, and Buenos Ayres on the Atlantic. It will cover a vessel anywhere on the east coast of the United States and communicate with St. Vincent, 500 miles west of the coast of Africa. For sending the Poulsen system will be used.

A contractor in Southeastern Kansas was given a contract to build a concrete bridge over a stream. Then the contractor started and he found he had to lay water two miles in order to mix the concrete.

Water---Its Properties and Practical Uses.

The Principles of Heat and Circulation. Some Simple Examples of Hot Water Heating for House Use. By F. W. Tower in "Domestic Engineering".

Hot Water Service.

In ordinary language the term heat is used, not only to express a particular sensation, but, also to describe that particular state or condition of weather which produces the sensation.

Besides producing this sensation, heat acts variously on bodies; it melts ice, boils water, expands air, makes metals red hot, and melts them, etc.

Heat is termed a "condition of matter," and a condition which can be transferred from one body to another.

Heat is termed a "form of motion."

A noticeable property of heat is its tendency to an equilibrium, that is, its disposition to pass from the hotter body to that which is colder, until there is equality of temperature.

The general action of heat upon bodies, is to assume a greater volume, or, to expand.

All bodies expand by the action of heat.

As a general rule, gases are the most expansive, then liquids, and lastly solids.

The diffusion of heat among the particles of fluids and gases has been termed convection, to carry.

When a liquid is heated from above, the temperature rises slowly, but, if a liquid be heated from below, it will be noticed, at once, that currents of liquid rise from the bottom to the top of the vessel and the liquids acquire a uniform temperature.

The layers of a liquid or gas which are nearest to the source of heat are expanded, and, thus become specifically lighter than surrounding portions, consequently they rise, while colder and therefore heavier portions fall, are heated in their turn, then rise to make way for other and colder portions.

In plumbing, this movement, when applied to hot water heating is termed circulation, or, in other words, "moving in a course which brings the moving body to the place where its motion began."

The degree of "expansion" produced by heat in different liquids varies considerably.

Water expands more than mercury; and also of, which is lighter than water, expands more than water.

Heat can be transmitted from one body to another without alternating the temperature of the intervening medium.

Thus, radiating, spreading or diverging, from a common center, such as a water front, would be the cause of heating water in a boiler.

Latent heat means "to lie behind."

When substances pass from the solid to the liquid condition, and from the liquid to the gaseous, they absorb heat.

A liquid is a solid plus heat.

A gas is a liquid plus heat.

The heat thus absorbed does not appear as sensible heat, but is consumed

in bringing together energy upon the particles of matter.

Specific or sensible heat, is the quantity of heat required to raise the temperature of a body, of a given weight, one degree, the unit of measure being the quantity required to raise the same weight of water to the same temperature.

Water is taken as the standard of comparison.

The portion of heat which affects the thermometer and is registered, is called sensible heat.

Heat not being ponderable, capable of being weighed, it is estimated by the effects it produces.

The unit quantity of heat, is the quantity required to raise the temperature of a pound of water from 62 to 63 degrees, and is termed the British Thermal Unit, or, B. t. u.

When a body of water is increased in temperature, it expands, therefore occupies more space.

When decreased in temperature, the water contracts, and occupies less space.

The density of a body of water being uniform throughout, there will be no movement, because the weight of any part of the body is equalized, thus, one part cannot displace another.

If any body of water having a temperature above 39 degrees F. (the point of greatest density of water) the coldest particles will fall to the bottom, and the others will take their respective positions throughout the body, according to their respective temperatures, the hottest being at the top.

How is this principle practically applied in heating water for a house supply?

Currents can be formed by heating a part of the water at some central point, such as a water front, in a range.

Heat from the fire being applied to the side of the water front, which is hollow, and being filled with water, will cause the water to become heated, thus expanding, becoming lighter, and make an effort to rise.

If a tube, or pipe, extending from the upper part, or end, of the water front, be connected to the storage tank, or boiler, the warmed water will move through this passage to the highest point of the storage reservoir.

The boiler is intended, and installed, for the purpose of storing hot water.

As the fire continues, the water continues to move upward, the colder water constantly settles to the lower part of the boiler and water front, thus establishing a return current, or circulation, according to the law of gravitation and heat transmission.

Circulation is caused solely by the change of weight due to expansion by heat and contraction by cooling.

As the heated water leaves the water front, and rises in the boiler, the hottest water will remain at the highest point, but, as it passes through the cooler body present in the boiler,

it loses some of its heat, and falls to the lower parts of the reservoir, thus starting a local circulation until such a time as an equilibrium is established.

It is difficult to maintain this equilibrium, as the water is constantly coming in contact with cooler particles, and the shell of the boiler being exposed to the atmosphere around it, will constantly exert a cooling effect, and a movement from the boiler to the heater and return is constantly taking place, being really another circulation.

The circulation of water in a system of hot water piping employing a return (as range boilers), is quite rapid, because of the great difference in temperature of the water in the rising and return pipes.

The matter of friction needs consideration; all sharp bends, or contractions in the pipe must be avoided; abrupt enlargements of the pipe, or pockets, create friction, and impede the flow.

Water must be heated from below and cooled from above, as it conducts heat slowly, depending very largely upon circulation.

The higher the flow pipe from a water front can rise, before it enters the boiler, provided it is not exposed to the influence of cold air, the more rapid the circulation, and the more water can be warmed in a given time, the water front being equal in other respects.

Side boiler couplings are usually too low.

The rapidity of circulation depends upon the difference in weight of the two columns, the longer these columns are, the greater the difference.

Hot water rises, cold water falls in vertical lines, the way of nature, and in exact accord with the laws of gravitation.

Every movement horizontally creates friction and resistance, thus checking the velocity or momentum with which the water should leave the boiler.

The reason hot water flows from the boiler, is simply because the water pressure in the feed pipe forces the hot water through the pipes when a hot water faucet is opened; the quantity thus drawn is replaced by cold water drawn from the street main into the bottom of the boiler, through the tube provided for that purpose.

No matter how much hot water is drawn, it is impossible to empty the boiler in this manner.

It simply fills the boiler with cold water as it is fed from the top.

When a fixture is a long distance from the boiler, the water cools, and often an undesirable wait is necessary, beside wasting water, unless a circulating pipe is installed to keep the water moving.

Therefore it is desirable to install a pipe connecting to the hot water flow pipe, an extension at or beyond the branch to the farthest fixture.

then return with a somewhat smaller pipe than this main flow pipe to the boiler, as the water, being cooled, contracts, or becomes more dense, its temperature lowered, and requires less room.

The pipe should return to the boiler without branches, to its lowest connection, or through a tube, the water becomes reheated, and again goes on its way around the circuit.

With this circuit pipe, the water is constantly moving, and when a faucet, anywhere on the hot water down line is opened, hot water will be drawn immediately.

Sometimes the flow is reversed, when the pressure is lowered, or the opening of a faucet at some low point on the line, which would allow the water to flow to the point of least resistance.

Check valves are designed to allow the flow of a liquid in one direction only, to positively prevent any return flow, and are usually applied to the circulation pipe for this purpose.

These are two kinds: the globe and the swing check.

The passage of water through the swing check is more direct and less pressure is required to open or operate it.

Baths do not need circulation for the same reason that a lavatory does, as only small quantities of water are needed at a time, and it is very annoying to have to waste time drawing out cold, or dead water, from a lavatory faucet, and enough more to warm the pipe line, before hot water reaches the fixture.

When water is pumped by hand, it is still more annoying.

Kitchen sinks, being usually close to the boiler, are seldom in need of a circulating pipe.

Hot water for domestic purposes is commonly heated in the cooking range by means of a water front, sometimes, when located in the back of the fire pot, called a water back. This water front or back, is really the water heater, sometimes termed a boiler.

The cold water supplies this water, usually taken from the bottom of the kitchen boiler; this pipe is called the low pipe to water front.

The upper pipe from the water front conveys hot water to the storage reservoir boiler, and is called the hot low pipe.

A water front, having fire outside and water inside, is subjected to severe strain, internally, and the metal tends to be much thicker to stand this double tension, water and fire.

Water fronts are usually constructed and tested to resist a pressure, when cold, of 700 pounds per square inch.

Water fronts are frequently overheated, warped, corroded, and the shell is made thinner, which lessens its ability to resist an excessive strain, and thus explosions occur, often doing great damage.

The capacity of a water front is measured by the heating surface in square inches, exposed to the fire, about 100 square inches being usually estimated as the surface in the average casting, and enough to heat 10 gal. boiler.

The quantity of water heated the

time required for heating, and the amount used, varies in all cases.

The capacity of the heater depends upon the requirements of a building, the large water front with a small reservoir means very hot water, with steam causing snapping and cracking sounds, and straining all piping connected with the hot water system, while a small water front, with a large boiler, produces only luke warm water.

A coil of copper pipe will heat about 35 gal. of water under the same conditions that the average water front

will heat 17 gallons, with the usual hot, from 62 to 180 degrees, per hour.

This coil replaces the cast iron water front, to increase the heating capacity, often avoiding the necessity for a new range or front of larger size, and usually proving satisfactory.

Boilers are usually constructed of copper or galvanized iron, sometimes set in a vertical or upright position, but when conditions are such that it is necessary to install them horizontally it is equally practical, the results being satisfactory in either installation.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$25,000. Architects, Dunn & Kearns, Monadnock Bldg., S. F. Owner, J. F. Dunn. The building will be erected on the north side of Pine street west of Leavenworth, covering an area of 25 by 120 feet. Interior has been arranged to contain 12 large suites of three and four rooms. Interior finish will be of pine with elm panels and some hardwood floors. All suites will be equipped with wall beds and private bath rooms. Plans provide for a central heating system and hot water supply. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Marble will be used in the entrance vestibule. Plans are being prepared and will be ready for figures within a month.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$15,000. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, William Hencke. This building was mentioned here when the architects were first commissioned to prepare plans. The structure will be erected on Page street east of Fillmore, covering an area of 52x92 feet. There will be a total of six modern suites of two and three rooms with private bath and wall beds. Interior finish will be of pine with some elm panels. Plans provide for a central heating system and hot water supply. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame. Cost not stated. Architect, none. Owner, K. Anderson, Hearst Bldg., S. F. The building will be erected on the north side of Highland avenue west of Holly Park, covering an area of 30x51 feet. Plans provide for a total of six suites of two, three and four rooms. Interior finish will be entirely of pine. All suites will have wall beds and private bath rooms. Bath rooms will have composition floors and tile wainscot. A hot water system will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All mate-

rials are now being purchased.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architects, Dunn & Kearns, Monadnock Bldg., S. F. Owner, M. Byrne. The building will be erected on the west line of Webster street 102 feet south of Pacific, covering an area of 46½ feet by 100 feet. The structure will contain twelve suites of two, three and four rooms. All apartments will have wall beds and private baths. Interior finish will be of pine, elm panels and hardwood floors. There will be steam heat and a hot water system. Bath rooms will have composition floors and tile wainscot. Marble will be used in the entrance vestibule. Exterior of the building will be covered with cement plaster on metal lath and rustic. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick and steel. Cost not stated. Architects, M. S. Yager and Co., Trust and Savings Bldg., L. A. Owner, C. C. Hooper. The building will be erected on a corner site covering an area of 52x150 feet. Plans show a total of 110 rooms arranged in two and three room suites. All apartments will have connecting bath rooms and wall beds. There will be steam heat, elevator service, vacuum cleaning system and hot water plant. Interior of the building will be finished in pine with some hardwood floors and elm panels. Bath rooms will have cement floors and tile wainscot. Exterior will be faced with pressed brick. Construction will be carried on by the M. S. Yager Co.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick, \$30,000. Architect, L. L. Jones, I. V. Hoffman Bldg., L. A. Owner, J. W. Patch. The building will cover an area of 53x115 feet. There will be two stories on the first floor and 10 rooms arranged in two and three room suites on the upper floors. Interior finish will be of pine throughout. All suites will have wall beds and private bath rooms. There will be steam heat, elevator service and a vacuum cleaning system. Exterior of the building will be faced with pressed brick. Plans are being prepared.

BANKS.

RIVERBANK, STANISLAUS CO., CAL. Bank, 2 story and base, brick and steel, \$10,000. Architect, C. H. Russell, Humboldt Bank Bldg., S. F. Owners, Riverbank Land Co. The building

will be erected on a corner site covering an area of 50x125 feet. There will be stores on the first floor besides the bank. Upper floors will be arranged for offices and living apartments. Interior finish will be of pine except in the bank which will be finished in hardwood and tile. Special fireproof vaults will be used. Exterior of the building will be faced with pressed brick. Plans are complete and segregated figures are being taken.

BATH HOUSES.

ALAMEDA, ALAMEDA CO., CAL.—Bath house, 1 story, reinforced concrete, \$10,000. Engineer, City Engineer Chapman, Alameda. Owners, City of Alameda. This work has been mentioned here before when the engineer was first instructed to prepare plans. The building, which is to contain a large swimming tank 120x200 feet, will be erected adjoining the city power house. Hot water exhaust from the power plant will be used to heat the tank. Special salt water filters will be installed. Exterior of the building will be faced with cement plaster. A glass roof will be used. Plans are nearly complete and bids will be called for as soon as funds can be made available.

LONG BEACH, LOS ANGELES CO., CAL.—Bath house and auditorium, 2 story brick and steel, \$600,000. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, A syndicate headed by Frank Strong of Long Beach. The city of Long Beach has been a bid to grant a franchise for the construction of a Class A building on the Strand between Pine and American avenues covering an area of 450x200 feet. There will be a plunge 200 by 100 feet, 200 bath rooms and an auditorium with a seating capacity of 10,000 people. Preliminary plans have been prepared. Further mention will be made of this work as the plans progress.

BRIDGES, DAMS AND HARBOR WORK.

Contracts Awarded.

VANCOUVER, B. C.—Government dock, reinforced concrete, \$1,500,000. Engineer's name not stated. Owners, Provincial Government. Contractors, Henry, McFee and McDonald, White Bldg., Seattle. Contract price, \$1,500,000.

VALE TO ODELL, ORE AND WASH.—Bridge, concrete and steel, \$156,000. Engineer, Engineering Dept. O-W. R. and N. Co. Owners, Oregon-Washington Railroad and Navigation. Contractors, Oregon Bridge and Construction Co., Bates Bldg., Portland. Contract price, \$156,000. Note—The contract calls for the construction of 12 bridges.

CHURCHES.

BERKELEY, ALAMEDA CO., CAL.—Church, 1 story and base, \$5,000. Architect, H. L. Smith, 1521 California street, Berkeley. Owners, Sacred Heart Order. The building will be erected on Center street west of San Pablo. There will be a main auditorium seating 100 people and Sunday school rooms. Interior finish will

be of pine and redwood. Some art glass will be used. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

LA GRANDE, ORE.—Church, 1 story and base, brick and stone, \$25,000. Architects, Tourtellotte & Hummel, Rothchild Bldg., Portland. Owners, Roman Catholic Church of La Grande. The building will cover an area of 39 by 30 feet and has been designed in the classic style. Plans provide for a main auditorium seating about 500 people, class rooms and pastor's study. Interior finish will be of pine throughout. There will be steam heat. Basement will contain the heating system and a gymnasium. Some ornamental plaster work will be used. Exterior of the building will be faced with pressed brick and cut stone. Plans are nearly complete and figures will be called for shortly.

COURT HOUSES.

SAN FRANCISCO—City hall, 4 story and dome, Class A construction, \$4,500,000. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works for the granite work on the new City Hall show McGilvray-Raymond Granite Co. of this city low at \$991,213. Three other firms submitted figures, one Los Angeles firm being included. The next lowest bid came from the Raymond Granite Co. at \$1,010,588. Bids were reported as being very satisfactory to the Board of Public Works and it is stated that the McGilvray figures were some \$225,000 below the architects' estimate. A contract will be awarded shortly. A complete list of the bids appears under the heading of San Francisco in this issue.

FACTORIES & WAREHOUSES.

SACRAMENTO, CAL.—Warehouses, 2, 1 story, frame, \$115,000. Architect, none. Owners, McGilvray Const. Co., 1007 7th street, Sacramento. These buildings will be erected on the company's property bounded by 10th and 11th street and B and C. There will be cement floors. Exteriors will probably be covered with galvanized iron although stock brick may be used. Plans are in the hands of the owners and the work will be done by Day Labor.

FIRE HOUSES.

HAYWARD, ALAMEDA CO., CAL.—Fire house, 2 story and base, frame and brick, \$6,000. Architect, John Haar, Hayward. Owners, Town of Hayward. The building will be erected on Castro street between B and C streets. The first floor will be arranged for three pieces of apparatus and the second floor for company quarters. Interior finish will be of pine throughout. A cement floor will be used over a part of the first floor. Special electric work and plumbing fixtures will be installed. Exterior of the building will be covered with pressed brick veneer. Plans are complete and figures are being taken.

FLATS.

SAN FRANCISCO—Flats, 3 story and base, frame, \$6,500. Architect, none. Owner, William R. Dillon, 538 Haight street, S. F. The building will be erected on the south side of Page street east of Fillmore and will cover an area of 25x195 feet. Plans provide for three flats of five rooms and bath each. All interior finish will be of pine and redwood. Some hardwood floors will be used. There will be an open fire place in each of the living rooms with a brick or tile mantel. Bath rooms and kitchens will have tile wainscot. Marble will be used in the entrances. Exterior of the building will be covered with shiplap and cement plaster. Plans are in the hands of the owner and work will be done by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Flats, 3 story and base, frame. Cost not stated. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Charles H. Cassasa. The building will be erected at 1915 Lake street and has been designed to contain four residential flats. Interiors will be handsomely finished in pine and redwood with some hardwood veneer and imported tapestry. Hardwood floors will be used throughout. Bath rooms will have composition floors and tile wainscot. There will be a large open fire place in each of the living rooms. Mantels will be of tile and brick. Tile wainscot will be used in the bath rooms. Exterior of the building will be covered with shiplap, rustic and brick veneer. Plans are complete and figures are being taken.

STOCKTON, SAN JOAQUIN CO., CAL.—Flats, 2 story and base, frame. Cost not stated. Architect, Walter King, Elks' Bldg., Stockton. Owner, Joe Lynch. The building will be erected on a corner lot at the intersection of Lindsay and San Joaquin streets and has been designed to contain two modern four room flats. Each flat will have one bath. Interior finish will be of pine and elm panels. Hardwood floors will be used in the principal rooms. There will be a large open fire place in each of the living rooms. Mantels will be of tile. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with rustic. Plans are complete and figures are being taken.

GARAGES.

SAN FRANCISCO—Garage, 1 story and base, brick and steel. Cost not stated. Architects, Miller & Colmesnil, Lick Bldg., S. F. Owners, Cool Estate. This building will be erected at the corner of Steiner and Ellis streets and will cover a large area. There will be a concrete foundation, brick walls and steel roof trusses. Cement floor will be used. The building has been designed for a large commercial garage and will include besides the storage space an office and completely equipped machine shop. Special gasoline storage tanks and metal window frames and sash will be specified. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SAN FRANCISCO—Garage, 1 story and base, reinforced concrete, \$20,000. Architect, Herman Barth, 12 Geary

street, S. F. Owner, Marshall K. Koszyner. The building has been designed for a garage and automobile sales rooms, and will be erected on the southeast corner of Van Ness and Pacific street. Interior of the front portion of the building will be handsomely finished in hardwood and tile. A cement floor will be laid. Rear of the building will be used for the repair shop and shipping office. Exterior will be faced with cement plaster. Metal window sashes and frames are prepared. Plans are being prepared.

OAKLAND, CAL.—Garage and sales rooms, 1 story and base of reinforced concrete. Cost not stated. Architect, Frederick H. Meyer, Bankers Trust Building, S. F. Owners, Koss, Car. The building will be erected on the corner of 24th and Broadway streets. It has been designed as the Oakland headquarters of the Kissel Car Co. Interior of the office space and sales rooms will be handsomely finished in hardwoods and tile will be used. A cement and tile floor will be specified. Metal window sash and frames and special machine equipment will be installed. Exterior of the building will be faced with cement plaster. Plans are being prepared.

GOVERNMENT WORK AND SUPPLIES.

PROSPECTIVE BIDDERS.
Supervising Architect.

Specifications for work to be done by the office of the supervising architect have been furnished to the following firms in addition to those previously listed in these columns:

Pasadena, Cal., Construction, September 11.

King Lumber Co., Charlotte, N. C.

Hiram Lloyd Building Co., Construction Co., St. Louis, Mo.

J. E. & A. L. Pennock, Inc., and Title Building, Philadelphia, Pa.

M. Yeager & Son, Danville, Va.

Dieter & Wenzel Construction Co., Wichita, Kan.

J. W. Wieso, 1291 City National Bank Building, Omaha, Neb.

Wise Granite Co., Richmond, Va.

Sound Construction and Engineering Co., Central Building, Los Angeles, Cal.

Southwest Contractor and Manufacturing Co., 506 Douglas Building, Los Angeles, Cal.

J. W. Atkinson, Colorado St., 48, Colo.

E. Schuler, Santa Barbara, Cal.

Sound Construction Co., Seattle, Wash.

P. J. Anweg, 244 Kearny street, San Francisco, Cal.

Campbell Building Co., Salt Lake City, Utah.

E. F. Burke, 1458 Ellis street, San Francisco, Cal.

W. Fissell & Co., St. James street, New York City

San Francisco, Cal., Vault Construction, September 2.

The old Safe and Lock Co., San Francisco, Cal.

B. F. Sturtevant Co., Wash. D. C.

Skinker & Garrett, 417 E. 11th street, Washington, D. C.

Wells Construction Co., 9 W. 11th street, Philadelphia, Pa.

Hygeis Contracting Co., 1134 R street, New York City.

Duplex Electric Co., 575 W. 11th street, New York City.

P. F. Cormley Co., Union Trust Building, Washington, D. C.

Carbon Steel Co., foot of 2nd street, Pittsburgh, Pa.

E. A. Olmer Co., 3 West 29th street, New York City.

York Safe and Lock Co., York Hall's Safe Co., Spring Garden street, Cincinnati, Ohio.

Herring-Hall-Marvin Safe Co., Broadway, New York City.

Manganese Steel Safe Co., 251 Broadway, New York City.

Moller Safe Co., Hamilton street, Remington & Sherman Co., 606 R street, Philadelphia, Pa.

Charles Wright, 25 Stockton street, San Francisco, Cal.

Excavation, Uncompahgre Project.

The following bids were opened by the U. S. Reclamation Service at Montrose, Colo., for excavation of the canal, Uncompahgre project, Colo.

Item 1, schedules 2, 4, 5, 6 and 7, 2, schedules 2 and 4.

Ellsworth-Klauer Construction Co., Globe Building, Pittsburgh, Pa., \$1,651.75.

Saylor Construction Co., Lamar, Colo., team work only, item 1, \$27,224.

Saler Construction Co., Lamar, Colo., team work only, item 1, \$27,224.

Reynolds-Ely, Construction Co., Springville, Utah, item 1, \$24,921.

Roylance & Bates, Springville, Utah, item 1, \$49,317.

C. B. Sierwood, Rocky Ford, Colo., item 2, \$10,729.

Puget Sound Gunners' Quarters, etc.

The following bids were received by the chief bureau of yards and docks, Navy Department, Washington, D. C., for gunners' quarters and firing house at the naval magazine Puget Sound, Washington:

Item 1, Work complete, 2, gunners' quarters; 3, firing house; 4, add to item 1 for substituting asbestos for wood shingles; 5, add to item 1 for dormers and porches to be built as indicated on drawing.

Carlson & Son, Seattle, Wash., item 1, \$7,551; 4, \$221; 5, \$71.

Erickson & Larson, Seattle, Wash., item 1, \$7,384.70; 2, \$5,896.35; 3, \$1,488.45; 4, \$288; 5, \$199.

Johnson & Odlin, Henry Building, Seattle, Wash., item 1, \$7,589; 2, \$5,965; 3, \$1,424; 4, \$485; 5, \$299.

Gravel Cars.

The secretary of the interior has authorized the Reclamation Service to purchase 25 gravel cars at not to exceed \$250 each, for use in connection with work on the Arrowrock dam, Boise irrigation project, Idaho.

Bridge, Warm Springs, Oregon.

The Midland Bridge Co., Kansas City, Mo., No. 1, riveted bridge, concrete abutments, \$14,352; No. 2, pin-connected bridge with concrete abutments, \$13,388; No. 3, riveted bridge with tubular abutments, \$12,459; ac-

cepted, No. 1, pin-connected bridge with tubular abutments, \$11,688; time, 150 days afterward.

Northwest Steel Co., Portland, Oreg., No. 1, \$14,985; 2, \$14,700; 3, \$12,706; 4, \$12,566; time, 150 days.

Structural Steel Works, Omaha, Neb., No. 1, \$13,485; 2, \$12,050; 3, \$12,475; 4, \$12,499; time, 150 days.

D. Moore, 54 4th street, Portland, Ore., No. 1, \$14,050; 2, \$13,625; 3, \$12,125; time, 150 days.

St. Paul Steel Bridge Co., St. Paul, Minn., \$10,425 for pin-connected bridge with two 20-ft approaches; time, 150 days.

Seattle, Wash., Power Boat.

The following bids were received by the district engineer, 16th district, Seattle, Wash., for one service power boat:

Charles H. Curry, Seattle, Wash., \$3,000; boat only; 100 days; accepted.

Edmund Pederson, Seattle, Wash., \$2,500; boat only; 100 days.

George Crosby, Seattle, Wash., \$3,000; boat and screw; \$100 days.

Material for Canal Fortifications.

The Panama Canal Commission has received requisitions for the purchase of a quantity of material required for the fortifications for the Panama Canal fortifications.

The material to be furnished under these specifications, except the rivets, is of the same of standard commercial open-hearth steel, subject to surface inspection only at the point of fabrication.

The rivets are to be a standard grade of steel. The material for consumption of reference is divided into 17 divisions: The first comprises 17 roof trusses in three parts each, anchor bolts and bed plates; 34 necessary for field assembly, 34 expansion rods, complete, with pins, and washers.

The second division is intended for Point, and comprises the necessary grinders, floor beams, channels, sections, anchor bolts, and rivets to make the suspension system of a steel floor in an eight-panel building.

The third division is intended for steel and comprises the necessary grinders, floor beams, channels, sections, anchor bolts, and rivets to make the suspension system of a steel floor in an eight-panel building.

The fourth division calls for material for an overhead traveling crane, and indicates the amount of steel to be marked for each division.

The material called for in the specifications follows:

17 1/2 lbs steel, division 1, for Toro

13 1/2 lbs steel, division 1, for Nios

13 1/2 lbs steel, division 2, for Toro

13 1/2 lbs steel, division 3, for Nios

13 1/2 lbs steel, division 4, for Toro

13 1/2 lbs steel, division 4, for Nios

Marine Island, Cal., Dredging.

The following bids were received by the chief bureau of yards and docks, Navy Department,

ment, Washington, D. C., for dredging channel and basin in Marc Island Strait and removing rocks and the work readvertised, new bids to be opened September 6.

Bellingham, Wash., Post Office.

The contract for painting plaster in the U. S. post office, Bellingham, Wash., has been awarded to Seth A. Atwood Paint & Wall Paper Co., Bellingham, Wash., at \$22.77.

Douglas, Wyo. Post Office.

Under bids opened for the construction of the Douglas, Wyo., public building all bids received on that date have been rejected.

Roswell, N. Mex., Vault Shelving.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for installing metal vault shelving for the U. S. post office and court house, Roswell, N. Mex.:

Watson Mfg. Co., Jamestown, N. Y., \$856.

The Berger Mfg. Co., Canton, Ohio, \$912.

The Canton Art Metal Co., Canton, Ohio, \$948.

Art Metal Construction Co., Jamestown, N. Y., \$1,048.

General Fireproofing Co., Youngstown, O., \$1,218.

The Van Horn Iron Works, Cleveland, Ohio, \$1,760.

Transmission Line.

The secretary of the Interior has awarded contract to the Standard Underground Cable Co., of Los Angeles, Cal., for furnishing wire for transmission line in connection with the Boise irrigation project, Idaho. The contract amounts to \$5,834.05.

Casper, Wyo. Post Office.

All bidders for the construction of the U. S. post office, Casper, Wyo., will be requested by the supervising architect to make certain changes in their bids in order that the cost of the building may be brought within the amount appropriated by Congress.

HALLS & SOCIETY BLDGS.

BURLINGAME, SAN MATEO CO., CAL.—City hall, 2-story and base, brick and steel. Cost not stated. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owners, City of Burlingame. A change has been made in the call for bids on the Burlingame City Hall. The time for figuring the work has been extended to September 15th. The amount of the bond has been fixed at 50 per cent of the contract price, and each bid must be accompanied by a certified check of 10 per cent of the amount of the bid. An official proposal containing these changes appears in the Daily Pacific Builder under the head of Official Advertising.

SAN FRANCISCO.—Science Museum, 1½-story and base, Class A construction, \$120,000. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, Golden Gate Park Trustees. Preliminary plans for this building, which is to occupy a prominent place in Golden Gate Park, have been approved by the Park Commissioners and working drawings are now being prepared. The building is designed in the classic

style and will be absolutely fireproof throughout. There will be a complete steel frame with stone and terra cotta facing. Interior finish will be of metal and stone with some hardwood. Floors will be of cement and tile. A steam heating system will be installed. Working drawings will be complete and bids will be called for this fall.

HOTELS.

SAN FRANCISCO.—Hotel, 4-story and base, brick and steel. Cost not stated. Architect, Arthur T. Ehrenfort, 251 Kearny street, S. F. Owner, Metta Hacks. The building will be erected at the southwest corner of Olive and Larkin streets on a lot 60x103 feet. First floor will contain three stores besides the hotel entrance. Upper floors have been divided into 60 guest rooms, all of which will have private baths. Several of the rooms will also be equipped with wall beds. Interior finish will be of pine throughout. There will be steam heat, elevator service and a hot water supply. Bath rooms will have cement floors and tile wainscot. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Contracts for the excavating and foundation work have been awarded. Other parts of the work are now being figured.

OAKLAND, CAL.—Hotel alterations, 4-story, brick, \$20,000. Architect, C. W. Dickey, Central Bank Bldg., Oakland, Owners, Abrahamson Bros. The present building at the southeast corner of 13th and Clay streets, and for several years occupied as a lodge hall, will be remodeled into a modern hotel. The work will include division of the floors into guest rooms, interior plaster work, electric work, plumbing, new interior finish, painting, and the installation of a central heating system. Exterior of the building will not be changed. Plans are nearly complete and figures will be called for shortly.

LOS ANGELES, CAL.—Hotel, 4-story and base, brick and steel. Cost not stated. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Victor Ponet. The building is to be erected at the corner of Pico and Hope streets. Interior will contain in the neighborhood of 120 rooms, a large per cent of which will have private baths. Interior finish will be of pine and hardwood. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water plant. There will be metal window sash and frames. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. Only preliminary plans have been prepared.

LOS ANGELES, CAL.—Hotel, 4-story and base, brick and steel, \$50,000. Architects, Mayberry and Parker, Pacific Electric Bldg., L. A. Owners, Consolidated Realty Co. The building will be erected at the corner of 14th and Hill streets and will cover an area of 60x101 feet. First floor will contain a large lobby, offices, dining room and kitchen. Upper floors will be divided into 60 guest rooms and 18 baths. Interior finish will be of pine and hardwood. Bath rooms will be finished in tile. There will be steam heat, elevator service, a hot water system and vacuum cleaning plant. Exterior of the building will be faced with pressed brick. Plans are out for figures.

Contracts Awarded.

PORTLAND, ORE.—Hotel, 3-story and base, brick, \$25,000. Architect, A. C. Ewart, Beak Bldg., Portland. Owner, Mr. Ryan. Contractor, G. Zanello, Builders' Exchange, Portland. Contract price, \$25,000.

LOS ANGELES, CAL.—Hotel, 4-story and base, brick and steel, \$43,000. Architects, Neher and Skilling, Garland Bldg., L. A. Owner, W. H. Wagner. Contractors, Alta Planing Mill Co., 830 McGarry street, L. A., general construction only. Contract price, \$13,690.

LOS ANGELES, CAL.—Hotel, 3-story and base, Class C construction, \$22,000. Architect, Albert C. Martin, Higgins Bldg., L. A. Owner, J. Demozzi. Contractor, H. D. Sylvester, Central Bldg., L. A. Contract price, \$22,000.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO.—Exposition auditorium, Class A construction, \$1,000,000. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans and specifications for the plumbing, heating, ventilating and electric work on the Exposition Auditorium, which is to be erected in the Civic Center, have been completed. Bids will be opened by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Co. on September 18th. Separate bids will be received on the plumbing and electric work, and under heating, for the system complete and for four divisions, covering the following work: Direct heating and vacuum pumps; sheet metal work, fans, motors and air heaters and air washers. Plans can be secured from the Director of Works, Service Bldg. An official proposal appears under the heading of Official Advertising in this issue.

SAN FRANCISCO.—Exhibit building, frame and concrete construction, \$100,000. Architects, Rightetti & Headman, Phelan Bldg., S. F. Owners, Swiss Society. These architects have just received a commission to prepare plans for a large building which will be erected on the Exhibit Section of the Panama-Pacific International Exposition for the Swiss Society. Construction will be of frame and cement plaster.

RESIDENCES.

SAN FRANCISCO.—Residence, 2-story and base, frame. Cost not stated. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Mr. Carnine. The house has been designed for a seven room dwelling and will be erected on Douglas street west of 17th street. Interior will be finished in pine with some hardwood floors and elm panels. There will be furnace heat and open fire place. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

SAN FRANCISCO.—Residence, 2-story and base, frame, \$2,500. Architect, none. Owner, E. Nelson, 30 Presidio Terrace, S. F. This dwelling will be similar to a number of other houses erected by Mr. Nelson on property on

California street west of 17th avenue. There will be six rooms and bath. Interior finish will be of pine throughout. Hardwood floors will be used in the living room, dining room and reception hall. There will be a large open fire place in the living room with tile or brick mantel. Tile will be used in the bath and kitchen. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner. Work will be done by Day Labor.

SAN FRANCISCO—Residence, 3 story and base, frame, \$3,500. Architect, none. Owner, James T. and S. J. Joice street, S. F. The dwelling will be erected on Joice street near Pine and will contain seven rooms and bath. All interior finish will be of pine. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire place. Mantel will be of brick or tile. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame and brick, \$12,000. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owner, Albert A. Hanks. This building will be erected on Pacific avenue near Laurel and has been designed to contain 10 rooms, baths and sleeping porch. A garage will also be erected on the rear of the lot. Interior of the dwelling will be handsomely finished in pine, hardwoods and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with brick veneer. Plans are now being prepared.

SAN FRANCISCO—Residence, 2 story and base, brick, \$40,000. Architects, Willis Polk and Co., Merchants' Exchange Bldg., S. F. Owner, Albert Herman. The dwelling will be erected on the 2800 block on Broadway, commanding an excellent view of the city and bay, and has been designed for a modern city home. There will be in the neighborhood of 14 rooms, several baths and sleeping porches. Interior finish will be of pine, hardwoods and white enamel. Hardwood floors will be used in the principal rooms. A central heating system, either hot water or steam, will be installed. Several of the rooms will have open fire places and tile or brick mantels. Bath rooms will be finished in tile with composition floors. Marble will be used extensively. Exterior of the dwelling will be faced with pressed brick. Plans are now being prepared.

SAN FRANCISCO—Residence, 2 story and base, frame, \$10,000. Architect, W. L. Schmollie, Whittell Bldg., S. F. Owner, Mary A. Hume. The dwelling will be erected on the north side of Chestnut street near Hyde and will cover an area of 54x16 feet. There will be in the neighborhood of 10 rooms and several baths. Interior finish will be on pine and hardwood. Hardwood floors will be used in the principal

rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick or tile. Tile will be used in the bath rooms and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Roof will be of terra cotta tile. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,800. Architect, none. Owner, David Houle, 669 Market street. The dwelling has been designed for a six room house with bath, and will be erected on the west side of 25th avenue near Lincoln Way. Interior finish will be of pine throughout. Hardwood floors will be used in the living room, dining room and reception hall. There will be a large open fire place in the living room with brick or tile mantel. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Bungalows, 3, 1 1/2 story and base, frame, \$2,500 each. Architect, Joseph M. Geary, 2581 Post street. Owner, J. H. Kruss. These houses will be erected on the south side of College avenue between 25th and Shotwell streets. Each has been designed to contain six rooms and bath. Interior finish will be of pine with some hardwood floors. Open fire places will be used in the living rooms with brick mantels. Tile will be used in the baths and kitchens. Exteriors will be covered with cement plaster on metal lath and rustic. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1 1/2 story and base, frame, cost not stated. Architect, John Lindson Thomas, First National Bank Bldg., Berkeley. Owner, O. I. Punnells. The house will be erected in North Cragmont Tract and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine with some hardwood in the living and dining rooms. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the residence will be covered with cement plaster on metal lath. Plans are complete and figures have been taken.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$5,000. Architect, none. Owner, H. M. Swalley, 745 Wesley avenue, Oakland. The dwelling has been designed for an eight room house with bath, and will be erected on Walker avenue near Cottage street. Interior finish will be of pine with hardwood floors in the principal rooms. There will be furnace heat and open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner. Work will be done by Day Labor. All materials are now being purchased.

OAKLAND, CAL.—Residence, 2 story and base, frame, cost not stated. Architects, Milwain Bros., Delger Bldg., Oakland. Owner, A. H. Dana. The dwelling will be erected in Rock Ridge Park and has been designed to contain eight rooms, bath and sleeping porch. Interior finish will be of pine with some hardwood and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath rooms and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with shingles. Plans are complete and figures are now being taken.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$6,500. Architect, A. D. Nicholson, Whittell Bldg., S. F. Owner, W. D. Tillinghast. This work has been mentioned here before when plans were first out for figures. Some revisions have been made in the plans and new figures are now being taken. The dwelling has been designed to contain eight rooms, baths and sleeping porches. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Bath rooms will be finished in tile with cement floors. Exterior of the house will be covered with cement plaster on metal lath. Plans are now out for figures for the second time.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$4,000. Architect, none. Owner, Jalmer Millan, 412 Blackstone street, Oakland. The house has been designed for an eight room dwelling with bath and sleeping porch. Interior will be finished in pine with some elm panels in the living room. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner. Work will be done by Day Labor and all materials are now being purchased.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$30,000. Architects, Milwain Bros., Delger Bldg., Oakland. Owner, Mrs. A. J. Lurkey. The dwelling will be erected in Crocker Highlands and has been designed to contain 15 rooms, baths and sleeping porches. A garage will be erected on the rear of the lot. Interior of the dwelling will be finished in pine, redwood and hardwoods. There will be a hot water system of heating, open fire places and vacuum cleaning system. Hardwood floors will be used in the principal rooms. Mantels will be of tile and brick. A garbage incinerator and automatic water heater will be installed. Bath rooms will have composition floors and tile wainscot. Tile will also be used in the kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. A clay tile roof is specified. Plans are nearly complete and figures will be called for within a week or ten days.

SACRAMENTO, CAL.—Residences, 1 and 2 story and base, frame, cost not stated. Architect, none. The follow-

ing Lay Labor jobs are reported as about to be started in Sacramento: 1 story frame dwelling for D. Lamorue, 4219 Stanford avenue, \$1,800; 2 story frame dwelling for L. Lorgomarsine, East Side, \$2,000; 1 story frame dwelling for H. A. Langley, 1317 18th street, \$1,500 and a 2 story frame dwelling for J. G. Houston, 2705 O street, \$2,000.

PORTLAND, ORE.—Residence, 2 story and base, frame, \$15,000. Architect, Ellis P. Lawrence, Chamber of Commerce Bldg., Portland. Owner, John Keating. The dwelling has been designed for a 10 room house with baths and sleeping porches and will be erected in St. Helene's Court in Portland Heights. Interior finish will be of pine and hardwoods with hardwood floors in the principal rooms. There will be a central heating system, probably hot water, and open fire places. Mantels will be of tile and brick. Automatic water heater and vacuum cleaning system will be installed. Bath rooms will have composition floors and tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be carried to completion under the direction of Andrew Wilson by Day Labor. All materials are now being purchased.

PORTLAND, ORE.—Residence, 2½ story and base, brick and stone, \$35,000. Architect, Ellis P. Lawrence, Chamber of Commerce Bldg., Portland. Owner, Daniel Kern. The house has been designed to contain in the neighborhood of 15 rooms, several bath rooms and sleeping porch. Interior finish will be of pine and hardwoods. Hardwood floors will be used in the principal rooms. There will be steam heat and open fire places, a vacuum cleaning system and dumb waiters. Mantels will be of brick and tile. Bath rooms will have composition floors and tile wainscot. A garage will be erected on the rear of the lot. Exterior of the dwelling will be faced with cut stone and pressed brick. Plans are complete and the work will be done by Day Labor. Excavation has been completed.

PASADENA, LOS ANGELES CO., CAL.—Residence, 2 story and base, brick or reinforced concrete. Cost not stated. Architect, Frederick Heinlein, Lister Bldg., L. A. Owner, Baroness Rosa Von Zimmerman. The dwelling, which will be designed in the Italian Villa style, will contain in the neighborhood of 21 rooms. A site has been secured in Oak Knoll. The type of construction which is to be used has not been fully determined. Interior finish will be largely of hardwoods. Exterior of the house will probably be faced with cement plaster. Further mention of the work will be made as the plans progress.

CAPESTRANO, ORANGE CO., CAL. Residence, 2 story and base, hollow tile construction. Cost not stated. Architects, Walker and Vawter, Ilberian Bldg., L. A. Owner, Grace Dolph. The dwelling will contain twelve rooms, four baths and sleeping porches. There will be hollow tile interior partitions and concrete floors. Plans provide for steam heat and a vacuum cleaning system. Interior finish will be of pine and hardwoods. Exterior of the house will be faced with cement plaster. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,500. Architects, Smith and Stewart, 244 Kearny street, S. F. Owner, C. Gettme. The dwelling has been designed for a seven room house with two baths and two sleeping porches. Interior finish will be of pine throughout. Hardwood floors will be used in the principal rooms. There will be a large open fire place and a brick mantel in the living room. Bath rooms will have tile wainscot. Exterior of the dwelling will be covered with shakes. Plans are nearly complete and figures will be called for shortly.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,500. Architect, none. Owner, P. Lindeblad, 3822 Randolph avenue, Oakland. The dwelling has been designed for a six room house with bath and will be erected on Everett street. Interior finish will be of pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be open fire place and brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner. Work will be done by Day Labor. All materials are now being purchased.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,400. Architect, none. Owners, Fedt Bros., 8 Warren street, Oakland. The dwelling has been designed for a seven room house with bath. Interior finish will be of pine with some hardwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire place. Mantel will be of tile. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, C. S. Allred, 120 Onondaga avenue, S. F. The dwelling will contain six rooms and bath. Interior finish will be of pine throughout. Hardwood floors will be used in the living and dining rooms. There will be a large open fire place and brick mantels. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with shiplap and rustic. Plans are complete and work will be done by Day Labor.

STORE.

SAN FRANCISCO—Store addition, 1 story and base, brick and steel. Cost not stated. Architect, M. J. Lyon, Nevada Bank Bldg., S. F. Owner, Dr. Buckley. The building on the north line of Market street west of Marshall Square will be added to at a cost of approximately \$10,000. The addition will contain stores and storage space. Interior finish will be of pine throughout. Modern plumbing and electric work will be included. Exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Telephone Exchange, 6 or 12 story and base, Class A construction. Cost not stated. Architect, Architectural Department Pa-

cific Telephone and Telegraph Co., 140 New Montgomery street, S. F. Owners, Pacific States Telephone and Telegraph Co. The building will be erected at 622 South Hill street covering an area of 75 feet square. The entire building will be used by the company. Plans are being prepared for a 12 story structure but only six stories will be erected at the present time. There will be a complete steel frame, exterior walls of terra cotta and pressed brick. Hollow tile interior partitions and metal trim will be used. There will be steam heat and elevator service. Bids will be called for as soon as plans can be completed.

Contracts Awarded.

LOS ANGELES, CAL.—Lofts, 13 story and base, Class A construction, \$78,000. Architects, Austin and Pennell, Wright and Callender Bldg., L. A. Owners, Mason Estate. Contractors, C. J. Kubach Co., Van Nuys Bldg., L. A. general construction only. Contract price, \$78,000.

THEATRES.

LOS ANGELES, CAL.—Theatre, 1 story and base, brick and steel, \$35,000. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, H. L. McAllister and J. M. Dobbins. The building will be erected on an irregular lot covering an area of 169x183x121x26 feet. The theatre, which will be used for moving pictures, will seat 850 people. There will be five stores in the building besides the theatre. Metal window sash and frames will be used. Interior finish will be of pine throughout. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

SAN FRANCISCO—Nickelodeon, 1 story, frame. Cost not stated. Architects, Fabre and Bearwald, Merchants' National Bank Bldg., S. F. Owner, Mr. Louissin. The building will be erected in the Richmond District and will contain an auditorium seating 200 people. Interior finish will be of pine and ornamental plaster. There will be special electric work. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures will be called for at once.

BERKELEY, ALAMEDA CO., CAL.—Theatre and pool room, 1 story and base, brick and frame. Cost not stated. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, J. Michel. The building will be erected on San Pablo near 67th street and will contain, besides the theatre, a large pool hall. Interior finish will be of pine. Special electric work will be required. Exterior of the building will be covered with cement plaster. Plans are complete and figures are being taken.

This work will consist of exterior and interior alterations and will call for new plastering, painting, decorating, electric work and plumbing. Exterior walls will be faced with pressed brick. Plans are complete and figures are being taken.

VICTORIA, B. C.—Theatre, 3 story and base, reinforced concrete and steel, \$125,000. Architect, Jesse M. Warren, Central Bldg., Victoria. Owners, McPherson and Fulton. The building will be erected on the east side of Government street north of Cormorant

Separate bids will be received for Plumbing, Electric Wiring and under Heating and Ventilating for the system complete and for four divisions covering the following work: Duct

of the Board of Supervisors of Kern County, up to 10 o'clock a. m. of the 7th day of October, 1913. Plans, elevations and sections must be drawn to a scale of eight feet to one inch, and be executed in black and white only. Building site is 264x264 feet. A perspective may be submitted.

Specifications must be complete and contain a complete system of heating, plumbing and ventilation, and must specify kinds of material used in construction. The plans must be for a building two stories high and basement.

The successful competitor must file a good and sufficient bond, satisfactory to the Board of Supervisors, in the sum of \$25,000 as a guarantee that it will file bid, for a sum not to exceed \$150,000 for the construction of said building as per plans will be received at the time appointed for such bids.

Premiums will be given to competitors as follows, to-wit:

First prize, acceptance of plans and specifications.

Second prize, two hundred and fifty dollars.

Third prize, one hundred and twenty-five dollars; all of said premiums to be deducted from the commissions paid the successful architect.

The Board reserves the right to accept or reject any or all plans and specifications.

Dated this 13th day of August, 1913.
I. L. MILLER,
Clerk of the Board of Supervisors.
By Geo. H. Brunette, Deputy Clerk.

S. Indian land office at San Indian, N. M., and the San Juan School, N. M. For further information apply to the superintendent of the San Juan Indian School, Shiprock, New Mexico. CATO SELLS, commissioner.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 415, in the Exposition Building, Pine and Battery Streets, San Francisco.

Plans dealing with certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, and carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

APARTMENT HOUSE—3 story and base, frame, \$25,000. San Francisco. Architects, Dunn & Kearns, Monadnock Bldg., S. F. Owner, J. F. Dunn. The building will be erected on the north side of Pine street west of Leavenworth, covering an area of 25 by 120 feet. Interior has been arranged to contain 12 large suites of three and four rooms. Interior finish will be of pine with elm panels and some hardwood floors. All suites will be equipped with wall beds and private bath rooms. Plans provide for a central heating system and hot water supply. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Marble will be used in the entrance vestibule. Plans are being prepared and will be ready for figures within a month.

APARTMENT HOUSE—3 story and base, frame, \$15,000. San Francisco. Architects, Fitch & Knoll, Hearst Bldg., S. F. Owner, William Hencke. This building was mentioned here when the architects were first commissioned to prepare plans. The structure will be erected on Page street east of Fillmore, covering an area of 25x92 feet. There will be a total of six modern suites of two and three rooms with private baths and wall beds. Interior finish will be of pine with some elm panels. Plans provide for a central heating system and hot water supply. Bath rooms will have cement floors and the wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame. Cost not stated. San Francisco. Architects, Rouscan & Rous-

cisco, California, at 11:30 A. M. Thursday, September 18, 1913, for plumbing, heating and ventilating, and electric wiring for the Exposition Auditorium, in accordance with the plans and specifications on file in the office of the Director of Works.

Separate bids will be received on Plumbing, Electric Wiring, and under Heating and Ventilating, for the system complete and for four divisions covering the following work: Direct Heating and Vacuum Pumps; Sheet Metal Work; Pans, Motors, and Air Heaters; Air Washers.

A bond in the sum of fifty (50) per cent. of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$10.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman. (*)

seum, Monadnock Bldg., S. F. Owner, Mr. Carnine. The house has been designed for a seven room dwelling and will be erected on Douglas street west of 17th street. RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, P. Nelson, 30 Presidio Terrace, S. F. This dwelling will be similar to a number of other houses erected by Mr. Nelson on property on California street west of 15th avenue. There will be six rooms and bath. Interior finish will be of pine throughout. Hardwood floors will be used in the living room, dining room and reception hall. There will be a large open fire place in the living room with tile or brick mantel. Tile will be used in the bath and kitchen. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner. Work will be done by Dry Labor.

Residence—3 story and base, frame, \$3,500. San Francisco. Architect, none. Owner, James T. Tobin, 18 Joyce street, S. F. The dwelling will be erected on Joyce street near Pine and will contain seven rooms and bath. All interior finish will be of pine. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire place. Mantel will be of brick or tile. Tile will be used in the bath room and kitchen. An automatic water heater

will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

RESIDENCE—2 story and base, frame and brick, \$12,000. San Francisco, Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owner, Abbott A. Hanks. This dwelling will be erected on Pacific avenue near Lomb and has been designed to contain 10 rooms, baths and sleeping porch. A garage will also be erected on the rear of the lot. Interior of the dwelling will be handomely finished in pine, hardwoods and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with brick veneer. Plans are now being prepared.

RESIDENCE—2 story and base, brick, \$10,000. San Francisco, Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owner, Albert Herman. The dwelling will be erected on the 2800 block on Broadway, commanding an excellent view of the city and bay, and has been designed for a modern city home. There will be in the neighborhood of 14 rooms, several baths and sleeping porches. Interior finish will be of pine, hardwoods and white enamel. Hardwood floors will be used in the principal rooms. A central heating system, either hot water or steam, will be installed. Several of the rooms will have open fire places and tile or brick mantels. Bath rooms will be finished in tile with composition floors. Marble will also be used extensively. Exterior of the dwelling will be faced with pressed brick. Plans are now being prepared.

RESIDENCE—2 story and base, frame, \$10,000. San Francisco, Architect, W. L. Schmolle, Witterl Bldg., S. F. Owner, Mary A. Hume. The dwelling will be erected on the north side of Chestnut street near Hyde and will cover an area of 54x100 feet. There will be in the neighborhood of ten rooms and several baths. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick or tile. Tile will be used in the bath rooms and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Roof will be of terra cotta tile. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$2,800. San Francisco, Architect, none. Owner, David Hoole, 660 Market street. The dwelling has been designed for a six room house with bath, and will be erected on the west side of 25th avenue near Lincoln Way. Interior finish will be of pine rough-cut. Hardwood floors will be used in the living room, dining room and reception hall. There will be a large open fire place in the living room with brick or tile mantel. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be

covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner, who will do the work by Day Labor.

RUNGALOWS—3, 1½ story and base, frame, \$2,500 each. San Francisco, Architect, Joseph M. Geary, 2581 Post street, S. F. Owner, J. H. Kins. These houses will be erected on the south side of College avenue between 23rd and Shotwell streets. Each has been designed to contain six rooms and bath. Interior finish will be of pine with some hardwood floors. Open fire places will be used in the living rooms with brick mantels. Tile will be used in the baths and kitchens. Exteriors will be covered with cement plaster on metal lath and rustic. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

APARTMENT HOUSE, 3 story and base, frame. Cost not stated. San Francisco, Architect, none. Owner, K. Anderson, Hearst Bldg., S. F. The building will be erected on the north side of Highland avenue west of Holly Park, covering an area of 30x51 feet. Plans provide for a total of six suites of two, three and four rooms. Interior finish will be entirely of pine. All suites will have wall beds and private bath rooms. Bath rooms will have composition floors and tile wainscot. A hot water system will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

APARTMENT HOUSE—3 story and base, frame, \$10,000. San Francisco, Architects, Dunn and Kearns, Mondnock Bldg., S. F. Owner, M. Byrne. The building will be erected on the west line of Webster street 102 feet south of Pacific covering an area of 46½ feet by 100 feet. The structure will contain twelve suites of two, three and four rooms. All apartments will have wall beds and private bath rooms. Interior finish will be of pine, elm panels and hard wood floors. There will be steam heat and a hot water system. Bath rooms will have composition floors and tile wainscot. Marble will be used in the entrance vestibule. Exterior of the building will be covered with cement plaster on metal lath and rustic. Plans are being prepared.

CITY HALL—4 story and dome, Class A construction, \$1,500,000. San Francisco, Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works for the granite work on the new City Hall show McGilvray-Raymond Granite Co. of this city low at \$991,213. Three other firms submitted figures one Los Angeles firm being included. The next lowest bid came from the Raymond Granite Co. at \$1,019,588. Bids were reported as being very satisfactory to the Board of Public Works and it is stated that the McGilvray figures were some \$225,000 below the architects' estimate. A complete list of the bids appears under the heading of San Francisco in this issue.

FLATS—3 story and base, frame, \$6,500. San Francisco, Architect, none. Owner, William R. Dillon, 538

Haight street, S. F. The building will be erected on the south side of Page street east of Fillmore and will cover an area of 25x105 feet. Plans provide for three flats of five rooms and bath each. All interior finish will be of pine and redwood. Some hardwood floors will be used. There will be an open fire place in each of the living rooms with a brick or tile mantel. Bath rooms and kitchens will have tile wainscot. Marble will be used in the entrances. Exterior of the building will be covered with shipap and cement plaster. Plans are in the hands of the owner and work will be done by Day Labor. All materials are now being purchased.

FLATS—3 story and base, frame. Cost not stated. Architects, Rousseau & Rousseau, Mondnock Bldg., S. F. Owner, Charles H. Sassasa. The building will be erected at 1915 Lake street and has been designed to contain four residential flats. Interiors will be handomely finished in pine and redwood with some hard wood veneer and imported tapestry. Hardwood floors will be used throughout. Bath rooms will have composition floors and tile wainscot. There will be a large open fire place in each of the living rooms. Mantels will be of tile and brick. Tile wainscot will be used in the bath rooms. Exterior of the building will be covered with shipap, rustic and brick veneer. Plans are complete and figures are being taken.

GARAGE—1 story and base, brick and steel. Cost not stated. San Francisco, Architects, Miller and Colmesnil, Lick Bldg., S. F. Owners, Cool Estate. This building will be erected at the corner of Steiner and Ellis streets and will cover a large area. There will be a concrete foundation, brick walls and steel roof trusses. Cement floor will be used. The building has been designed for a large commercial garage and will include besides the storage space an office and completely equipped machine shop. Special gasoline storage tanks and metal window frames and sash will be specified. Exterior of the building will be faced with pressed brick. Plans are being prepared.

GARAGE—1 story and base, reinforced concrete, \$20,000. San Francisco, Architect, Herman Barth, 12 Geary street, S. F. Owner, Dr. Martin Krotoszyner. The building has been designed for a garage and automobile sales rooms, a will be erected at the southeast corner of Van Ness avenue and Pacific street. Interior of the front portion of the building will be handomely finished in hardwoods, marble and tile. A cement floor will be used. Rear of the building will contain the repair shop and shipping rooms. Exterior will be faced with cement plaster. Metal window sash and frames are specified. Plans are being prepared.

SCIENCE MUSEUM 1½ story and base, Class A construction, \$120,000. San Francisco, Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, Golden Gate Park Trustees. Preliminary plans for this building, which is to occupy a prominent place in Golden Gate Park, have been approved by the Park Commissioners and working drawings are now being prepared. The building is designed in the classic style and will be absolutely fireproof throughout. There will be a complete

steel frame with stone and terra cotta facing. Interior finish will be of metal and stone with some hardwood. Floors will be of cement and tile. A steam heating system will be installed. Working drawings will be complete and bids will be called for this fall.

HOTEL—4 story and base, brick and steel. Cost not stated. San Francisco. Architect, Arthur T. Ehrenpfort, 251 Kearny street, S. F. Owner, Metta Ilacke. The building will be erected at the southwest corner of Olive and Larkin streets on a lot 60x100 feet. First floor will contain three stores besides the hotel entrance. Upper floors have been divided into 60 guest rooms, all of which will have private baths. Several of the rooms will also be equipped with wall beds. Interior finish will be of pine throughout. There will be steam heat, elevator service and a hot water supply. Bath rooms will have cement floors and tile wainscot. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Contracts for the excavating and foundation work have been awarded. Other parts of the work are now being figured.

STORE ADDITION—1 story and base, brick and steel. Cost not stated. San Francisco. Architect, M. J. Lyon, Nevada Bank Bldg., S. F. Owner, Dr. Buckley. The building on the north line of Market street west of Marshall Square will be added to at a cost of approximately \$10,000. The addition will contain stores and storage space. Interior finish will be of pine throughout. Modern plumbing and electric work will be included. Exterior of the building will be faced with pressed brick. Plans are being prepared.

EXPOSITION AUDITORIUM—Class A construction, \$1,000,000. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans and specifications for the plumbing, heating, ventilating and electric work on the Exposition Auditorium, which is to be erected in the Civic Center, have been completed. Bids will be opened by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Co. on September 18th. Separate bids will be received on the plumbing and electric work, and under heating, for the system complete, and for four divisions, covering the following work: Direct heating and vacuum pumps—sheet metal work, fans, motors and air heaters and air washers. Plans can be secured from the Director of Works, Service Bldg. An official proposal appears under the heading of Official Advertising in this issue.

BUNGALOW—1 story and base, frame, \$2,000. San Francisco. Architect, none. Owner, C. S. Alfred, 120 Onondaga avenue, S. F. The dwelling will contain six rooms and bath. Interior finish will be of pine throughout. Hardwood floors will be used in the living and dining rooms. There will be a large open fire place and brick mantel. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with shiplap and rustic. Plans are complete and work will be done by Day Labor.

NICKEL PLATE—1 story, frame. Cost not stated. San Francisco. Architects, Fabre and Bearwald, Merchants National Bank Bldg., S. F.

Owner, Mr. Louissou. The building will be erected in the Richmond District and will contain an auditorium seating 200 people. Interior finish will be of pine and ornamental plaster. There will be special electric work. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures will be called for at once.

EXHIBIT BUILDING—frame and

concrete construction, \$100,000. San Francisco. Architects, Rightt and Headman, Phelan Bldg., S. F. Owners, Swiss Society. These architects have just received a commission to prepare plans for a large building which will be erected on the Exhibit Section of the Panama-Pacific International Exposition for the Swiss Society. Construction will be of frame and cement plaster.

Bids Opened For Granite Work On New City Hall Building.

Lowest of Four Bids Submitted by McGilvray-Raymond Granite Company and Are Reported as Being Most Satisfactory to Board of Works. Cost Nearly a Million, but Within Architects' Estimates.

One Los Angeles Firm Submits Bid, but All Other Figures Come from Local Men. Prompt Action Promised on Awarding of Big Contract. Board of Works Also Open Bids for Removal of Safety Station.

Granite Work for City Hall.

Bids opened by the Board of Public Works for the granite work on the new City Hall show McGilvray-Raymond Granite Co. low on the main proposition at about \$991,313, the next lowest figure on the same proposition being submitted by the Raymond Granite Co. at \$1,010,588. Four firms bid on the work, one Los Angeles firm, L. Bly being represented. Mr. Bly bid only on the granite for the basement.

Figures submitted by the McGilvray-Raymond Granite Co. are stated to be very satisfactory to the Board of Public Works and are said to be below the estimate for this work prepared by the architects. No contract has been awarded, but action will probably be taken at the next meeting of the Board of Public Works.

Bids were opened at the same meeting for removing the Safety Station at the corner of Market and Stockton streets. J. P. M. Phillips submitted the lowest figures at \$995. A complete list of all bids received follows:

Prop.	L. Bly Los Angeles	McGilvray- Raymond Granite Co.	Raymond Granite Co.	Sound Const & Eng Co.

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE—2 story and base, frame. Cost not stated, Oakland, Cal. Architects, Milwain Bros., Delger Bldg., Oakland Owner, A. H. Dana. The dwelling will be erected in Rock Ridge Park and has been designed to contain eight rooms, bath and sleeping porch. Interior finish will be of pine with some hardwood and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath rooms and kitchen. An automatic water heater will be installed. Exterior of the

dwelling will be covered with shingles. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$6,500. Piedmont, Alameda Co., Cal. Architect, A. D. Nicholson, Whittell Bldg., S. F. Owner, W. D. Tillinghast. This work has been mentioned here before when plans were first out for figures. Some revisions have been made in the plans and new figures are now being taken. The dwelling has been designed to contain eight rooms, bath and sleeping porches. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Bath rooms will be finished in tile with cement floors. Exterior of the house will be covered with cement plaster on metal lath. Plans are now out for figures for the second time.

RESIDENCE—2 story and base, frame, \$4,000. Oakland, Cal. Architect, none. Owner, Jaimier Millan, 412 Blackstone street, Oakland. The house has been designed for an eight room dwelling with bath and sleeping porch. Interior will be finished in pine with some elm panels in the living room. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner. Work will be done by Day Labor and all materials are now being purchased.

RESIDENCE—2 story and base, frame, \$30,000. Oakland, Cal. Architects, Milwain Bros., Delger Bldg., Oakland. Owner, Mrs. A. J. Larkey. The dwelling will be erected in Crocker Highland, and has been designed to contain 15 rooms, baths and sleeping porches. A garage will be erected on the rear of the lot. Interior of the dwelling will be finished in pine, redwood and hard woods. There will be a hot water system of heating, open fire places and vacuum cleaning system. Hardwood floors will be used in the principal rooms. Mantels will be of tile and brick. A garbage incinerator and automatic water heater will be installed. Bath rooms will have composition floors and tile wainscot. Tile will also be used in the kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. A clay tile roof is specified. Plans are nearly complete and figures will be called for within a week or ten days.

BATH HOUSE—1 story, reinforced concrete, \$10,000. Alameda, Alameda Co., Cal. Engineer, City Engineer Chapman, Alameda. Owners, City of Alameda. This work has been mentioned here before when the engineer was first instructed to prepare plans. The building, which is to contain a large swimming tank 120x200 feet, will be erected adjoining the city power house. Hot water exhaust from the power plant will be used to heat the tank. Special salt water filters will be installed. Exterior of the building will be faced with cement plaster. A glass roof will be used. Plans are nearly complete and bids will be called for as soon as funds

in be made available.

BUNGALOW—1½ story and base, frame. Cost not stated. Berkeley, Cal. Architect, John Judson Thomas, First National Bank Bldg., Berkeley. Owner, O. I. L. Co. The house will be erected on Third ragmont Tract and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine with some hardwood in the living and dining rooms. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the residence will be covered with cement plaster on metal lath. Plans are complete and figures have been taken.

RESIDENCE—2 story and base, frame, \$5,000. Oakland, Cal. Architect, none. Owner, H. M. Swalley, 745 Vesley avenue, Oakland. The dwelling has been designed for an eight room house with bath, and will be erected on Watker avenue near Cottage street. Interior finish will be of pine with hardwood floors in the principal rooms. There will be furnace heat and open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner. Work will be done by Day Labor. All materials are now being purchased.

FIREHOUSE—2 story and base, frame and brick, \$6,000. Hayward, Alameda Co., Cal. Architect, John Haar, Hayward. Owners, Town of Hayward. The building will be erected on Castro street between B and C streets. The first floor will be arranged for three pieces of apparatus and the second floor for company quarters. Interior finish will be of pine throughout. A cement floor will be used over a part of the first floor. Special electric work and plumbing fixtures will be installed. Exterior of the building will be covered with pressed brick veneer. Plans are complete and figures are being taken.

GARAGE AND SALES ROOMS—1 story and base, reinforced concrete. Cost not stated. Oakland, Cal. Architect, Frederick E. Meyer, Bankers' Investment Bldg., S. F. Owners, Kessel Car. The building will be erected at the corner of 24th and Broadway and has been designed as the Oakland headquarters of the Kissel Car Co. Exterior of the office space and sales rooms will be handsomely finished. Hardwoods and tile will be used. A cement on the floor will be specified. Metal window sash and frames and special machine equipment will be installed. Exterior of the building will be faced with cement plaster. Plans are being prepared.

HOTEL ALTERATIONS—4 story brick, \$20,000. Oakland, Cal. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owners, Abrahamson Bros. The present building at the southeast corner of 13th and Clay streets, and for several years occupied as a hotel, will be remodeled into a modern hotel. The work will include demolition of the floors into guest rooms, interior plaster work, electric work, plumbing, new interior finish, painting and

the installation of a central heating system. Exterior of the building will not be changed. Plans are nearly complete and figures will be called for shortly.

CHURCH—1 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, E. J. Aalto, 1531 California street, Berkeley. Owners, Swedish Lutheran Church. The building will be erected on University avenue west of San Pablo. There will be a main auditorium seating 300 people and Sunday School rooms. Interior finish will be of pine and redwood. Some art glass will be used. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$3,500. Berkeley, Alameda Co., Cal. Architects, Smith and Stewart, 24 Kearny street, S. F. Owner, C. Gettmany. The dwelling has been designed for a seven room house with two baths and two sleeping porches. Interior finish will be of pine throughout. Hardwood floors will be used in the principal rooms. There will be a large open fire place and a brick mantel in the living room. Bath rooms will have tile wainscot. Exterior of the dwelling will be covered with shakes. Plans are nearly complete and figures will be called for shortly.

RESIDENCE—2 story and base, frame, \$5,500. Oakland, Cal. Architect, none. Owner, P. Lindeblad, 3822 Randolph avenue, Oakland. The dwelling has been designed for a six room house with bath and will be erected on Everett street. Interior finish will be of pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be open fire place and brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner. Work will be done by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$3,100. Oakland, Cal. Architect, none. Owners, Fedt Bros., 8 Warren street, Oakland. The dwelling has been designed for a seven room house with bath. Interior finish will be of pine with some hardwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire place. Mantel will be of tile. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

THEATRE AND POOL ROOM—1 story and base, brick and frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, J. Michel. The building will be erected on San Pablo near 67th street and will contain, besides the theatre, a large pool hall. Interior finish will be of pine. Special electric work will be required. Exterior of the building will be covered with cement plaster. Plans are complete and figures are being taken.

SAN JOSE AND THE SANTA CLARA VALLEY.

CITY HALL—2 story and base, brick and steel. Cost not stated. Bur-bank, San Mateo Co., Cal. Archi-tect, Charles Peter Weeks. Mutual Park Bldg., S. F. Owners, City of Bur-bank. A change has been made in the call for bids on the Burlingame City Hall. The time for figuring the work has been extended to September 10. The amount of the bond has been fixed at 50 per cent of the con-tract price, and each bid must be ac-companied by a certified check of 10 per cent of the amount bid. An official proposal containing these changes appears in the Daily Pacific Builder under the head of Official Advertising.

LOS ANGELES AND SOUTH- ERN CALIFORNIA.

APARTMENT HOUSE—4 story and
base, brick and steel. Cost not stated.
Los Angeles, Cal. Architects, M. S.
Yager and Co., Trust and Savings Bldg.,
L. A. Owner, C. C. Hooper. The
building will be erected on a corner
site covering an area of 52x150 feet.
Plans show a total of 110 rooms ar-
ranged in two and three room suites.
All apartments will have connecting
bath rooms and wall beds. There will
be steam heat, elevator service, vacu-
um cleaning system and hot water
plant. Interior of the building will be
finished in pine with some hardwood
floors and elm panels. Bath rooms will
have cement floors and tile wainscot.
Exterior will be faced with pressed
brick. Construction will be carried on
by the M. S. Yager Co.

APARTMENT HOUSE—3 story and
base, brick, \$30,000. Los Angeles, Cal.
Architect, L. L. Jones, I. W. Hellman
Bldg., L. A. Owner, J. P. Parth. The
building will cover an area of 53x115
feet. There will be two stores on the
first floor and 40 rooms arranged in two
and three room suites on the upper
floors. Interior finish will be of pine
throughout. All suites will have wall
beds and private bath rooms. There
will be steam heat, elevator service
and a vacuum cleaning system. Exter-
ior of the building will be faced
with pressed brick. Plans are being
prepared.

HOTEL—4 story and base, brick
and steel. Cost not stated. Los Ange-
les, Cal. Architects, Morgan, Walls &
Morgan, Van Nuyes Bldg., L. A. Owner
Victor Ponet. The building is to be
erected at the corner of Pico and Hope
streets. Interior will contain in the
neighborhood of 120 rooms, a large
percentage of which will have private
baths. Interior finish will be of pine
and hardwood. Plans provide for steam
heat, elevator service, a vacuum clean-
ing system and hot water plant. There
will be metal window sash and frames.
Bath rooms will have cement floors
and tile wainscot. Exterior of the
building will be faced with pressed
brick. Only preliminary plans have
been prepared.

HOTEL—4 story and base, brick and
steel, \$50,000. Los Angeles. Archi-
tects, Mayberry and Parker, Pacific
Electric Bldg., L. A. Owners, Con-
solidated Realty Co. The building
will cover an area of 60x104 feet. First

floor will contain a large lobby, offices, dining room and kitchen. Upper floors will be divided into 60 guest rooms and 18 baths. Interior finish will be of pine and hardwood. Bath rooms will be finished in tile. There will be steam heat, elevator service, a hot water system and vacuum cleaning plant. Exterior of the building will be faced with pressed brick. Plans are out for figures.

RESIDENCE—2 story and base, brick or reinforced concrete. Cost not stated. Pasadena, Los Angeles Co., Cal. Architect, Frederick Heinlein, Lasser Bldg., L. A. Owner, Baroness Rosa Von Zimmerman. The dwelling, which will be designed in the Italian Villa style, will contain in the neighborhood of 24 rooms. A site has been secured in Oak Knoll. The type of construction which is to be used has not been fully determined. Interior finish will be largely of hardwoods. Exterior of the house will probably be faced with cement plaster. Further mention of the work will be made as the plans progress.

RESIDENCE—2 story and base, hollow tile construction. Cost not stated. Capistrano, Orange Co., Cal. Architects, Walker & Vawter, Hibernian Bldg., L. A. Owner, Grace Dolph. The dwelling will contain twelve rooms, four baths and sleeping porches. There will be hollow tile interior partitions and concrete floors. Plans provide for steam heat and a vacuum cleaning system. Interior finish will be of pine and hardwoods. Exterior of the house will be faced with cement plaster. Plans are complete and figures are being taken.

TELEPHONE EXCHANGE—4 or 12 story and base. Class A Construction. Cost not stated. Los Angeles, Cal. Architect, Architectural Department Pacific States Telephone and Telegraph Co., 140 New Montgomery street, S. E. Owners, Pacific States Telephone and Telegraph Co. The building will be erected at 622 South Hill street, covering an area of 75 feet square. The entire building will be used by the company. Plans are being prepared for a 12 story structure, but only six stories will be erected at the present time. There will be a complete steel frame, exterior walls of terra cotta and pressed brick. Hollow tile interior partitions and metal trim will be used. There will be steam heat and elevator service. Bids will be called for as soon as plans can be completed.

THEATRE—1 story and base, brick and steel, \$25,000. Los Angeles, Cal. Architects, Austin and Pennell, Wright and Callender Bldg., L. A. Owners, H. L. McAlister and J. M. Dobbins. The building will be erected on an irregular lot covering an area of 169x187x121x26 feet. The theatre, which will be used for moving pictures, will seat 850 people. There will be five stories in the building, besides the theatre. Metal window sash and frames will be used. Interior finish will be of pine throughout. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

BATH HOUSE AND AUDITORIUM—2 story brick and steel, \$600,000. Long Beach, Los Angeles Co., Cal. Architect, Albert C. Martin, Higgins Bldg., L. A. Owner, a syndicate headed by Frank Strong of Long Beach. The city of Long Beach has been asked to

grant a franchise for the construction of a Class A building on the Strand between Pine and American avenues covering an area of 450x200 feet. There will be a plunge 200 by 100 feet, 200 bath rooms and an auditorium with a seating capacity of 10,000 people. Preliminary plans have been prepared. Further mention will be made of this work as the plans progress.

Contracts Awarded.

HOTEL—4 story and base, brick and steel, \$13,490. Los Angeles, Cal. Architects, Nehr and Skillings, Garland Bldg., L. A. Owner, W. H. Wagner. Contractors, Alta Planning Mill Co., 820 McGarry street, L. A., general construction only. Contract price, \$13,490.

HOTEL—3 story and base, Class C construction, \$22,000. Los Angeles, Cal. Architect, Albert C. Martin, Higgins Bldg., L. A. Owner, J. Demozzi. Contractor, H. D. Salveter, Central Bldg., L. A. Contract price, \$22,000.

LOFTS—13 story and base, Class A construction, \$78,000. Los Angeles, Cal. Architects, Austin and Pennell, Wright and Callender Bldg., L. A. Owners, Mason Estate. Contractors, C. J. Kuhnrich Co., Van Nuys Bldg., L. A., general construction only. Contract price, \$78,000.

PORTLAND AND OREGON.

RESIDENCE—2 story and base, frame, \$15,000. Portland, Ore. Architect, Ellis F. Lawrence, Chamber of Commerce Bldg., Portland. Owner, John Keating. The dwelling has been designed for a 10 room house with baths and sleeping porches, and will be erected in St. Helms Court in Portland Heights. Interior finish will be of pine and hardwoods with hardwood floors in the principal rooms. There will be a central heating system, probably hot water, and open fire places. Mantels will be of tile and brick. Automatic water heater and vacuum cleaning system will be installed. Bath rooms will have composition floors and tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be carried to completion under the direction of Andrew Wilson by Day Labor. All material are now being purchased.

RESIDENCE—2½ story and base, brick and stone, \$35,000. Portland, Ore. Architect, Ellis F. Lawrence, Chamber of Commerce Bldg., Portland. Owner, Daniel Kern. The house has been designed to contain in the neighborhood of 15 rooms, several bath rooms and sleeping porch. Interior finish will be of pine and hardwoods. Hardwood floors will be used in the principal rooms. There will be steam heat and open fire places, a vacuum cleaning system and dumb waiters. Mantel will be of brick and tile. Bath rooms will have composition floors and the wainscot. A garage will be erected on the rear of the lot. Exterior of the dwelling will be faced with cut stone and pressed brick. Plans are complete and the work will be done by Day Labor. Excavation has been completed.

CHURCH—1 story and base, brick and stone, \$25,000. La Grande, Ore. Architects, Tombellotte & Hummel, Balford Bldg., Portland. Owners, Roman Catholic Church of La Grande.

The building will cover an area of 39 by 90 feet and has been designed in the classic style. Plans provide for a main auditorium seating about 500 people, class rooms and pastor's study. Interior finish will be of pine throughout. There will be steam heat. Basement will contain the heating system and a gymnasium. Some ornamental plaster work will be used. Exterior of the building will be faced with pressed brick and cut stone. Plans are nearly complete and figures will be called for shortly.

ICE RINK—1 story, reinforced, concrete, \$15,000. Portland, Ore. Architect, A. J. MacClure, Lewis Bldg., Portland. Owners, Portland Ice Hippodrome Co. The building will be erected near the business center and will cover an area of 175x260 feet. Construction will be of reinforced concrete with a steel trussed roof. Space for the ice rink will be 100x347 feet. There will be special rooms for ladies and gentlemen and a large gallery seating 1500 people. The ice making plant will occupy a space 10x120. Details for the ice machinery have not been worked out. Exterior of the building will be faced with cement plaster. Plans are being prepared.

Contracts Awarded.

HOTEL—3 story and base, brick, \$25,000. Portland, Ore. Architect, A. C. Ewart, York Bldg., Portland. Owner, Mr. Ryan. Contractor, G. Zanello, Builders' Exchange, Portland. Contract price, \$25,000.

BRIDGES—concrete and steel, \$156,000. Vale to Odell, Ore. and Wash. Engineer, Engineering Dept. O.-W. R. and N. Co. Owners, Oregon-Washington Railroad and Navigation Co. Contractors, Oregon Bridge and Construction Co., Bates Bldg., Portland. Contract price, \$156,000. Note—The contract calls for the construction of 12 bridges.

SEATTLE AND WASHINGTON.

THEATRE—3 story and base, reinforced concrete and steel, \$125,000. Victoria, B. C. Architect, Jesse M. Warren, Central Bldg., Victoria. Owners, McPherson and Fulerton. The building will be erected on the east side of Government street north of Cormorant and will be fireproof throughout. There will be a complete steel frame, reinforced concrete walls and floors, and hollow tile interior partitions. Interior finish will be of pine, hardwoods and metal. Considerable ornamental plaster work will be used. There will be steam heat and a modern system of ventilation. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

Contracts Awarded.

GOVERNMENT DOCK—reinforced concrete, \$1,500,000. Vancouver, B. C. Engineer's name not stated. Owners, Provincial Government. Contractors, Henry, McFee and McDonald, White Bldg., Seattle. Contract price, \$1,500,000.

FOREST FIRE IN LAKE COUNTY.

MIDDELTOWN (Cal.), Aug. 25.—The forest fire broke across the backfire line, and tonight is threatening valley ranches one mile west of Middletown. At noon the Helen mine and Spring Hill resort sent a messenger for help.

The telephone is broken. An accumulation of underbrush aids the spread of the flames. J. D. Seiweller, State fire warden, arrived from Sacramento tonight to take charge of the fight to check the flames.

FOREIGN TRADE OPPORTUNITIES.

[Where addresses are omitted they may be obtained from the Bureau of Foreign and Domestic Commerce, Washington, D. C. In applying for addresses refer to file number.]

Consuls are requested to contribute to this department, and in doing so should in each instance state in what language correspondence should be conducted.

No. 11413. Office furniture.—A business man has made application to an American consul in Germany to be placed in communication with manufacturers of office furniture in the United States. He has been favorably impressed with the furniture in the office of the consulate. Correspondence should be in German.

No. 11444. Canal Locks and Gates.—An American consul reports that a business firm in his district desires to obtain the names of the firms manufacturing the machinery, locks, and gates for the Panama Canal locks. The firm desires to obtain this information at the earliest possible moment.

No. 11446. Galvanized-iron sheets and Kettles.—The junior member and traveling representative of a European firm makes annual trips to foreign countries and informs an American consulate that he desires to receive catalogues and prices of galvanized-iron sheets and small kettles, with which he believes he can place to good advantage. The kettles should be of common cast iron with three legs, a top, and two ears, with wire or iron handle attached, to hold from 3 to 6 quarts each. This firm also handles all classes of fabrics, hardware, soaps, and foodstuffs.

No. 11446. Stationery and desk articles.—The proprietor of a leading book store in the Near East has informed an American consulate that he wishes to be placed in communication with American firms manufacturing strictly high-grade stationery and desk articles. Publishers of ladies' fashion journals, weekly or monthly magazines are also invited to correspond. The firm is said to be of good standing.

No. 11447. Agricultural machinery, automobiles, typewriters, etc.—An American consular officer in a Latin-American country reports that a resident of his district desires to enter into commercial relations with American manufacturers of agricultural machinery, typewriters, automobiles, and chairs. The importer furnishes commercial and banking references.

No. 11467. Seed drills.—An American consul reports that the principal of an agricultural school in a foreign country would like to obtain catalogues or other descriptive matter concerning American drills, for the purpose of purchasing one for the college. It found suitable, and also suggesting general use of the same among local farmers. Correspondence may be in English.

No. 11468. Plumbing supplies.—A contract for sewer and water connections in a Latin-American city has recently been awarded to a local firm. An American consular officer writes that no particular make of plumbing supplies and sewerage has been specified, but that all are acceptable so long as they meet the specification requirements. Correspondence with the member of the firm mentioned may be in Spanish or English. The consul adds that a very considerable quantity of plumbing supplies of all kinds will be required during the next year for this work.

No. 11469. Concrete mixers.—A foreign government official informs an American consul that he would like to become informed concerning American concrete mixers suitable for use in forthcoming irrigation projects of the Government, and would be pleased to receive catalogues and other information concerning the same from American manufacturers. Correspondence may be in English.

No. 11473. Chair Seats and Panels.—An American consular officer in a European country reports that a business man in his district desires to enter into relations with an American manufacturer of 3-ply chair seats and panels with a view to obtaining the local agency for these goods. Samples of the 3-ply wood required for seats and panels, also a series of designs showing the seats most in favor in the country, accompanied the report and may be obtained from the Bureau of Foreign and Domestic Commerce.

No. 11474. Iron Fence and Posts.—American country is in the market, according to a communication to an American consul, for 100 meters of iron fence to be placed upon a base of masonry 75 centimeters high, with a corresponding width. A gate the same style as the fence should be furnished also. The posts must be 1½ meters high and of the very best material.

No. 11475. Motor Plow.—A well known European representative of various machinery manufacturers desires to secure the agency for a first-class American motor plow. He informs a consul that he wishes to correspond only with manufacturers who produce upon a large scale.

No. 11477. Motors for rowboats.—Catalogues and prices (f. o. b. New York) of small horsepower light-weight motors for attachment to rowboats are desired by a purchaser in the Levant. Full particulars of export prices and terms, packing charges, weight, and dimensions packed for export should accompany catalogues. The consul who forwarded this information states that two motors are desired at present and probably more will be ordered later. Correspondence may be in English.

No. 11478. Mining machinery and railroad equipment.—An American consular officer reports that certain mining companies in his district will undertake a vast amount of new development and construction work next two or three years. To prepare for an increased output the company's railroad will be rebuilt and extended, new ice breakers will be placed on lakes at the company's property, new boring machines will be installed, the power house will be enlarged, and a cashery will be built. The company

will also build a funicular railroad between two points. Manufacturers of railroad material, mining machinery, and equipment should write to a director of the company named in the report.

No. 11479. Lubricating oils.—A business house in a European city, informs an American consul that it desires to correspond with American firms manufacturing lubricating oils of every description. Cylinder oils are especially desired. Correspondence should be in either German or French.

No. 11480. Maple mangle-roller blocks.—A report from an American consular officer states that a local business man is in the market for green, quartered, chert, rough sawn, and octagon-cut maple roller blocks. These blocks are seasoned after importation and then turned and used as rollers for mangling machines. The importer in question has frequently purchased more than 50,000 blocks of this character per annum, and states that the quantity could be doubled very easily if he could find a manufacturer in a position to make regular shipments. He also states that the concern upon which he has been dependent for a long time has been obliged to reduce its output to such an extent as to be unable to cultivate export trade in the future.

No. 11482. Wire.—An importer of wire in a European city desires American connections. He now imports from other European countries, but believes the direct steamship sailing between American and local ports should enable him to make direct importations from the United States. The wire is used locally mostly for can-opening keys, and the importer believes the quality of copper in the American wire makes the keys less corrosive than other kinds. The consul who forwarded the report advises that the sizes of wire used range from 3.2 millimeters to 8.8 millimeters. English may be used in correspondence, though Norwegian would be preferable.

SCULPTURE AT THE EXPOSITION.

Charles Grady of Philadelphia, one of the most distinguished of American sculptors, has been selected to model the statue of the Pioneer Mother which is to be the central exhibit of the Fine Arts Department of the Panama-Pacific International Exposition and which is, at the close of the Exposition, to be presented by the Pioneer Mother Monument Association of California to the City of San Francisco. It probably will be installed permanently in the Civic Center.

The selection of Mr. Grady was made by the Monument Association after months of correspondence with many of the best known American sculptors, including Frederick MacMonnies, Daniel C. French, Edgar Walter, Paul Bartlett, Ralph Stackpole, Adolph A. Weiman, Herbert Adams, Hermon MacNeil and Douglas Tilden.

It was found by the Monument Association that the time available for the execution of the monument and its casting in bronze was so short that a number of the sculptors considered would be unable to complete so important a commission before the opening of the Exposition. The Association, therefore, considered itself fortunate in being able to induce Mr. Grady to postpone other work upon which he is en-

Veneered Panels that
Are good—order

San Francisco

Insist on getting "Wybro" Panels

There are no "just as good" Panels on the market that can take the place of the WYBRO.

If you want the best panels at the lowest cost, better INSIST upon getting WYBRO PANELS.

They are everlastingly good and superior to all others.

engaged in order to undertake this commission.

The plans of the Monument Association and of the sculptor are for a proper memorial to those men who, in the early days, endured both privation and hardship in reaching California and in the American settlement and civilization of the State.

In a large temporary corrugated iron house, between the Army Transport wharves and the big Palace of Machinery, work is progressing rapidly upon one of the most interesting, most beautiful and most important details of the Panama-Pacific International Exposition. It is the production of the ornamental statuary, the art of some of the leading sculptors of the world, which will adorn the great exhibit palaces of the Exposition. So extensively is this work advancing, that A. Stirling Calder, the noted sculptor who has the work in charge, has had built another temporary building alongside of the one now nearly filled, and this will soon be occupied by his corps of assistants.

In these two buildings is being developed the collection of groups and figures, of heroic size, that will decorate the great palaces and courts. The public is not admitted at present to these studios, and the statuary will not be seen generally until it is mounted upon the buildings.

DIAMONDS AND OTHER GEMS MINED IN THE UNITED STATES.

Precious Stones are Widely Distributed
and of Various Kinds—Aggregate
Value of Output Not Large

Gems and precious stones were produced in the United States in 1912 to the value of \$319,722 according to Douglass H. Sterrett, of the United States Geological Survey. The kinds of precious stones found in the United States are many, ranging from diamonds of fine quality to low-grade stones such as agates, but as is seen from the total value of the output there are no really large operations.

The principal gem mineral mined in the United States during 1912 was Montana sapphire, of which there was a large output for use of a gems and in mechanical applications. The greater part of the gem sapphires came from the mines in Lemhi County, where they occur in a rock matrix. The majority of these stones have the

true sapphire-blue color. The bulk of the sapphire for mechanical use came from the placier deposits in granite and deer lodge country and consisted of varicolored stones.

Fine Opals from Nevada.

The development of the opal deposits of Humboldt County Nev., was attended with much success, and a quantity of magnificent gem material was obtained.

The opal is of unusual type, consisting of dark translucent mineral with a variety of rich colors. The deposits promise to supply a gem equal if not superior in beauty to the opal from Australia.

Prospecting and mining at the emerald mine in North Carolina were attended with only partial success. Two pockets or deposits of emerald were removed during the year; other developments consisted mainly of exploratory work, which has continued into 1913.

The tourmaline output of southern California was small, but some magnificent specimen crystals were obtained. Especially fine gem crystals of kunzite were found and brought good prices. The production of turquoise was very small compared with some previous years. Beautiful emethyst was found in Warren County, N. C. and some fine gems have cut from sample crystals. A few fine specimens of golden beryl were obtained from prospects in Alexander County, N. C. Beautiful gems were cut from some of these. The production of agate and associated varieties of chalcedony was again large in several Western States.

Diamond Mines in Arkansas.

No great advances are reported in diamond mining in Arkansas during 1913.

Several dozen diamonds were found and several diamond-washing plants were constructed for operation in 1913.

It has been practically impossible to determine the quantity and value of the diamonds found in the Arkansas field since the first discovery in Aug. 1906. Most of the stones are still held by the mining companies and few have been sold. It is estimated from the figures furnished the Survey and from reports in the press and those furnished by private persons that about 1,400 diamonds weighing nearly 500 carats have been found from August, 1906, through December, 1912. The total estimated value placed on this output in these reports amounts to \$12,108.

Mr. Sterrett's report is a very inter-

STATES THAT HAVE IMPEACHED GOVERNORS.

William Sulzer is the first Governor to be impeached in the State of New York. Eight States have impeached their chief executives, and of this number three were removed from office, one resigned, one was acquitted, and the charges against three were dropped. The record follows:

Seth Smith, Colony of North Carolina, 1689; removed.

Charles Robinson, Kansas, 1862; acquitted.

Harrison Reed, Florida, 1868; charges dropped.

William W. Holden, North Carolina, 1870; removed.

Powell Clayton, Arkansas, 1871; charges dropped.

David Butler, Nebraska, 1871; removed.

Henry C. Warmouth, Louisiana, 1872; term expired and proceedings dropped.

Adelbert Ames, Mississippi, 1876; resigned.—Evening Post, New York.

THE HALLOWAY EXPANDED METAL COMPANY.

C. Halloway, Jr., for many years identified with the metal lath industry, San Francisco and Los Angeles, has organized the Halloway Expanded Metal Co., having secured the coast agency for the Consolidated Expanded Metal Co. of Pittsburgh, Pa., manufacturers of "Steel Crete" Expanded Metal Lath and Steel Crete Expanded Mesh for reinforcing.

A large and complete stock will be carried here for prompt deliveries.

The lath is of excellent quality of diamond mesh type, and it is claimed to be heavier in weight than any other lath of same gauge, put up in sheets 24x97, while billed as 24x96, thus giving the purchaser the benefit of an inch for lapping purposes.

One of the recent prominent jobs using Steel Crete is the New York post office building.

The Consolidated people are among the largest manufacturers in the country of Steel Crete Expanded Metal.

The Steel Crete system of reinforced concrete is presented to the architects and engineers in a 150 page loose leaf book, containing tables, standards and useful information appertaining to the system and the use of

Steel Crete in reinforced concrete.
The Holloway Company has also contracted for the exclusive rights for the coast of the Electric Welded Studding Co., manufacturers of electric welded steel partition and cold rolled channel iron. The reason as to cost and strength with the ease of erecting same, is without parallel in the market. The offices of the company are in the Monahan building, Telephone Sutter 2419.

PACIFIC GAS ATTACKS LAW.

A suit in equity to cancel a portion of a strip of land in the T. C. National forest reserve on which to construct the Brum power plant and its conduits was filed yesterday by the Pacific Gas and Electric Company against David F. Houston, Secretary of Agriculture, Henry S. Graves, head of the forest service of the Department of Agriculture, and others, in the United States District Court. The power company maintains that the act under which the land was set aside for forest purposes is unconstitutional.

UTILIZING THE STONE WALLS IN NEW ENGLAND.

Nothing in rural New England is more adorable than the forest of wild roses which begin about the middle of June and in some places lasts until the end of September. The wild rose bushes are frequently to be clustered along the old stone walls which were formerly in great abundance and now are more and more being found dividing the hillside or separating farms into pasture lots or corn fields or orchards. If there was any one product which New England generated and even lavishly offered its markets when they first began to clear its wilderness, it was the materials for stone walls. They were imparted and distributed under and over the hills. The stones were of every size and shape; there were huge ones for a lower course and graduated ones to pile on top. In many places they could be made double thick with hollow to fill in with smaller stones. That often failed to exhaust the supply. It is odd that they were used more for building houses, even though they found their place in lining the wells where hung specimens of the old oaken bucket of late years, especially along the seas where, as seen in their artistic possibilities, the farmers have been glad to sell at rather high, certainly not low prices, the old stone walls. Their ancestors or the original owners of the land had created at some of the lake and twenty four. The disappearance of them has been a considerable loss in the antiqueness of many localities. And even as we have said, clustered the wild rose bushes, and the delicate pink blossoms looking like a delicate artifice gave a tender, poetic appearance to the hillside-covered green rocks which had been so patiently piled and kept piled for so many years. Wild roses do not stand picking very well. They

quickly drop their petals or fade away when put into vases, but if not interfered with, they keep up a sweet one may see the jeweled hummingbird poised over them, perfectly motionless apparently, though his wings are buzzing like a dynamo, then darting off like a coal of fire. June is particularly the season of the wild rose, and before the summer drought has yellowed the fields, the loveliest sight that can be seen at the seashore is a cluster of the dainty, single-petaled flowers against a background of lush grass bounded by the violet blue of the sunny ocean.—Boston Herald.

WORLD'S GREATEST EXPOSITION TWO-THIRDS COMPLETED.

At this time, one and one-half years before its formal opening day, February 20, 1915, the Panama-Pacific International Exposition is more than two-thirds completed. This estimate is based upon the total amount of work necessary in the complete preparation of the exposition. Every department of the exposition is pronounced by executives familiar with the organization of universal expositions to be further advanced than were those of any of the greatest expositions held in America at a similar pre-exposition period. Twenty even of the world's nations have accepted the invitation conveyed through the Department of State; this record is unprecedented at a time one year and one-half before the opening. Thirty-five states have selected sites for state pavilions. Almost seven thousand applications for concession privileges have been received. The applications for exhibit space would, if all were granted, exhaust the entire exhibit area.

Construction is far advanced. The most difficult part in exposition building is past. An immense amount of preparatory work has been accomplished. Ten of the fourteen huge exhibit palaces are now under construction. One building, the service building is completed. Contracts for three additional buildings will be let within a short period.

All buildings are being built under time contracts with definite limits for their completion. A number of the most noted sculptors in America have advanced far in the preparation of the sculptural models to be reproduced upon the exposition grounds. Under the direction of Mr. A. Stirling Calder, some of the most important models are being enlarged in the sculptural workshops.

About 3,000 men are now employed upon the exposition grounds. The esplanade, to lie before the main exhibit palaces, has been down to grade, the freight ferry slip at the eastern end of the esplanade is completed and work on the passenger ferry slip is under way; the yacht harbor at the opposite end of the esplanade is practically finished; a considerable portion of the grounds is under railway track and within a short period cargoes may be unloaded at the freight ferry slips and transported by rail to any part of exposition grounds. The exposition company operates its own railway,

THE WEIGHTS AND MEASURES ACT.

The office of State Superintendent of Weights and Measures was created by Act approved June 6, 1913. Appointment is by the Governor, and the salary is \$3,600 a year. He may appoint a deputy at \$150 a month.

The standard of weights and measures adopted by the United States shall be the standard for California.

It will be the duty of the Supervisors to appoint a county sealer of weights and measures at \$5 a day while actually employed. Legislative bodies of cities and towns may also appoint sealers.

The State Superintendent shall, at least once in two years, visit the various counties and cities and inspect the work of the local sealers. He is empowered to inspect the weights, measures, balances, etc., of any person, firm or corporation.

The State Superintendent shall investigate conditions in the counties and towns in respect to weights and measures, and to the sale of merchandise, commodities and foodstuffs in containers. His instructions and recommendations shall govern all local sealers.

Sale of weighing devices and measures without test and official seal is prohibited.

Use of false or incorrect weights or measures is a misdemeanor, and possession of them is prima facie evidence of intent to violate the law.

The net container act, approved May 27, 1913, applies to foodstuffs. Net quantity of contents of the container shall be plainly and conspicuously stated.

The act does not apply to sale of a commodity in a quantity for less than ten cents at retail.

Inevitable leakage, shrinkage, evaporation, etc., shall not be regarded as violation of the law.

A fine of not less than \$25 or more than \$500, or imprisonment for not more than six months, or both fine and imprisonment are the penalties.

The net container act takes effect April 1, 1914.

BURLESQUE ON THE CITY OFFICIALS.

About twenty-five members of the Woman's Political League of California will appear in a burlesque entertainment at Scottish Rite Temple on the afternoon of September 3rd and closing of September 14th. The plan of the show is an entirely original one, in which the members will appear as a city make-up doubles of the city officials—the Supervisors, Mayor, Secretary, Clerk and Sergeant of Arms. The entertainment is full of humor, and is said to be entirely good natured, with no vicious thrusts. Dr. Charles McKel, of the First Congregational Church, who is also a director of the Anti-Slavery Society, will give an address setting forth some of the aims and conditions of this society of which McKel is a director. The two little daughters of Mr. and Mrs. John Pollock will contribute a charming dance and recitation in 75, 50 and 25 cent. Mr. A. von Terner will sing and play. Madam Butterfly. The price of

Bind your copies of the Building and Industrial News in PERMANENT BOOK FORM

We have succeeded at last in securing a really practical binder. The Building and Industrial News contains a great deal of technical and statistical information that many of our readers find worth saving for future reference. There is no better way of preserving it than using the

"BIG BEN" BINDER

which preserves the magazine in permanent book form. This binder is handsome and durable, and makes the permanent filing of magazines as easy as filing ordinary papers. It opens flat like a regular book, and comes in fine art cloth with the name of our Journal stamped in gold on the front cover and back. For persons who desire to

Save These Valuable Articles

this binder is just the thing, as it holds several numbers of our Journal and can be used again indefinitely year after year, simply by taking out the old Journals and inserting the new ones as they come to you.

By making special arrangement with the manufacturers of this best binder that has ever been put on the market, we are able to furnish them to you for **ONLY \$1.00 EACH.**

Merely send us your name and address and say: "Send us your binder. I enclose \$1.00," and we will send the binder promptly all charges prepaid.

Send in your orders now and begin saving the statistical and technical information, articles and valuable data, that will be published in The Building and Industrial News this year.

BOOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

Price 50 Cents

581 MARKET STREET, SAN FRANCISCO

Putting BEAVER BOARD to the wall and ceiling-beams of a new room, quickly and without litter or confusion.

Same room finished in one of many beautiful designs possible with BEAVER BOARD walls and ceilings.

BEAVER BOARD

takes the place of lath, plaster and wall-paper for the walls and ceilings of every type of building, new or remodeled.

It costs less; is more quickly and easily put up; is durable, sanitary and artistic.

It will not crack, chip or deteriorate with age; it deadens sound, keeps out heat and cold, retards fire, and withstands strain or vibration.

Made entirely of selected woods, reduced to fibrous form and pressed into panels of uniform thickness, with handsome pebbled surface.

We furnish all convenient sizes for every purpose, with full directions for application. Can also supply small quantities for making many useful and decorative household articles.

Editorial Comment.

Building operations for the month of August in San Francisco were less than for the preceding month of July. Altogether there was a total of recorded contracts and building permits amounting to \$1,755,696. This was for private construction only. It was divided as follows: Brick and fireproof construction \$867,321; frame buildings, \$712,337; alterations and additions, \$141,113; Panama-Pacific contracts, \$31,365. To these may be added city work and construction amounting to \$1,089,279 making in all a grand total of \$2,844,945.

While August was less than June and July as a general thing August is lax in building activity. Comparative figures from the files of this paper, for private construction outside of the Panama-Pacific work for the last ten years, are as follows:

August, 1904	\$1,565,568
August, 1905	1,579,514
August, 1906	5,640,508
August, 1907	4,030,087
August, 1908	2,597,110
August, 1909	2,588,723
August, 1910	1,743,587
August, 1911	1,686,518
August, 1912	1,797,408
August, 1913	1,723,801

It will thus be seen that the figures for the last four years have been practically the same for the month of August. So that while things generally have been dull and a general complaint that there is nothing doing, still the fact remains that contracts were let to somebody for about the usual amount of construction. No government work was contracted for during the month of August nor was there any work done by the State within the city limits. Generally speaking the month has been about an average one and the prospects seem to be that the advancing year will bring better business toward the close.

The best seller among the German novels of the summer season is "The Tunnel." Like so much in recent German romantic and melodramatic literature, it deals with New York society life. The story gets its name from the fact that the author, Herr Kellerman, selects for his hero a daredevil young engineer, who conceives the gigantic project of connecting Europe and America with a tunnel. Some of the newspapers who are reviewing "The Tunnel" say that it would probably be as much a mistake to ridicule the suggestion as it was to scoff at some of the ideas first launched by Jules Verne and H. G. Wells, when, in the meantime, have become every-day actualities. One commentator has figured out that the shortest tunnel route between the old and the New World would lie between Cape Ortegal, Spain, or Brest,

France, and Cape Charles, Labrador, a distance of about 2,250 miles.

The visit of Franklin K. Lane to his hometown as Secretary of the Interior comes at a fitting time when the Hetch-Hetchy measure has passed the House. Lane was City Attorney of San Francisco when the agitation for the water supply first began.

As a member of the Interstate Commerce Commission, Lane has done considerable work for the government. In his present capacity he has outlined his policy as being progressive, but at the same time thoroughly practical. He advocates the development by hydroelectric companies of as much power as they can sell, the rates or royalties paid to the government being regulated in proportion to the price paid by consumers. To this the electric companies can have no legitimate objection as it means use without monopoly or oppressive charges.

He advocates the building of a government railroad in Alaska. In this he is absolutely right. And of course since he has incurred the enmity of the Guggenheims and their satellites, together with them Alaska is a fair field to be exploited for their own aggrandizement.

The trouble in Alaska has been, as it is in all other places, not the restriction of development due to conservation, but the obstruction of all measures tending to government development by the reactionary members. The Secretary of the Interior can build the railroad in Alaska, and every man in mine on a leasing proposition, Alaska will go ahead by leaps and bounds in spite of the Guggenheim-Morgan Syndicate and a great deal more than if they were given the whole territory outright.

As for the Hetch-Hetchy measure passed the House of Representatives. There seems to be little doubt that it will also pass the Senate and it is safe to say that before the year is over.

San Francisco will be well on the way to acquire a water supply in the Sierran Mountains. And what a struggle it has been! Befogged with every conceivable opposition, unnamed titles to the lands, Engineers' reports that nothing, objections of fools that the name of nature lovers, and constant attacks of the subsidized press both here and in the East, it has spent about fifteen years of the countless thousand of dollars for nothing which should have been the asking. So it is always when anything is attempted to be done for the public good. The greed of the corporations and the insuperable prejudice that still exists in the minds of the people for the special interests of a few, are the world and political forces nearer toward socialism every day.

Electricity and the Architect.

The Question of House Illumination and Kindred Topics Discussed by C. S. Walton,
District Agent Southern California Edison Company.

It may generally be said that the architect in America is always alert and ready to adopt any new and practicable device which will add to the comfort and convenience of the occupants of the buildings designed by him.

In no other country are there so many modern conveniences provided in plans and specifications, and it is due to this fact that the luxury of yesterday has become the necessity of today, and it is true that were it not for the watchfulness of the architect and his ability to see ahead and provide for certain developments along certain lines our house would be out of date in some respect before they were fairly occupied.

In Southern California the small house (on a large lot) has reached its highest development. The so-called bungalow is not a summer cottage for temporary occupancy, but is an artistic little home, substantially built, and designed to satisfy the requirements of people who are used to and must have all the conveniences and comforts. The transition from the bungalow to the palace is gradual and runs through a variety of houses, charming in aspect and perfect in appointment, but the bungalow must be so planned that its occupants may enjoy in a measure the same comforts as those who dwell in more pretentious structures. The reason for this is found in the fact that a large portion of our population is made up of well-to-do people who come here for the climate and for rest. They have had big houses and have struggled with the servant question and the social whirl and now they want peace and quiet, with sunshine and flowers and that freedom from care which the small home provides.

The architect has done wonders in developing this home along practical as well as artistic lines. It is a home for both the well-to-do business man, active or retired, and the man on a salary. Let us go through one of them and discuss its electrical requirements, having in mind the fact that electricity is now very cheap and may be used freely, if not wasted, without producing an unnecessary expense bill at the end of the month.

The wasting of electricity is not well understood. Most people feel that if they turn off the light when they have finished with it, waste is stopped, and they do not know that too little is turned on, or too many are made current as well as necessary. If they were properly educated and the glassware and other appliances to give the best results in an economical way. Improper use of electricity and unnecessary glassware and other appliances in the house is a waste. In this respect the architect can save his client a considerable amount in every month.

Speaking of appliances used by this means all the modern electrical de-

vices which perform useful service in the household, they use very little current, and as their use is for a comparatively short time, the cost of running them is small compared with the service they render.

Illuminating engineering is a well-developed science. The engineer will take the dimensions of any room and after learning the use to which it is to be devoted and the general color scheme of ceiling and side walls, will quickly determine the proper location for the lights, their size and the type of reflecting glassware necessary to give exactly the right illumination without wasting the light where it is not needed.

Consumers often complain that they have to use extra large lamps in order to be able to see to read and they blame the lighting company's service. Investigation generally develops the fact that an ordinary lamp, if properly placed, would supply ample light for reading fine print and the consumer is simply the victim of an unscientific lighting arrangement.

From the viewpoint of economical use of current for light, and this is an item that must be met every day, dark side walls that absorb light will not reflect it, are responsible for demanding the light bill. This is an ultra conservative statement of a scientific fact, and besides, the dark walls are depressing and are unsuited to the Southern California home.

Scientific papers frequently contain articles on the effect of strong light on the human eye and it is recognized that in this generation the eye is being subjected to a strain many times greater than it was intended to stand. What the ultimate effect of this unnatural condition will be easy to predict, but it may be greatly improved by the illuminating engineer who always takes this fact into consideration when preparing a lighting scheme.

From the foregoing it will clearly be seen that much of the comfort and well-being of a household, as well as its economies, are dependent on the architect, and if he is not an illuminating engineer he will do well to consult with one.

The Southern California Edison Company has several high-grade illuminating engineers on its force. These services are at the disposal of architects and the public without charge. These men have solved many difficult lighting problems for architects and have effected large economies which were greatly appreciated by the architect and consumer.

Let us take a look at that bungalow. It is not too big and we will have to it. We are some difficulty in locating it, so we will have the light not burning and we will not be the number. As we get on a list of the house, the architect will be on the list, but still we cannot be the number because it is in the wrong place and the light does not strike it. House numbers

should always be located where the porch light will illuminate them. How many times have you had to lay down an interesting book or interrupt a quiet little game to inform the inquiring stranger at the front door that the number he is looking for is in the next block.

The porch light is one of the most useful lights about the house. It gives the place a cheerful look and is better than a night watchman to keep prowlers away. If all the houses in the block burned their porch lights all night robbers and thugs would select some darker neighborhood for their work. This idea has received the cordial approval of the police departments of many cities. To burn a porch light all night costs much less than one would think. Let us figure it:

Take a twenty-five watt lamp, which consumes twenty-five watts an hour, for, say twelve hours, which makes 300 watts a night. For thirty nights it would amount to 9000 watts, which equal nine kilowatt-hours added to the monthly bill would be a small addition for the results obtained; much less than you would pay for a watchman.

Let us ring the door bell. We hear its sound and know that someone will answer. The architect has located it where it may be heard in every room and it is rung by the lighting current through a little bell transformer; no dry batteries to give out and the cost of the transformer paid many times in saving in repairs to bells and batteries. The amount of current used could hardly be measured and it lasts forever.

We are in the living room which is quite large. How pleasant is the light from the semi-direct fixture. It is reflected from the ceiling against the side walls and shows the pictures perfectly. There is not a light in the room to glare into the eyes; you can free in any direction without being blinded. On the table is an ornamental lamp connected with a receptacle in the floor, while on the upright piano is a lamp which lights only the music and keys, and is connected to a receptacle in the baseboard. A wall-shaped standing lamp by a grand piano will be both ornamental and useful. The base board receptacle will be needed in the day time for connecting the portable vacuum cleaner which is in such general use.

We pass into the dining room where electricity finds a duty use in preparing many things for the table. The supply of current comes from the floor and the dining table is wired so that at a convenient point under the edge are several receptacles to which may be attached the coffee percolator, the toaster, the cooking dish, the griddle and the small stove. Ornamental lights for the decoration of the table may also be attached to these receptacles.

If there is objection to bringing the floor plug through the rug the floor

receptacle may be located at the edge of the rug and one hose lead run to the table receptacles. The floor receptacle should then be connected so that the cord will run under the chair at the head of the table, and it will not be in the way of a person moving around the table.

A receptacle in the base of a lamp supplies the current for an electric fan, or a luminous heater to take the chill off a cold room on a blustering, beside, being useful for a vacuum cleaner.

In the kitchen the use of electricity becomes greater every day. The electric stove is now perfectly safe, manageable and is economical in the consumption of current. It will do all the cooking, but is not adapted to boiling large quantities of water, which should be done by gas. Many homes have electric ovens and toasters, toasters built into the walls, so they take up no room and are a great comfort and convenience.

Over a shelf against the wall is a row of receptacles to which may be connected any or all of the appliances used in the dining room and kitchen, the electric iron, knife sharpener, silver polisher and the new vacuum freezer, as well as the fan.

On the back porch is a receptacle for the electric iron, the washing machine and the wringer, which is in very general use. The small electrically operated refrigerator, which is so nice, is on the way and must be provided for.

Sufficient thought is rarely given to the supply of electricity in new homes. A well-planned home should have two baseboard receptacles in each of the bedrooms, one by the bed for the sewing pad, vibrator and milk warmer, and another by the dresser for the electric iron, fan, shaving mug and shaver, and for the sewing machine, if there is no sewing room in the house. The vacuum cleaner and portable electric iron will be used in the bedroom.

Sleeping porches should also be provided with a receptacle as the sewing pad is indispensable in taking the chill off the bed and driving away dampness.

The bathroom should have a receptacle for the vibrator and milk warmer heater, the shaving mug and the milk warmer heater.

Every closet should contain a receptacle placed high and particularly in the hall should be given to the location of the telephone so that it may be reached near at hand.

The garage should be supplied with the house by a three-way switch, so that the lights may be turned on at any point, and the receptacle should be located at the entrance to the building and in such a way that no dark places in the yard will be a hiding place for the prowler. It is an arrangement to be made so useful in going to or from the house and in illuminating the yard, and of attempted burglary.

Appliances should never be connected to lighting fixtures, as the lights will soon get loose and burn out, and are not wired to carry the necessary current. Receptacles in the dining room, kitchen and screen porch should be the result of extra heavy wiring, and

from lighting circuits, in order to carry ample current and possibly to effect a considerable economy in even of specially low rates being made for current used for other purposes than light. It is important that receptacles, except those designed for some specific purpose, be all of the same type and size, as nothing is more annoying than to find that a certain receptacle will not receive some appliance without a change of the plug.

A good rule to follow in planning a home is that when all the lights are turned on there will not be found a dark or poorly lighted place in any part of the house. Providing an ample supply of electricity does not necessarily mean the extravagant use of it, but it means convenience and com-

fort, and if the house is offered for sale, it will surely be a most attractive feature to the possible purchaser.

The ample wiring of a house should be considered of the utmost importance, and it should be done when the house is being built, as it is very expensive, unsightly and sometimes almost impossible to add to the wiring after the plastering has been done. The difference in first cost between a poorly and a well-wired house is small in comparison with the added convenience and attractiveness of the better, and it is not an exaggeration to say that insufficiently wired houses will soon be considered old-fashioned. These were the houses of a few years ago that were not piped for gas.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

OAKLAND, CAL.—Apartment house, 6-story and base, brick and steel. Cost not stated. Architect, Charles W. McCull, Central Bank Bldg., Oakland. Owners, Eugene Co. This work has been mentioned here a number of times before. Contracts for the steel work and foundation work have been let. Plans for the carpentry work are now out for figures. The building will be erected at the corner of 12th and Grove streets. Bids are also being taken for the plumbing on the same building.

EUREKA, HUMBOLDT CO., CAL.—Apartment house, 3 story and base, frame. Cost not stated. Architects, Ackerman and Reese, Eureka. Owners, W. S. Clark and G. P. Georason. The building will be erected at the corner of 5th and I streets, covering a considerable area. Suites will contain from two to four rooms, all with private baths and wall beds. Interior finish will be of pine and hardwood. There will be a central heating system, probably steam heat, and a hot water plant. Bath rooms will have tile wainscot. Exterior of the building will be covered with rustless. Plans are now being prepared.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick and steel, \$75,000. Architects, Austin & Fennell, Wilgert and Chandler Bldg., L. A. Owners, Imperial Apartment House Co. The building has been designed to contain 100 rooms which will be arranged in two and three room suites, and will be erected on Maryland street near Bx 100, lot 59x122 feet. Interior finish will be of pine and hardwood. Made and tile will be used in the vestibule. All suites will have wall beds and private bath rooms. Plans are complete for steam heat, hot water and passenger elevators, a vacuum cleaning system and a hot water plant. Bath rooms will have composition tile wainscot. Exterior of the building will be faced with pressed brick. Plans will be ready for figures by the end of this month.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick and steel. Cost not stated. Architects, McGomeray & McGomeray, Trust and Savings Bldg., L. A. Owners, Mrs. Kate Irvine McArthur. The building will

be on an area of 55x55 feet and will contain 45 rooms and 15 baths. Interior finish will be of pine and redwood. Solid hardwood floors will be used. There will be steam heat and elevator service. A hot water system and vacuum cleaning plant will be installed. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SEATTLE, WASH.—Apartment house, 12 story and base. Class A construction, \$600,000. Architect, G. J. N. Hols, 1932 2nd Ave., Seattle. Owner, E. G. McKelvey, Washington Apts., Seattle. A site in the downtown district has been secured, but the owner will not announce the exact location for some time. The building will cover an area of 120 feet by 210 feet, and will contain in the neighborhood of 100 rooms. Apartments will be arranged in suites of from two to six rooms. Construction will be fireproof, built out with steel frame, concrete walls, floors and roof. Interior partitions will be of hollow tile and metal lath and plaster. Plans provide for steam heat, elevators, vacuum cleaning system, electric generating system and storage plant. Interior will be finished in pine and hardwoods with special finish in the larger suites to meet the taste of the tenants. Exterior of the building will probably be faced with cement plaster. Further mention will be made of the work as the progress.

Contracts Awarded.

SAN FRANCISCO.—Apartment house, 3 story and base, brick and steel, \$72,000. Architects, Welsh and Carey, Architects, National Bank Bldg., S. F. Owner, Sewall Pollock, Contractor, H. J. Swoad, 110 Jessie street, S. F. Estimated price, \$72,000.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick, \$35,150. Architects, Metzger & Davis, 28 American Ave., L. A. Owner, Edward T. Hatfield, Contractor, T. H. Forrest, 2161 Olive St., L. A. Estimated price, \$35,450.

BANKS.

LOS ANGELES, CAL.—Bank building, 4 story and base, reinforced concrete, \$1,500,000. Architects, J. J. ...

& Bergstrom, Security Bldg. 12 A. Owners, Citizens' Savings Bank of Los Angeles. This work has been mentioned here before when the architects were first commissioned to prepare the plans. The entire first floor will be remodeled for the bank and upper floors will each contain sixteen offices. Construction will be fireproof throughout. Exterior walls will be faced with pressed brick and terra cotta. Metal window sash and frames will be used. There will be steam heat, elevator service and a vacuum cleaning system. Plans are complete and figures will be called for at once.

Contracts Awarded.

RIVERBANK, STANISLAUS CO., CAL.—Bank, 2-story and base, brick and steel, \$25,000. Architect, C. H. Russell, Humboldt Bank Bldg., S. F. Owners, First National Bank of Riverbank. Contractor, H. A. Hansen, Fresno. This contract calls for the plain and reinforced concrete work, brick work and carpentry work. Owners will furnish most of the materials.

BRIDGES, DAMS AND HARBOR WORK.

WOODS CREEK, SAN MATEO CO., CAL.—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor Neuman, Redwood City. Owners, San Mateo County. Plans and specifications for the construction of a reinforced concrete road bridge over Woods Creek in the Fourth Road District have been completed and approved by the Board of Supervisors. Bids are now being called for and will be opened by the Supervisors on September 15th. Plans can be secured from the County Surveyor at Redwood City.

COLMA, SAN MATEO CO., CAL.—Culvert and end walls, reinforced concrete. Cost not stated. Engineer, County Surveyor Neuman, Redwood City. Owners, San Mateo County. Plans for a reinforced concrete culvert with concrete end walls are complete and now out for figures. The culvert will be erected on the County Road from Colma to the ocean. Plans can be secured from the County Surveyor at Redwood City.

SAN CARLOS INDIAN RESERVATION, N. ARIZ.—Bridge, 2-story and concrete. Cost not stated. Engineer, Department of Indian Affairs, Washington, D. C. Owner, United States Government. Plans are now being called for and will be out for two steel span bridge structures which are to be erected over the San Carlos and San Carlos rivers on the Indian Reservation. Plans can be secured from the United States Indian office in San Francisco or the Indian Department at Washington, D. C. Plans will be opened in Washington, D. C. on Sept. 22nd. An official price list appears in this issue.

CHURCHES.

PORTLAND, O.—Parsonage, 1-story and dome, brick and granite, \$25,000. Architect, J. T. Foulkes, Crocker Bldg., S. F. Owner, Edward

Holman. The building has been designed in the classic style with a steel frame and exterior walls faced with California granite. Dome will be covered with copper. Interior will be finished in metal and stone. Marble will also be used extensively. Plans are complete and ready for figures.

REEDLEY, FRESNO CO., CAL.—Church, 1-story, frame, \$5,000. Architects, Starbuck & Clark, Forsyth Bldg., Fresno. Owners, First Mononitic Church of Reedley. The building will occupy the site of the present structure which will be moved back on the lot and used for Sunday school rooms. Main auditorium in the new building will have a seating capacity of 100 people. Interior finish will be of pine and redwood. Heating and ventilating systems will be installed. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and figures will be called for at once.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Packing plant, 3-story and base, reinforced concrete, \$50,000. Architect, Smith, O'Brien, Humboldt Bank Bldg., S. F. Owners, Workmen Packing Co. This work has been mentioned here before when the architect was first commissioned to prepare plans. The building will be erected on the north line of Harrison street between 4th and 5th streets, covering a large area. First floor will contain the general office, shipping department and storage space. Upper two floors will contain the packing plant and cold-storage rooms. The flat slab type of construction will be used. There will be a large amount of special machinery required. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

SAN FRANCISCO—Laundry, 2-story and base, brick, \$25,000. Architect, none. Owner, Peter J. Smith, 759 Folsom street, S. F. The building will be erected on West 14th street south of Folsom covering an area of 25x70 feet. Interior of the second floor will be finished in pine throughout. Special machinery will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

SALFORD, ORE.—Warehouse, 2-story and base, brick, cost not stated. Architect, Fred L. Lee, Annsworth Bldg., Portland. Owner, R. P. Bolde. The building will be erected near the railroad tracks and will cover an area of 122½ by 80 feet. Construction will be extra heavy. Interior finish will be of pine throughout. Metal window sash and frames will be used. There will be metal doors. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

PEARL HARBOR, HAWAII—Cold storage plant, reinforced concrete construction, \$15,000. Engineers, Bureau of Yards and Docks, Washington, D. C. Owner, United States Government. Plans and specifications are complete and out for figures for a cold storage plant to be erected at the Naval Station at Pearl Harbor. Plans can be secured direct from the Bureau of

Yards and Docks at Washington, D. C., or from the Commandant of the Naval Station at Pearl Harbor. Bids will be opened on October 18th. An official proposal appears under the heading of Official Advertising in this issue.

SEATTLE, WASH.—Warehouse, 7-story and base, reinforced concrete, \$125,000. Architects, Saunders & Lawton, Alaska Bldg., Seattle. Owners, A. Hambock & Co. The building will be erected at the corner of First avenue and King street and will cover a large ground area. Construction will be fireproof throughout with reinforced concrete walls, floors and roof. Interior partitions will be of hollow tile and metal lath and plaster. Fireproof doors, metal window sash and frames are specified. There will be elevator service, steam heat and parcel chutes. First floor will be arranged for the general offices of the company and will be handsomely finished in pine and hardwood. Exterior of the building will be faced with cement plaster. Bids are now being taken for the general construction. Figures on the plumbing, heating and electric work will be taken later.

SEATTLE, WASH.—Cold storage warehouse, 2-story and base, reinforced concrete, \$1,000,000. Architect, Paul P. Whitman, Central Bldg., Seattle. Owners, Port of Seattle Commission. This project is a part of the Seattle Port Commission's plan for the East Water Terminal. The building will be constructed in two units, each of which will cost about \$500,000. Plans for the first unit are now underway. When complete the building will have a capacity of 2,000 carloads. Only preliminary sketches have been prepared. Further details will be given as plans progress.

FLATS.

SAN FRANCISCO—Flats, 2-story and base, frame, \$15,000. Architect, none. Owner, Conrad Young, North Point near 26th street. The building has been designed to contain two flats and will cover an area of 23x53 feet. Interior finish will be of pine and redwood. Some hardwood floors will be used. Each flat will have a 30 gallon boiler. Open fire places will be used in the living room. Mantels will be of tile. The window will be of tile. The bath rooms and kitchens. Exterior of the house will be covered with rustic and shingle. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Flats, 2-story and base, frame, \$18,000. Architect, none. Owner, J. H. Thorpe, 6124 California street. The building will be erected on the west side of 26th avenue north of California street and has been designed to contain two modern flats of five rooms and bath. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the principal rooms. Each living room will have a large open fire place and brick mantel. Bath rooms will be finished in tile. Exterior of the building will be covered with rustic and cement plaster on metal lath. Brick veneer base will be used. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Flats, 3-story and base, frame, \$5,000. Architect, William

Kleeman, 188 Page St., S. F. Owner, James Hagan. The building will be erected on a lot 198x55 feet on the east side of Elgin street north of Duboce avenue. There will be three flats of five rooms and bath each. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the living rooms. Each living room will have an open fire place with tile mantels. Vestibule will be finished in marble and mosaic. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

SAN FRANCISCO—Flats, 2-story and base, frame, \$4,500. Architect, none. Owner, J. Johnson, 429 35th Ave., S. F. The building will cover an area of 25x64 feet, and has been designed to contain two modern five-room flats. Interior finish will be of pine and elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Flats, alterations and repair, 2-story frame, \$7,000. Architect, G. A. Berger, 133 Octavia St., S. F. Owner, J. P. Mirasol, 2021 22nd St., S. F. This work will consist of the addition of one story to the present building and extensive alterations. Included in the work will be new plumbing, painting, plastering and electric work as well as new interior finish. Exterior of the new portion of the building will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Flats, 2-story and base, frame, \$5,000. Architect, Sidney B. Newson, Novada Bank Bldg., S. F. Owner, Mr. M. A. Lindholm. The building will be erected on the south side of Barker avenue near Hillegass and will contain two five-room flats with baths. Interior finish will be of pine, redwood and some hardwood. Each living room will have a large open fire place and brick or tile mantel. Hardwood floors will be used in the principal rooms. Bath rooms will have tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared and figures will shortly be taken.

OAKLAND, CAL.—Flats, 2-story and base, frame, \$8,500. Architect, Earl E. Scott, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be erected on Linda avenue, and has been designed to contain four apartment flats each of four rooms, bath and sleeping porch. Interior finish will be of pine and redwood. Hardwood floors will be used in the living rooms. There will be open fire places and tile mantels. Bath rooms will have composition floors and tile wainscot. Each apartment will have a wall bed. A hot water system will be installed. Exterior of the building will be covered with brick veneer and rustic. Plans are being prepared.

which were opened on dates indicated below, are pending in the office of the supervising architect.

Casper, Wyo., construction, complete, April 7.

Fresno, Cal., hoistway and freight lift, July 17.

Grass Valley, Cal., construction, complete, June 30.

Grand Junction, Colo., construction, complete July 21.

Pocatello, Idaho, construction, complete May 28.

San Francisco, Cal., subtreasury, electric vault system, June 29.

Riverside, Cal., Post Office.

The Southwestern Construction Co., 328 Central Bldg., Los Angeles, Cal., who has the contract for the construction of the U. S. post office, Riverside, Cal., will use lighting fixtures manufactured by the Reading Chandelier Works in lieu of the California Fixture Co.'s fixtures whose order cannot be filled. No change is made in the contract price.

Spurs and Siding, Fort Russell.

All bids received for the reconstruction of railroad spurs and sidings at Fort D. A. Russell, Wyo., have been rejected. All offers were considered excessive.

Valves, Belle Fourche Project.

The following bids were opened by the U. S. Reclamation Service under advertisement No. 213, for furnishing balanced regulating valves for the Belle Fourche project:

Advance Machine Co., Los Angeles, Cal., \$85; 21 days.

Moline Machine Works, Los Angeles, Cal., \$90; 14 days.

Fulton Engine Works, \$151; 11 days. All deliveries Los Angeles, Cal.

Canal Commission Awards.

Awards have been made during the past week by the general purchasing officer of the Isthmian Canal Commission for furnishing supplies for the Panama Canal as follows:

Under circular 778, 2 floating caissons, bids opened July 21.

Union Iron Works, San Francisco, Cal., for 1 caisson only, \$239,760.

Bids for the 2d caisson have been rejected and no purchase will be made.

Canal Circular No. 793.

The Isthmian Canal Commission will call for bids under circular 793, opened September 17, 1913, for the following material and supplies:

Class 1, 296,956 lbs. material required for (open) storehouses, Panama Canal fortifications, roof trusses, and miscellaneous iron work.

Class 2, One track pile driver. Class 3, 93,375 steel reinforcing bars. Class 4, 100 long handle shovels. Class 5, 100 railroad picks. Class 6, 12,600 iron head rivets. Class 7, 29,100 machine bolts. Class 8, 200 gals. wrought steel tanks. Class 9, 18 sets stocks and dies. Class 10, 8,000 lbs. galv. flat spikes. Class 11, 12 portable blacksmith forges. Class 12, 12 riveting forges. Class 13, 30 grind stones. Class 14, 11,000 ft. hot ting; plow steel cable, 6 strands and 23,000 ft. plow steel extra flexible cable, 8 strands. Class 15, 2,300 ft. straight link black chain and 1,000 ft. galv. straight link chain. Class 16, 20 iron body gate valves. Class 17, 200 compression grease cups. Class 18, 600 garbage cans. Class 19, 60 roofing brush-

es. Class 20, 96 whitewash brushes, 9 in. Class 21, 800 lbs. cold rolled and 400 lbs. hot rolled sheet copper. Class 22, 2,500 lbs. solder. Class 23, 5,000 gal. liquid coal tar. Class 24, 15,000 lb. white zinc in oil. Class 25, 30,000 lb. foundry slab zinc. Class 26, 24,000 lbs. ammonia alum. Class 27, 645,000 lbs. lump sulphate aluminum. Class 28, 500 gals. black asphaltum paint. Class 29, 300 gals. black jacket enamel. Class 30, 1,000 lbs. lump black in oil. Class 31, 600 lbs. yellow ochre in Japan. Class 32, 350 lbs. burnt sienna in oil. Class 33, 400 lbs. red vermilion. Class 34, 2,000 gals. ra. winseed oil. Class 35, 1,000 lbs. putty in oil. Class 36, doors and windows for all control houses. Class 37, 2,410 lengths untreated piles. Class 38, 1,360 lengths creosoted piles. Class 39, 3,460 pieces long leaf yellow pine or Douglas fir, rough. Class 40, a quantity estimated 1,275,000 ft. B. M. long leaf yellow pine or Douglas fir lumber.

Canal Circular 794.

The Isthmian Canal Commission will open bids September 19, 1913, under canal circular No. 794, for the following material and supplies:

Class 1, 22,800 lin. ft. cast-iron bell and spigot pipe, 12-ft. lengths, and fittings consisting of tees, elbows, flanges, and reducers.

Class 2, 13 iron body gate valves.

Class 3, 12,000 lbs. lute for cast-iron pipe joints.

Class 4, 118 frames, casement doors, and sashes, and screen sashes.

Phoenix, Ariz., Vault Shelling.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for installing metal vault shelving for U. S. post office and court house, Phoenix, Ariz.:

Watson Manufacturing Co., Jamestown, N. Y., \$1,487.

The Steel Fixture Manufacturing Co., Topeka, Kans., \$1,525.

The Canton Art Metal Co., Canton, O., \$1,739.

Crown Metal Construction Co., Jamestown, N. Y., \$1,815.

Art Metal Construction Co., Jamestown, N. Y., \$1,815.

Art Metal Construction Co., Jamestown, N. Y., \$2,124.

The Van Dorn Iron Works, Cleveland, Ohio, \$3,117.

Canal Work.

The Secretary of the Interior has awarded contract to Ellsworth Kissner Construction Company, of Pittsburg, Kans., for the construction of a portion of the East Canal, Incomapahge valley irrigation project, involving approximately 88,000 cubic yards of excavation in open cut, and 5,500 cubic yards overhaul. The contract price is \$26,572.50.

Grand Valley Irrigation Project.

The Secretary of the Interior has authorized the Reclamation Service to construct the diversion dam and appurtenant structures for the Grand Valley irrigation project, Colorado. The work will begin at once in order to take advantage of the present low water season. It is estimated that it will cost approximately \$375,000.

GOVERNMENT WORK AND SUPPLIES.

PENDING PROJECTS.

The following projects, bids for

HALLS AND SOCIETY BUILDINGS.

VANCOUVER, B. C.—Armory, 1 and story and base. Class A construc-

tion, \$200,000. Architects, Ferry & Fowler, Pacific Bldg., Vancouver, Owners, Province of British Columbia. The building is to be erected on Grandview avenue covering an area of over 200 feet square. Construction will be fireproof with a complete steel frame and exterior walls of brick faced with pressed brick and terra cotta. Funds for the construction are not yet available. Further mention will be made of this work when figures are called.

HOSPITALS.

SAN RAFAEL, MARIN CO., CAL.—Hospital, 2 story and base, reinforced concrete, \$37,472. Architect, Thomas O'Connor, San Rafael. Owners, Marin County. Contractor, Peter Hamilton, San Anselmo. Contract price, \$37,472.

HOTELS.

SAN FRANCISCO—Hotel, 3 story and base, brick and steel, \$75,000. Architect, R. R. Christensen, Grant Bldg., S. F. Owner, Mary Mariscano. The building, which was originally designed for a four-story structure, will be erected at the southwest corner of Broadway and Grant avenue. There will be several stories besides the hotel lobby on the first floor. Upper floors will contain in the neighborhood of 125 guest rooms and a large number of baths. Interior finish will be of pine and hardwood. There will be steam heat, elevator service and a hot water system. Bath rooms will have cement floors and tile wainscot. Marble, tile and ornamental plaster will be used in the entrance and lobby. Stores will have patent fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans have been prepared.

SAN FRANCISCO—Hotel and stores, 5 story and base, reinforced concrete. Cost not stated. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, Carmel Fallon. The building will be erected on the south line of Market street near Barb, covering an area of 31x121 feet. There will be stores and the hotel entrance on the first floor. Upper floors will be divided into single rooms and baths. Interior finish will be of pine and redwood with some hardwood and ornamental plaster in the lobby. Plans provide for steam heat, elevator service and a hot water plant. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

SAN FRANCISCO—Hotel addition, 4 story and base, reinforced concrete, \$15,000. Architect, C. H. Skidmore, Foxcroft Bldg., S. F. Owner, John Meierdierks. The building will be erected on Te and street east of 4th, connecting with a hotel building on the property of the same owner on Howard street. There will be in the

neighborhood of 60 rooms and several baths in the new portion. Interior finish will be of pine and redwood. Plans provide for steam heat and hot and cold running water will be supplied to all rooms. Exterior of the building will be faced with cement plaster. Plans are complete and ready for figures.

OAKLAND, CAL.—Hotel, 3 story and base, brick, \$15,000. Architect, Intel Chies Home Builders, 1751 Broadway, Oakland. Owner, L. Berckovich. This building will be erected at the corner of Second and Broadway, and will be arranged for stores on the first floor and hotel rooms above. Interior finish will be of pine throughout. All rooms will have hot and cold running water and steam heat. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with cement plaster. Stores will have plate glass display windows and patent store fronts. Plans are complete and figures are being taken.

Contracts Awarded.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel, \$13,690. Architect, Neher & Skilling, Garland Bldg., L. A. Owner, W. H. Wagner. Contractors, Alta Planning Mill Co., 829 McGarry St., Los Angeles. Contract price, \$13,690.

LIBRARIES.

Contracts Awarded.

BAKERSFIELD, KERN CO., CAL.—Library, 2 story and base, brick and concrete, \$20,000. Architect, Orville Clark, Brower Bldg., Bakersfield. Owners, City of Bakersfield. Contractor, F. J. Amwed, 211 Kearny St., S. F. Contract price, \$20,000.

POST OFFICES.

SAN FRANCISCO—Painting Custom House. Cost not stated. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. Plans have been received by Supt. Roberts, Post Office Bldg., S. F., for the interior painting of the United States Custom House in this city. Bids will be opened in Washington, D. C., on September 24th. Plans and specifications can be secured from Supt. of Construction Roberts, Post Office Bldg., S. F. An official proposal appears in another column of this issue.

Bids opened in Washington on September 2nd show Grant Fee low on the vault work at the Subtreasury at \$35,618, and the York Safe and Lock Co., York, Pa., low on the vault entrances at \$17,995. Contracts have not been awarded. A complete list of these figures appears under the heading of San Francisco in this issue.

RAILROAD CONSTRUCTION—AND EQUIPMENT.

RICHMOND, CONTRA COSTA CO., CAL.—Passenger station, 1 story and base, brick and steel, \$30,000. Architect, Architectural Department South-

ern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Announcement has been made that this company will erect a new building at Richmond. The present combination freight and passenger station will be removed to a different location and used for a freight house. Additional trackage is being planned. Details of the building will be given later. Construction will probably be underway inside of a month or six weeks.

RESIDENCES.

ALAMEDA, ALAMEDA CO., CAL.—Residence, 1½ story, attic and base, frame, \$4,000. Architects, H. Geiffuss & Son, 46 Kearny St., S. F. Owner's name withheld. The dwelling will contain six rooms, sleeping porch and bath, and is to be erected in one of the select residence sections of Alameda. Interior finishings will be of pine and hardwoods. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. The bath room will have composition floor and tile wainscot. There will be an automatic water heater installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$5,000. Architect, none. Owner, J. Brown Schuyler, Solano Ave., Berkeley. This dwelling has been designed for a nine room house with bath and sleeping porch, and will be erected on Marin Ave., near Fresno St. Interior finish will be largely of pine with hardwood floors in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

OAKLAND, CAL.—Dwelling, 1 story and base, frame, \$3,000. Architect, Leonard H. Ford, 2135 Center St., Berkeley. Owner, A. M. Duncan. The dwelling is to be erected on Kingston avenue and will contain six rooms, bath and sleeping porch. Interior finish will be of pine and some elm panels. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire place. Mantel will be of brick. Tile wainscot will be used in the bathroom and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared for the work.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$7,500. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, Thomas C. Huxley. The house will be erected in Elmwood Park and will contain 8 or 9 rooms, several baths and sleeping porch. Interior will be finished in pine hardwood and white enamel. Hardwood floors will be used in the principal rooms. Bath rooms will have composition floors and tile wainscot. There will be a central heating system, probably furnace heat, and open fire places. Mantels will be

of tile and brick. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are nearly complete and figures will soon be called for.

OAKLAND, CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, none. Owner, P. M. Fisher, principal Polytechnic High School, Oakland. The dwelling will be erected on Orange street, near Perry, and has been designed to contain seven rooms and bath. Interior will be finished in pine with some elm panels and hardwood floors. There will be a large open fire place in the living room with brick or tile mantel. Bath room will have composition floor and tile wainscot. An automatic water heater and a vacuum cleaning system will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner, who is taking figures on the work.

OAKLAND, CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, A. W. Smith, 1904 Broadway, Oakland. Owner, Mrs. A. C. Jessie. The dwelling will contain seven rooms, bath and sleeping porch, and will be erected on Mira Vista avenue. Interior will be finished in pine and redwood, with some hardwood floors. There will be an open fire place in the living room with tile or brick mantel. Bath room will have tile wainscot. Tile will also be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,500. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, Mr. Ochletree. The dwelling has been designed for a seven room house and will be erected on Bonita avenue. Interior finish will be largely of pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$1,500. Architect, Claude B. Barton, Security Bank Bldg., Oakland. Owner, E. P. Houston. The dwelling has been designed for a seven room house with bath and sleeping porch and will be erected in Piedmont Manor. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken on the work.

BERKELEY, ALAMEDA CO., CAL.—Residence alteration 2 story and base, frame, \$1,000. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, O. A. Gilles. This work will consist of both interior and exterior work and is to be done at the premises at the corner of Telegraph and Oregon streets.

There will be new exterior covering, chingles and cement plaster, new interior finish, pine and hardwood floors, gas grates and brick mantels. Work will also call for plastering, plumbing, painting and electric work. Plans are being prepared.

PIEDMONT, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$2,500. Architects, United Home Builders, 1762 Broadway, Oakland. Owners, United Home Builders. The bungalow will contain six rooms, bath and sleeping porch. Interior finish will be mostly of pine and redwood. Hardwood floors will be used in the principal rooms. There will be a large open fire place in the living room with brick mantel. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$1,500. Architect, A. J. Yerrick, Blake Bldg., Oakland. Owner, E. B. Fernhoff. The dwelling is to be erected at the southwest corner of Bonita and Panama avenues and has been designed for a seven room house with bath and sleeping porch. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$1,000. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, H. J. Knight. The dwelling has been designed for an eight room house with bath and sleeping porch and will be erected in Northbrae. Interior finish will be of pine, redwood and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

OAKLAND, CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owner, C. M. Orr. This house will be erected on Euclid avenue in Alhambra and will contain in the neighborhood of 8 rooms, baths and sleeping porch. Interior will be finished in pine and hardwoods with hardwood floors in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will have tile floors and wainscot and tile will also be used in the kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame. Cost not stated. Architects, Milwain Bros., De-lger Bldg.,

Oakland. Owner, Mrs. A. J. Larkey. This house has been mentioned here before when the architects were first commissioned to prepare plans. The dwelling will contain 10 rooms and baths. Interior finish will be of pine, redwood and hardwoods. Hardwood floors will be used in the principal rooms. Bath rooms will have tile floors and tile wainscot. A garbage incinerator will be installed, also a vacuum cleaning system and automatic water heater. There will be furnace heat and open fire places. Mantels will be of brick and tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$1,000. Architect, Leonard H. Ford, 2136 Center street, Berkeley. Owner, D. Goodale. The house has been designed for a seven room dwelling with bath and sleeping porch and will be erected on Benvenue street. Interior finish will be largely of pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Tile will be used in the bath room and kitchen. An automatic water heater will also be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$2,500 each. Architect, none. Owner, J. M. Peters, 1010 Eads street, S. F. These houses will be erected on the east side of 20th avenue, south of California street and each has been designed to contain six rooms and bath. Interior finish will be entirely of pine with some hardwood floors. Each living room will have an open fire place with tile or brick mantel. Tile will be used in the bath rooms and kitchens. Exterior of the houses will be covered with cement plaster and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$30,000. Architects, H. Gillfus & Son, 46 Kearny street, S. F. Owner's name withheld. The house will be erected on property on Pacific avenue near Buchanan street recently purchased by a wealthy Sacramento woman. The lot has a frontage on Pacific avenue of 10 feet and a depth of 168 feet 1 inches, and the building will cover a portion about 10000 feet. There will be a total of 16 rooms and four baths contained in the house. Interior finish will be of pine mahogany, birch, white enamel and ornamental plaster. Main living room and reception hall will be finished in Empire style. Main dining room will be finished in red gum and white mahogany in hardwoods. All chambers will be finished in white enamel. Hardwood floors will be used throughout except in the bath rooms, which will have tile floors and tile wainscot. Each of the principal chambers will have a private dressing room with a specially designed wardrobe with French plate doors, special shoe closets and drawers. A most completely equipped butler's pantry will connect the dining room and kitchen. The pantry will contain coolers and ice chest, marble shelves and slabs and tile wainscot.

Tile will also be used extensively in the kitchen. A number of servants' rooms have been provided for in the basement and upper floors. A Rector system of heating will be installed. Exterior of the house will be covered with cement plaster marked off in imitation of cut stone. When completed the house will cost in the neighborhood of \$30,000.

SAN FRANCISCO.—Residence, 2 story and base, frame, \$12,000. Architects, O'Brien and Werner, Foxcroft Bldg., S. E. Owner, Abbott A. Hanks. This dwelling has been mentioned here before when plans were first prepared. The dwelling will be erected on Pacific avenue near Laurel and will contain in the neighborhood of 10 rooms, several baths and sleeping porch. Interior finish will be largely of pine and hardwoods. There will be a central heating system, probably furnace heat. Hardwood floors will be used in the principal rooms. Bath rooms will have cement floors and tile wainscot. A vacuum cleaning system will be installed and an automatic water heater. Exterior of the dwelling will be covered with brick veneer. Plans are ready for figures.

SAN FRANCISCO.—Residence, 2 story and base, frame, \$10,000. Architect, John J. Foley, 16 Kintony street, S. E. Owner, Mr. St. Clair. The dwelling will be erected at the corner of 29th avenue and California street, and will contain seven rooms and bath. Interior finish will be of pine and hardwood. There will be furnace heat and open fire places. Mantels will be of tile. Hardwood will be used in the principal rooms. Bath room and kitchen will have the wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO.—Bungalow, 3, 1½ story and base, frame, \$2,000. Architect, none. Owners, MacArthur Bros., 1550 Fell street, S. E. These houses will be erected on the south side of Judah street west of 10th avenue. Each house has been designed to contain six rooms and bath. All interior finish will be of pine or redwood. Some hardwood floors will be used. A large open fire place with brick or the mantel will be installed in each of the living rooms. Bath rooms and kitchens will have tile wainscot. Exterior will be covered with rustic shingles and cement plaster. Plans are complete and in the hands of the owners who will do the work by Day Labor.

SAN FRANCISCO.—Residence alterations and addition, 2 story and base, frame, \$2,500. Architects, C. A. Meussdorffer, 1400 Market Bldg., S. E. Owner, James S. Wadell. This work will include alterations to the interior alterations and the addition of a sleeping porch and a bath. There will be new interior decoration, finish, painting, plumbing and electric work. Exterior of the dwelling will be covered with shingles and cement. Plans are complete and figures are being taken.

OAKLAND, CAL.—Bungalow, 1½ story and base, frame, \$2,200. Architects, Newcomb and Dean, 812 Broadway, Oakland. Owner, Mr. Coward. The dwelling will be erected at the corner of S. and College streets and has been designed for a six-room dwelling with bath. Interior finish will be of pine throughout. There will

be a large open fire place in the living room with brick mantel. Some hardwood floors will be used. Tile wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. All materials are now being purchased.

OAKLAND, CAL.—Bungalow, 1½ story and base, frame, \$3,000. Architect, none. Owner, J. A. Brett, 727 39th street, Oakland. The house will contain six rooms and bath and will be erected on Crescent street near Santa Clara. Interior finish will be of pine with some hardwood floors. Open fire place and a brick mantel will be used in the living room. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor. All materials are being purchased.

STOCKTON, SAN JOAQUIN CO., CAL.—Bungalow, 1 story and base, frame, \$3,000. Architect, Walter King, Elks' Bldg., Stockton. Owner, Mr. Ross. The dwelling will be erected at the corner of Madison and Stockton streets and has been designed for a five-room house with bath and sleeping porch. Interior finish will be of pine with hardwood floors in the principal rooms and some elm panels. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath room will have cement floor and tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic. Plans are nearly ready for figures.

STOCKTON, SAN JOAQUIN CO., CAL.—Residence, 2 story and base, frame, \$4,000. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owner, Miss D. McInnes. The house will be erected on Madison street north of Willow and has been designed to contain seven rooms and bath. Interior finish will be of pine with some hardwood veneer. There will be furnace heat and open fire places. Mantels will be of tile or brick. Hardwood floors will be used in the living room, dining room and reception hall. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic. Plans are complete and figures are being taken.

STOCKTON, SAN JOAQUIN CO., CAL.—Bungalow, 1 story and base, frame, \$2,300. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owner, Frank Tucker. The house will contain six rooms and bath. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be a large open fire place with tile or brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustic. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

SACRAMENTO, CAL.—Residence, 1 and 2 story and base, frame. Cost not given. Architect, none. To following Day Labor jobs are reported as about to be started in Sacramento, E. A. Pierce, 3523 Park avenue, Sacramento, 1, 2 story frame dwellings \$11,300; C. Valine, 1215 D street, Sacra-

mento, 2 story frame dwelling, \$3,000, and W. A. Fairfield, 3114 27th street, Sacramento, 1 story frame dwelling, \$1,800.

LOS ANGELES, CAL.—Residence, 2 story and base, brick and frame, \$20,000. Architect, Charles E. Shattuck, Mason Bldg., L. A. Owner, Miss Ada A. Dryden. A central heating system will be installed. Exterior of the building will be faced with cement plaster. Working drawings are complete and figures are now being taken.

SEWERS, STREET WORK AND WATER SYSTEMS.

SAN FRANCISCO—Tunnel construction, \$2,914,002. Engineer, City Department of Engineering, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. City Engineer O'Shaughnessy has submitted a report to the Board of Public Works of the estimated cost of the Fillmore Street tunnel. This report places the cost of actual construction, exclusive of property value, at \$2,914,002. The engineer estimates that 360 ft. will be required to complete the work. According to plans on file with the Board of Public Works the bore will be 4,116 feet long, extending from the south line of Bush street to the north line of Union street. Plans show a double bore with a 2 1/2 per cent grade. One compartment will be used by vehicles and will be 25 feet wide and 20 feet high. The other will be used for street car traffic and will be 20 feet wide and 22 feet high with a six-foot passage way for foot traffic.

SAN FRANCISCO—Office building, 25 story and base. Class A construction, \$1,500,000. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owners, Hobart Estate. Plans and specifications for the 25 story Class A office building to be erected on the Hobart property, north Market opposite Second, have been practically completed. Bids are now being called for on the steel work. Excavating and foundation work will be let shortly. All parts of the work will be segregated. Architect Willis Polk is in complete charge of the work.

OAKLAND, CAL.—Stores and offices alteration, brick construction, \$28,000. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owners, H. and J. Abramson. The building at the southeast corner of 13th and Clay streets will be altered and modernized. Interior will be rearranged and new interior finish installed. New plastering, painting, plumbing and electric work is also included. Exterior of the building will also be altered and new pressed brick and terra cotta facing put on. Some structural steel will be used. There will be plate glass show windows in patent store fronts. Marble and tile will be used. Plans are complete and figures are being taken.

SANTA ANA, ORANGE CO., CAL.—Stores and offices, 4 story and base, brick and steel, \$75,000. Architects, Metcalf & Davies, 28 American Ave., L. A. Owner, W. H. Spurgeno, Supt., F. Harmon, Santa Ana. The building will be erected at the corner of 4th and Sycamore streets, covering an area of 100x125 feet. Entire first floor will be arranged for stores. Upper floors will contain over 100 modern offices. Interior finish will be of pine with marble and tile wainscot in the halls and corridors. Plans provide for steam heat, elevator service and a vacuum cleaning system. There will be patent store fronts, mail chute and metal window sash and frames. Marble and tile will be used in the store entrances. Exterior of the building will be faced with pressed brick. Plans are nearly complete and work will be done by Day Labor.

Contracts Awarded.

PROPOSALS FOR ICE AND STORAGE PLANT.

ICE AND STORAGE PLANT—Sealed proposals, including proposals for ice-making and Cold-Storage Plant will

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, and carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCES—2, 2 story and base, frame, \$25,000 each. S. F. T. Co., Architect, none. Owners, J. H. Young, 1010 Polk street, S. F. T. Co. These will be erected on the east side of 24th avenue south of California street, and each has been designed to contain six rooms and bath. Interior finish will be entirely of pine with some hardwood floors. Each living room will have an open fire place with tile or brick mantel. Tile will be used in the bath rooms and kitchens. Exterior of the houses will be covered with cement plaster and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$20,000. San Francisco Architects, Geilfuss & Son, 18 Kearny street, S. F. Owner's name withheld. The house will be erected on property on Pacific avenue near Broadway street recently purchased by a wealthy Sacramento woman. The lot has a frontage on Pacific avenue of 10 feet and a depth of 165 feet 4 inches, and the building will cover a portion about 165x10 feet. There will be a total of 16 rooms and four baths contained in the house. Interior finish will be of pine, mahogany, birch, white enamel and ornamental plaster. Main living room and reception hall will be finished in Empire style. Main dining room will be finished in red gum and billiard hall in hardwoods. All chambers will be finished in white enamel. Hardwood floors will be used throughout, except in the bath rooms, which will have tile floors and tile wainscot. Each of the principal chambers will have a private dressing room with a special designed wardrobe with French plate glass, special shoe closets and drawers. A most completely equipped butler's pantry will connect the dining room and kitchen. The pantry will contain ice boxes and ice chest, marble slabs and slabs and tile wainscot. This will also be used extensively in the kitchen. A number of servants' rooms will be provided for in the basement and upper floors. A Rector system of heating will be installed. Exterior of the house will be covered with cement plaster marked off in imitation of stone. When completed the building will cost in the neighborhood of \$20,000.

RESIDENCE—2 story and base, frame and brick, \$12,000. San Francisco Architects, O'Brien, Foxcroft Bldg., S. F. Owner, A. Hanks. This dwelling, as mentioned here before, will be the first prepared. The dwelling will be erected on Pacific avenue north of 10th rooms, several bath and living porch. Interior finish will be entirely of pine and hardwoods. There will be a central heating system with furnace heat. Hardwood floors will be used in the principal rooms. Bath rooms will have cement tile and tile wainscot. A vacuum electric system will be installed and an electric water

heater. Exterior of the dwelling will be covered with brick veneer. Plans are ready for figures.

RESIDENCE—2 story and base, frame, \$1,000. San Francisco Architect John J. Foley, 46 Kearny street, S. F. Owner, Mr. St. Clair. The dwelling will be erected at the corner of 24th avenue and California street and will contain seven rooms and bath. Interior finish will be of pine and hardwood. There will be furnace heat and open fire places. Mantels will be of tile. Hardwood floors will be used in the principal rooms. Bath room and kitchen will have tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BUNGALOWS—2, 1½ story and base, frame, \$2,000. San Francisco Architect, none. Owners, MacArthur Bros., 1560 Fell street, S. F. These houses will be erected on the south side of Judah street west of 10th avenue. Each house has been designed to contain six rooms and bath. All interior finish will be of pine or redwood. Some hardwood floors will be used. A large open fire place with brick or tile mantel will be installed in each of the living rooms. Bath rooms and kitchens will have tile wainscot. Exterior will be covered with rustic, shingles and cement plaster. Plans are complete and in the hands of the owners who will do the work by Day Labor.

RESIDENCE ALTERATIONS AND ADDITIONS—2 story and base, frame, \$2,500. San Francisco Architect, C. A. Meussdorff, Humboldt Bank Bldg., S. F. Owner, Justus Wardell. This work will include exterior and interior alterations and the addition of a sleeping porch on the rear. There will be new interior plastering, finish, painting, plumbing and electric work. Exterior of the building will be covered with shingles and rustic. Plans are complete and figures are being taken.

PACKING PLANT—3 story and base, reinforced concrete, \$50,000. San Francisco Architect, Smith O'Brien, Humboldt Bank Bldg., S. F. Owners, Workman Packing Co. This work has been mentioned here before when the architect was first commissioned to prepare plans. The building will be erected on the north line of Harrison street between 4th and 5th streets covering a large area. First floor will contain the general offices, shipping department and storage space. Upper two floors will contain the packing plant and odd storage rooms. The flat slab type of construction will be used. There will be a large amount of special machinery required. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

LAUNDRY—2 story and base, brick, \$2,500. San Francisco Architect, none. Owner, Peter J. Smith, 739 Polson street, S. F. The building will be erected on West Pitch street south of Polson covering an area of 25x70 feet. Interior of the second floor will be finished in pine throughout. Special machinery will be installed. Exterior of

the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

FLATS—2 story and base, frame, \$1,500. San Francisco Architect, none. Owner, Conrad Young, North Point 100 Polk street. The building has been designed to contain two flats and will cover an area of 25x53 feet. Interior finish will be of pine and redwood. Some hardwood floors will be used. Each flat will have a 30 gallon water closet. Open fire places will be used in the living rooms. Mantels will be of tile. Tile wainscot will be used in the bath rooms and kitchens. Exterior of the house will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

FLATS—2 story and base, frame, \$1,500. San Francisco Architect, none. Owner, J. H. Thorup, 6121 California street. The building will be erected on the west side of 26th avenue north of California, and has been designed to contain two modern flats of five rooms and bath. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the principal rooms. Each living room will have a large open fire place and brick mantel. Bath rooms will be finished in tile. Exterior of the building will be covered with rustic and cement plaster on metal lath. Brick veneer base will be used. Plans are complete and the work will be done by Day Labor.

FLATS—3 story and base, frame, \$5,000. San Francisco Architect, William Kleeman, 188 Page street, S. F. Owner, James Hagan. The building will be erected on a lot 19 by 65 feet on the east side of Elgin street north of Duboce avenue. There will be three flats of five rooms and bath each. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the living rooms. Each living room will have an open fire place with tile mantels. Vestibule will be finished in marble and mosaic. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

FLATS—2 story and base, frame, \$1,500. San Francisco Architect, none. Owner, J. Johnson, 488 9th avenue, S. F. The building will cover an area of 25 by 64 feet and has been designed to contain two modern five room flats. Interior finish will be of pine and elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

FLATS, ALTERATIONS AND REPAIR—2 story, frame, \$3,000. San Francisco Architect, G. A. Berger, 128 Octavia street, S. F. Owner, J. P. Mirassol, 222nd street, S. F. This work will consist of the addition of a story to the present building and extensive alterations. Included in the work will be new plumbing, painting, heating and electric work as well as new interior finish. Exterior of the new portion of the building will be covered with rustic and shiplap. Plans

are complete and work will be done by Dry Labor.

HOTEL—3 story and base, brick and steel, \$75,000. San Francisco. Architect, R. B. Christensen. Grant Bldg., S. F. Owner, Mary Marcano. The building, which was originally designed for a four story structure, will be erected at the southwest corner of Broadway and Grant avenue. There will be several stores besides the hotel lobby on the first floor. Upper floors will contain in the neighborhood of 125 guest rooms and a large number of baths. Interior finish will be of pine and hardwood. There will be steam heat, elevator service and a hot water system. Bath rooms will have cement floors and tile wainscot. Marble, tile and ornamental plaster will be used in the entrance and lobby. Stores will have patent fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans have been prepared.

HOTEL AND STORES—3 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, C. A. Meussdorffer. Humboldt Bank Bldg., S. F. Owner, Carmel Fallon. The building will be erected on the south line of Market street near Brady covering an area of 34 by 124 feet. There will be stores and the hotel entrance on the first floor. Upper floors will be divided into single rooms and baths. Interior finish will be of pine and redwood with some hardwood and ornamental plaster in the lobby. Plans provide for steam heat, elevator service and a hot water plant. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

HOTEL ADDITION—4 story and base, reinforced concrete, \$15,000. San Francisco. Architect, C. H. Skidmore. Foxcroft Bldg., S. F. Owner, John Meierdierks. The building will be erected on Telama street east of 10th connecting with a hotel building on the property of the same owner on Howard street. There will be in the neighborhood of 60 rooms and several baths in the new portion. Interior finish will be of pine and redwood. Plans are complete and ready for figures.

PAINTING CUSTOM HOUSE—Cost not stated. San Francisco. Architect, Oscar Wendroth. Washington, D. C. Owners, United States Government. Plans have been received by Supt. Roberts, Post Office Bldg., S. F. for the interior painting of the United States Custom House in this city. Bids will be opened in Washington, D. C. on September 24th. Plans and specifications can be secured from Supt. of Construction Roberts, Post Office Bldg., S. F. An official proposal opens in another column of this issue.

TUNNEL CONSTRUCTION—\$2,914,002. San Francisco. Engineer, City Department of Engineering. Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. City Engineer O'Sullivan's plan is submitted a report for the proposed Public Works of the city to be located at the Fillmore Street tunnel. The project places the cost of the construction, exclusive of property, at \$2,914,002. The engineer estimates that 300 days will be required to plan and do the work. According to plan, the tunnel will be 3,116 feet long, extending from the south line

of Bush street to the north line of Union street. Plans show a double bore with a 2.3 per cent grade. One compartment will be used by vehicles and will be 25 feet wide and 20 feet high. The other will be used for street car traffic and will be 29 feet wide and 22 feet high with a six foot passage way for foot traffic.

OFFICE BUILDING—2 1/2 story and base. Class A construction, \$150,000. San Francisco. Architects, Willis Polk & Co. Merchant's Exchange Bldg., S. F. Owners, Hobart Estate. Plans and specifications for the 26 story Class A office building to be erected on the Hobart property, north Market Street opposite Second, have been practically completed. Bids are now being called for on the steel work. Excavating and foundation work will be let forth. All parts of the work will be segregated. Architect Willis Polk is in complete charge of the work.

VAULT CONSTRUCTION—Subtreasury Building, \$53,648. Architect, Oscar Wendroth. Washington, D. C. Owners, United States Government. Bids opened in Washington on Sept. 2nd show Grant Fee low on the vault work at the Subtreasury at \$53,648, and the York Safe and Lock Co., York, Penn., low on the vault entrances at \$37,995. Contracts have not been awarded. A complete list of these figures appears under the heading of San Francisco in this issue.

COLD STORAGE PLANT—Reinforced concrete construction, \$15,000. Pearl Harbor, Hawaii. Engineers, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Plans and specifications are complete and out for figures for a cold storage plant to be erected at the Naval Station at Pearl Harbor. Plans can be secured direct from the Bureau of Yards and Docks at Washington, D. C., or from the Commandant of the Naval Station at Pearl Harbor. Bids will be opened on October 18th. An official proposal appears under the heading of Official Advertising in this issue.

Contracts Awarded.

APARTMENT HOUSE—6 story and base, brick and steel, \$72,000. San Francisco. Architects, Walsh and Carey, Merchants' National Bank Bldg., S. F. Owner, Sewall Bellvery. Contractor, Henry Jacobs, the Jesse St. S. F. Contract price, \$72,000.

British Corporation Selects San Francisco As Port.

Royal Mail To Make This City Headquarters for Western Trade.

It has been officially announced by the American Representative of the Royal Mail Steam Packet Company, a British corporation, that San Francisco has been selected as the headquarters and terminus in the Pacific ocean. This company has the largest fleet of merchant ships in the world and the announcement is important. The German line, the Hamburg American, is also preparing for the canal trade and in all probability there will be a rivalry between these corporations sending ships from this port. Mr. E. J. M. Nash, the representative

of the big British corporation, gave out the following statement of his company's plans:

"We have no ships running here now, but the new steamers will be ready in the middle of 1914 and, according to present anticipations, the canal will not be ready for shipping until the first part of 1915. So there will be plenty of time for the opening of the service.

"The canal will revolutionize the trade routes of the world, and it is in an attempt to forecast the new tracks that we have determined on San Francisco as the western terminus for the European cargoes and European immigrants to be brought in our vessels.

To Change Trade Routes.

"Every trade route in the world practically will be changed by the canal. The Golden Gate will get the benefit of all the changes. The greatest change of all will come in the handling of freight from Europe to the United States. Instead of being brought to New York by steamship and then distributed throughout the country by rail, the millions of tons of manufactured and other products of the United Kingdom and the Continent will be brought to San Francisco by steamship.

"This new way will be both cheaper and will take less time. It is to handle that freight that we are building the steamers. We have sixty-seven vessels now in the West Coast trade and that business will be immensely increased by the canal, to the benefit of San Francisco as well as Europe. Of course the East Coast of South America will also be brought in closer touch with this port.

"Each of the new steamships will have accommodations for 500 first-class passengers, 250 second-class and 1000 third-class. The accommodations provided indicate in a way the volume of business that is being planned for."

Subtreasury Vault Bids Are Opened.

Many Local Firms Bid on Work With Grant Fee Low Man at \$53,648. All Figures are Close.

(By Special Wire).

Bids were opened in Washington, D. C., on September 2nd by Supervising Architect Oscar Wendroth for constructing two fire proof vaults in the United States Subtreasury in this city. Bids were also opened at the same time for furnishing vault entrances for the same. The construction work attracted a large number of local bidders, while the contract for vault entrances was bid on by Eastern firms only. A special wire from the Supervising Architect's office gives the following list of bidders.

Subtreasury Vault Construction.

City Bids Opened.

Bids For Architectural Terra Cotta Work on City Hall Bring Two Close Bids From Local Men.

Seven sets of figures for architectural terra cotta work and furnishing cleaned brick for the new City Hall were opened by the Board of Public Works at their regular Wednesday afternoon meeting. This work includes cleaning in the new, and of 2,000,000 brick now on the old City Hall site and included in the proposals was a rebate clause. The lowest of the seven figures was submitted by Brandon & Lawson for \$119,826 with a rebate of \$4.00 per thousand brick. Another figure submitted by O'Connor & Collins for \$121,687 with a rebate of \$5.00 per thousand brick was also received. Until the exact amount of brick was set, the figure in the rebate has been determined the low man can not be selected. A complete list of all figures submitted will be published in Friday's issue.

Structural Steel Bids Are Opened.

Two Firms Only Submit Figures for Structural Steel Work on Horticulture Building.

Two bids only were received for buildings and grounds connected with the Panama-Pacific International Exposition Company for furnishing and fabricating the structural steel for Horticulture Building of the exposition group. Dyer Bros., a local concern, low at \$44,374. No award can be set has yet been made.

Plans are complete and in the hands of the owner who will do the work by day labor.

RESIDENCE—1 story and base, price \$3000. Oakland, Cal. Architect, Leonard H. Ford, 2156 Center street, Berkeley. Owner, A. M. Dunegan. The dwelling is to be erected on Kingston Avenue and will contain six rooms, bath and sleeping porch. Interior finish will be of pine and some elm woods. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire place. Mantel will be of brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lat. Plans are being prepared for the work.

RESIDENCE—2 story and base, price \$7500. Architect, Olin S. Grove, 101 Telegraph Avenue, Berkeley. Owner, Thomas C. Huxley. The house will be erected in Elmwood Park and will contain 8 or 9 rooms, several baths and sleeping porch. Interior will be of pine, hardwood and white oak. Hardwood floors will be used in the principal rooms. Bath rooms will have composition floors and tile and set. There will be a central heating system, probably furnace heat, in open fire places. Mantels will be of brick. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lat. Plans are complete and figures will be shortly called.

RESIDENCE—2 story, 1 1/2 story and 1st flume, not stated. Oak 1/2 flume. Architect, none. Owner, P. J. Jones, 101 Polye. map. H. S. Schaffer. The dwelling will be erected on Kensington street near the Hill. It is designed to contain seven rooms and bath. Interior will be of pine and

pine with some elm panels and hardwood floor. There will be a large open fire place in the living room with brick or tile mantel. Bath room will have composition floor and tile wainscot. An automatic water heater and vacuum cleaning system will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner, who is taking figures on the work.

RESIDENCE—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, A. W. Smith, 1001 Broadway, Oakland. Owner, Mrs. A. C. Jessie. The dwelling will contain seven rooms, bath and sleeping porch and will be erected on Mira Vista avenue. Interior will be finished in pine and redwood with some hardwood floors. There will be an open fire place in the living room with tile or brick mantel. Bath room will have the wainscot. Tile will also be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$2,500. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, Mr. Oddtree. The dwelling has been designed for a seven room house and will be erected on Bonita avenue. Interior finish will be largely of pine and redwood. Hardwood floors will be used in the bath room and kitchen. An open reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCE—2 story and base, frame, \$1,500. Piedmont, Alameda Co., Cal. Architect, Claude B. Barton, Security Bank Bldg., Oakland. Owner, H. P. Houston. The dwelling has been designed for a seven room house with bath and sleeping porch and will be erected in Piedmont Manor. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken on the work.

RESIDENCE ALTERATION—2 story and base, frame, \$1,000. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, C. A. Gross. This work will consist of both interior and exterior work and is to be done at the premises at the corner of Telegraph and Oregon streets. There will be new exterior covering, sashes and cement plaster, new interior finish, pine and hardwood floors, gas grates and brick mantels. Work will also be done for plastering, plumbing, painting and electric work. Plans are being prepared.

UNGALOW—1½ story and base, frame, \$2,500. Piedmont, Alameda Co., Cal. Architect, United Home Builders, 1762 Broadway, Oakland. Owners, United Home Builders. The bungalow will contain six rooms, bath and sleeping porch. Interior finish will be mostly of pine and redwood. Hardwood

floors will be used in the principal rooms. There will be a large open fire place in the living room with brick mantel. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with shingles. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$1,500. Piedmont, Alameda Co., Cal. Architect, A. J. Yerriek, Blake Bldg., Oakland. Owner, F. B. Fernhoff. The dwelling is to be erected at the southwest corner of Bonita and Panama avenues and has been designed for a seven room house with bath and sleeping porch. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$4,000. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, H. J. Knight. The dwelling has been designed for an eight room house with bath and sleeping porch and will be erected in Northbrae. Interior finish will be of pine, redwood and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owner, U. M. Orr. This house will be erected on Euclid avenue in Adams Point and will contain in the neighborhood of 8 rooms, baths and sleeping porch. Interior will be finished in pine and hardwoods with hardwood floors in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will have tile floors and wainscot and tile will also be used in the kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame. Cost not stated. Oakland, Cal. Architects, Milwain Bros., Decker Bldg., Oakland. Owner, Mrs. A. J. Larkley. This house has been mentioned here before when the architects were first commissioned to prepare plans. The dwelling will contain 10 rooms and baths. Interior finish will be of pine, redwood and hardwoods. Hardwood floors will be used in the principal rooms. Bath rooms will have tile floors and tile wainscot. A garbage incinerator will be installed, also a vacuum cleaning system and automatic water heater. There will be furnace heat and open fire places. Mantels will be

of brick and tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$4,000. Berkeley, Alameda Co., Cal. Architect, Leonard H. Ford, 2136 Center street, Berkeley. Owner, D. Goodale. The house has been designed for a seven room dwelling with bath and sleeping porch and will be erected on Benvenue street. Interior finish will be largely of pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Tile will be used in the bath room and kitchen. An automatic water heater will also be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

UNGALOW—1½ story and base, frame, \$2,700. Oakland, Cal. Architects, Newson and Dixon, 812 Broadway, Oakland. Owner, Mr. Coward. The dwelling will be erected at the corner of Shafter and College streets and has been designed for a six room dwelling with bath. Interior finish will be of pine throughout. There will be a large open fire place in the living room with brick mantel. Some hardwood floors will be used. Tile wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. All materials are now being purchased.

UNGALOW—1½ story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owner, J. A. Brett, 727 59th street, Oakland. The house will contain six rooms and bath and will be erected on Crescent street near Santa Clara. Interior finish will be of pine with some hardwood floors. Open fire place and a brick mantel will be used in the living room. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor. All materials are being purchased.

APARTMENT HOUSE—6 story and base, brick and steel. Cost not stated. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owners, Bugniere Co. This work has been mentioned here a number of times before. Contracts for the steel work and foundation work have been let. Plans for the carpentry work are now out for figures. The building will be erected at the corner of 12th and Grove streets. Bids are also being taken for the plumbing on the same building.

FLATS—2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner, Mrs. M. A. Lindbloom. The building will be erected on the south side of Parker avenue near Hillegass and will contain 2 five room flats with baths. Interior finish will be of pine, redwood and some hardwood. Each living room will have a large open fire place and brick or tile mantel. Hardwood floors will be used in the principal rooms. Bath rooms will have tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans

are being prepared and figures will shortly be taken.

FLATS—2 story and base, frame, \$8,500. Oakland, Cal. Architect, Earl B. Scott, Humboldt Bank Bldg, S. F. Owner's name withheld. The building will be erected on Linda avenue and has been designed to contain four apartment flats each of 600 rooms, bath and sleeping porch. Interior finish will be of pine and redwood. Hardwood floors will be used in the living rooms. There will be open air places and tile mantel. Bath rooms will have composition floors and tile wainscot. Each apartment will have a wall bed. A hot water system will be installed. Exterior of the building will be covered with brick veneer and stone. Plans are being prepared.

A central heating system will be installed. Exterior of the building will be faced with cement plaster. Working drawings are complete and figures are now being taken.

BRIDGES—2 steel and concrete. Cost not stated. San Carlos Indian Reservation, Ariz. Engineer, Department of Indian Affairs, Washington, D. C. Owners, United States Government. Bids are now being called for on the construction of two steel span bridges which are to be erected over the Gila and San Carlos Rivers on the Indian Reservation. Plans can be secured from the United States Indian Office in San Francisco or direct from the department at Washington. Full particulars as to freight charges, etc., can be had upon application to the Supt. of the School. Bids will be opened in Washington, D. C. on September 22nd. An official proposal appears in this issue.

PORTLAND AND OREGON.

MANUFACTORY—1 story and dome, steel and granite, \$25,000. Portland, Ore. Architect, Edward T. Foulkes, Crocker Bldg., S. P. Owner, Edward Holman. The building has been designed in the classic style with a steel frame and exterior walls faced with California granite. Dome will be covered with copper. Interior will be finished in metal and stone. Marble will also be used extensively. Plans are complete and ready for figures.

WAREHOUSE—2 story and base, brick. Cost not stated. Selden Ore Architect, Fred L. Legg, Amesworth Bldg., Portland. Owner, R. P. Boise. The building will be erected near the railroad tracks and will cover an area of 82½ by 85 feet. Construction will be extra heavy. Interior finish will be of pine throughout. Metal window sash and frames will be used. There will be fireproof doors. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

SEATTLE AND WASHINGTON.

ARMORY—1 and 2 story and base, Class A construction, \$200,000. Vancouver, B. C. Architects, Ferry and Fowler, Pacific Bldg., Vancouver. Owners, Province of British Columbia. The building is to be erected on Grandview avenue covering an area of over 200 feet square. Construction will be fireproof with a complete steel frame and exterior walls of brick faced with pressed brick and terra cotta. Funds for the construction are not yet available. Further mention will be made of this work when figures are called.

THEATRE—1 story and base, brick and reinforced concrete. Cost not stated. Seattle, Wash. Architect, W. A. Pentecost, Seattle. Owner, E. N. Hallet. The building will be erected on the east side of 1th avenue between Pike and Union streets, and is being designed for a modern picture house. Construction will be fireproof. There will be a cement floor, metal window sash and frames. A system of ventilation will be installed. Exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for by the end of this month.

APARTMENT HOUSE—12 story and base. Class A construction, \$600,000. Seattle, Wash. Architect, G. J. Nichols, 1922 2nd avenue, Seattle. Owner, E. G. McKelvey, Washington Apts., Seattle. A site in the down town district has been secured, but the owner will not announce the exact location for some time. The building will cover an area of 120x210 feet and will contain in the neighborhood of 300 rooms. Apartments will be arranged in suites of from two to six rooms. Construction will be fireproof throughout with steel frame, concrete walls, floors and roof. Interior partitions will be of hollow tile and metal lath and plaster, plans provide for steam heat, elevators, vacuum cleaning system, electric generating system and cold storage plant. Interior will be finished in pine and hardwoods with special finish. In the larger suites to meet the taste of the tenants. Exterior of the building will probably be faced with cement plaster. Further mention will be made of the work as the plans progress.

WAREHOUSE—7 story and base, reinforced concrete, \$125,000. Seattle, Wash. Architects, Saunders & Lowton, Alaska Bldg., Seattle. Owners, A. Hamisch & Co. The building will be erected at the corner of First avenue and King street and will cover a large ground area. Construction will be fireproof throughout with reinforced concrete walls, floors and roof. Interior partitions will be of hollow tile and metal lath and plaster. Fireproof doors, metal window sash and frames

are specified. There will be elevator service, steam heat and parcel chutes. First floor will be arranged for the general offices of the company and will be handsomely finished in pine and hardwoods. Exterior of the building will be faced with cement plaster. Plans are now being taken for the general construction. Figures on the plumbing, heating and electric work will be taken later.

COLD STORAGE WAREHOUSE 2 story and base, reinforced concrete, \$1,000,000. Seattle, Wash. Architect, Paul P. Whitman, Central Bldg., Seattle. Owners, Port of Seattle Commission. This project is a part of the Seattle Port Commission's plan for the East Water Terminal. The building will be constructed in two units, each of which will cost about \$500,000. Plans for the first unit are now underway. When complete the building will have a capacity of 2,000 carloads. Only preliminary sketches have been prepared. Further details will be given as plans progress.

Contracts Awarded.

APARTMENT HOUSE—3 story and base, brick, \$35,450. Long Beach, Los Angeles Co., Cal. Architects, McNeill & Davis, 28 American Ave., L. A. Owner, Edward T. Hatfield. Contractor, T. H. Forrest, 2161 Olive street, L. A. Contract price, \$35,450.

HOTEL—2 story and base, brick, building will also be altered and new. This building will be erected at the corner of Second and Broadway and will be arranged for stores on the first floor and hotel rooms above. Interior windows in patent store fronts. Marble and tile will be used. Plans are complete and figures are being taken.

SOLANO TO BUILD HOSPITAL.

FAIRFIELD (Solano Co.), September 5.—The Supervisors at their meeting Wednesday appointed a Special Committee consisting of Supervisors J. E. Glendon and J. B. Hoyt and S. R. Barnett, Foreman of the Grand Jury, to look into the proposition selecting a new site for the County Hospital, the present location being undesirable in some respects.

For some time the Supervisors have had under consideration the erection of new buildings for the hospital, and the proposition will probably be carried out as soon as funds shall become available. If the present land owned by the county and used for hospital purposes can be disposed of to advantage, another site more suitable will be purchased.

STATE BUYS HARBOR BONDS.

SACRAMENTO, September 2.—The State of California saved itself \$150,000 in commissions today when it bought at par and accrued interest \$1,500,000 in San Francisco harbor improvement bonds of State Treasurer Roberts.

The purchase was made by the State Board of Control from a \$2,000,000 fund, recently set aside as "available surplus" in the State's general fund under authority of an act passed by the last Legislature. Today's purchase brings the total amount this State has now invested in the four per cent harbor securities to \$2,950,000.

MINOR JOBS ABOUT TOWN

D. Williams; alter dwelling, owner, H. Hencken, 2320 Mission, contractor, Geo. Meyer, 144 De Long, cost, \$125.

HALF MILLION FOR HIGHWAY.

SAN LUIS OBISPO, Sept. 5.—Action taken Wednesday by the Board of Supervisors of San Luis Obispo County to issue a half-million dollars immediately available for work on state roads within the county. Bonds to be sold on the 15th of the month for state bonds in the county by the state treasurer, commenced. The county will receive \$500,000 in bonds. San Luis Obispo bonds will take \$500,000 and E. J. Lewis, a San Luis Obispo capitalist, has subscribed \$100,000. The other half of the \$500,000 will be taken up by the state. A commission in the future will be an agreement between the state commission and the board of supervisors.

RENT FOR CANAL. The Panama Canal Commission has begun on the first of the 20th of the month to issue bonds of San Luis Obispo.

POTASH INVESTIGATIONS.

I. S. Geological Survey Publishes Report with the Analyses of Certain Potash and Other Saline Deposits in California and Nevada.

Those who are interested in the search for deposits of potash salts in the West will find to the United States Geological Survey for a copy of advance chapter N from Bulletin 549, entitled "Papers on Potash and Other Salines," by Hoyt S. Gale. This report consists of a series of notes on what are known as the Quaternary (pre-historic) lakes of the Great Basin, with special reference to the deposition of those salines.

The existence of extensive lakes in certain of the larger catchment areas of the Great Basin region undoubtedly had an important influence on the concentration there of saline material. From a study of the physiographic history of the region it appears that some of these catchment basins may now be considered as more favorable and some as less favorable places in which to look for large concentrated saline deposits, especially with reference to the possible occurrence of valuable potash salts. Mr. Gale's report suggests a distinction that may be drawn between the desert-basin areas, from which some conclusions of practical importance with reference to saline deposits may be deduced.

The report includes discussions and analyses of the brines of Death Valley; of the salts, borax, and potash in Saline Valley, Inyo County, California; potash tests from wells in Columbus Marsh, Nevada, and discussions and analyses from deposits of sodium sulphate in Soda Lake, in the Carrizo Plains, San Luis Obispo County, California.

A copy of Mr. Gale's report may be obtained free of charge upon application to the Director of the U. S. Geological Survey, Washington, D. C.

STOCK DIVIDEND ON GOLDFIELD.

RENO (Nev.), September 5.—The directors of the Goldfield Consolidated Mining Company of Goldfield met in the office of President George Winfield in this city Tuesday night and declared a dividend of 40 cents per share, amounting to \$1,110,000 on the outstanding stock. The dividend consists of the regular dividend of 20 cents per quarter and an extra dividend of 20 cents. The company has paid out in dividends since its organization about \$23,000,000.

RICE MILL FOR BIGGS.

BIGGS (Butte Co.), September 3.—At a spirited meeting of the Biggs Chamber of Commerce Monday night, the proposition of Charles E. Hale, of the Charles E. Hale Company, San Francisco, importer and exporters, for the establishment of a \$40,000 rice mill in this city within sixty days, was accepted.

J. F. Garrette of Woodland, presented a counter proposition but lost after a hard fight.

Hale has secured an option for the lease of the old cannery building from W. M. Doty. Under his proposition the company is to furnish all the money, install \$10,000 worth of machinery and have a plant with a capacity of from 1,200 to 1,500 sacks of rice daily in operation within sixty days, in time to handle this season's crop.

The mill is to pay the market price for rice, or will mill it for \$5 per ton, the company to retain the refuse, or will mill it for \$10 per ton, the grower to retain the refuse. If the growers desire the company will sell them 45 per cent of the stock, or will sell none at all. It is estimated that \$50,000 will be required to handle this season's crop.

It is also specified that the city is to construct water mains to the cannery building.

BUILDINGS ERECTED SINCE THE FIRE.

Private building operations since May, 1906, to August 31st, 1913, as reported by the Bureau of Building Inspection of the Board of Public Works, show a total of 46,523 building permits issued amounting to \$28,682,778. Complete report as follows:

Class	No. of Bldgs.	Amount.
"A"	159	\$31,025,694
"B"	190	14,079,191
"C"	2574	76,666,639
Frames	23459	90,143,246
Alterations	20141	16,768,098
Total	46523	\$28,682,778

ERECTING NEW BRIDGE.

ST. LOUIS (Sierra Co.), September 1.—The construction of the Sierra-Pumas Counties bridge across Slate Creek is well under way. It is a concrete truss bridge, replacing the steel bridge built nine years ago. J. McVittors, of Sacramento, is Foreman and has a crew of nine men employed.

BUSINESS AND SAN FRANCISCO FAIR.

A dispatch from Berlin says that Dr. Wittenberg, chairman of the Association of German Textile Wholesalers, advises manufacturers to exhibit goods at the San Francisco exposition, that he is urging that the absence of British competition is Germany's opportunity. Of course, when no serious objections alone are the sole reasons given for the refusal to exhibit, it is just such competition as is suggested that could bring about a change in the plans of Germany and Great Britain. If governments cannot be convinced by the larger aspect of the great world event that is to bring the oceans together and change the course of transportation then the force of business logic may finally be decisive.

In any event it should serve to fix our own attention upon the attractions that the Pacific Coast offers to exhibitors. The population of California, of Oregon increased by more than 60 per cent during the last decade, and the population of Washington more than doubled. All three states, and their neighbors as well, are producing now a steady stream of immigrants that pour in from all parts of the world. European nations are largely represented in the population, and the more they are inclined to break away by keeping away from the fair, the better the opportunity for American business men to form new ties with the people from foreign parts. None of our nation is a short-sighted policy, whether it is domestic or foreign. —Chicago Record-Herald.

AMERICAN ENGINEERING IN THE PHILIPPINES.

The work done by British engineers in far-off colonies has given them a well-deserved fame, but few in the United States, whether engineers or laymen, understand that works that can rank with the best in the British colonial engineering history have been performed by American engineers in the Philippines. Under an efficient organization there have been constructed highways, bridges, public buildings, water supply systems, and irrigation works—all according to high standards. In one respect the highway laws may well be taken as a model even here in the United States, for maintenance is placed above every other consideration. Maintenance of completed roads takes precedence over every other expenditure. For bridge and building work concrete has been adopted as the principal material, so that permanence and low maintenance costs are assured. All in all the record is one of which the American people and the Bureau of Public Works, under its efficient director, Warwick Greene, may well be proud.—Engineering Record.

ASBESTOS AND CHROME.

REDDING (Shasta Co., Sept. 9).—The chrome and asbestos deposits of Shasta are attracting much attention from the government, and Professor J. C. Diller, of the United States Geological Survey, recently made a thorough examination of proven deposits in various parts of the county. The demand for asbestos

of commercial grade is constantly growing, and the Shasta deposits are reported to be of excellent quality. Chrome is largely used in the manufacture of high grade steel, and deposits of the mineral have been discovered in this county for many years. The Noel Electric Steel Company has considered the making of chrome steel at its Herault plant, and American iron manufacturers are showing growing interest in the local deposits.

FOREIGN CONSTRUCTION WORK.

Construction of Bridge.

The Honduras National Railway Company has secured the \$250,000 bid of an American engineering company for the two spans of the bridge over the Rio Chama, 100 feet, respectively, a road bridge over the river at Pimental, delivery of the steel at New York not later than December. The contract for erecting the bridge is a bridge in which the American contractor of Guatemala City, for \$155,000, with additional cost for extras. The contract will be awarded by a firm in New York, for a traveler to be made by the firm. The firm is the Honduras National Railway Company, which is the contractor for the bridge. The contract for the bridge is a bridge in which the American contractor of Guatemala City, for \$155,000, with additional cost for extras. The contract will be awarded by a firm in New York, for a traveler to be made by the firm. The firm is the Honduras National Railway Company, which is the contractor for the bridge.

Bind your copies of the Building and Industrial News in PERMANENT BOOK FORM

We have succeeded at last in securing a really practical binder. The Building and Industrial News contains a great deal of technical and statistical information that many of our readers find worth saving for future reference. There is no better way of preserving it than using the

"BIG BEN" BINDER

which preserves the magazine in permanent book form. This binder is handsome and durable, and makes the permanent filing of magazines as easy as filing ordinary papers. It opens flat like a regular book, and comes in fine art cloth with the name of our journal stamped in gold on the front cover and back. For persons who desire to

Save These Valuable Articles

this binder is just the thing, as it holds several numbers of our Journal and can be used again indefinitely year after year, simply by taking out the old Journals and inserting the new ones as they come to you. By making special arrangement with the manufacturers of this best binder that has ever been put on the market, we are able to furnish them to you for **ONLY \$1.00 EACH.**

Merely send us your name and address and say: "Send us your binder. I enclose \$1.00," and we will send the binder promptly all charges prepaid.

Send in your orders **now** and begin saving the statistical and technical information, articles and valuable data, that will be published in The Building and Industrial News this year.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking. **IS YOUR ADVERTISEMENT AMONG THESE?**

Nailing BEAVER BOARD to the wall and ceiling-boards of a new room, quickly and without litter or confusion.

Same room finished in one of many beautiful designs possible with BEAVER BOARD walls and ceilings.

BEAVER BOARD

takes the place of lath, plaster and wall-paper for the walls and ceilings of every type of building, new or remodeled.

It costs less; is more quickly and easily put up; is durable, sanitary and artistic.

It will not crack, chip or deteriorate with age; it deadens sound, keeps out heat and cold, retards fire, and withstands strain or vibration.

Made entirely of selected woods, reduced to fibrous form and pressed into panels of uniform thickness, with handsome pebbled surface.

We furnish all convenient sizes for every purpose, with full directions for application. Can also supply small quantities for making many useful and decorative household articles.

Editorial Comment.

The Examiner comes out in a bold page editorial for a clean town, in that it means the abolishment of the salubrious Coast and the vice districts of the city and to substitute clean amusements therefor. According to the Examiner this is easily done. All you need is enlightened public opinion and conscientious officials of government and there you are.

The greatest difficulty has been heretofore that the newspapers have always knocked every reform except those that they claimed as their own. Thus the Examiner when it couldn't control the graft prostitution immediately began to knock. And so it is with the whole bunch of moulders of public opinion. Reforms begun by the newspapers of San Francisco have usually been not primarily for the public good, but to exalt the born of the newspaper and its proprietor. With the changing order of things the newspapers have necessarily had to change their policy. So that there seems to be a more conscientious effort to really champion something for the public good. How far the Examiner's talk will be backed by its efforts remains to be seen.

THE MAN WHO CARES.

The way to make a success of any job is to care whether you do it right or not. To be sure, the abilities of men differ, and he who has the greater ability can do more and larger things than he who has less ability. But every one has the ability to do some thing, and the doing of anything well constitutes at least a reasonable degree of success. The man who makes that success is the man who, in the job that is his to do, cares whether he does it right or wrong.

The principle which thus applies to doing things also applies to learning things. The way to learn things is to be interested in them. He who goes through life interested in what is going on around him will acquire a liberal education just by keeping his eyes and ears open. There is something to be learned everywhere from everybody, and from everything. The one who is interested acquires knowledge almost without effort. The one who is not interested acquires very little knowledge, even when he occasionally makes painful effort to do so, and he acquires no knowledge at all in the ordinary incidental contact of life. The man interested in baseball learns something about baseball from every game he sees or hears about, no matter how badly it may be played. But the same man might take to his work every morning through a country filled with bees and butterflies, in the

company of a great entomologist, and never learn to know one insect from another. A person of great and concentrated interest on one thing will always find opportunity to increase his knowledge of that thing. A person who is interested generally in whatever and whatever happens, will find no engagement in life so narrow or so limited that he cannot get out of it daily increase of knowledge and wisdom.

Success in life depends on knowing and doing. The way to know is to be interested. The way to do is to care. The road to failure is indifference.—
Edna Republican.

COMPOSITION FLOORS.

In 1866, Stanislas Sorel, a French engineer, patented this composition in his country and about the same time patented the cement much used by dentists, which is of a nature similar to the oxy-chloride cement of magnesia, but having zinc as its base. The Sorel stone, as it was formerly called, has found a large use in Germany and elsewhere in Europe, principally for laying sanitary floors, counter-tops and for steamship decks.

Its slow hardening or setting is a desirable feature of this material; the chemical reaction taking place slowly through a period of say 24 hours, is much preferable to a quick set. For instance, I have had floors that set in a half hour's time. I have also had floors in which the chemical action took place so rapidly as to produce extreme heat, sufficient to burn one's skin.

In Europe most of the floors are stamped, like hardwood floors, when in a dry state, later on finished by polishing, then oiled or waxed; this produces a very beautiful "Steinholz" floor. I am acquainted with formulas and work of about 20 European concerns, having visited them and seen some of their work. They attempt to do the whole much more elaborate work than is usually done by the manufacturers in this country, since their labor and materials are more easily obtained. Very artistic marble or terrazzo effects are obtained and of kept oiled or waxed such floors will wear and look well indefinitely. I have laid such floors in banks and large houses in this territory with good success, due to the fact that the janitors properly attended to such waxing and oiling.—Concrete
Scientist Age.

Douglas fir, according to the information collected by the forest service, is the principal wood exported from this country. It is said to be the favorite among insular manufacturers for flooring, ceiling, siding, cornice, shingles, and boat work.

and vegetation of the cienega or swamp which always exists in the lowest part of a valley. This process of evaporation is so difficult of detection by sight or sound that it is hard to realize its importance. Yet in many of the underground reservoirs of Southern California more than 75 per cent of the unused supply is lost by evaporation, from soil and plant surfaces and even in Central California the loss is seldom less than 50 per cent. The rate of evaporation from some types of water-loving vegetation exceeds that from the same area of open water surface. From moist soil the rate is nearly as great as from water. Since evaporation from water varies from four to six feet in depth per year in various parts of the State, it is obvious that enormous losses must occur by this process.

The determination of the amount of water which can be safely pumped from a basin is a problem requiring specialized experience and technical training as well as judgment. It involves first a careful study of the geology of the containing basins as well as of the material which fills it. Then the sources of ground water supply must be ascertained and methods devised for their measurement. Also the ground water outlets must be determined and their measurement planned. Finally a study of the existing wells in the basin must be made. Even with all the necessary data at hand careful study and broad experience and judgment are necessary to correctly interpret the results.

The better understanding of the principles governing ground water has led to methods of conserving and increasing the supplies. The knowledge that seepage from stream channels is a source of supply suggested the possibility of artificially stimulation of absorption from the wasted winter floods. This idea has a wide application through Southern California and its practicability is being demonstrated in a number of localities. The California Conservation Commission recognizing the economic importance of such work recently had a thorough scientific investigation made of the subject. The conclusions drawn from these studies are incorporated in the 1912 report of the commission strongly recommending underground storage as a method of conservation.

The principles involved are exactly similar to the storage of flood water in surface reservoirs. The water in the gravel filled basin are then stored. This storage space is filled by diverting flood waters upon the ground surface. The stored water is drawn when needed by means of wells or artesian flow.

There are great advantages in favor of subterranean storage. The capacity is very large and needs no dam to make it available. The annual supply is better assured so that the water stored in winter becomes available in dry years. Furthermore the evaporation which occurs from the entire surface of an ordinary reservoir is limited to a very small area in the underground reservoir.

There are several methods employed for getting a greater amount of flood water. The most common method and that which has been used in the San Bernardino Valley for a number

of years is locally known as "water spreading." This consists of diverting the flood waters from the channel of Santa Ana River after it leaves its canyon and distributing it over the worthless gravel lands adjacent to the stream in such a manner that it is absorbed as rapidly as possible. The Federal Government has set aside public land for this work and the interested water companies have purchased additional area from private ownership. The water is diverted from the stream, carried in contour ditches to the land, there distributed into smaller ditches and finally allowed to spread out over the surface and sink into the ground. The best spreading ground has a gentle slope and an unbroken surface of fine wash material composed of sand and gravel. This work is accomplishing the annual storage of a volume of water equivalent to a supply of about nine million gallons per day at a cost of less than one-tenth of a cent per 1000 gallons. The water formerly immediately flowed from the basin and wasted into the ocean. Another method, which is in use for a small basin in Lytle Creek Canyon near San Bernardino, is to sink shafts in the gravels into which flood water is diverted. This is an efficient method here the area of good spreading ground is small. Still another way is to divert the water into basins, allowing it to overflow from one into another. This also has special advantages.

There is no doubt that a properly planned and operated system for increasing the absorption of flood waters will accomplish increased replenishment of water at a reasonable cost in many of our underground reservoirs.

The possibility of increasing the artificial withdrawals from an underground basin by decreasing evaporation losses is also being demonstrated in many of the California basins. During the last ten years the area of moist land has been permanently reduced in many of the basins as a result of increased development of ground water. A corresponding decrease in evaporation has resulted. This has accomplished conservation equally as beneficial as the storage of flood water, for whereas this water formerly wasted into the atmosphere, it is now being pumped and used for beneficial purposes. There are many basins where extensive development of water can be made by decreasing evaporation losses.

Not only is it possible to develop water by reducing evaporation losses but also to drain swamp land. Evaporation losses from ground water occur only when the water plane is less than eight feet below the ground surface. To stop evaporation it is necessary to lower the water level beyond eight feet. This, of course, results in the drainage of the ground. As a result water-logged and alkali soil becomes good for agricultural purposes. The reduction of evaporation loss, therefore, results in conservation of water and land.

There are great possibilities for combined water supply and drainage projects in the Sacramento and San Joaquin Valleys. Much of the lower land in these valleys will become water-logged and alkaline by migration of an excess. The prevention of this process can in many cases be accomplished by a properly designed pumping system. The water produced by such a system is

free from impurity and should be dependable for municipal supply. With cheap power such projects should be readily feasible.

Another way in which ground water can be conserved in basins, which are artesian, is by capping flowing wells when not in use. Water under pressure is being recklessly dissipated in many basins of the State notwithstanding laws on the statute books prohibiting such waste. The capping of wells can be done easily and cheaply and there is no reason why public sentiment in each community should not favor the enforcement of the law.

There are many municipal water departments depending upon ground water sources which would benefit greatly by having accurate knowledge of the underground reservoir from which their supply is obtained. In some cases an adequate supply is being impured through excessive draft by developments not under control of the community. In other cases the department is following a policy of ground water development that, although apparently cheap in first cost, will lead ultimately to unnecessary large expense and possibly water famine. In still other cases the department is involving not only municipality but the local industries and surrounding country in a dangerous situation. There is just as much reason for having knowledge of the safe yield of an underground reservoir as there is of a surface reservoir. No city would undertake a surface storage project without first making careful engineering investigations of the dependable water supply. There is a definite engineering knowledge required in the use of an underground reservoir. With this data available the municipality whose water supply is subterranean need only act upon the basis of accurate knowledge.—Reprinted from Pacific Municipalities.

ADVERTISING MEASURED BY INTELLIGENT EFFORT

By James A. Wood.

Everybody who is any kind of business is an advertiser. The mere fact of being in business forces some kind of advertising. It may not be newspaper or magazine advertising; the billboards or the street cars may not be used; in fact, there may be no evidence of any of the sort of advertising that is generally classed as legitimate. But there is advertising in some form. The name of the proprietor is up over the entrance; something or other will be in the front window, and there may be a few boxes of apples and a barrel of candy handles on the sidewalk outside; there will be something to show that the man is in business, and anything that will show a man to be in business is advertising.

But modern methods of advertising are intended to reach far beyond the point of establishing the fact that a man is in business. They are intended to advertise his business, to make his name of business popular, to enlarge the sales of whatever he may have to sell. These days of competition no man in business is more firmly fixed in the fact that the man who advertises in an up-to-date way will do more business than the man who is

running along with only one sign and his window display, or the man who uses other means of advertising in a slipshod and indifferent way.

Value of Commodity.

Naturally the first thing in advertising is to have something that is worthy of advertising effort and expenditure, something that the people ought to know about, something that is attractive in quality and price; something that the people will be pleased with when they get it. There is nothing that any reliable manufacturer turns out, nothing that an honest business man carries in stock that cannot be made to meet these simple requirements.

There is no doubt that all kinds of trouble are in store for illegitimate advertisers. They may even prosper for a time, but they cannot be any lasting prosperity for anyone whose advertising is false or misleading. The man who advertises something he cannot deliver, who gets people into his place of business under false pretenses and tries to sell them something else or who sells something that falls below the merits claimed for it in his advertising, is bound to come to grief. It is a good sign of the times that the Ad Clubs and Associations backed up by sound business sentiment, are getting after such men in all parts of the country. There is no place for them in honest business or in honest advertising.

The great slogan of the business world today is, "It pays to advertise." That is not always, nor necessarily true. It may pay to advertise and it may not pay to pay—some men to advertise while it doesn't pay for others. A slogan, more exact, more true would be this:—"Advertising can be made to pay." The business man who has something to sell, something which he can deliver right up to specifications, invariably finds that it pays to advertise, provided, always provided that he uses good common sense in his advertising methods and that his advertising is properly done. I am not speaking now of the kind of advertising of the huckster who wants to unload something worthless on people who do not need it and who will be disappointed when they get it. I am speaking of the honest business man who wants to build up his business by advertising, and who doesn't know how to get at the thing right.

A word of money is wasted in advertising. That is to say that what every businessman enters in advertising will not be some extent there is a demand for him, and a vast beyond the advertising. That is not true of the advertising of the business there is a demand for him, and a vast beyond the advertising. That is not true of the advertising of the business there is a demand for him, and a vast beyond the advertising.

Do not be misled by conclusions on that matter. It is not a question of taking too much of a few people's opinion in too extreme a case, but of a certain legitimate distrust of man. The white is not there. He is not the unproductive machine of the 19th century, but the individual, the individual space. The individual is not a machine in the 20th century and the large mediums for getting it out in the miller

communities. In the larger cities advertising is more highly specialized. Business men are making more of a study of it for themselves or are handling it to an increased extent through or under the advice of those who have made a study of it.

The Choice of Copy.

But in the smaller cities and towns how many men are contributing to the support of local advertising mediums with little showing of regard for their own interest? How often one sees such an ad as "John Jones, Staple and Fancy Groceries," and the address: or "Go to Smith for Your Dry Goods." Now Jones and Smith get results from that sort of advertising, no doubt of it. They get something for their money, but they don't get all that they ought to get. Such simple statements keep their names before the people, but it is only a little while until the people quit looking at the places where their names appear; they have lost interest. How much better results could be obtained by using the same space and saying something in it from time to time that would keep up popular interest. It would not cost Jones or Smith a cent more than they spend for the mere announcement of their names, but it would certainly get them more business.

The cases of Jones and Smith are perhaps extreme, although they are very numerous, but a great deal of advertising and much of it in the big cities, shows a similar lack of intelligent interest in preparing matter to occupy space that is under contract and must be paid for. It is in this respect that much money spent in advertising is unproductive of results.

Judicious Advertising.

That judicious advertising of salable articles, things of real merit, will get results is beyond question. But judicious advertising is not always the rule. There is a reason and it is hard to find. Modern advertising, the application of accumulated experience and practical knowledge, is a business of its self—just as much a business as the grocery business or the dry goods business. The average lawyer is not equipped for merchandising, neither is a doctor or a dentist. Then why should it be expected that the average merchant, lacking in knowledge and experience in advertising, will make a success of an advertising campaign that may tell for the expenditure of a goodly portion of his receipts. If he has not this knowledge and experience, and is not willing to entrust his advertising work to those who have, he will save money by keeping out of advertising on any scale.

Any business man knows when he is selling flour at a loss, he knows when he makes a profit on a can of coffee. He should be able to determine almost, if not quite as accurately, whether he is losing or profiting in the use of advertising space. There is no good mystery about judicious advertising. It calls simply for good business sense, the kind of sense that must be used in any other branch of a profitable enterprise.

All business men must disown from their minds any idea they may have that there is nothing in advertising or

that they can do as well without advertising as they could do with it. That is all nonsense and has been proved to be nonsense in the cases of many thousands of advertisers. There is every possibility of benefit in advertising and that fact has been so often demonstrated as to leave no room for doubt or question in the mind of any intelligent business man.

The Choice of Med

Do not let yourself be talked into advertising for no better reason than that someone has advertising space to sell. If you have something that you want to sell and that you know is able to, consider carefully the class of people most desirable to reach, and choose the advertising medium or mediums which you are satisfied will put your advertising before that class of people.

Large advertising space is better than small, but do not buy large space if it is going to consume all possible profits from the sale of the things to be advertised. But keep this in mind: It may sometimes be necessary to use up all the profits in advertising for a time in order to establish your place of business or your article. With that once established keep your advertising cost to a point where it must show profit.

Do not let your advertising get stale. Change your copy often. In this day and generation people peruse newspapers and magazines or the new things, not for the old. In a campaign constantly boosting for the sale of one thing it pays to tell your story in a different way just as often as you can.

Maximum Results Required.

Advertising is too expensive to admit of any thing but maximum results. Make your advertising attractive for the same reason that you change your story often. It pays. Newspaper and magazine readers look at the attractive things in the publications they read. It cost no more to run a good looking ad than it does to run a poor or common one. Make your advertising as distinctive as possible, and in this the possibilities are without limit.

Tell the truth and deliver the goods as advertised. Not long ago the manager of a "six department" store in Portland told me he had discharged his advertising man because he had advertised a sale of men's silk hose at 2 cents a pair. The hose were only part silk and part cotton. There was a great deal of disaffection among intending customers brought to the store by the ad. "Twenty years' experience," said this manager, "has taught me that that sort of advertising does a store far more harm than good."

And now, in closing, let me urge you not to "take a flyer" at advertising just to see if it will pay. You cannot set the results of a "flyer" up against the accumulated experience of the age. Steady advertising, judicious advertising, the right kind of advertising will pay. Don't rush into advertising unless you are ready. But once you are in don't drop out because big results are not instantaneous. Stick to it. Use your money as carefully in advertising as in making or buying your goods. Advertising has won for others and will win for you.

Firms dealing news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$75,000. Architect, C. O. Clausen, P. O. Box 45, S. F. Owner, James Ward. The building will be erected on a 25-foot lot on the east side of Taylor street south of Clay and will contain six one and two bedroom suites. Interior finish will be of pine, elm and blue gum. Hardwood floors will be used in the principal rooms. There will be steam heat. All suites will have wall beds and private bath rooms. A hot water system will be installed. Exterior of the house will be covered with a plaster of stucco. A brick veneer base will be used. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 4 story and base, brick and stone, \$70,000. Architect, C. O. Clausen, P. O. Box 45, S. F. Owner, M. S. S. W. This building will be erected on a 25-foot lot on the north side of Bush street between Hyde and Larkin streets, covering an area of 65 feet 9 inches by 137 1/2 feet. Plans provide for a total of 45 suites, each with a bedroom and a bathroom. The design is in the Georgian style and the main entrance and lobby will also be finished in the same period. Interior trim will be of pine, elm and blue gum. There will be steam heat, elevator service, vacuum cleaning system and hot water plant. All suites will have wall beds and private bath rooms. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with red pressed brick trimmed with limestone. Plans are now being prepared and when complete the work will be done by Day Labor. Mr. S. W. will shortly purchase all material.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$74,000. Architect, C. O. Clausen, P. O. Box 45, S. F. Owner's name withheld. This building will be erected in the Mission District, and has been designed to contain twelve suites of two and three rooms. Interior finish will be of pine throughout. Some hardwood floors will be used. There will be steam heat and a hot water plant. All suites will have wall beds and private bath rooms. Tile wainscot will be used in the bath rooms. Exterior of the building will be covered with rustic stone. Preliminary plans only have been prepared.

RENO, NEVADA—Apartment house, 6 story and base, brick and stone, cost not stated. Architect, George E. Holworth, 29 Mill street, Reno. Owner, George E. Holworth. The building is on a large corner site which is being improved by the construction of a building 265x150 feet. Interior will be arranged for 57 suites of two and four rooms. Interior finish will be of pine and hardwoods. Hardwood floors will be used in the principal rooms. There will be steam heat and hot water service, a vacuum cleaning system and hot water supply. All suites will be equipped with wall beds and have private bath rooms. Exterior of the building will be faced with colored

buffet is now raising the roof structure.

FRESNO, FRESNO CO., CAL.—Apartment house, 2 story and base, cost not stated. Architect, J. C. Mathewson, Forsythe Bldg., S. F. Owner, C. J. Cragcroft. The building will be erected on Blackstone street near Belmont, and has been designed to contain four suites of four rooms and bath each. Interior finish will be of pine and redwood. Bath rooms will have cement floors and tile wainscot. Plans provide for steam heat and hot water system. Exterior of the building will be faced with pressed brick. All suites will have private bath rooms and wall beds. Plans are complete and figures are being taken.

—BRIDGES—

AUBURN, WASH.—Dam and bridge, concrete and steel, \$250,000. Engineers, Pierce, King and Pierce Contractors, Tacoma. The bridge will be the final decision of the Joint Commission on King and Pierce Counties, the amount to be borne by each of the counties in the improvement of the Stuck River was as follows: Pierce County, 60 per cent and Pierce County, 40 per cent. The first contract let will be for the construction of the above mentioned dam. Plans are now being prepared. The entire work estimated upon will cost in the neighborhood of \$1,500,000.

Contracts Awarded.

NESIKA, WASH.—Bridge, stone and concrete, \$23,000. Engineers, Inman & McCoy, Mutual Life Bldg., Seattle. Owners, Washington State Highway Commission. Contractors, Henry & Henry, Hoquiam, Wash. The bridge price, \$23,000.

—CHURCHES—

PASADENA, LOS ANGELES CO., CAL.—Church addition, 1 story, frame and concrete, cost not stated. Architect, Norman F. Morgel, Broadway Bldg., S. F. Owner, L. A. Owens. The building will form the auditorium portion of the new edifice which is to be erected on Pasadena. Plans for a building 100x100 feet have been prepared. Interior finish will be of pine throughout. Stained glass will be used. There will be a central heating system. The auditorium will seat 250 people. Bathrooms of the building will be covered with cement plaster on metal lath. Plans are complete and ready for figures.

COURT HOUSES.

Contracts Awarded.

HANFORD, KINGS CO., CAL.—Court house addition, 2 story, frame and concrete, \$6,900. Architects, J. C. Mathewson & J. C. Mathewson, S. F. Owners, Kings County. Contractors, Trewitt & Schellis, Fresno. The price, \$6,900.

FLATS.

SAN FRANCISCO—Flats, 4 story and base, frame, \$12,500. Architect, J. C. Mathewson, S. F. The building will be

erected on a 25-foot lot on the north side of Washington street, west of Mason, covering an area of 36x137 1/2 feet. Interior will be arranged to contain six flats of three to five rooms and bath. Interior finish will be of pine with elm in the living and dining rooms. Some hardwood floors will be used. There will be open fire places and side mantels. All flats will be equipped with wall beds. Main entrance hall will be finished in the Empire style. Exterior of the building will be covered with cement plaster and finished with artificial stone. Plans ready for figures.

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,500. Architect, J. C. Mathewson, P. O. Box 45, S. F. Owner, E. J. Rousseau. The building will be erected on Broderick street and has been designed for residential flats. The building will contain six rooms and bath. Interior finish will be of pine, elm and oak. Hardwood floors will be used in the principal rooms. Bath rooms and kitchen will have tile floors. A large open fire place will be used in each living room. The building will be covered with cement plaster and finished with artificial stone. Plans ready for figures.

SAN FRANCISCO—Flats, 3 story and base, frame, \$10,200. Architect, J. C. Mathewson, 2367 Mission street, S. F. Owners, Mary and Edward Fox. The building will be erected on the west side of Sixth avenue near Clement, covering an area of 25x66 feet. The building will be arranged to contain six flats of four and five rooms each. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will also be used. There will be open fire places and brick or tile mantels. Firestone floors and tile roof will be used in the bath rooms. Entrance vestibule will have tile floors. Exterior of the building will be covered with cement plaster on metal lath and rustic. Plans complete and the work will be done by Day Labor. All material is being purchased.

SAN FRANCISCO—Flats, 2 story and base, frame, \$6,500. Architect, J. C. Mathewson, P. O. Box 45, S. F. Owner, E. J. Rousseau. The building will be erected on Union street near the First and will contain two modern flats of five and six rooms. The upper flat will be occupied by the owner. Interior finish will be of pine, elm and oak in panels. Hardwood floors will be used in the principal rooms. There will be large open fire places and brick or tile mantels. Exterior of the building will be covered with cement plaster on metal lath and rustic. Plans complete and the work will be done by Day Labor. All material is being purchased.

and four rooms. Interior finish will be of pine with some elm panels. Bath rooms will have cement floors and tile wainscot. There will be open fire fire places and tile mantels. Exterior of the building will be covered with shiplap and cement plaster on metal lath. Plans are complete and now out for figures.

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner's name withheld. This building will be erected in the Mission District for the same owner who is now constructing a three-story frame apartment house from plans by Mr. Clausen. The building will contain two flats of four and five rooms. Interior finish will be of pine and redwood. Tile wainscot will be used in the bath rooms and kitchens. There will be open fire places and tile mantels. Exterior of the house will be covered with shiplap and rustic. Plans are now being prepared.

SACRAMENTO, CAL.—Flats, 3 story and base, frame, \$10,500. Architect's name not given. Owner, A. W. Norris, 409 21st street, Sacramento. The building will be erected on 21st street and has been designed to contain a number of three, four and five room flats. Interior will be finished in pine, redwood and elm. Some hardwood floors will be used. There will be open fire places and brick and tile mantels. Automatic water heaters will be installed. Tile wainscot and cement floors will be used in the bath rooms. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

GARAGES.

SAN FRANCISCO—Garage, 1 story and base, brick, \$7,500. Architect, Charles J. I. Devlin, Pacific Bldg., S. F. Owner, William Rayhill. The building will be erected on the south side of Haight street west of Steiner, covering an area of 31x134 feet. Construction will be made as near fireproof as possible. Interior partitions will be of metal lath and plaster. Steel roof trusses will be used. A cement floor is specified. Exterior of the building will be faced with tapestry brick. Plans are complete and the work will be done by Day Labor under the direction of the architect.

OAKLAND, CAL.—Garage and sales rooms, 1 story and base, brick. Cost not stated. Architects, Roussau & Roussau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on the corner of Brook and Broadway, covering a considerable area. Foundations and walls have been designed heavy enough to support additional stories. Front portion of the building will be handsomely finished in pine, hardwood and tile and will be used as a sales room. Rear part will contain the shipping rooms and repair shop. There will be metal window sash and frames. Exterior of the building will be faced with pressed brick. Plans are now out for figures.

SAN FRANCISCO—Garage, 1 story and base, Class A construction, \$35,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. This work has been mentioned here before when the architects were first

commissioned to prepare the plans. The building will be erected at the corner of 14th and Bryant streets, and will cover an area of 20,000 square feet. Construction will be fireproof throughout with a complete steel frame, steel roof trusses and metal lath and plaster interior partitions. Floor will be of concrete. The front portion of the building will be occupied as an office and will be finished in pine. Besides the storage space there will be a completely equipped machine shop. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and bids will be called for shortly.

SAN FRANCISCO—Garage, 1 story and base, reinforced concrete, \$25,000. Architect, C. H. Barrett, 381 Bush St., S. F. Owner, Dr. Cerf, 111 Ellis street. The building will be erected on the north side of Post street, west of Jones, and directly opposite the new commercial garage being erected for Mr. Samuels. Construction will be fireproof. Floor will be of concrete and partitions of metal lath and plaster. Metal window sash and frames are to be specified. There will be a main office, storage space and machine shop. Interior will be finished in pine. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

FRESNO, FRESNO CO., CAL.—Garage, 1 story and base, brick, \$6,500. Architect, E. B. Gowell, Fresno. Owners, Fresno Brewing Co. The building will cover an area of 70x80 feet, and will be devoted to the storage of the company's machines. Besides the storage space there will be a completely equipped machine shop. Floor will be of cement. There will be special gasoline storage tanks and metal window sash and frames. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

GOVERNMENT WORK AND SUPPLIES.

Yerba Buena, Water Pipe, Etc.

The contract for furnishing water pipe from Yerba Buena Island to Oakland, Cal., bids for which were opened by the chief bureau of yards and docks, Navy Department, Washington, D. C., has been awarded to the Contra Costa Construction Co., Shelden Building, San Francisco, at \$8,675.

To Aid Subcontractors.

The Treasury Department has announced that it would insist that contractors on public buildings hereafter must look after the financial claims of their subcontractors as work on the structure progresses. In the past the department has experienced trouble in pushing work on new buildings because contractors in their monthly requisitions for funds failed to make proportionate payments to subcontractors. This practice the department proposes to end and it will try out its new policy in the erection of the new four hundred thousand dollar Federal Building at New Haven, Conn.

San Diego, Cal., Cooling Tower, Etc.

Action regarding the award for constructing one wooden cooling tower and appendances at San Diego, Cal., has been postponed indefinitely.

Goat Island, Replacing Piles.

The following bids were received by the light house inspector, 18th district, San Francisco, Cal., for replacing tender piles at Goat Island light house depot:

E. J. Cotton, \$1,065.

Healy-Tibbitts Construction Co., \$1,635.

Hyde-Harjes & Co., Inc., San Francisco, Cal., \$891. Accepted.

Thompson Bridge Co., \$1,387.

Merry Elwell Co., \$1,085.

H. W. Stebbins, \$1,000.

Yards and Docks.

Specifications for work under the bureau of yards and docks, Navy Department, have been furnished to the following firms in addition to those previously mentioned in these columns: **Puget Sound, Storehouse and Factory, September 27.**

Detroit Steel Products Co., Washington, D. C.

Mesker Bros. Iron Co., St. Louis, Mo.

W. N. Concannon Co., San Francisco, Cal.

Pearl Harbor, Magazines, September 20.

Penn Bridge Co., Beaver Falls, Pa.

Spaulding Construction Co., Portland, Ore.

W. N. Concannon Co., San Francisco, Cal.

General Roofing Manufacturing Co., York, Pa.

U. S. Steel Products Co., New York City.

Detroit Steel Products Co., Detroit, Mich.

E. T. Owsley, 311 Sharon Building, San Francisco, Cal.

Mogul Co., 429 Sixth avenue, New York City.

The Lehon Co., 141 W 36th street, New York City.

David Lupton's Sons Co., Philadelphia, Pa.

Pearl Harbor Quarters, September, 27.

Spaulding Construction Co., Portland, Ore.

Crane Co., Washington, D. C.

W. N. Concannon Co., San Francisco, Cal.

Mesker Bros. Co., St. Louis, Mo.

Reclamation Work.

The director of the Reclamation Service is asking for bids for the construction of about 53 miles of canals and laterals involving the excavation of approximately 366,000 cubic yards of material, in connection with the Flat-head irrigation project, Montana. The work lies between 5 and 12 miles southwest from Polson. Proposals will be opened at St. Ignatius, Mont., on September 30, 1913.

Canal Circular 795.

An advertisement appears elsewhere in this issue, calling for bids to be opened September 15, under circular 795, steel rolling doors for permanent shop buildings at Balboa. The material is called for under one class divided into six items as follows:

Item 1, 4 doors for building No. 1, 16 ft 9 in x 31 ft.

2, 8 doors for building No. 1, 21 ft 3 in x 17 ft 6 in.

3, 1 door for building No. 2, 16 ft 9 in x 31 ft.

4, 2 doors for building No. 2, 21 ft 4 in x 17 ft.

5, 1 door for building No. 4, 16 ft 9 in x 31 ft.

[illegible]

rooms, 60 private baths and 6 public baths. Interior finish will be of pine and redwood. Some ornamental plaster and hardwood will be used in the office and dining room. There will be steam heat and elevator service. Hot and cold water will be supplied to all rooms. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

OCEAN BEACH, SAN DIEGO CO., CAL.—Hotel, 6 story and base, reinforced concrete, \$600,000. Architect, Charles Krengl, Touken Bldg., San Diego. Owner, H. H. Sinnige. The first floor will be arranged for a bath house with large plunge, second floor a large cafe and sun rooms and the third floor will contain the main hotel entrance, office, lobby and parlors. Upper three floors will be arranged for about 100 guest rooms. Construction will be fireproof. Interior finish will be of pine and hardwoods. There will be steam heat and a vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans are complete.

Contracts Awarded.

SEATTLE, WASH.—Hotel and stores, 3 story and base, brick and steel, \$125,000. Architect, A. Wickersham, Lyon Bldg., Seattle. Owners, Yesler Estate. Contractors, Butler Construction Co., Central Bldg., Seattle. Contract price, \$125,000. Note: The general contract includes plumbing, heating, electric work and elevators.

LOS ANGELES, CAL.—Hotel, 3 story and base, brick and steel, \$22,000. Architect, Albert C. Martin, Higgins Bldg., L. A. Owner, J. Demozzi, Contractor, H. D. Salvester, Central Bldg., L. A. Contract price, \$22,000.

LIBRARIES.

Contracts Awarded.

RENTON, WASH.—Library, 1 story and base, brick, \$10,000. Architect, H. H. Gimlin, Epler Bldg., Seattle. Owners, City of Renton. Contractors, Eckman & Mowatt, Mutual Life Bldg., Seattle. Contract price, \$10,000.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Horticulture building, frame and steel construction. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans are now out for figures for the general construction of the Horticulture Building, which will be erected in the Exhibit Building Section of the grounds. Bids have already been taken for furnishing and fabricating the structural steel for this building and now Dyer Bros. of San Francisco has at \$14,374. Bids on the general construction will be opened on September 18th. An official proposal appears under the heading of Official Advertising in this issue.

SAN FRANCISCO—Auditorium, 3 story and base. Class A construction, \$1,000,000. Architects, John Galen Howard, John Reid, Jr. and Frederick H. Meyer, associated Owners, Panama-Pacific International Exposition Co. Bids for the general construction of this building were opened on September 11th by the Buildings and Grounds Committee. The lowest regular bidder

was Lindgren & Co. who bid \$611,630 on Proposition D, which calls for substituting terra cotta for Blue Bedford limestone. Commamy-Peterson put in a bid of \$109,500 on the same proposition, but these figures were obviously a mistake and were not considered. On the day following Commamy-Peterson Co. put in a second bid, which they claim was their original figures on Proposition D, and asked that it be considered. This bid was for \$639,033, and is the low figure. What action will be taken by the Buildings and Grounds Committee has not been determined. A complete list of all bids appears under the heading of San Francisco in this issue.

SAN FRANCISCO—State Exhibit building, frame construction, \$100,000. Architect, A. F. Heide, 223 Spring St., Seattle. Owners, State of Washington. Mr. Heide has been appointed to prepare plans for both buildings at the Panama-Pacific Exposition and at the San Diego Exhibition. The architect will be in San Francisco during the coming week and will negotiate for a large site for the Washington State Buildings.

POST OFFICES.

PASADENA, LOS ANGELES CO., CAL.—Post Office, 2 story and base, Class A construction. Cost not stated. Architect, Oscar Wenderlich, Washington, D. C. Owners, United States Government. Bids opened in the Supervising Architect's office in Washington on September 11th show Eugene Schuler of Wahpeton, North Dakota, low at \$179,000. No action has been taken by the authorities. A complete list of all figures received appears under the heading of Los Angeles and Southern California in this issue.

RAILROAD CONST., STATIONS AND EQUIPMENT.

Contracts Awarded.

SPOKANE, WASH.—Passenger station, 4 story and base. Class A construction, \$650,000. Architect's name not given. Owners, Oregon-Washington Railroad and Navigation Co. Contractors, Grant Smith & Co., Seattle. Contract price, \$650,000.

RESIDENCES.

ALAMEDA, ALAMEDA CO., CAL.—Bungalows, 2, 1 story and base, frame, \$2,500. Architect, Leonard H. Ford, 2136 Center St., Berkeley. Owner, G. Gotsdien. SEALED PROPOSALS.

PROPOSALS FOR CANAL SUPPLIES.
CANAL. CHOTULAR 796—1st Indian Canal Commission, Office of the Purchasing Officer, Washington, D. C.—Sealed proposals will be received at this office until 10:30 a. m. October 6, 1913, for furnishing and installing pumps, valves, piping, hydraulic operating tables, traveling cranes, air compressors, switch board complete with all electrical instruments and equipment. For further information address F. C. Ford, 148, corps of engineers, U. S. Army, general purchasing officer.

NOTICE TO CONTRACTORS.

STANFORD UNION BUILDINGS.

SEALED PROPOSALS will be received by the undersigned in the office of the Civil Engineering Building, Stanford University, at 3 P. M. **SUNDAY, September 27, 1913,** for the construction of the Stanford Union, the Stanford Women's Club House and Arcades.

The two buildings are of re-enforced construction, three stories in height, each covering a ground space of approximately 45 by 90 feet. Each proposal must be accompanied by a certified check payable to the order of the undersigned in the sum of ten (10) per cent of the amount of the bid, or the same will not be considered. When the award of contract is made, all checks will be mailed to the respective bidders except that filed with the accepted proposal. The bid, if successful, will be returned upon the successful bidder signing a contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract. The sureties thereon must be satisfactory to the undersigned and to the authorities of the University.

The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Union. Plans and specifications for the work may be obtained from the undersigned at Room 1215 First National Bank Building, San Francisco, between the hours of 1:00 and 4:30 Saturday, September 27, 1913. Application for inclusion to the same at 221 Kingsley Avenue, Palo Alto, at any time thereafter. A deposit of \$20 will be required, which amount will be refunded upon the return of the plans and specifications in good condition. **F. H. FOWLER,** In Charge of Construction.

PROPOSALS FOR CANAL WORK.
CANAL WORK. Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, at St. Ignatius, Mont., until 3 o'clock p. m. September 30, 1913, for the construction of about 53 miles of canals and laterals, involving the excavation of about 250,000 cubic yards of material. The work lies between 5 and 12 miles southwest from Polson, Mont. For particulars address the United States Reclamation Service, Washington, D. C. Great Falls, Mont., or St. Ignatius, Mont. **P. H. NEWELL,** director.

PROPOSALS FOR RECORDERS, INDICATORS, ETC.
RECORDERS, INDICATORS, FILTERS AND THERMOMETERS. Sealed proposals indorsed "Proposals for Flue Gas Recorders and Indicators and Thermometers" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. September 27, 1913, and thereafter until the office is open for recording and installing 4 multiple CO2 recorders of 4 units each with 14 recording gauges, 14 auxiliary boiler room indicators and 14 condensing filters; also 14 recording flue gas thermometers, all in the central power plants, navy yards, Mare Island, Cal., and Puget Sound, Wash. Estimated cost, \$3,500. Plans and specifications can be obtained on application to the bureau or to the commissioners of the navy yards named. **H. R. STANFORD,** chief of bureau.

PROPOSALS FOR BRIDGE CONSTRUCTION.

STEEL HIGHWAY BRIDGES. Department of the Interior, Office of Indian Affairs, Washington, D. C.—Sealed proposals plainly marked on the outside of the sealed envelope "Proposals for Two Steel Highway Bridges Across the Gila and San Carlos Rivers, San Carlos Indian Reservation, Arizona" and addressed to the commissioner of Indian Affairs, Washington, D. C., will be received at the office of the supervisor of construction, Denver, Colo. U. S. Indian War Houses at San Francisco, Cal., at the San Carlos School. For particulars address the Indian Commissioner, Department of the Interior, at the Indian School, San Carlos, ARIZONA SELLERS.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to locality. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

FLATS—3 story and base, frame, \$12,500. San Francisco, Architect, Charles J. Rousseau, 46 Kearny St., S. F. Owner's name withheld. The building, which has been designed for an apartment flat structure, will be erected on the north side of Washington street east of Mason, covering an area of 36x137½ feet. Interior has been arranged to contain six flats of from three to five rooms and bath. Interior finish will be of pine with elm panels in the living and dining rooms and halls. Some hardwood floors will be used. There will be open fireplaces and tile mantels. All flats will be equipped with wall beds. Main entrance hall will be finished in the Empire style. Exterior of the building will be covered with cement plaster trimmed with artificial stone. Plans are ready for figures.

GARAGE—1 story and base, brick \$7,500. San Francisco, Architect, Charles J. L. Devlin, Pacific Bldg., S. F. Owner, William Rayhill. The building will be erected on the south side of Haight street west of Steiner, covering an area of 31x124 feet. Construction will be made as near fire proof as possible. Interior partitions will be of metal lath and plaster. Steel roof trusses will be used. A cement floor is specified. Exterior of the building will be faced with tapestry brick. Plans are complete and the work will be done by Day Labor under the direction of the architect.

HOTEL ANNEX—7 story and base, Class A construction, \$162,000. San Francisco, Architects, MacDonald & MacDonald, Holbrook Bldg., S. F. Owners, William and Mrs. Burbank. The Union Square Hotel, now located at the northwest corner of Post and Stockton streets has purchased an additional piece of property at the rear and will erect an addition to the present building. The new portion will contain in the neighborhood of 150 rooms, nearly doubling the present capacity of the hotel. Construction and architecture will be similar to the old portion of the building. Plans also include a complete remodel and re-furbishing of the old building. Working drawings are now being prepared.

THEATRE—1 story frame, \$10,000. San Francisco, Architect, W. G. Hind, 16 Kearny St., S. F. Owner, William and Elias Masser. The building designed for a moving picture house, will be erected on Market street near Noe, and will cover an area of 62x118 feet. There will be a store box for the picture show. The play house will have a seating capacity of 200 people. Interior will be finished in pine and ornamental plaster. Exterior of the building will be covered with ornamental stucco. Patent stage fronts will be used. Plans are complete and out for figures.

HORTICULTURE BUILDING—Frame and steel construction. Cost not stated. San Francisco, Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans are now out for

figures for the general construction of the Horticulture Building, which will be erected in the Exhibit Building Section of the grounds. Bids have already been taken for furnishing and fabricating the structural steel for this building, and show Dyer Bros. of San Francisco low at \$14,374. Bids on the general construction will be opened on September 18th. An official proposal appears under the heading of Official Advertising in this issue.

AUDITORIUM—3 story and base, Class A construction, \$1,000,000. San Francisco, Architects, John Gleen Howard, John Reid, Jr., and Frederick H. Meyer, associated. Owners, Panama-Pacific International Exposition Co. Bids for the general construction of this building were opened on September 11th by the Buildings and Grounds Committee. The lowest regular bidder was Lindgren & Co., who bid \$611,630. On Proposition D, which calls for substituting terra cotta for Blue Bedford limestone, Commary-Peterson put in a bid of \$109,500 on the same proposition, but these figures were obviously a mistake and were not considered. On the day following Commary-Peterson Co. put in a second bid, which they claim was their original figures on Proposition D, and asked that it be considered. This bid was for \$639,033 and is the low figure. What action will be taken by the Buildings and Grounds Committee has not been determined. A complete list of all bids appears under the heading of San Francisco in this issue.

APARTMENT HOUSE—3 story and base, frame, \$12,000. San Francisco, Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, James Ward. The building will be erected on a 25-foot lot on the east side of Taylor street south of Clay and will contain six modern three room suites. Interior finish will be of pine, elm and blue gum. Hardwood floors will be used in the principal rooms. There will be steam heat. All suites will have wall beds and private bath rooms. A hot water system will be installed. Exterior of the house will be covered with shiplap and rustic. A brick veneer base will be used. Plans are complete and figures are being taken.

APARTMENT HOUSE—1 story and base, brick and steel, \$45,000. San Francisco, Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, M. S. Shaw. This building will be erected on the north side of Bush street, between Hyde and Larkin streets, covering an area of 68 feet 9 inches by 137½ feet. Plans provide for a total of 15 suites of two and three rooms. The design is in the Georgian style, and the main entrance and lobby will also be finished in the same period. Interior trim will be of pine, elm and blue gum. There will be steam heat, elevator service, a vacuum cleaning system and hot water plant. All suites will have wall beds and private bath rooms. Bath rooms will have composition floors and tile walk out. Exterior of the building will be faced with red pressed brick trimmed with limestone. Plans are now being prepared and

when complete the work will be done by Day Labor. Mr. Shaw will shortly purchase all materials.

APARTMENT HOUSE—3 story and base, frame, \$14,000. San Francisco, Architect, C. O. Clausen, Phelan Bldg., S. F. Owner's name withheld. This building will be erected in the Mission District, and has been designed to contain twelve suites of two and three rooms. Interior finish will be of pine throughout. Some hardwood floors will be used. There will be steam heat and a hot water plant. All suites will have wall beds and private bath rooms. Tile wainscot will be used in the bath rooms. Exterior of the building will be covered with rustic and shiplap. Preliminary plans only have been prepared.

APARTMENT HOUSE—6 story and base, brick and steel. Cost not stated. Reno, Nevada, Architect, George E. Holworth, 20 Mill street, Reno. Owner, George E. Holsworth. The owner has a large corner site which he intends to improve by the construction of a building 70x180 feet. Interior has been arranged for 87 suites of two, three and four rooms. Interior finish will be of pine and hardwoods. Hardwood floors will be used in the principal rooms. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. All suites will be equipped with all beds and will have private bath rooms. Exterior of the building will be faced with pressed brick. Plans are complete and the architect is now raising funds for construction.

THEATRE—1 story and base, Class A construction, \$40,000. San Francisco, Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Nellie Harris. The building will be erected on the north side of Broadway west of Grant avenue, and will cover an area of 68 feet 9 inches by 137½ feet. Construction will be fireproof with a complete steel frame and walls of brick and terra cotta. Exterior will be faced with terra cotta and stone. There will be two stores besides the theatre. Interior finish will be of pine and ornamental plaster. A modern system of ventilation will be installed. There will be patent store fronts. Plans are complete and figures are being taken.

RESIDENCES—2, 2 story and base, frame, \$3,000 each. San Francisco, Architect, none. Owner, R. J. Button, 1212 4th Ave., S. F. These houses are to be erected on the east side of 26th Avenue north of Irving. Each house will contain six rooms and bath. Interiors will be finished in pine with some elm panels. Hardwood floors will be used in the principal rooms. There will be large open fire places with brick or tile mantels in the living rooms. Bath rooms and kitchens will have tile wainscot. Exterior will be covered with cement plaster on metal lath and a brick veneer base. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$2,000. San Francisco, Architect, none. Owners, John E. Dougherty and James N. Reid, 754 Lisbon street, S. F. The house has been designed to contain six rooms and bath, and will be erected at the northeast corner of Amazon and Lisbon streets.

Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be a large open fire place in the living room with a brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustle and shiplap. Plans are complete and in the hands of the owners who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, Karl Knyge, 133 Alpine street, S. F. The house has been designed for a seven-room dwelling with bath and will be erected on Clayton street near Ashbury. All interior finish will be of pine. Hardwood floors will be used in the living room, dining room and reception hall. There will be an open fire place in the living room with a large brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustle and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$2,800. San Francisco. Owner, P. Algot Nelson, 4333 19th St., S. F. The dwelling will be erected on the south side of 19th street east of Eureka, and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood with some elm panels. Hardwood floor will be used in the principal rooms. There will be a large open fire place in the living room. Mantel will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath and rustle. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$1,000. San Francisco. Architects, Robinson & Robinson, Mondrack Bldg., S. F. Owner, W. J. Garlin. The house will be erected on Bonanza street east of 17th and has been designed for a seven-room residence with bath and sleeping porch. Interior finish will be of pine and elm. Hardwood floors will be used in the living room, dining room and reception hall. There will be a large open fire place in the living room. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath and rustle. Plans are complete and the work will be done by Day Labor.

CLUBHOUSE—2 story and base, frame, \$7,000. San Francisco. Architect, J. H. Barrett, 381 Bush St., S. F. Owner, Dr. Carl, 111 Ellis street. The building will be erected on the north side of Post street west of Jones, and directly opposite the new commercial garage being erected for Mr. Samuels. Construction will be fireproof. Floor will be of concrete and partitions of metal lath and plaster. Metal window sash and frames are to be specified. There will be a main office, storage space and machine shop. Interior will be finished in pine. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

FLATS—2 story and base, frame, \$7,500. San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner's name withheld. The building will be erected on Broderick street, and has been designed for residential flats, the owner occupying the upper flat. Each flat will contain six rooms and bath. Interior finish will be of pine, blue gum and elm. Hardwood floors will be used in the principal rooms. Bath room and kitchen will have tile wainscot. A large open fire place will be installed in each living room. Mantels will be of brick. Automatic water heaters will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

terior of the building will be faced with pressed brick and terra cotta. Plans are complete and bids will be called for shortly.

GARAGE—1 story and base, reinforced concrete, \$25,000. San Francisco. Architect, J. H. Barrett, 381 Bush St., S. F. Owner, Dr. Carl, 111 Ellis street. The building will be erected on the north side of Post street west of Jones, and directly opposite the new commercial garage being erected for Mr. Samuels. Construction will be fireproof. Floor will be of concrete and partitions of metal lath and plaster. Metal window sash and frames are to be specified. There will be a main office, storage space and machine shop. Interior will be finished in pine. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

FLATS—2 story and base, frame, \$7,500. San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner's name withheld. The building will be erected on Broderick street, and has been designed for residential flats, the owner occupying the upper flat. Each flat will contain six rooms and bath. Interior finish will be of pine, blue gum and elm. Hardwood floors will be used in the principal rooms. Bath room and kitchen will have tile wainscot. A large open fire place will be installed in each living room. Mantels will be of brick. Automatic water heaters will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

FLATS—3 story and base, frame, \$10,200. San Francisco. Architect, C. E. Evans, 2367 Mission street, S. F. Owners, Mary and Edward Fox. The building will be erected on the west side of 8th avenue near Clement, covering an area of 25x65 feet. The building has been arranged to contain six flats of four and five rooms each. Interior finish will be of pine and redwood with some elm panels. Hardwood floor will also be used. There will be open fire places and brick of the mantels. Fiber-tone floors and tile wainscot will be used in the bath rooms. Entrance vestibules will have mosaic floors. Exterior of the building will be covered with cement plaster on metal lath and rustle. Plans are complete and work will be done by Day Labor. All material is now being purchased.

FLATS—2 story and base, frame, \$6,500. San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner's name withheld. The building will be erected on Union street near the Presidio, and will contain two modern flats of five and six rooms. The upper flat will be occupied by the owner. Interior finish will be of pine, blue gum and elm panels. Hardwood floors will be used in the principal rooms. There will be large open fire place and brick of the mantel in each of the living rooms. Bath rooms will have cement floors and tile wainscot. Automatic water heaters will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

FLATS—2 story and base, frame, \$17,500. San Francisco. Architect, George J. Bon, c/o Mondrack Bldg., S. F. Owner's name withheld. The building will be erected on the north side of Washington street east of

Mason. The building has been designed to contain twelve flats of three and four rooms. Interior finish will be of pine with some elm panels. Bath rooms will have cement floors and tile wainscot. There will be open fire places and tile mantels. Exterior of the building will be covered with shiplap and cement plaster on metal lath. Plans are complete and now out for figures.

FLATS—2 story and base, frame, \$5,000. San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner's name withheld. This building will be erected in the Mission District for the same owner who is now constructing a three-story frame apartment house from plans by Mr. Clausen. The building will contain two flats of four and five rooms. Interior finish will be of pine and redwood. The wainscot will be used in the bath rooms and kitchen. There will be open fire places and tile mantels. Exterior of the house will be covered with shiplap and rustle. Plans are now being prepared.

HOTEL—6 story and base, Class C construction, \$45,000. San Francisco. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owner, Thomas O'Leary. This building has been mentioned here before when plans were first out. The building will be erected on the south side of O'Farrell street east of Larkin on a lot 46x90 feet. There will be a store besides the hotel lobby on the first floor. Upper floors will contain in the neighborhood of 100 guest rooms, a large percentage of which will have private baths. Interior finish will be of pine throughout. Plans provide for steam heat, elevator service, vacuum cleaning and a hot water supply. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for within a short time.

STORES AND LOFTS—3 story and base, reinforced concrete, \$150,000. San Francisco. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Cowell Estate. This building will cover a large area and is to be erected on the Embarcadero. Construction will be practically fireproof. Plans are complete and have been out for figures. Bids on the work will be opened today, September 17th.

STATE EXHIBIT BUILDING—Frame construction, \$100,000. San Francisco. Architect, A. F. Heide, 223 Spring street, Seattle. Owners, State of Washington. Mr. Heide has been appointed to prepare plans for both the buildings at the Panama-Pacific Exposition and at the San Diego Exhibition. The architect will be in San Francisco during the coming week and will negotiate for a large site for the Washington State buildings.

Auditorium Bids Are Made Public.

Landgren Co. Lowest Regular Bidder, But Exposition Company May Consider Connolly-Peterson Co.

Landgren & Co. presented the lowest regular figure for the general construction of the Exposition Auditorium, bid to which were opened Thursday by the Buildings and Grounds Committee of the Panama-Pacific Exposition Com-

pany. This bid was submitted on Proposition D and calls for an expenditure of \$644,659. Connary-Peterson Co. bidding on the same proposition, submitted a bid of \$109,200 and claim an error and Friday submitted another bid to the committee which they asked be considered. This figure was the lowest received being \$639,033. Whether or not this figure will be considered by the Buildings & Grounds Committee has not been announced.

Bids were taken on the work as follows: Proposition A A lump sum bid for the building complete as specified, "ie" using Blue Bedford limestone. Proposition B A lump sum bid for all work as specified except elevator work and stone. Proposition C A lump sum bid for furnishing and setting all stone work as specified with the limestone cut and finished at the Eastern quarries. C-2-A lump sum bid with the stone cut and finished in San Francisco. C-3-A lump sum bid with Colusa Sandstone substituted for Blue Bedford limestone. C-4-A lump sum bid with California granite substituted for Blue Bedford limestone. Proposition D A lump sum bid with terra cotta substituted for limestone. Proposition E-A lump sum bid for the elevator work.

Following is a complete list of all figures submitted:

GENERAL CONSTRUCTION AUDIT—
TORRIS M.

Proposition A
Connary-Peterson Co. \$529,733

OAKLAND AND ALAMEDA
COUNTY.

PUNGLOW'S—3, 1 story and base.
\$2,500. Alameda, Alameda Co.
Architect, Leonard H. Ford, 2136
Geary St., Berkeley. Owner, G. Got-
tlieb. These houses will be erected
on 18th avenue near Webster street,
and each has been designed to con-
tain 4 rooms and bath. All interior
walls will be of pine or redwood.
Hardwood floors will be used in the
living and dining rooms. Each living
room will have a large open fire place
with tile or brick mantel. Bath rooms
will have tile wain-cot. Exterior of
the house will be covered with ce-
ment plaster on metal lath, rustic and
singles. Plans are complete and in
the hands of the owner who is now

taking subgignotes on the various parts of the work.

RESIDENCE—2 story and base, frame, \$4,000, Berkeley, Alameda Co., Cal. Architect, W. C. Perry, 2636½ Dwight Way, Berkeley. Owner, Mr. Hawen. The building has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and hardwood. There will be furnace heat and open fire places. Mantels will be of brick and tile. Hardwood floors will be used in the living and dining rooms, and reception hall. There will be tile wainscoting in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BUNGALOW—1½ story and base, frame, \$2,500, Oakland, Cal. Architect, none. Owner, B. F. Butler, 333 49th street, Oakland. The dwelling has been designed for a seven-room house with bath and sleeping porch, and will be erected on Oak Grove avenue. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath room will have a composition floor and tile wainscot. Tile will also be used in the kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner. Work will be done by Day Labor and all materials are now being purchased.

BUNGALOW—1 story and base, frame, \$2,500, Berkeley, Alameda Co., Cal. Architect, none. Owner, R. W. Mason, 1492 Josephine St., Berkeley. The house will be erected on Bonita avenue and has been designed to contain six rooms and bath. All interior finish will be of pine. Hardwood floors will be used in the dining room, living room and reception hall. There will be a large open fire place in the living room with a brick mantel. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$2,500, Oakland, Cal. Architect, Alvin J. Stern, 1522 Broadway, Oakland. Owner, C. B. Coit, 1522 Broadway, Oakland. The house has been designed for a seven-room dwelling and will be erected on Orange street. Interior will be finished in pine and hardwood. There will be a large open fire place in the living room with brick mantel. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Owner is now purchasing all materials.

BUNGALOW—1 story and base, frame, \$1,500, Oakland, Cal. Architect, Alvin J. Stern, 1522 Broadway, Oakland. Owner, Peter Anderson. The house will contain six rooms and bath

and will be erected in Colby Park. All interior finish will be of pine with hardwood floors in the principal rooms. There will be an open fire place in the living room with brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. Owner is now purchasing all materials.

STORES AND OFFICES—9 story and base, Class A construction, \$150,000, Oakland, Cal. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owners, Morris and Muller, 16th and Telegraph, Oakland. This building, which is to be erected at the northwest corner of 14th and Jefferson streets, has been mentioned here before. At first plans are prepared for a hotel structure, but these have since been changed and a modern office building with stores on the first floor will be erected. All plans are complete and in the hands of the owners who will do the work by Day Labor. All contracts will be segregated and figures are now being taken.

BUNGALOWS—2, 1 story and base, frame, \$2,000 each, Piedmont, Alameda Co., Cal. Architect, none. Owners, Western Union Home Builders, 1617 Telegraph avenue, Oakland. These houses will contain four rooms, bath and sleeping porch. Interior finish will be of pine and redwood. Hardwood floors will be used in the two principal rooms. Living rooms will have large open fire places and tile or brick mantels. Tile wainscot will be used in the bath rooms and kitchens. Exteriors will be covered with rustic and shingle. Plans are complete and in the hands of the owners who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$5,000, Oakland, Cal. Architect, D. C. Coleman, Merchants' National Bank Bldg., S. F. Owner, William A. Pryal. The house has been designed for a eight-room dwelling with bath and sleeping porch, and will be erected on 59th street near Claremont. Interior finish will be largely of pine with some hardwood veneer and hardwood floors. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

GARAGE AND SALES ROOMS—1 story and base, brick. Cost not stated, Oakland, Cal. Architects, Roussau & Roussau, Almadenock Bldg., S. F. Owner's name withheld. The building will be erected at the corner of Brook and Broadway, covering a considerable area. Foundations and walls have been designed heavy enough to support additional stories. Front portion of the building will be handsomely finished in pine, hardwood and tile and will be used as a sales room. Rear part will contain the shipping rooms and repair shop. There will be metal window sash and frames. Exterior of the building will be faced with pressed brick. Plans are now out for figures.

be erected at the corner of Kern and I streets, covering an area of 50x90 feet. There will be two stories on the first floor and about 10 modern offices on the upper two floors. Interior finish will be of pine throughout. Plans provide for steam heat. There will be patent store fronts and plate glass display windows. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

SCHOOL—2 story and base, brick, \$38,000. Bakersfield, Kern Co., Cal. Architect, Orville L. Clark, Brower Bldg., Bakersfield. Owners, City of Bakersfield. Contractors, Tiewitt & Shields Construction Co., Fresno. Contract price, \$38,000.

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout the city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Editorial Comment.

The action of England and Germany in deciding not to exhibit at the Exposition in 1915 seems to be in many ways inexplicable if it is a final action. For they are two countries that depend primarily upon foreign trade for the life of their great manufactures. While their trade and reputation is established the world over yet they can not afford to miss the advertisement that this opportunity will present. If they do not revise their action many of their people will be exhibitors irrespective of the action of their governments.

For this celebration is to commemorate an event the greatest in the world's history, insofar as it affects commerce. The world is to take a new form and to occupy new fields. A large percentage of the required tax for commercial communication is to be saved.

World's fairs have been held comparatively frequently during the last twenty years. In fact too many world's fairs have been held. For, generally speaking, they are like a circus and each succeeding one has been a model of the preceding with a slight variation.

The San Francisco Exposition, however, will be different. It will commemorate the present achievement of one of the greatest works in the history of the world. It will be located upon the great harbor of the Pacific Coast and will demonstrate the progress made on the world's great highway since Columbus first sought a westward passage to the Indies. And here will be exhibited the wealth of the Orient for which the old explorers so long sought the unknown passage to the west. The occasion is ripe for a great exhibition. Its commercial importance is the greatest in the world's history. All nations will no doubt see this fact before the time arrives and will be represented when the nations of the world gather at San Francisco in 1915.

The Ohio State censors have barred scenes of harrowing crimes from moving picture shows. How far this will be effective in molding public taste is a question. But certainly the great mass of melodrama given the public in the movies is more or less demoralizing. Like the yellow newspaper it may be entertaining to the great mass of people, but its effect is not to be considered beneficial.

The melodrama of crime has its day like the problem play and the rag dances. Just now there is a moral wave sweeping over the country wherein vice is sought to be pulled by root and branch while you wait. Red

light bills have been passed by members of the legislature, war is made on commercialized vice, while at the same time suggestive dances are becoming more and more popular and women's dress the subject of public comment. Certainly there is something doing all the time and it is a question to determine just what the majority of public opinion is on the question of public morals.

During the year 1912, automobiles sold in the United States \$5,638,878 in registration and license fees. This figure exceeds in value the amount of exports in automobiles in 1906. In 1911 this country exported automobiles to the value of \$15,924,361 exclusive of parts of machines. The corresponding figures for 1912 was \$23,763,989. The total number of machines upon our highways last year was a round million. The increase of machines in our own state and in every state in the Union indicates an enormous increase in every firm of automobiles in this country.

And as a necessary result of this increase in the use of machines is the increase of agitation for good roads. The plan to construct an automobile highway across the continent has interested automobile enthusiasts everywhere. And the general agitation for better roads is not only getting the support of farmers in remote districts but also the city man as well. More money has been spent in road improvements and more permanent highways have been planned in the different states during the last five years than was ever thought of before in a similar period. The automobile has had a good deal to do in directing public attention to the value of good roads.

Why California should be selected as seeking to assume prerogative not granted by the constitution and treaties is hard to see when identical action has been taken by other states and nothing has been said. Lawyers are notably behind the times. They depend upon precedent and progress with them is like the philosophy of the Chinese. The great corporations are the lawyers' best clients. So that prominent lawyers who determine the policies of the Bar Association usually look at matters in the light of established precedent which has many times been decided in the interest of special privilege. Kellogg is the retiring president of the American Bar Association. William Howard Taft is the present president. Both evidently are going to the school who believe in a special endowment of a special class through whom the general public should seek justice and equality before the law.

The Economic Value And Social Justice Of A Compulsory And Exclusive Workmen's Compensation Law.

By George Sutherland, United States Senator from Utah *

Conditions produce opinions which, when sufficiently potent, find expression as law. Changed opinions naturally result from changed conditions, and as conditions are never at a standstill it follows that the law of one generation never quite satisfies the sentiment of the generations which follow. It is the business of the lawmaker to determine—and sometimes determine at his official peril,—out of the multitude of opinions that from time to time develop, which of them are sufficiently substantial to find statutory expression. The general demand for a wiser and juster adjustment of the burden resulting from accidental injury sustained by workmen in their employment presents to the legislator one of these problems, the correct solution of which not only requires him to know what is demanded but to understand the conditions out of which the demand arose.

Blackstone, writing 150 years ago, includes master and servant along with husband and wife, parent and child, guardian and ward, in a class whose reciprocal obligations result from status rather than from contract. The explanation of this classification is probably to be found in the fact that prior to Blackstone's day the servants' duties were generally of a domestic character, but with the vast extension and diversification of industry the relationship of the employer and employed has radically changed, until it is no longer predominantly domestic in character but has become more generally a relation apart from the household. As a result, the contractual conception of the relation of each to the other has more and more supplanted that which was originally drawn from the notion of status. This law has been strikingly manifested in the evolution of the law of liability for personal injury, which has resulted, until recent years, from judicial as distinguished from legislative activity, and nearly every development of which is rooted in the notion of contract.

The rule is well known that the master is held liable to an injury to the servant caused by the former's negligence, was based upon an implied contract to furnish safe appliances and a safe place to work, to provide safe methods and to exercise reasonable care to protect the latter from injury. The familiar saying that the servant could not recover where the injury resulted from a defect or clearly observable dangerous conditions was based upon the implied undertaking of the servant to assume the risk of injury from the same. The fellow-servant tort is a recognized branch of this general doctrine.

These various aspects of the common law conception of liability when all the

circumstances of the employment were of a simple and open character, but as complicated machinery has more and more taken the place of hand labor, as the powerful and indirectly applied forces of steam and electricity have been substituted for the simple and direct power furnished by water and horses, as the master has been more and more removed from direct contact with the servant through the device of corporate organization and the interposition of supervising agents, as the servants of the same master—originally few in number and working side by side,—have grown to an army, no longer acquainted with one another, these rules have come to be largely without justice or justification. From time to time they have been modified by judicial interpretation and the invention of exceptions. In recent years this process has been accelerated by legislative action. Thus, because of the injustice of relieving the master from liability where the negligence in question was that of a superior servant or of one engaged in a separate and distinct class of work, the fellow servant doctrine has been modified by the introduction of the vice-principal and separate department doctrines. As it has been borne in upon the consciousness of the legislator that the laborer in modern industry in this day of sharp competition is not quite free to accept or refuse work at his pleasure, the doctrine of assumption of risk has been modified or overthrown; and in this way the former common law defense of the master have been abrogated or have undergone radical alteration. The whole process indicates that the vice of applying the common law system to modern industrial conditions arises not so much from its details as from its fundamental doctrines. Legislation which continues to recognize the general applicability of the system and attempts by the introduction of modifications and exceptions to reconcile it to the utterly different conditions of our day is not a remedy but a palliative merely. Thoughtful students of the subject have come to recognize that what is needed is not to lop off dead or superabundant branches, but to cut up the tree by the roots and substitute for the entire growth of employers' liability the new system of workmen's compensation.

We have thus swung round the circle from the ancient notion of the master's duties based upon status, through that of employers' liability based upon contract and its statutory modification, to the broader conception of the absolute right of the injured workman to compensation from the enterprise in which he is employed and to whose success he contributes his work for the sake of the wages, as the owner contributes his capital for the sake of the dividends, and we are brought around again to the idea of status, only it now the status of industry and workman instead of the

status of master and servant. In this new conception there is consistently no place for any part of the old common law system.

Workmen's compensation and employers' liability proceed upon wholly different, if not irreconcilable, principles. Employers' liability for personal injury is based upon negligence, against the existence of which, by implication of law, he has contracted. Workmen's compensation is based entirely upon the relationship which the injured workman bears to the employment in which he is injured. While statutes have been passed depriving the employer of the common law defenses or modifying them to a more or less radical extent, under all of them the necessity of showing negligence on the part of the employer remains. The inherent evils of the common law system of liability for negligence are generally conceded, among the most prominent being: (1) That the enforcement of the employee's rights results in great waste and in great delay. The employee being generally unable to pay any counsel fees in the event of failure, is compelled to submit to the payment of exorbitant contingent fees in the event of success. Litigation, because of the crowded condition of the court dockets and for other reasons, is prolonged indefinitely. In the meantime the employee, if able to work, must often live in enforced idleness because his old employer will not furnish him work and others from sympathy with the employer do not do so. The result is that even if a large or extravagant judgment is obtained, more than half of it goes to the lawyer and for other expenses, and the expenditure of the remainder is largely anticipated by living expenses. (2) Upon the happening of an injury a condition of antagonism between employer and employee at once arises. The employee naturally desirous of securing as large a payment as possible, consciously or unconsciously exaggerates the facts tending to show the employer's negligence, and the employer, upon his side, exaggerates the facts tending to minimize his own negligence or emphasize some affirmative defense. Out of this double distortion the truth does not appear. If the employee is honest enough to tell the exact truth he may not recover and to often does not recover by deliberate untruth or by coloring the facts with the ingenious aid of counsel. Thus conscientious truth suffer, and dishonesty is rewarded. The measure of damages is so uncertain, so much is dependent upon the bias or prejudice of individual jurors, that verdicts for similar injuries differ in amount to the widest possible extent. (3) In a large proportion of the cases, particularly in death claims, the recipient of the money resulting from settlement or judgment, is wholly inexperienced in handling considerable sums, and it is often quickly frittered away or lost

* Paper Read at the Third Annual Convention of the International Association of Casualty and Surety Underwriters, Chateau Frontenac, Quebec, Canada, July 9, 1913.

in unwise investment, in which case, as well as where no recovery can be had at all, the unfortunate employee or his dependents, in case of death, become to a greater or less degree a charge upon the charity of society.

In addition to this, the litigation is carried on at great public expense. In the United States probably one-fifth of the time of courts and juries is taken up with this class of litigation.

The foregoing may be exemplified by the following case, the facts of which are not at all out of the ordinary. An engineer on a western railroad was killed, leaving a widow and three young children. Before the body of the dead engineer had been laid away she was importuned by an agent of a firm of personal injury lawyers to put her case into their hands, upon an agreement to pay them 50 per cent of the amount recovered. This she did, and suit was brought. At the end of three years of litigation, a judgment of \$10,000 in her favor was paid. Of this amount she received \$5,000. In addition to the \$10,000 the litigation had cost the railroad company, as nearly as can be estimated, \$2,500 more. It had cost the State \$625, taking a proportionate part of the salary of the judge, the expense of maintaining the court, the fees of the jurors, and so on. Thus it will be seen that in order to get \$5,000 into the hands of the widow and children, the railroad and the State together had expended \$13,125. Long before the judgment was paid the widow had exhausted her financial resources, and had been compelled to do hard and unaccustomed labor in order to support herself and family. A part of the money which she received went to pay debts which she had incurred. She was a woman wholly unaccustomed to business and unfamiliar with investing money. She was surrounded by friends who knew precisely what she ought to do with the money, and at the end of eighteen months she found herself without a dollar, the very existence of herself and children dependent upon such poorly paid work as she could do and public or private charity. And yet this widow was far more fortunate than the vast majority of her sisters similarly situated, more than half of whom receive no compensation whatever.

An exhaustive inquiry carried on by the federal commission appointed to investigate this subject discloses that the average amount paid by the railroads in the United States to the dependents for a death claim is \$1,221, from which lawyers' fees and other expenses are deducted.

These are some of the evils of employers' liability. How can they be most effectively and justly eliminated? It is obvious that a mere alteration of the details of the common law will not be of any considerable economic value. It is true that by abrogating or modifying the common law defenses, the field of the employee's opportunity for successful litigation is broadened, but at the field of opportunity for waste is at the same time extended. It is likewise true that some employees who are not now able to recover solely because a negligent employer can establish a good defense will, under the alterations, be able to recover, but it is safe to say that more than one-half

of the workmen who are injured and a still greater proportion of the dependents of those who are killed will still be unable to recover, because of their inability to establish the employer's negligence or because accident is due wholly to the employee's negligence or to the ordinary risks of the employment.

Under the simple conditions which, at one time existed the majority of accidents which happened were due to somebody's want of care, because there were no inherent dangers in the use of manual tools and simple appliances in the usual way and under the usual circumstances, but in this day of complex appliances, rapidly moving machinery and the press and stress of abnormal hurry, a very large proportion of all accidents are due to general conditions for which no one is specifically to blame. At a time when, if accidents happened, they were generally the result of clearly ascertainable negligence, there was both wisdom and justice in making negligence the controlling element in the right to recover, but now that the conditions under which the work of our day is performed are such that the greatly preponderating proportion of accidents are due to inherent dangers, or to a complex and confusing set of circumstances in which negligence is either not present or not traceable or exercises only a minor influence, the element of negligence has ceased in face to constitute the usual determining cause of industrial accident, and there has resulted a growing opinion that it should no longer be regarded in law as the determining factor controlling the employee's right to recover.

The German accident statistics, which have been gathered with the most painstaking care, in this connection are most illuminating. Those statistics are gathered from the experience of a vast body of workers, aggregating today many millions, and cover many hundreds of thousands of accidents. In the year 1887 the percentage of accidents which were due to the negligence of the employer was 20.47 per cent, those due to the negligence of the employee 26.56 per cent, due to the contributing negligence of both 8.91 per cent, and due to the inevitable risks of the industries and other causes 44.96 per cent. In the year 1897, ten years later, there was due to the negligence of the employer 17.20 per cent, to the negligence of the employee 29.74 per cent, of both 10.14 per cent, and to the inevitable risks, etc., 42.92 per cent. Ten years later, in 1907, the number due to the fault of the employer was 16.81 per cent, to that of the employee 28.89 per cent, to both parties 9.94 per cent, and to the inevitable risks, etc., 44.36 per cent.

Applying these figures to our own country—and there is no reason why they should not approximately apply—under the most liberal employers' liability law which we have, recoveries may be had by employees in considerably less than one-third of the accidents which happen, the remainder more than two-thirds, being due to inevitable risks, the sole negligence of the employee, or other causes not involving negligence on the part of the employer.

The Labor Bureau of Wisconsin has given the result of their investigation

of representative cases of personal injury, in which it was found that 52.10 per cent were due to the hazard of the industry. A rather careful examination of such statistics as we have in this country convinces me that on the average approximately one-half of all accidents resulting in personal injury or death are due to the hazard of the industry and that not more than 25 per cent are due to the sole or contributing negligence of the employer. It must be apparent, therefore, that no matter how the system of employers' liability may be modified, so long as the employer's negligence remains as a prerequisite to recovery, either by far the greater proportion of all injuries must go without compensation or many verdicts must be based upon untruthful evidence or rendered in disregard of facts. Neither alternative is to be contemplated with satisfaction.

The truth is we have been thinking in terms of negligence so long that it is difficult to rid ourselves of the notion that personal fault on the part of somebody is always a necessary prerequisite to a just liability. The subject must be approached from new angles. The great industries of today are engaged in producing commodities or in rendering services for the general public. The consumers of these commodities or the recipients of these services are justly obligated to pay what they cost plus a fair return upon the investment. The wear and tear of machinery, the cost of the labor employed, every item of expense entering into their production or rendition is properly taken into consideration in arriving at the amount to be paid. To injury to a workman, resulting in loss of earning ability or death, as truly enters into the cost of production as the breaking of a piece of machinery, only in the latter case the industry bears the expense no matter how the loss occurs, while in the former the industry pays when the owner is at fault and the workman pays in every other case. There is no reason why the industry should not bear the expense in all cases, collecting it in the first analysis from the consumer, just as it collects every other item of expense entering into the production.

In earlier times, when few men were employed by the same employer and few were engaged in each occupation, the number of accidents and consequently their cost could not be forecast. From the standpoint of anticipation that was wholly a matter of chance. But dealing with modern conditions, where vast numbers are employed and a vastly extensive field is covered, we are able to predict almost exactly not only how many accidents will occur in the course of a year but to classify them according to the extent of their severity. Thus we know that in the railroad service of the country, where seventeen hundred thousand men are employed, about ten thousand will be killed every year and about seventy-five or eighty thousand will be injured to a greater or less degree. In other words, by the vast extension of the field within which these accidents occur the degree of chance has stepped out and the law of averages has stepped in as the controlling rule. It is the unvarying and certain operation of this law of averages upon all human activities that constitutes the value of

all our statistics; that makes insurance a business of scientific accuracy; that in all our large affairs enables us to walk sure-footedly toward the future. There is, therefore, no longer any difficulty in determining what the aggregate cost to any given large industry the payment of compensation will be where the schedule of amounts is prescribed, and this cost can be easily and exactly included in the price of the commodity or service. In the case of the small industries, insurance, mutual or otherwise, gives opportunity for the operation of the law of averages by bringing a sufficient number of employers into the same field of risk.

Whenever a workman is injured so that his ability to earn a living is impaired or destroyed, somebody must bear the burden, and the extent of the burden is precisely the same no matter how the accident was caused. The theory of employers' liability is to put the entire burden on the employer when his casual negligence can be established and to leave the entire burden on the employee in all other cases; while the theory of workmen's compensation is to equalize the burden by paying the injured workman half wages, or approximately that in every case of injury however caused and for a period proportioned to the extent of the injury. Such a rule results in average justice, which the more or less haphazard enforcement of the system of negligence liability does not, since a majority of injuries go without any compensation, while of the remainder some are fairly, some are inadequately, and some are extravagantly compensated.

I have already stated that these two theories of employers' liability and workmen's compensation proceed upon wholly different principles. It follows that any attempt to engraft one upon the other is un sound. The law of workmen's compensation, therefore, should afford the sole remedy. In other words it should be compulsory and exclusive. An elective law is a legislative absurdity. Indeed it is in effect no law, since "Law is a rule of civil conduct commanding what is right and prohibiting what is wrong." The so-called elective law commands nothing—prohibits nothing. It proceeds upon the notion that it is right that the employer should be obliged to pay and the employee should be obliged to receive definite and fixed compensation for a personal injury, independently of fault, and then permits both parties to do as they please about it by allowing them to elect in advance whether or not they will be bound by the law of compensation or the law of liability. Indeed, were the elective form has been adopted, the justice and wisdom of compulsion is recognized by prescribing penalties for a failure to accept it, the usual provision being that if the employer elects not to be bound he shall be liable as at common law stripped of all the common law defenses and that if the employee elects not to be bound he shall be entitled to the common law remedy burdened with all the common law defenses. Such legislation has been in this characterized as "The Workmen's Law." One could allow those who are affected to elect or decline in fact to accept acceptance of the muzzle of the legislative revolver.

Every consideration of justice and

economy demands that the law should be exclusive; that is, that it should not permit, after the accident has happened, a choice of remedies on the part of the employee. These considerations may be briefly stated as follows:

1. It is unjust to the employee, since its effect is to compel him to respond for such unlimited and sometimes extravagant damages as a jury may see fit to impose, whenever his negligence can be established, and then superadds a liability to pay the definite amounts prescribed by the law in all cases where he is without fault, including those where the injury was due entirely to the negligence of the employee. There is, to say the least, grave doubt whether such a law is not so arbitrary in character that the Supreme Court of the United States would declare it void as constituting a denial of due process of law. The exclusive law is based upon perfectly defensible considerations of mutual burden and mutual advantage. It compels the employer to pay definite compensation in all cases, but relieves him of the liability to respond in unlimited damages in some cases. It deprives the employee of his right to recover unlimited damages in some cases but gives him in exchange the right to recover definite compensation in all cases. The effect of it is to make the employer an insurer of the safety of his employees in a fixed and limited amount, but to leave in his treasury the fund theretofore available for the payment of indefinite damages to enable him in whole or in part to meet the new obligations. It gives to the employee an insurance policy in exchange for the gambler's chance, and in effect says to him, "You may hereafter sustain an injury, which may or may not be due to your employer's negligence. You may be able to recover damages or you may not be able to recover any thing. This law guarantees you the certainty of compensation in place of the uncertainty of damages."

2. By making the law exclusive larger compensation can be given than would be possible if a choice of remedies were allowed, since it is manifest that if the employers' liability to pay unlimited damages in case of negligent injuries be continued and in addition he be compelled to pay large compensation in all other cases his industry will be taxed beyond its capacity to pay. It must be frankly recognized that the compensation law substitutes the communistic idea of benefit for the whole class in place of the individualistic theory which permits a minority of the class to recover much and the majority little or nothing. The justification for a compulsory and exclusive workmen's compensation law rests in the conception that the workmen employed in any enterprise are industrial soldiers, who being injured in its service are entitled to be cared for to a fair and equitable extent, having in view the ability of the industry to pay. Theoretically, therefore, we are to consider that we have a fund, which, however large, is still limited; that this fund is to be distributed among the workmen who sustain injury resulting disability and the dependents of those who sustain injury resulting in death; that this fund is to be distributed not for

the purpose of penalizing the negligence of the employer but for the purpose of aiding the injured, and that finally it is better that everybody injured should receive compensation than that only a portion of those injured should receive damages and the remainder nothing.

3. The double remedy will result in a continuation of the great waste which it is one purpose of the compensation law to avoid. To allow an election of remedies is to permit the injured employee to still remain a bone of contention between the personal injury lawyer, who urges him to sue for the sake of the contingent fee involved, and the claim agent, who seeks to make inadequate settlement in order to save the treasury of his company. Suits will go on as heretofore. Half of the amount recovered will be lost on its way from the treasury of the company to the pockets of the employees. The unfortunate feeling of antagonism between employer and employee, which now results, will continue without abatement. The expense to the taxpayer incident to the trial of personal injury cases will still continue.

4. To allow an election of laws or a choice of remedies destroys one of the most pronounced advantages of the compensation principle; namely, the element of certainty. So long as we allow the employee to seek damages upon the basis of the employer's fault or the employer to defend upon the basis of the employee's negligence, just so long will the uncertainty of the law suit counteract the certainty of the fixed schedule and just so long will the fund which should be husbanded and utilized for the benefit of all be frittered away for the benefit of some. A compulsory and exclusive law saves the vast sum which is now wasted and which would continue to be wasted under a composite system, for distribution among those who are injured. Expense will be saved to employer and employee and to the public. The only individuals who will suffer will be the personal injury lawyers and his law suit hunting agents.

5. A compulsory and exclusive law will, in my judgment, prove a powerful aid in the prevention of accidents. Under the liability system the employer and the employee are interested in exaggerating or concealing the real facts in so far as they tend to prove or disprove negligence, the employer coloring and distorting them in one direction and the employee coloring and distorting them in the opposite direction. Between the two the precise truth as to how the accident occurs is effectually concealed. When the employer knows that he must pay and the employee knows that he may receive a certain prescribed sum, wholly irrespective of the way in which the accident happened, neither will have any reason for misrepresentation and we shall be able to ascertain the cause of the accident; and knowing why and how it happened we shall be able to prescribe remedies which will have a tendency to prevent similar accidents in the future.

After all, the vital objection to the liability system is that it does not in the main permit of average justice, and this is particularly so in death claims where by the death of the em-

ployee quite often the evidence which would have established liability is lost. The consequences to the dependent family of an engineer who is killed as the result of his own negligence are precisely the same as where there is no negligence at all or where the employer is at fault. Both families have lost a provider and both must be cared for.

It is certainly more in consonance with sound public policy to require that both families shall be compensated within fair and reasonable limits than that the employer should be penalized for his carelessness for the benefit of one family at the expense of the other.

Experience is always a more valuable guide to human conduct than precept. Every country in Europe except one has abandoned the theory of employers' liability based upon fault and substituted that of compensation for accidental injury based upon status alone. These laws have been in operation in some of these countries for many years—in England for seventeen years, in Germany for more than a quarter of a century. If they did not on the whole work well, if they were not of superior benefit to the employee over the old system, we should expect that long ago there would have been serious efforts for their repeal, but on the contrary the workmen in those countries have repeatedly endorsed their principles and declared in favor of their continuation. It is furthermore significant that among the scores of official and non-official commissions, committee and civic organizations in our own country, which have investigated the subject, upon which most of these bodies both employer and employee have been represented, practically all have reported in favor of the principle of compensation as opposed to that of employers' liability. If a wide-spread consensus of opinion, based upon long experience, careful investigation and earnest desire for a wise and just solution, of a great problem can ever accomplish anything, surely it may be taken for granted that the desirability of workmen's compensation is no longer open to dispute.

The demand for a more or less automatic adjustment of compensation for accidental injuries to workmen is but one of the many phases of a world wide movement for the readjustment of the relations of labor to capital and of both to society, more in consonance with modern notions of social justice. The thought behind the movement is that of society en masse, for the general welfare, may command the self-effacing loyalty of each of its constituent units, society in turn may care and preserve conditions which will protect each unit in the unequal struggle for individual well-being.

There is a growing feeling that the individualistic theory has been based with too much stress upon the dry logic of its doctrines and too little regard for the practical operation of the humanitarian notion of law. We are discovering that we cannot always regulate our economy and social relations by scientific formulae, because a good many people perversely insist upon being fed and clothed and comforted by the practical rule of thumb,

rather than by the exact rules of science. In the rebound, however, from the old notion which, carried to its final conclusion, compels each not only to wage his own battle for existence and happiness, even though he fall in the fight, but which bids him lie where he falls, there is danger that we may go too far in the opposite direction. In while helping the weak, we may encourage the indolent, which is well. We must be careful that in the effort to relieve ourself of the burdens which bear us down we do not take away the stimulating necessity of personal effort which compels us to rise. We must find at our peril the happy mean between the hardship which breaks, and the coddling which saps, our strength. That in our righteous anxiety to minimize human suffering we may miss this crucial point is one of the grave dangers which the great civilized nations face today. The unfortunate must be carried for, the soldiers of industry who fall must be lifted up, but no deadlier check could be put upon the upward march of civilization than to embark upon such a scheme of emotional socialism as would put upon the backs of the strong not only the care of those who cannot but of those who can but will not bear their own burdens.

In framing our laws we must never lose sight of the vital distinction between helplessness, which is a misfortune, and laziness, which is a vice. It is a lovely thing to give in case of need, but it is a far more important thing to so adjust conditions that giving will not be necessary. Laws which afford financial aid for the old and sick and unfortunate who cannot help themselves are necessary and righteous; but laws which, by insuring safe and healthful and remunerative work for the young and strong enable them to care for themselves in time of misfortune and sickness and old age are better. Laws which compel industry to pay, irrespective of negligence, for accidents which entail injury and loss of earning ability or death, are commendable and desirable, but laws which will prevent the accidents are far more so. Clean, sanitary hospitals

for those who are torn and mangled by defective machinery or diseased by lawless surroundings are necessary and good, but safe machinery and sanitary work-shops are better still. In other words, in dealing with industrial conditions, the prime duty of society and therefore the prime study of the lawmaker, should be to prevent and minimize the evils which give rise to the necessity for assisting the helpless, for in law as in medicine the golden maxim holds good, that "An ounce of prevention is worth a pound of cure."

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., OF THE DAILY PACIFIC BUILDER PUBLISHED DAILY EXCEPT SUNDAYS AND HOLIDAYS AT SAN FRANCISCO, REQUIRED BY THE ACT OF AUGUST 24, 1912.

Name of Editor, C. Munday, 560 Mission Street.

Managing Editor, L. A. Larsen, 560 Mission Street.

Business Manager, L. A. Larsen, 560 Mission Street.

Publisher, L. A. Larsen, 560 Mission Street.

Owner, L. A. Larsen, 560 Mission Street. Known bond holders, mortgagees, and other security holders, holding 1 per cent or more of total amount of bonds, mortgages, or other securities: None.

Average number of copies of each issue of this publication sold or distributed, through the mails or otherwise, to paid subscribers during the six months preceding the date of this statement, 1200.

L. A. LARSEN, Owner

Sworn to and subscribed before me this 20th day of September, 1913.

MARTIN ARONSOHN.

Notary Public in and for the City and County of San Francisco, State of California.

My Commission expires Sept. 20th, 1915.

[SEAL]

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame \$4000. Architect, Milton Lichtenstein, 111 Eddy St., S. F. Owner, Louise R. Barrett. The building will be erected at the corner of 14th and Market streets, covering an area of 125x80 feet. There will be several stores on the first floor besides the entrance to the apartment house. Upper floors will be subdivided into about 30 suites of two and three rooms. All apartments will have wall beds and private bath rooms. Interior finish will be of pine with elm paneling and some hardwood floors. Plans provide for a steam heating system and hot water supply. Bath rooms will have cement floors and tile wainscoting. Marble and tile will be used in the entrance. There will be patent store fronts and plate glass windows. Exterior of

building will be covered with terra cotta and metal tiles. Plans are complete and contracts will be awarded in a short time.
SUNSHINE, ALAMEDA CO., CAL.—Eight lodged story and base, \$12,000. Architect, George W. Brown, 2126 Emerson street, Berkeley, Cal. Mrs. E. N. Richardson, The building will be erected on Dana street between 14th and 15th streets. It will be a two story building and has been designed to contain six modern suites of three rooms each. Interior suits will be of pine and elm with some hardwood floors. A central heating system will be installed. All suites will have wall beds and private bath rooms. Bath rooms will have composition floors and tile wainscoting. Marble and tile will be used in the entrance. Exterior of the building will be finished with cement plaster on metal lath. Plans are complete and the work will be begun in a few days.

Day Labor. All materials are now being purchased by the architect.

SEATTLE, WASH.—Apartment house, 3 story and base, brick and steel, \$37,000. Architect, Robert E. Knipe, Henry Bldg., Seattle. Owner, Robert E. Knipe. The building will be erected on 18th avenue near Republican street, and will cover an area of 42x114 feet. Interior has been arranged for ten large suites, ranging from four to seven rooms. Interior finish will be of pine and hardwood with hardwood floors in all dining and living rooms. Plans provide for steam heat, elevator service, vacuum cleaning system and hot water supply. Bath rooms will have cement floors and tile wainscot. Tile and marble will be used in the entrance vestibule. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 2 story and base, brick and steel. Cost not stated. Architect, R. M. Jackson, Citizens' National Bank Bldg., L. A. Owner, Southwest Investment Co. The building will be erected at the corner of 15th and San Pedro streets, covering an area of 40x76 feet. First floor will be arranged for stores and upper floor will be subdivided into four apartments of three rooms and bath. Interior finish will be of pine throughout. Plans provide for steam heat and a hot water system. Stores will have patent fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Bath rooms will have cement floors and tile wainscot. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 2 story and base, brick and steel, \$15,000. Architect, none. Owner, Mrs. Fannie L. Lowe, 624 West 8th street, L. A. The building will be erected on Slansen avenue near Hoover street. There will be several stores on the first floor and twelve suites of two and three rooms each on the upper floors. All apartments will have wall beds and private baths. Interior finish will be of pine and redwood. There will be steam heat and a hot water supply. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

BRIDGES, DAMS AND HARBOR WORK.

SACRAMENTO, CAL.—Levee work, earth and rock construction. Cost not stated. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Three bids were received by the Sacramento Commissioners of Public Work for levee work in Districts 4, 8 and 10. The Summit Construction Co. offered to do the work in District 4 for \$51,000 and in District 8 for \$4,900, making a total bid of \$115,000. Other bids submitted by Haywood, Dozier & Tibbets on the whole work were for 91 per cent above cost, and F. E. Frye for the work in Districts 8 and 10 for 10 per cent above cost. All bids have been taken under consideration by the Commissioners of Public Works.

CHURCHES.

SAN FRANCISCO, CAL.—1 story and base, frame, \$12,999. Architects,

O'Brien Bros., Clunie Bldg., S. F. Owners, Japanese Mission Church. The Japanese have secured a site on Pine street in the Japanese quarter, and will shortly commence construction on their new building. The lot covers an area of 50x120 feet, nearly all of which will be occupied by the building. The design is in the Greek Doric style. Besides a main auditorium seating 400 people there will be several Sunday school rooms. Interior finish will be of pine and ornamental plaster. Some art glass will be used. Exterior of the building will be covered with cement plaster. Plans are being prepared.

LOS ANGELES, CAL.—Church, 1 story, frame, \$10,000. Architects Train & Williams, Exchange Bldg., L. A. Owners, York Boulevard Methodist Church. The building has been designed in the Mission style and will have an auditorium with a seating capacity of 250 people, Sunday school rooms and pastor's study. Interior finish will be of pine and redwood. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures will shortly be taken.

FACTORIES & WAREHOUSES.

BAKER CITY, ORE.—Warehouse, 1 story and base, brick and concrete, \$20,000. Architect, M. P. White, Baker City. Owner, S. A. Heilner. The building has been designed with foundations and exterior walls heavy enough to carry additional stories. The building will cover an area of 50x200 feet, and will be erected near the railroad, and will have spur track facilities. There will be a cement floor, metal window sash and frames and fireproof doors. Exterior will be faced with cement plaster. Plans are now being prepared.

FIRE HOUSES AND JAILS.

Contracts Awarded.

FRESNO, FRESNO CO., CAL.—Detention home, 2 story and base, brick and steel, \$12,200. Architects, Swartz, Hotchkiss & Swartz, Rowell Bldg., Fresno. Owners, Fresno County. Contractors, Lindgren & Co., Monadnock Bldg., S. F. Contract price, \$12,200.

FLATS.

SAN FRANCISCO—Flats, 1, 2 story and 1, 3 story, frame, \$2,800 and \$6,900. Architect, Jules Godart, 635 Montgomery street, S. F. Owner, E. Lange. These two buildings will be erected on the north side of Broadway east of Taylor. The three-story structure will face Broadway and the two-story building will be erected on the rear of the same lot. Interior finish will be of pine and elm panels. Some hardwood floors will be used. There will be open fire places and tile mantels. The wainscot will be used in the bath rooms and kitchens. There will be a mosaic floor in the vestibules. Exteriors will be covered with rustic, ship-lap and a brick veneer base. Plans are complete and figures are being taken.

GARAGES.

SAN FRANCISCO—Garage, 2 story and base, reinforced concrete, \$18,000. Architect, August Nordin, Mills Bldg.,

S. F. Owner, Robert Jones. The building will be erected on the north side of Post street west of Polk, and will cover an area of 68 feet 9 inches by 120 feet. Construction will be fireproof throughout with reinforced concrete walls and floors. Interior partitions will be of metal lath and plaster. Besides the office and machine shop there will be considerable storage space. Interior finish will be of pine. Plans provide for metal window sash and frames. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Garage, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Mrs. E. J. Culver. The building has been designed for a private garage and will be erected on property adjoining the owner's home. First floor will contain storage space and machine shop and upper floor will be arranged for living rooms. Interior finish will be of pine throughout. There will be a cement floor on the first floor. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

GOVERNMENT WORK AND SUPPLIES.

Naval Supplies.

Bids will be opened on September 30 by the paymaster general of the Navy for furnishing the following:

Schedule 5801—Construction and Repair.

Class 1. Mare Island—1 automatic steam towing machine.

Class 1. Alternate—Do, f. o. b. works.

Schedule 5813—Ordnance.

Class 11. Mare Island—1 steam driven, 3-stage high-pressure air compressor.

Schedule 5814—Steam Engineering.

Class 21. Mare Island—Welding and cutting outfit.

Class 21. Alternate—Do, f. o. b. works.

Schedule 5824—Construction and Repair.

Class 31. Puget Sound—L738 lbs wire rope, plow steel.

Class 32. Puget Sound—800 ft pneumatic hose.

Class 33. Mare Island—25,000 feet Douglas fir flooring.

Mare Island, Cal. Dredging.

The following bids were received by the chief, bureau of yards and docks, Navy Department, Washington, D. C., for dredging channel and basin in Mare Island Strait at the U. S. navy yard, Mare Island, Cal.:

Item 1. Net price per cu yd for dredging and disposing of mud in channel and basin; 2, price per cu yd for dredging and disposing of that part of commission rock to be excavated to a depth of 30 ft; 3, do to a depth of 20 ft.

S. G. Hines, 14 Montgomery street, San Francisco, Cal., item 1, \$218,900; 2, \$59,000.

H. G. Plumber, Honolulu, H. T., item 1, \$252,500; 2, \$69,000.

R. A. Perry, 414 13th street, Oakland, Cal., item 1, \$197,000, 2, \$46,000.

Eight-Hour Law Pamphlet.

From the office of the Supervising Architect for the Treasury there has just been issued a pamphlet intended for the instruction of those who are interested in the application of the national eight-hour laws. The pamphlet gives the full text of the law approved August 1, 1892, and the law approved June 19, 1912. The document has been brought out for the purpose of covering inquiries which are being received by the Supervising Architect relative to materials entering into the construction of public buildings.

Canal Requisitions.

The Isthmian Canal Commission has received requisitions for the purchase of the following supplies and material for the Panama Canal: 300 scythe blades; 4 differential blocks, 3-ton, 120 dozen corn brooms; 240 cash tool brushes; 600 galvanized water buckets, 3-gallon capacity; 500 galvanized water buckets, 4-gallon capacity; 2,400 yds white cotton canvas; 500 rolls bronze wire cloth, 18-mesh; 41 reams emery cloth; 132 lbs galvanized water coolers; 1,020 lbs ash cord; 250 compression grease cups; 36 automatic grease cups; 250 brass composition cocks; A quantity of files; 2,500 railway signal flags; 150 hand-hole gaskets; 150 man-hole gaskets; 125 sets water gauges; 25 cases window glass; 500 railroad lantern globe; 400 ft unarmored plain rubber air hose, 3/4-inch; 1,000 ft rubber wire-wound steam hose; 12,000 ft rawhide belt lacing; 98 pairs ash oars; 1,300 lbs sheet rubber packing, no insertion; 500 lbs square flax braided packing; 500 lbs square spiral packing, in graphite; 140 cases toilet paper; 24 cross-cut saws; 200 lbs large sponges; 6,000 lbs fresh water laundry soap; 3,500 lbs salt water soap; 150 lbs copper tacks; 36 steel tapes; 30 metaline tapes; 1,200 cotton towels; 14,750 carriage bolts; 700 machine bolts, counter-boring head, with square nut; 54,250 machine bolts, square head and square nut; 7,500 round drift bolts; 3,700 lbs special round bronze; 10,000 ft extra flexible plow-steel cable, 2 1/2-in.; 1/2 straight-link black iron or steel chain, 1/2-in.; 1,000 ft straight-link galvanized iron or steel chain, 1/2-in.; 18 portable forges; 8,000 lbs yellow metal; 3,200 lbs galvanized common wire nails; 13,000 lbs common wire nails, 3rd; 3,500 lbs common wire nails, 6d; 1,000 lbs wire roofing nails; 3,000 lbs hexagon tapped nuts; 3,300 lbs boiler rivets; 68,500 lbs cone-head rivets; 11,700 gal screws; 3,000 lbs track spikes; 500 ft 1/2-in. tubing; 2,000 lbs lead washers; 5,000 lbs cast-iron washers; 500 washers; 3,500 lbs sheet zinc.

Sale of Vessels.

The Navy Department will soon issue an advertisement calling for bids for the purchase of the receiving schooner Independence, which has been for many years stationed at the Mare Island navy yard. This vessel has been condemned by a board of survey and appraised at \$4,000. This advertisement is exclusive of a large quantity of equipment and fittings, which will be removed from the vessel. Within a short time the department will ask for bids for the purchase of the converted yacht Restless.

Canal Circular 790.

An advertisement appears elsewhere

in this issue calling for bids to be opened October 6 for furnishing pumps, valves, switchboards, etc., for the Ancon and Mira Flores pumping station. The material required is called for under one class divided into six items, as follows:

- Item 1. 14 centrifugal pumps, with electric motors and compensators.
- Item 2. 3 switch and gauge boards.
- Item 3. Miscellaneous valves.
- Item 4. 1 air compressor, complete, with motor and air receiver.
- Item 5. 3 slate operating tables for operating hydraulic valves.
- Item 6. 3 6-ton hand-operated traveling cranes.

Fresno, Cal., Lift.

The contract for furnishing and installing a new hoistway and an electric freight elevator in the U. S. post office and court house, Fresno, Cal., has been awarded to the Otis Elevator Co., Washington, D. C., at \$4,774.

- Grass Valley, Cal., construction, June 30.
- Casper, Wyo., construction, April 7.
- Pocatello, Idaho, construction complete, May 28.

HALLS AND SOCIETY BUILDINGS.

SAN FRANCISCO.—City Hall, monumental granite work. Cost not stated. Architects, Bakewell & Brown, 254 Kearny St., S. F. Owners, City and County of San Francisco. Plans are complete and have been approved for

monumental granite work over the entrance in entrance pediments on the City Hall building. Bids are now being called for by the Board of Public Works. Bids will be opened on October 6. Plans and specifications can be secured from the Board of Public Works, Temporary City Hall Bldg.

OAKLAND, CAL.—Auditorium, general construction. Cost not stated. Architects, Palmer & Hornbostel, New York, associated with J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Bids will be received on October 9th by the City Clerk for the general construction of a \$1,000,000 Municipal Auditorium, which is to be erected on the shores of Lake Merritt. Plans and specifications can be secured from Architect Donovan. The work will include practically all construction except foundation work and steel, contracts for which have already been let.

OAKLAND, CAL.—City Hall, cabinet work and painting. Cost not stated. Architects, Palmer & Hornbostel, New York, associated with Architect J. J. Donovan, Security Bank Bldg., Oakland and owners, City of Oakland. Plans and specifications for the interior painting and for furnishing and setting of cabinet work for the new City Hall building are complete. Separate agencies will be taken for each part of the work. Bids will be opened by the City and City Council on October 9th. Plans and specifications can be secured from Architect J. J. Donovan, Security Bank Bldg.

BURLINGAME, SAN MATEO CO., CAL.—City Hall, 2 story and base, concrete and brick, \$20,000. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owners, City of Burlingame. Bids opened recently for this work show Robert Trost of San Francisco low at \$19,958. Only \$20,000 is available for complete construction and it is probable that the plans will have to be revised. No action was taken by the City Trustees. A complete list of all figures appears under the heading of San Jose and the Santa Clara Valley in this issue.

ONTARIO, SAN BERNARDINO CO., CAL.—Lodge hall alterations, 2 story and base brick. Cost not stated. Architects, Edger & Edger, Story Bldg., L. A. Owners, Independent Order of Odd Fellows. The first floor of the present building will be altered for storage purposes and the second floor will be rearranged for a large lodge room, reception hall, banquet room, 100-120 rooms, billiard rooms and kitchen. Interior finish will be of pine and hardwood. A new steam heating system will be installed. Exterior of the building will be faced with cream colored pressed brick. Plans are now being prepared.

HOSPITALS.

SAN DIEGO, CAL.—Hospital, 4 story building, reinforced concrete, \$250,000. Architects, John S. Seibert, Swickels & Co., San Diego. Owners, E. Alex. T. and J. L. Adams. A site covering an area of 100x200 feet has been located on Cedar street between 7th and 8th streets. The basement will be for emergency wards, storage and mechanical equipment. First floor will contain the administrative

departments, consultation rooms, dining room and kitchen. Second and third floors will be devoted to wards and private rooms. The fourth floor will contain two operating rooms. Contagious wards will occupy the roof. Construction will be fire proof. There will be steam heat, elevator service and a vacuum cleaning system. Exterior will be faced with cement plaster. Plans are now being prepared.

Contracts Awarded.

SANTA ANA, ORANGE CO., CAL.—Hospital, 2 story and base, reinforced concrete, \$15,441. Architect's name not given. Owners, Orange County. Contractor, Chris McNeil, 911 Spurgeon St., Santa Ana, general construction only. Contract price, \$45,141.

HOTELS.

SAN FRANCISCO—Hotel, 5 story and base, reinforced concrete, \$25,000. Architect, Charles J. Rousseau, 46 Kearny St., S. F. Owner, A. Newman. The building will be erected on the east side of Fourth street north of Harrison and will cover an area of 25x80 feet. There will be two stores and the hotel entrance on the first floor. Upper four floors will contain in the neighborhood of 60 rooms and a number of baths. Interior finish will be of pine and elm. Bath rooms will have cement floors and tile wainscot. Plans provide for steam heat and elevator service. There will be several rooms so arranged that they may be thrown into suites, and will be equipped with all modern conveniences for light housekeeping. Exterior of the building will be faced with cement plaster in imitation of Caen stone. Plans will be complete and out for figures within one week.

SAN FRANCISCO—Hotel and stores, 7 story and base, brick and steel, \$60,000. Architect, C. H. Barrett, 351 Bush street, S. F. Owners, Zellerbach and Levison. The building, which is to be erected on the north side of Turk street between Mason and Taylor streets, has been mentioned here a number of times before. At first it was decided to give the contract out on a percentage basis, but since the owners have placed plans on the open market for figures. The building will contain one store besides the hotel lobby and in the neighborhood of 110 rooms. Interior finish will be of pine and hardwood. All bath rooms will have cement floors and tile wainscot. There will be steam heat and elevator service. Exterior of the building will be faced with pressed brick. Plans are now being figured.

PORTLAND, ORE.—Hotel, 3 story and base, brick and steel, \$30,000. Architect, A. C. Ewart, Beck Bldg., Portland. Owner, Jessie M. James. The building will be erected on 6th street near Irving, covering an area of 50x100 feet. The plans provide for two stores on the ground floor besides the hotel lobby. Upper floors will be arranged for a total of 55 guest rooms and a number of public baths. There will be steam heat and a hot water supply. Interior finish will be of pine throughout. There will be patent store fronts and plate glass windows. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owner, W. W. Neuer. The building will occupy a corner site and will contain several stores on the first floor besides the hotel lobby and entrance. Upper floors will be arranged for 110 guest rooms, 25 per cent of which will have private baths. Interior finish will be of pine and hardwoods. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Stores will have patent fronts. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

OCEANA PARK, LOS ANGELES CO., CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architect, S. Tilden Norton, Title Insurance Bldg., L. A. Owners, W. M. Gottschalk and A. Sioroty. The building will be erected on a corner lot and will contain five stores on the first floor. Upper floors will contain in the neighborhood of 120 guest rooms, a large percentage of which will have private baths. Interior finish will be of pine and birch. Plans provide for steam heat, elevator service and a vacuum cleaning system. Bath rooms will have cement floors and tile wainscot. There will be patent store fronts. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are being prepared.

Contracts Awarded.

SEATTLE, WASH.—Hotel, 3 story and base, brick and steel, \$125,000. Architect, A. Wickersham, Lyon Bldg., Seattle. Owners, Yesler Estate. Contractor, Butler Construction Co., Central Bldg., Seattle. Contract price, \$125,000.

SHERIDAN, ORE.—Hotel, 2 story and base, brick. Cost not stated. Architects, Brubaker Construction Co., Railroad Exchange Bldg., Portland. Owner's name not given. Contractors, Brubaker Construction Co., Railroad Exchange Bldg., Portland. Contract price not stated. Note: The building will cover an area of 58x100 feet.

LIBRARIES.

HUNTINGTON BEACH, LOS ANGELES CO., CAL.—Library, 1 story and base, brick, \$10,000. Architect, E. L. Hopkins, Delta Bldg., L. A. Owners, Town of Huntington Beach. The building, which is to be classic in design, will be erected on a corner site covering an area of 26x70 feet. Interior will be finished in pine and hardwood. There will be two reading rooms, librarian's office and stack room. Maple floors will be used. A central heating system will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

RENTON, WASH.—Library, 1 story and base, brick, \$10,000. Architect, Harold H. Grinnold, Epier Bldg., Seattle. Owners, City of Renton. Contractors, Bokman & Mowatt, Mutual Life Bldg., Seattle. Contract price not stated.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Court of the Four Seasons, frame construction. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Working drawings for the building to be known as the Court of the Four Seasons, one of the most beautiful of the Exposition buildings, have been completed. Bids are now being called for on the general construction. Figures are to be opened by the Buildings and Grounds Committee on October 2nd. Plans and specifications can be obtained from the Director of Works, Service Bldg. An official proposal appears in another column of this issue.

SAN FRANCISCO—Plumbing, heating, ventilating and electric work on Exposition Auditorium. Cost not stated. Architects, John Galen Howard, John Reid, Jr., and Frederick H. Meyer, associated, S. F. Owners, Panama-Pacific International Exposition Co. Bids were received September 18 from twenty-nine contractors on the plumbing, heating, ventilating system and electric work on the Exposition Auditorium which is to be erected in San Francisco's new Civic Center. Bids were asked for on nine distinct propositions. On proposition "A" which included a lump sum bid for all work, no figures were received. Following are the low men on the other eight propositions: Plumbing, heating and ventilating; complete, Kiernan & O'Brien, \$109,796; plumbing only, F. W. Snook, \$23,967; heating and ventilating only, Atlas Heating and Ventilating Co., \$72,699; heating and ventilating as specified under division No. 1, Victor Engineering Co., \$13,555; same as specified under division No. 2, Atlas Heating and Ventilating Co., \$27,235; same as specified under division No. 3, Peterson-James Co., \$23,590; same under division No. 4, Pacific Blower and Heating Co., \$6,550; electric work, complete, Newbery-Bendheim Co., \$17,490. A complete list of all figures received appears under the heading of San Francisco in this issue.

SAN FRANCISCO—Horticulture building, frame and steel construction. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids were also opened at Thursday's (September 18) session of the Buildings and Grounds Committee of the Exposition Co. for the general construction of the Horticulture Building. Three propositions were considered. Proposition A with lumber furnished by Exposition Co. Proposition B with lumber furnished and erected by contractor, and Proposition C erecting structural steel. John Monk was low bidder on Proposition A at \$226,218; Streshlow-Freeze & Petersen were the only bidders to submit figures on Proposition B, their bid for the complete work being \$319,775. The Golden West Iron Works were the only bidders on Proposition C and asked \$11,745 for erecting the structural steel and \$20 per ton for receiving, unloading, storing and erecting the steel. A complete list of these figures appears under the heading of San Francisco in this issue.

SAN FRANCISCO—Fire hose. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-

Pacific International Exposition Co. bids are now being taken for furnishing the Exposition Company with 10,000 feet of fire hose. Hose is to be of the common cotton variety lined with rubber. Full particulars can be had from the Director of Works, Service Bldg. An official proposal appears in another column of this issue. Bids will be opened on October 2nd.

SAN FRANCISCO—State Exhibit building, 3 story, frame and stucco, \$150,000 to \$200,000. Architect's name not given. Owners, State of New York. Plans have been approved by the New York State Commission for the Exhibit building to be erected at the Panama-Pacific International Exposition in 1915. Plans show a structure 220x100 feet. Norman E. Mack of Buffalo is chairman of the State Fair Commission.

POST OFFICES.

ALAMEDA, ALAMEDA CO., CAL.—Post Office, painting, cement work and brick work, subfigures. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. Contractor, William V. Murray, Post Office Bldg., Alameda, wants subfigures from San Francisco and Oakland contractors on painting, cement sidewalks, cement curbs and coping work, brick driveway and court yard work and other work. Interested parties can see Mr. Murray at the Alameda Post Office.

RAILROAD CONSTRUCTION—AND EQUIPMENT.

PORTERVILLE, TULARE CO., CAL.—Passenger station, 1 story and base, brick and concrete, \$25,000. Architects Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Company. Plans are complete and bids are now being taken for the construction of a new depot in Porterville. There will be two waiting rooms, agent's office and baggage room. There will be a central heating system. Interior will be finished in pine. Exterior of the building will be faced with cement or pressed brick. Plans can be secured from the Engineer's office, Flood Bldg., San Francisco. Bids will be opened on September 25th.

Contracts Awarded.

LOS ANGELES, CAL.—Passenger station, 2 and 4 story, Class A and Class C, \$250,000. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Southern Pacific Co., Contractors, Alta Planning Mill Co., 330 McDuffy St., L. A., general construction only. Contract price \$250,000.

RESIDENCES.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$7,000 each. Architect, Edward E. Young. These houses will be erected on the west side of 17th avenue north of Lake street. Each dwelling will contain eight rooms and bath. Interior finish will be of pine, redwood and hardwood. There will be furnace heat and open fire places. Hardwood floors will be used in the living rooms, dining rooms and reception halls. Bath rooms will have composition floors and tile wainscot. Automatic water heaters will be installed. Tile will be used in the

kitchens. Exterior will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, A. T. Morris, 616 9th avenue, S. F. The dwelling has been designed for a seven-room house with bath. All interior finish will be of pine. Hardwood floors will be used in the principal rooms. There will be a large open fire place in the living room with brick or tile mantel. The wainscot will be used in the both room and kitchen. Exterior of the dwelling will be covered with rustic cement plaster on metal lath and a brick veneer base. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$30,000. Architects, H. Gelfuss & Son, 16 Kearny street, S. F. Owner's name withheld. This work has been mentioned here before when the architect was first commissioned to prepare plans. The dwelling will be erected on Pacific avenue near Buchanan, and will contain 16 living rooms, servants' rooms and 4 baths. Interior finish will be of pine, mahogany and other hardwoods. Hardwood floors will be used throughout. Rector system and steam heat will be installed. Bath rooms will be finished in tile. Marble will be used extensively in the butler's pantry and kitchen. There will be large open fire places with tile and brick mantels. Automatic water heater and a vacuum cleaning system will also be installed. Exterior of the house will be covered with cement plaster in imitation of cut stone. Plans are complete and figures will be called for at once.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,000. Architect, none. Owner, A. R. Lapham, 1833 McAllister St., S. F. The dwelling will contain six rooms and bath. Interior finish will be largely of pine. Hardwood floors will be used in the living and dining rooms. There will be an open fire place and tile or brick mantel. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$5,000. Architect, Edward E. Young, 251 Kearny St., S. F. Owner, Thomas Scoble, 363 15th avenue, S. F. The dwelling will be erected on 16th avenue north of Lake, and has been designed to contain seven rooms and bath. Interior finish will be of pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath room will have composition floor and tile wainscot. An automatic water heater will be installed. Tile wainscot will also be used in the kitchen. Exterior of the house will be covered with rustic cement plaster on metal lath and brick veneer base. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$7,500. Architect, Ed-

ward G. Garden, Phelan Bldg., S. F. Owner, Mrs. Mary L. Giguere. This dwelling will be erected on San Diego Way in St. Francis Wood, one of this city's new residence sections. The dwelling will contain eight or nine rooms, baths and sleeping porch. Interior finish will be of pine, redwood and hardwood. There will be furnace heat and open fire places. Mantels will be of brick and tile. Hardwood floors will be used in the principal rooms. Bath rooms and kitchen will have tile wainscot. Composition floors will be used in the bath rooms. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are nearly complete and figures will shortly be called.

SAN FRANCISCO—Residences, 4, 2 story and base, frame \$3,000 each. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Thomas Scoble, 363 15th avenue, S. F. These dwellings will be erected on property on 44th avenue near Lake. Each house will contain seven rooms and bath. Interior finish will be of pine, elm and hardwood. Hardwood floors will be used in the principal rooms. There will be a large open fire place in each living room. Mantels will be of brick and tile. Tile wainscot will be used in the bath rooms and kitchens. Automatic water heaters will be installed. Exterior will be covered with cement plaster, rustic, shiplap and brick veneer base. Plans are now being prepared and when complete the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1½ story and base, frame, \$3,000. Architect, none. Owners, F. R. Peake Co., 2127 University avenue, Berkeley. The dwelling has been designed for a seven room house with bath and sleeping porch. Interior finish will be of pine and hardwood. There will be a large open fire place in the living room and brick mantel. Hardwood floors will be used in the living room, dining room and reception hall. Tile wainscot will be used in the bath room and kitchen. Composition floors will also be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SACRAMENTO, CAL.—Residence, 2 story and base, frame, \$2,000. Architect, none. Owner, O. H. Moore & Co., 2902 35th street, Sacramento. The house will contain six rooms and bath, and is to be erected on the East End Division Tract. Interior finish will be of pine throughout. Some hardwood floors will be used. There will be a large open fire place in the living room with brick or tile mantel. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and cement plaster. Plans are complete and work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Bungalows, 5, 1 story and base, frame Cost not stated. Architect none. Owner, Al Story, Builders' Exchange, Oakland. These houses will be erected on property on Indian Rock avenue. Each dwelling has been designed to contain six rooms and bath. Interiors will be finished in pine with some elm panels. the Board of Supervisors for an addition to the present County High School. New building will be two stories in eight and of fireproof construction. There will be a number of class rooms, gymnasium, a large auditorium and laboratories. Interior finish will be of pine with maple floors. There will be team heat. Considerable tile and marble will be used. Exterior of the building will be faced with pressed brick. Working drawings are being prepared.

Contracts Awarded.

BERKELEY, ALAMEDA CO., CAL.—Convent building, 2 story and base, frame, \$23,695. Architect, John J. Foley, 46 Kearny St., S. F. Owners, St. Joseph's Convent. Contractors, Kidder & McCullough, Berkeley. Contract price \$23,695.

STORES AND OFFICES.

SAN FRANCISCO—Store and loft addition, 2 story and base, brick and steel, \$17,000. Architect, C. W. Dickey, Bank of Savings Bldg., Oakland. Owner, Howard Smith. The present building on Mission street west of 7th is to have a two-story addition. Construction will be of brick and steel. The building covers an area of 55x165 feet. The new stories will be arranged for lofts. Interior finish will be of pine. Elevator service is provided. There will be metal store fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SAN FRANCISCO—Stores, 1 story brick and steel, \$27,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners, Holbrook & Maguire. The property at the northwest corner of Clay and the Embarcadero is to be improved at once by the construction of a one-story building covering a large ground area. There will be several stores. Interior finish will be of pine throughout. Plans call for patent store fronts and plate glass windows. Cement floor will be used. Exterior of the building will be faced with pressed brick. Plans are being prepared and bids will be called for within two weeks.

CORONA, RIVERSIDE CO., CAL.—Store and rooms, 2 story and base, brick. Cost not stated. Architect, H. C. Koegner, 424 Broadway, L. A. Owners, Corona Investment Co. The building will be erected on a corner site, covering a large area. There will be banking rooms, post office and five stores on the first floor. Upper floor will be arranged for 43 guest rooms and several baths. Interior finish will be of pine throughout. Plans provide for steam heat and a hot water system. There will be patent store fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans are complete and bids will be called for next week.

LOS ANGELES, CAL.—Stores and theatre, brick and steel, \$90,000. Architect, Lawrence A. Valk, Union Oil Bldg., L. A. Owner, Henry Lums. This work has been mentioned here before when plans were first prepared. The building will cover a large area and has been designed to contain a moving picture theatre and five stores. Interior finish will be of pine throughout. Stores will have patent store fronts and plate glass windows. There

will be a modern ventilating system in the theatre. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Loft building, 6 story and base. Class C construction. Cost not stated. Architect, Harold Cross, Bible Institute Bldg., L. A. Owners, Lyon, McKinney & Smith. The building is to be erected on South Hill street and will have a frontage of 60 feet and a depth of 150 feet. Considerable steel will be used. There will be stores on the first floor and upper floors will be arranged for light loft. Plans provide for freight and passenger elevators, steam heat and metal window sash and frames. Interior finish will be of pine. There will be automatic sprinklers, patent store fronts and sidewalk doors. Exterior of the building will be faced with pressed brick. Plans are now nearly complete.

Contracts Awarded.

SAN FRANCISCO—Stores and offices, 8 story and base. Class A construction, \$225,000. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners Trowbridge & Perkins. Contractors, McLaren & Peterson. Sharon Bldg., S. F., general construction only. Contract price, \$225,000.

SANTA ANA, ORANGE CO., CAL.—Store and offices, 2 story and base, reinforced concrete, \$20,000. Architect, F. H. Eley, Hervey-Finlay Bldg., Santa Ana. Owner, H. D. Meyers, Contractor, N. L. Galbraith, 1929 West 3rd St., Santa Ana. Contract price, \$20,000.

PORTLAND, ORE.—Store and billiard hall, 2 story and base, brick, \$12,000. Architects, Sutton & Whitney, Lewis Bldg., Portland. Owner, Frank Keenan. Contractor, J. K. Flynn, 529 Hoyt St., Portland. Contract price, \$12,000.

THEATRES.

LONG BEACH, LOS ANGELES CO., CAL.—Theatre, 1 story and base, reinforced concrete. Cost not stated. Architects, Metcalf & Davies, 42 American avenue, Long Beach. Owners, Kuhn Amusement Co. The building will be erected on West Ocean avenue and will contain a large auditorium and one store. Interior finish will be of pine and ornamental plaster. A modern system of heating and ventilation will be installed. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being called.

LOS ANGELES, CAL.—Theatre and stores, 1 story and base, brick and steel, \$20,000. Architects, Austin & Pennel, Wright and Callender Bldg., L. A. Owner, Joseph L. Murphy. The building will be erected on a corner site covering an area of 50x150 feet. Beside the theatre there will be two stores. Interior finish will be of pine throughout. Considerable tile and ornamental plaster will be used in the theatre. There will be a modern system of ventilation. A cement floor will be used. Stores will have patent store fronts and plate glass windows. Metal window sash and frames are specified. Exterior of the building will be faced with cement plaster and artificial stone. Plans are nearly complete and figures will be taken next week.

LOS ANGELES, CAL.—Theatre, 1 story and base, brick, \$14,000. Archi-

tect, Lawrence Valk, Union Oil Bldg., L. A. Owners, H. La-tig and M. Gore. The building will be erected on a corner site, and will contain two stores besides a moving picture theatre seating 50 people. Interior finish will be of pine throughout. Construction will be fireproof. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

SEALED PROPOSALS.

S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; Portland, Ore.; E. C. BOUGHS, major, corps of engineers, U. S. Army, general purchasing officer.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received at the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 100 of the Exposition Building, Pine Street, Battery Street, San Francisco, California, at 11:30 a. m., Thursday, October 2nd, 1913, for Furnishing Ten

Thousand (10,000) Feet Cotton, Rubber-Lined Fire Hose, in accordance with specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract, the sum of the same thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman. (*)

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific In-

ternational Exposition Company at Room 115, in the Exposition Building, Pine and Battery Streets, San Francisco, California at 11:30 A. M. Thursday, October 2, 1913 for Constructing **The Court of The Four Seasons**, in accordance with the specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207 Service Building, Fillmore and Chestnut Street, San Francisco, by depositing \$50.00, which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and failing to submit bona fide bids will forfeit the deposit of Fifty Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman. (*)

dining rooms and reception halls. Bath rooms will have composition floors and tile wainscot. Automatic water heaters will be installed. Tile will be used in the kitchens. Exterior walls will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, A. T. Morris, 616 9th Avenue, S. F. The dwelling has been designed for a seven-room house with bath. All interior finish will be of pine. Hardwood floors will be used in the principal rooms. There will be a large open fire place in the living room with brick or tile mantel. Tile wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic, cement plaster on metal lath and a brick veneer base. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$9,000. San Francisco. Architects, H. Geilfus & Son, 46 Kearny St., S. F. Owner's name withheld. This work has been mentioned here before when the architect was first commissioned to prepare plans. The dwelling will be erected on Pacific Avenue near Buchanan, and will contain 16 living rooms, servants' rooms and 4 baths. Interior finish will be of pine, mahogany and other hardwoods. Hardwood floors will be used throughout. Rector system and steam heat will be installed. Bath rooms will be finished in tile. Marble will be used extensively in the butler's pantry and kitchen. There will be large open fire places with tile and brick mantels. Automatic water heater and a vacuum cleaning system will also be installed. Exterior of the house will be covered with cement plaster in imitation of cut stone. Plans are complete and figures will be called for at once.

RESIDENCE—2 story and base, frame, \$2,000. San Francisco. Owner, A. R. Lapham, 1833 McAllister Street, S. F. The dwelling will contain six rooms and bath. Interior finish will be largely of pine. Hardwood floors will be used in the living and dining rooms. There will be an open fire place and tile or brick mantel. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$5,000. San Francisco. Architect, Edward E. Young, 251 Kearny St., S. F. Owner, Thomas Scoble, 363 15th Avenue, S. F. The dwelling will be erected on 16th Avenue north of Lake, and has been designed to contain seven rooms and bath. Interior finish will be of pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath room will have composition floor and tile wainscot. An automatic water heater will be installed. The wainscot will also be used in the kitchen. Exterior of the house will be covered with rustic, ce-

Pine dealing news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO

APARTMENT HOUSE—3 story and base, frame, \$10,000. San Francisco. Architect, Milton Latschstein, 111 Ellis Street, S. F. Owner, Louise R. Harrold. The building will be erected at the corner of 11th and Market Streets covering an area of 125x80 feet. There will be several stores on the first floor besides the entrance to the apartment house. Upper floors will be subdivided into about thirty suites of two and three rooms. All apartments will have wall beds and private bath rooms. Interior finish will be of pine with elm panels and some hardwood floor. Plans provide for a steam heating system and hot water supply. Bath rooms will have cement floors and tile wainscot. Marble and tile will be used in the entrance. There will be pattern stone fronts and plate glass windows. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and contract will be awarded within a short time.

HOTEL—5 story and base, pentagon of concrete, \$25,000. San Francisco. Architect, Charles J. Rousseau, 46 Kearny St., S. F. Owner, A. Newman. The building will be erected on the east side of G Street north of Harrison, and will cover an area of 25x80 feet. There will be two stories and the hotel entrance on the first floor. Upper four floors will contain in the neighborhood of 600 rooms and a number of bath rooms. Each room will have cement floor and tile wainscot. Plans provide for steam heat and elevator

service. There will be several rooms so arranged that they may be thrown into suites and will be equipped with all modern conveniences for light housekeeping. Exterior of the building will be faced with cement plaster in imitation of Caen stone. Plans will be complete and out for figures within one week.

HOTEL AND STORES—7 story and base, brick and steel, \$60,000. San Francisco. Architect, C. H. Barrett, 381 Bush St., S. F. Owners, Zellerbach & Levison. This building, which is to be erected on the north side of Turk Street between Mason and Taylor Streets, has been mentioned here a number of times before. At first it was decided to give the contract out on a percentage basis, but since the owners have placed plans on the open market for figures. The building will contain one store besides the hotel lobby and in the neighborhood of 110 rooms. Interior finish will be of pine and hardwood. All bath rooms will have cement floors and tile wainscot. There will be steam heat and elevator service. Exterior of the building will be faced with pressed brick. Plans are now being figured.

RESIDENCES—2, 2 story and base, frame, \$7,000 each. San Francisco. Architect, Edward E. Young, 251 Kearny Street, S. F. Owner, Matthew A. Little, 1317 14th Avenue. These houses will be erected on the west side of 14th Avenue north of Lake Street. Each dwelling will contain eight rooms and bath. Interior finish will be of pine, redwood and hardwood. There will be furnace heat and open fire places. Hardwood floors will be used in the living rooms,

ment plaster on metal lath and brick veneer base. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$7,500. San Francisco. Architect, Edward G. Garden, Phelan Bldg., S. F. Owner, Mrs. Mary L. Glazer. This dwelling will be erected on San Diego Way in St. Francis Wood, one of this city's new residence sections. The dwelling will contain eight or nine rooms, baths and sleeping porch. Interior finish will be of pine, redwood and hardwood. There will be furnace heat and open fire places. Mantels will be of brick and tile. Hardwood floors will be used in the principal rooms. Bath rooms and kitchen will have tile wainscot. Composition floors will be used in the bath rooms. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are nearly complete and figures are shortly be called.

RESIDENCES—1, 2 story and base, frame, \$5,000 each. San Francisco. Architect, Edward E. Young, 251 Kearny St., S. F. Owner, Thomas S. Noble, 353 4th avenue, S. F. These dwellings are to be erected on property on 4th avenue near Lake. Each house will contain seven rooms and bath. Interior finish will be of pine, elm and hardwood. Hardwood floors will be used in the principal rooms. There will be a large open fire place in each living room. Mantels will be of brick and tile. Tile wainscot will be used in the bath rooms and kitchens. Automatic water heaters will be installed. Exteriors will be covered with cement plaster, rustic, shiplap and brick veneer base. Plans are now being prepared and when complete the work will be done by Day Labor.

COURT OF THE FOUR SEASONS—Frame construction. Cost not stated. San Francisco. Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Working drawings for the building to be known as the Court of the Four Seasons, one of the most beautiful of the Exposition buildings, have been completed. Bids are now being called for on the general construction. Figures are to be opened by the Buildings and Grounds Committee on October 2nd. Plans and specifications can be obtained from the Director of Works, Service Bldg. An official proposal appears in another column of this issue.

PLUMBING, HEATING, VENTILATING AND ELECTRIC WORK ON EXPOSITION AUDITORIUM. Architects John Galen Howard, John Reid, Jr. and Frederick H. Meyer, associated. S. F. Owners, Panama-Pacific International Exposition Co. Bids were received September 18 from twenty-nine contractors on the plumbing, heating, ventilating system and electric work on the Exposition Auditorium which is to be erected in San Francisco's new Civic Center. Bids were asked for on nine distinct propositions. On proposition "A" which included a lump sum bid for all work, no figures were received. Following are the low men on the other eight propositions: Plumbing, heating and ventilating, complete, Kiernan & O'Brien, \$100,796; plumbing only, F. W. Snook, \$23,967; heating and ventilating only, Atlas Heating and Ventilating Co., \$72,690; heating and ventilating as specified under division

No. 1, Victor Engineering Co., \$13,550; same as specified under division No. 2, Atlas Heating and Ventilating Co., \$27,235; same as specified under division No. 3, Peterson-James Co., \$23,500; same under division No. 4, Pacific Blower and Heating Co., \$6,550; electric work, complete, Newberry-Bandini Co., \$17,400. A complete list of all figures received appears under the heading of San Francisco in this issue.

HORTICULTURAL BUILDING—Frame and steel construction. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids were also opened at Thursday's (September 18) session of the Buildings and Grounds Committee of the Exposition Co. for the general construction of the Horticulture Building. Three propositions were considered. Proposition A with lumber furnished by Exposition Co. Proposition B with lumber furnished and erected by contractor, and Proposition C erecting structural steel. John Monk was low bidder on Proposition A at \$226,218; Streshlow-Freeze & Petersen were the only bidders to submit figures on Proposition B, their bid for the complete work being \$319,775. The Golden West Iron Works were the only bidders on Proposition C and \$11,745 for erecting the structural steel and \$20 per ton for receiving, unloading, storing and erecting the steel. A complete list of these figures appears under the heading of San Francisco in this issue.

CHURCH—1 story and base, frame, \$12,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners, Japanese Mission Church. The Japanese have secured a site on Pine street, in the Japanese quarter, and will shortly commence construction on their new building. The lot covers an area of 56x120 feet, nearly all of which will be occupied by the building. The design is in the Greek Doric style. Besides a main auditorium seating 400 people there will be several Sunday school rooms. Interior finish will be of pine and ornamental plaster. Some art glass will be used. Exterior of the building will be covered with cement plaster. Plans are being prepared.

FLATS—1, 2 story and 1, 3 story, frame, \$2,800 and \$6,900. San Francisco. Architect, Jules Godard, 635 Montgomery street, S. F. Owner, E. Lange. These two buildings will be erected on the north side of Broadway east of Taylor. The three-story structure will face Broadway and the two-story building will be erected on the rear of the same lot. Interior finish will be of pine and elm panels. Some hardwood floors will be used. There will be open fire places and tile mantels. The wainscot will be used in the bath rooms and kitchens. There will be a mosaic floor in the vestibules. Exteriors will be covered with rustic shiplap and a brick veneer base. Plans are complete and figures are being taken.

GARAGE—2 story and base, reinforced concrete, \$15,600. San Francisco. Architect, August Nordin, Mills Bldg., S. F. Owner, Robert Jones. The building will be erected on the north side of Post street west of Polk, and will cover an area of 68 feet 9 inches by 120 feet. Construction will be fireproof throughout with reinforced con-

crete walls and floors. Interior partitions will be of metal lath and plaster. Besides the office and machine shop, there will be considerable storage space. Interior finish will be of pine. Plans provide for metal window sash and frames. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

CITY HALL—Ornamental granite work. Cost not stated. San Francisco. Architects, Bakewell & Brown, 251 Kearny St., S. F. Owners, City and County of San Francisco. Plans are complete and have been approved for the ornamental granite work over the two main entrance pediments on the new City Hall building. Bids are now being called for by the Board of Public Works. Bids will be opened on October 2nd. Plans and specifications can be secured from the Board of Public Works, Temporary City Hall Bldg.

RESIDENCES—2, 2 story and base, frame, \$2,500 each. San Francisco. Architect, none. Owner, P. Nelson, 39 Presidio Terrace, S. F. These two houses will each contain six rooms and bath, and will be erected on 15th avenue north of California street. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be large open fire places in each of the living rooms. Mantels will be of brick or tile. Tile wainscot will be used in the bath rooms and kitchens. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

STORE AND LOFT ADDITION—2 story and base, brick and steel, \$17,000. San Francisco. Architect, C. W. Dickey, Bank of Savings Bldg., Oakland. Owner, Howard Smith. The present building on Mission street west of 7th is to have a two-story addition. Construction will be of brick and steel. The building covers an area of 65x165 feet. The two new stories will be arranged for lofts. Interior finish will be of pine. Elevator service is provided. There will be metal store fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

STORES—1 story and base, brick and steel, \$27,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners, Holbrook & Maguire. The property at the northwest corner of Clay and the Embarcadero is to be improved at once by the construction of a two-story building covering a large ground area. There will be seven bays. Interior finish will be of pine throughout. Plans call for patterned store fronts and plate glass windows. A cement floor will be used. Exterior of the building will be faced with pressed brick. Plans are being prepared and bids will be called for within two weeks.

FIRE HOSE—Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids are now being taken for furnishing the Exposition Company with 20,000 feet of fire hose. Hose is to be of the common cotton variety lined with rubber. Full particulars can be obtained from the Director of Works, Service Bldg. An official proposal appears in another column of this issue.

Bids will be opened on October 2nd.

STATE EXHIBIT BUILDING—3 story frame and steel, \$150,000 to \$200,000. San Francisco. Architect's name not given. Owners, State of New York. Plans have been approved by the New York State Commission for the Exhibit building to be erected at the Panama-Pacific International Exposition in 1915. Plans show a structure 220x100 feet. Norman E. Mack of Buffalo is chairman of the State Fair Commission.

Contracts Awarded.

STORES AND OFFICES—6 story and base. Class A construction, \$225,000. San Francisco. Architect, Frederick H. Meyer. Bankers' Investment Bldg., S. F. owners. Trowbridge & Perkins. Contractors, McLaren & Peterson. Sharon Bldg., S. F. general construction only. Contract price, \$225,000.

Exposition Company Opens Many Bids.

Figures for Plumbing, Heating, Ventilating and Electric Work at Auditorium and Other Big Work Opened.

Bids were received from twenty-nine contractors on the plumbing, heating, ventilating system and electric work on the Exposition Auditorium which is to be erected in San Francisco's new Civic Center. Bids were asked for on nine distinct propositions. On proposition "A," which included a lump sum bid for all work, no figures were received. Following are the low men on the other eight propositions: plumbing, heating and ventilating, complete, Kiernan & O'Brien, \$100,790; plumbing only, F. W. Snook, \$23,967; heating and ventilating only, Atlas Heating and Ventilating Co., \$72,690; heating and ventilating as specified under division No. 1, Victor Engineering Co., \$13,555; same as specified under Division No. 2, Atlas Heating & Ventilating Co., \$27,235; same as specified under Division No. 3, Peterson-James Co., \$23,500; same under Division No. 1, Pacific Blower & Heating Co., \$6,550; electric work, complete, Newbery-Bendheim Co., \$17,100.

Bids were also opened at Thursday's session of the Buildings and Grounds Committee of the Exposition Co. for the general construction of the Horticulture Building. Three propositions were opened. Proposition A with lumber furnished by Exposition Co. Proposition B with lumber furnished and erected by contractor and Proposition C erecting structural steel.

John Monk was low bidder on Proposition A at \$29,175. Streshlow-Freeze & Petersen, were the only bidders to submit figures on Proposition B, their bid for the complete work being \$319,775. The Golden West Iron Works were the only bidders on Proposition C and asked \$11,745 for erecting the structural steel and \$1,000 per ton for receiving, unloading, storing and erecting the steel.

All bids submitted for the plumbing, heating, ventilating systems and electric work for the Exposition Auditorium follow:

Proposition B

A lump sum bid for plumbing, heating and ventilating systems complete.
Wittman-Lyman Co., \$101,700
Peterson-James Co., 106,500
Kiernan & O'Brien, 100,790

Proposition C

A lump sum bid for plumbing only.
Wittman-Lyman Co., \$25,860
J. G. Sutton Co., 24,900
The Turner Co., 24,230
A. Lettich, 30,300
J. Looney Co., 26,800
Burnham Plumbing Co., 26,450
A. Coleman, 24,929
F. W. Snook Co., 23,967
F. J. Kilham, 24,417
J. M. Lettich, 26,810

Proposition D

A lump sum bid for all heating and ventilating.
Wittman-Lyman Co., \$76,843
Pacific Fire Extinguisher Co. 72,943
R. Dalziel, 84,800
Atlas Heating & Ventilating Co., 72,690
J. G. Sutton Co., 74,485
Mangrum & Otter, 87,710

Proposition E

A lump sum bid for all work specified under Division 1, heating and ventilating.
Wittman-Lyman Co., \$14,717
Pacific Fire Extinguisher Co. 12,733
R. Dalziel, 15,127
Victor Engineering Co., 12,555
Atlas Heating & Ventilating Co., 14,640
J. E. O'Mara, 14,595

Proposition F

As in Proposition E under Division 2.
R. Dalziel, \$25,150
Victor Engineering Co., 32,000
Atlas Heating & Ventilating Co., 27,235

Proposition G

As in Propositions E and F under Division 3.
Wittman-Lyman Co., \$25,760
Peterson-James Co., 23,500

General Construction Horticulture Building.

The following is a complete list of all figures submitted for the general construction of the Horticulture Building. Proposition A asked for figures with the Exposition Company furnishing the lumber, certain deductions and unit prices as are noted below. Proposition B a bid with lumber furnished by the contractor, certain deductions and unit prices as noted below and on Proposition C erecting structural steel

and also a unit price per ton for receiving, unloading, storing and erecting:

Proposition A

One—Building complete, Exposition Company to furnish lumber.

Bidders—(1) Streshlow-Freeze and Petersen; (2) Connary-Peterson Co.; (3) J. D. Hannah; (4) John Monk.

(1) \$269,575; (2) \$237,860; (3) \$233,773; (4) \$226,218.

Two—Deduct for all work specified under structural steel erection.

(1) \$15,000; (2) \$12,750; (3) \$13,000; (4) \$12,000.

Three—Deduct for omission of all cold water paint.

(1) \$2,200; (2) \$2,700; (3) \$2,500; (4) \$2,800.

Unit Prices.

(a) Lumber furnished and erected by Contractor.

(1) \$40 per M ft. B. M.; (2) \$35 per M ft. B. M.; (3) \$35 per M ft. B. M.

(b) Lumber furnished by Exposition Company, in place.

(1) \$20 per M ft. B. M.; (2) \$15 per M ft. B. M.; (3) \$15 per M ft. B. M.

(c) Truss rod, plates, iron washers, etc.

(1) \$75 per ton; (2) \$80 per ton; (3) \$75 per ton.

(u) Plastering on sheathing.

(1) \$.50 per sq yd; (2) \$.30 per sq yd; (3) \$.30 per sq yd.

(e) Plastering on metal lath.

(1) \$.90 per sq yd; (2) \$.75 per sq yd; (3) \$.75 per sq yd.

(f) Concrete in place.

(1) \$13 per cu yd; (2) \$12.50 per cu yd; (3) \$12.50 per cu yd.

(g) Reinforcing steel in place.

(1) \$.04 per lb.; (2) \$.04 per lb.; (3) \$.032 per lb.

(h) Erecting structural steel.

(1) \$24.50 per ton; (2) \$27 per ton; (3) \$27 per ton.

(i) Prepared roofing in place.

(1) \$3 per square; (2) \$3 per square; (3) \$3.25 per square.

Proposition B

One—Building complete, contractor to furnish lumber.

Bidder—Streshlow-Freeze & Petersen (1) \$319,775.

Two—Deduct for all work specified under structural steel erection (1) \$15,000

Three—Deduct for omission of all cold water paint (1) \$2,200

Four—Unit prices.

(a) lumber in place (1) \$40 per M ft. B. M.

(b) truss rods, plates, iron washers, etc., (1) \$75 per ton.

(c) Plastering on sheathing (1) \$.50 per square yard.

(d) Plastering on metal lath (1) \$.90 per square yard.

(e) Concrete in place (1) \$12 per cubic yard

(f) Reinforcing steel in place (1) \$.04 per lb.

(g) Erecting structural steel (1) \$24.50 per ton.

(h) Prepared roofing in place (1) \$3.00 per square.

Proposition C

1—All work specified under structural steel erection.

2—Price per ton for receiving, unloading, storing and erecting structural steel

Bidder—Golden West Iron Works. (1) \$11,745; (2) \$20 per ton.

General Lockout Averted.

State Building Trades Council Concedes the Demands of the Local Contractors.

As predicted in the "Builder" last Saturday the threatened tie up of the entire building industry in San Francisco and Oakland was amicably settled and the storm was safely weathered late Friday night, when, in the presence of representatives of both the contractors and organized labor, a formal agreement to arbitrate their differences for a period not to exceed ninety days was signed by R. B. Moore, president of the Building Trades Employer's Association, and P. H. McCarthy, president of the State Building Trades Council.

The agreement was reached in the headquarters of the Building Trades Employers' Association in the Pacific Building, after repeated conferences between committees for each side. As a result construction work on a number of large jobs in both San Francisco and Oakland which has been halted for the past two weeks will be resumed at once and be continued during the period of arbitration.

That a lockout affecting more than 10,000 workmen engaged in the building trades of this city was averted by the amicable solution reached Friday night, was the statement of R. B. Moore and others prominent in the organizations of general contractors. This was the ultimatum held out by the contractors in case the Building Trades Council refused definitely to arbitrate their differences.

Through the agreement thus rendered the structural iron workers have gone back to work at their old hours and did also the hoisting engineers, but the question of the hours and pay of the latter will be the subject of arbitration in the meantime.

Much satisfaction was expressed among the contractors at the acceptance by the Building Trades Council of the arbitration plan and also in averting an ugly labor difference.

"The Building Trades Council has met our demand for arbitration," said R. B. Moore, "and a formal agreement has been entered into whereby arbitration for a period not to exceed ninety days will be resorted to in an effort to satisfactorily settle all disputes between the contractors and their employees."

President P. H. McCarthy also stated that the Building Trades Council had finally approved of the arbitration plan. He, however, endeavored to minimize the seriousness of the situation.

Charles W. Gompertz, president of the General Contractors' Association, declared that the question for the contractors had not been one of wages or length of working hours.

"What we want is an assurance that in all cases of disputes or misunderstanding both sides will be given ninety days' time within which to set forth their grievances and endeavor to reach a peaceful solution through arbitration, during which time the work can go on without interruption. This subserves

the best interests of the workmen," said the contractor and the general public.

RAIN STOPS FOREST FIRE.

STEVENS (Wash.), September 23.—A heavy rain Sunday put a check on the forest fire which had raged near Carson for 36 hours. One ranch house and several thousand cords of firewood were burned. J. G. Harris, Ross Inman and the Yeoman Lumber Company are the heaviest losers of standing timber.

OAKLAND AND ALAMEDA

APARTMENT HOUSE—4 story and base, frame, \$12,000. Berkeley, Alameda Co., Cal. Architect, George W. Patton, 2126 Emerson St., Berkeley. Owner, Mrs. E. N. Richardson. The building will be erected on Dana street near Channing, and has been designed to contain six modern suites of three and four rooms. Interior finish will be of pine and elm with some hardwood floors. A central heating system will be installed. All suites will have wall beds and private bath rooms. Bath rooms will have composition floors and the wainscot. Marble and tile will be used in the entrance. Exterior of the building will be finished with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased by the architect.

BUNGALOW—1½ story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, none. Owners, E. R. Peake Co., 2127 University avenue, Berkeley. The dwelling has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and hardwood. There will be a large open fire place in the living room and brick mantel. Hardwood floors will be used in the bath room and kitchen. Composition floor will also be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

BUNGALOWS—5, 1 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, none. Owner, Al. Story, Builders' Exchange, Oakland. These houses will be erected on property on Indian Rock avenue. Each dwelling has been designed to contain six rooms and bath. Interiors will be finished in pine with some elm panels. Hardwood floors will be used in the living rooms and dining rooms. There will be a large open fire place in each of the living rooms. Mantels will be of brick and tile. Bath rooms will have the wainscot. Interiors will be covered with cement plaster. Bingles and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Frederick P. Thomas. The dwelling will be erected in Thousand Oaks Park, and has been designed for an eight-room house with bath and sleeping porch. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath room will have composition floor and the wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with stucco. Plans are complete and figures are being taken.

BUNGALOW—1 story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, C. W. Woodard, 1540 Broadway, Oakland. The dwelling will be erected on Bright avenue south of 13th avenue, and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and hardwood. There will be furnace heat and open fire places. Mantels will be of brick and tile. Hardwood floors will be used in the living room, dining room and reception hall. Bath room will have cement floor and the wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$4,500. Piedmont, Alameda Co., Cal. Architect, none. Owners, E. J. Aalto and Otto Peterson, 1531 California street, Berkeley. The dwelling, which has been designed for a seven-room house with bath and sleeping porch, will be erected on one of the most beautiful homesites in Piedmont. Interior will be finished in pine, hardwood and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of granite and tile. Bath rooms will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

GARAGE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Mrs. E. J. Calver. The building has been designed for private garage and will be erected on property adjoining the owner's home. First floor will contain storage space and machine shop and upper floor will be arranged for living rooms. Interior finish will be of pine throughout. There will be a cement floor on the first floor. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

ADDITION—General construction. Cost not stated. Oakland, Cal. Architects, Palmer & Hornbostel, New York, associated with J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Bids will be received on October 10 by the city council for the general construction of the \$1,000,000 Municipal Auditorium which is to be erected on the shores of Lake Merritt. Plans and specifications can be secured from Architect Donovan. The work will include practically all construction except the foundation work and steel contract for which have already been let.

CITY HALL—Cabinet work and painting. Cost not stated. Oakland, Cal. Architects, Palmer & Hornbostel, New York, associated with Architect J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Plans and specifications for the interior painting and for furnishing and setting all cabinet work for the new City Hall building are complete. Separate figures will be taken for each part of this work. Bids will be opened

by the Oakland City Council on October 9th. Plans and specifications can be secured from Architect J. J. Donovan, Security Bank Bldg.

POST OFFICE—Painting, cement work and brick work, subfigures. Alameda Alameda Co., Cal. Architect, George Wenderoth, Washington, D. C. Owners, United States Government. Contractor, William V. Murray, Post Office Bldg., Alameda, wants subfigures from San Francisco and Oakland contractors on painting, cement sidewalk, cement curbs and coping work, brick driveway and court yard work and other work. Interested parties can see Mr. Murray at the Alameda Post office.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, A. H. Geriz. The dwelling will contain seven rooms, bath and sleeping porch. Interior finish will be of pine, redwood and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath room will have the floor and wainscot. An automatic water heater will be installed. Tile will also be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans have been revised and new bids are being taken.

BUNGALOW—1 story and base, frame, \$3,000. Oakland, Cal. Architect, Charles F. Shaw, Macdonough Bldg., Oakland. Owner, Henry Brath, 682 31st street. The dwelling will be erected on the north side of 42nd street near West street, and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine and redwood with some hardwood floors. Plans provide for furnace heat and open fire places. Mantels will be of brick. There will be a composition floor in the bath room and tile wainscot in both the bath and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$6,500. Oakland, Cal. Architect, Clarence A. Tantan, 251 Kearny St., S. F. Owner, Mrs. J. H. Lewis. The dwelling will be erected at the northeast corner of Keith avenue and Pearl street, and will contain eight rooms, bath and sleeping porch. A garage will also be erected on the east of the lot. Interior of the dwelling will be handsomely finished in pine, redwood and hardwoods. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Bath room will have composition floor and tile wainscot. An automatic water heater will be installed. Exterior of both the house and garage will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Contracts Awarded.

SAN JOSE AND THE SANTA CLARA VALLEY.

CITY HALL—2 story and base. Concrete and brick. \$20,000. Burlingame, San Mateo Co., Cal. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owners, City of Burlingame. Bids opened recently for this work show Robert Trost of San Francisco low at \$19,958. Only \$20,000 is available for complete construction, and it is probable that plans will have to be revised. No action was taken by the City Trustees. A complete list of all figures appears under the heading of San Jose and the Santa Clara Valley in this issue.

BUNGALOWS—1 story and base, frame. Cost not stated. San Jose, Santa Clara Co., Cal. Architect, none. The following Day Labor jobs are reported as about to be started in San Jose: G. W. Latta, 434 N Eleventh St., San Jose, 1 story six-room frame cottage, \$2,000, and J. H. Wagner, 320 S Sixteenth St., San Jose, 1 story six-room cottage, \$2,000.

Burlingame City Hall Bids Are Opened.

Robert Trost of This City Low Man on Two-story Building Designed by Architect Charles Peter Weeks.

Fourteen sets of figures were received by the Burlingame City Trustees, September 15th for the construction of their new City Hall building. The structure is a two-story brick and concrete building designed by Architect Charles Peter Weeks, Mutual Bank Bldg., this city. Robert Trost submitted the lowest figure at \$19,958. No official action was taken by the Trustees. Only \$20,000 is available for construction complete and it is probable that plans will have to be re-

vised. The following firms figured the work:

Veneered Panels that
ARE good-----order
today from

White Brothers

5th and Brannan Streets

San Francisco

The Panels with the smooth finish.

It doesn't take long to distinguish the WYBRO Panels from interior makes.

The smooth and even finish of the Wybro Panels makes them stand out as the most superior panels on the market.

Look for the Wybro stamp on the back of every panel---the stamp that insures smooth finish and lasting quality.

LOS ANGELES AND SOUTHERN CALIFORNIA.

RESIDENCE — 2 story and base, frame, \$7,000. Los Angeles, Cal. Architect, George H. Skidmore, Union Oil Bldg., L. A. Owner, Mrs. C. A. Bennet. The dwelling will be erected at the corner of Eighth street and Mountain avenue, and has been designed to contain 10 rooms, baths and sleeping porch. Interior finish will be of pine and birch. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with stucco. Plans are now being prepared.

APARTMENT HOUSE—2 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, R. M. Jackson, Citizens' National Bank Bldg., L. A. Owner, Southwest Investment Co. The building will be erected at

the corner of 18th and San Pedro streets covering an area of 10x76 feet. First floor will be arranged for stores and upper floor will be subdivided into four apartments of three rooms and bath. Interior finish will be of pine throughout. Plans provide for steam heat and a hot water system. Stores will have patent store fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Bath rooms will have cement floors and tile wainscot. Plans are being prepared.

APARTMENT HOUSE—2 story and base, brick and steel, \$15,000. Los Angeles, Cal. Architect, none. Owner, Mrs. Fannie L. Lowe, 621 West 5th street, L. A. The building will be erected on Slansen avenue near Hoover street. There will be several stores on the first floor and twelve suites of two and three rooms each on the upper floors. All apartments will have beds and private baths. Interior finish will be of pine and redwood. There will be steam heat and a hot water supply. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

LODGE HALL ALTERATIONS—2 story and base, brick. Cost not stated. Ontario, San Bernardino Co., Cal. Architect, Eager & Eager. Story Bldg., L. A. Owners, Independent Order of Odd Fellows. The first floor of the present building will be altered for store purposes and the second floor will be rearranged for a large lodge room, reception hall, banquet room, lounging rooms, billiard rooms and kitchen. Interior finish will be of pine and hardwood. A new steam heating system will be installed. Exterior of the building will be faced with cream colored pressed brick. Plans are now being prepared.

HOSPITAL—1 story and base, reinforced concrete, \$250,000. San Diego, Cal. Architect, John S. Schell. Brooks Bldg., San Diego, Cal. Owners, H. Alex. T. Crane and J. L. Adams. A site covering an area of 100x250 feet has been secured on Cedar street between 7th and 8th streets. The basement will contain the emergency wards, storage space and mechanical equipment. First floor will contain the administrative departments, consultation rooms, dining room and kitchen. Second and third floors will be devoted to wards and private rooms. The fourth floor will contain two operating rooms. Outpatients ward will occupy the roof. Construction will be fireproof. There will be steam heat, elevator service and a vacuum cleaning system. Exterior will be faced with cement plaster. Plans are now being prepared.

HOTEL—1 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Parkinson & Ferguson. Security Bldg., L. A. Owner, W. W. Neuer. The building will occupy a corner site and will contain several stores on the first floor besides the hotel lobby and entrance. Upper floors will be arranged for 110 guest rooms, 25 per cent of which will have private baths. Interior finish will be of pine and hardwood. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Store will have patent fronts. Bath rooms will have cement floors and tile wainscot. Exterior of the building

will be faced with pressed brick. Plans are complete and figures are being taken.

HOTEL—1 story and base, brick and steel. Cost not stated. Ocean Park, Los Angeles Co., Cal. Architect, S. Tilden Norton. Title Insurance Bldg., L. A. Owners, W. M. Gottschalk and A. Storty. The building will be erected on a corner lot and will contain five stories on the first floor. Upper floor will contain in the neighborhood of 120 guest rooms, a large percentage of which will have private baths. Interior finish will be of pine and oak. Plans provide for steam heat, elevator service and a vacuum cleaning system. Bath rooms will have cement floors and tile wainscot. There will be patent store fronts. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are being prepared.

RESIDENCE—2 story and base, brick and frame, \$15,000. Los Angeles, Cal. Architect, H. H. Whiteley. Story Bldg., L. A. Owner, S. M. Cooper. The dwelling will be erected on a corner lot and will contain in the neighborhood of 11 rooms and 3 baths. Interior finish will be of pine, cedar, oak and birch. Hardwood floors will be used in the principal rooms. There will be furnace heat and three open fire places. Mantels will be of tile. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. Exterior of the dwelling will be faced with cream colored pressed brick. Plans are being prepared.

RESIDENCE—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, Elmer Grey. Wright and Callender Bldg., L. A. Owner's name withheld. The dwelling will occupy a corner site and has been designed for a 14-room house with 4 baths and sleeping porches. Interior finish will be of pine, oak, cedar and birch. Hardwood floors will be used in the principal rooms. There will be furnace heat and four open fire places. A garage will also be erected on the property. Bath rooms will have composition floors and tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

STORES AND THEATRE—1 story and base, brick and steel, \$30,000. Los Angeles, Cal. Architect, Lawrence A. Volk. Union Oil Bldg., L. A. Owner, Henry Lamb. This work has been mentioned here before when plans were first prepared. The building will cover a large area and has been designed to contain a moving picture theatre and five stores. Interior finish will be of pine throughout. Stores will have patent store fronts and plate glass windows. There will be a modern ventilating system in the theatre. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LOFT BUILDING—6 story and base, Class C construction. Cost not stated. Los Angeles, Cal. Architect, H. Ross Cross. Bible Institute Bldg., L. A. Owners, Leon McKimney & Smith. The building is to be erected on South Hill street and will have a frontage of 60 feet and a depth of 150 feet. Considerable steel will be used. There will be store on the first floor and upper floors will be arranged for big lifts

Plan provide for freight and passenger elevators, steam heat and metal window sash and frames. Interior finish will be of pine. There will be automatic sprinkler, patent store fronts and sidewalk doors. Exterior of the building will be faced with pressed brick. Plans are now nearly complete.

THEATRE—1 story and base, reinforced concrete. Cost not stated. Long Beach, Los Angeles Co., Cal. Architects, Metcalf & Davies, 13 American avenue, Long Beach, Owners, Kuhn Amusement Co. The building will be erected on West Ocean avenue and will contain a large auditorium and one store. Interior finish will be of pine and ornamental plaster. A modern system of heating and ventilation will be installed. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being called.

THEATRE AND STORES—1 story and base, brick and steel, \$20,000. Los Angeles, Cal. Architects, Austin & Pennell. Wright and Callender Bldg., L. A. Owner, Joseph L. Murphree. The building will be erected on a corner site covering an area of 50x150 feet. Besides the theatre there will be two stores. Interior finish will be of pine throughout. Considerable tile and ornamental plaster will be used in the theatre. There will be a modern system of ventilation. A cement floor will be used. Stores will have patent fronts and plate glass windows. Metal window sash and frames are specified. Exterior of the building will be faced with cement plaster and artificial stone. Plans are nearly complete and figures will be taken next week.

THEATRE—1 story and base, brick, \$14,000. Los Angeles, Cal. Architect, Lawrence Volk. Union Oil Bldg., L. A. Owners, H. Lustig and M. Gore. The building will be erected on a corner site and will contain two stores. Besides a moving picture theatre seating 500 people. Interior finish will be of pine throughout. Construction will be fireproof. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

CHURCH—1 story, frame, \$10,000. Los Angeles, Cal. Architects, Train & Williams. Exchange Bldg., L. A. Owners, York Boulevard Methodist Church. The building has been designed in the Mission style and will have an auditorium with a seating capacity of 250 people. Sunday school rooms and parsonage study. Interior finish will be of pine and redwood. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures will shortly be taken.

LIBRARY—1 story and base, brick, \$60,000. Huntington Beach, Los Angeles Co., Cal. Architect, E. L. Hopkins. Delta Bldg., L. A. Owners, Town of Huntington Beach. The building, which is to be classic in design, will be erected on a corner site, covering an area of 38x60 feet. Interior will be finished in pine and hardwood. There will be two reading rooms, librarian's office and stock room. Maple floors will be used. A central heating system will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

STORE AND ROOMS—2 story and base, brick. Cost not stated. Corona, Riverside Co., Cal. Architect, H. C. Koenner, 124 Broadway, L. A. Owners, Corona Investment Co. The build-

er. Concrete investment only. The building will be erected on a corner site, covering a large area. There will be banking rooms, post office and five stores on the first floor. There will be patent stone fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans are complete and bids will be called for next week.

Contracts Awarded.

HOSPITAL—2 story and base, reinforced concrete, \$15,111. Santa Ana, Orange Co., Cal. Architects' name not given. Owners, Orange County. Contractor, Chas. McNell, 911 Spurgeon street, Santa Ana, general construction only. Contract price, \$15,111.

PASSENGER STATION—2 and 1 story, Class A and Class C, \$250,000. Los Angeles, Cal. Architects, Parkinson and Ferguson, Security Bldg., L. A. Owners, Southern Pacific Co., Contractors, Atin Planning Mill Co., 820 McCarty St., L. A. general construction only. Contract price \$250,000.

STORE AND OFFICES—2 story and base, reinforced concrete, \$20,000. Santa Ana, Orange Co., Cal. Architect, F. H. Elvey, Harvey-Elvey Bldg., Santa Ana. Owner, H. D. Meyers. Contractor, N. L. Galtrecht, 1029 West 3rd St., Santa Ana. Contract price, \$20,000.

PORTLAND AND OREGON.

RESIDENCE—3 story and base, brick, \$35,000. Portland, Ore. Architects, Ellis P. Lawrence and William B. Holford, Chamber of Commerce Bldg., Portland. Owner, Daniel Kern. The dwelling has been designed for a modern city residence, and will contain in the neighborhood of 14 rooms, several baths and sleeping porch. Interior finish will be largely of hardwoods with pine. Hardwood floor will be used in the principal rooms. There will be steam heat and open fire places. Kitchens will be of brick and tile. Bath rooms will have tile floors and wainscot. Exterior of the house will be faced with pressed brick. Plans are complete and the work is being done by Day Labor.

HOTEL—3 story and base, brick and steel, \$34,000. Portland, Ore. Architect, A. C. Ewart Beck Bldg., Portland. Owner, Jessie M. James. The building will be erected on 6th street near Faving, covering an area of 50x200 feet. Plans provide for two stories on the ground floor besides the hotel lobby. Upper floors will be arranged for a total of 55 guest rooms and a number of public baths. There will be steam heat and a hot water supply. Interior finish will be of pine throughout. There will be patent stone front and plate glass windows. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are being prepared.

WAREHOUSE—1 story and base, brick and concrete, \$20,000. Baker City, Ore. Architect, M. P. White, Baker City. Owner, S. A. Holmes. The building has been designed with foundations and exterior walls heavy enough to carry an additional story. The building will be on an area of 50x200 feet and will be erected near the railroad and will have spur track facilities.

There will be a cement floor, metal window sash and frames and fire proof doors. Exterior will be faced with cement plaster. Plans are now being prepared.

Contracts Awarded.

HOTEL—2 story and base, brick. Cost not stated. Sheridan, Ore. Architects, Brubaker Construction Co., Railroad Exchange Bldg., Portland. Owner's name not given. Contractors, Brubaker Construction Co., Railroad Exchange Bldg., Portland. Contract price not stated. Note: The building will cover an area of 58x100 feet.

STORE AND BILLIARD HALL—2 story and base, brick, \$12,000. Portland, Ore. Architects, Sutton & Whitney, Lewis Bldg., Portland. Owner, Frank Keenan, Contractor, J. K. Flynn 589 Hoyt street, Portland. Contract price, \$12,000.

SEATTLE AND WASHINGTON.

NEW ARCHITECTURAL FIRM ANNOUNCED.

TACOMA, WASH.—C. E. W. Lundberg and Frank Mahon have formed a co-partnership for the practice of architecture under the firm name of Lundberg & Mahon. Offices will be in the President Building, Tacoma.

Both members of the firm are well known members of their profession in the city of Tacoma and throughout the States of Washington and Oregon. The partnership is regarded by their many friends as a strong combination of business ability and professional skill.

APARTMENT HOUSE—3 story and base, brick and steel, \$37,000. Seattle, Wash. Architect, Robert E. Knipe, Henry Bldg., Seattle. Owner, Robert E. Knipe. The building will be erected on 18th avenue near Republican street, and will cover an area of 42x114 feet. Interior has been arranged for ten large suites, ranging from four to seven rooms. Interior finish will be of pine and hardwood with hardwood floors in all dining and living rooms. Plans provide for steam heat, elevator service, vacuum cleaning system and hot water supply. Bath rooms will have cement floors and tile wainscot. Tile and marble will be used in the entrance vestibule. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

Contracts Awarded.

HOTEL—3 story and base, brick and steel, \$125,000. Seattle, Wash. Architect, A. Wickersham, Lyon Bldg., Seattle. Owners, Yesler Estate. Contractors, Butler Construction Co., Central Bldg., Seattle. Contract price, \$125,000.

LIBRARY—1 story and base, brick, \$10,000. Renton, Wash. Architect, Harold H. Ginnold, Epler Bldg., Seattle. Owners, City of Renton. Contractors, Eckman & Mowatt, Mutual Life Bldg., Seattle. Contract price not stated.

DRAINAGE CANAL FOR YURA.

YURA CITY (Butter Co.), September 20.—The Directors of Reclamation District 1394 have decided to start immediately the construction of four miles of drainage canal proposed to

be built from the pumping plant to a northerly point. The work is to be done by a large excavator and will be under the supervision of the Directors.

The prime object of the canal is to drain a large acreage that is flooded during high water stages to such an extent that the crops cannot be planted in time. The land is especially valuable for growing beans. If present plans carry a \$60,000 pumping plant will be installed next year.

FOREIGN TRADE OPPORTUNITIES.

[Inquiries in which addresses are omitted are on file at Bureau of Foreign and Domestic Commerce, Washington, D. C. In applying for addresses refer to file number.]

Consuls are requested to contribute to this department, and in doing so should in each instance state in what language correspondence should be conducted.

No. 11599, Automobile.—Inquiry has been made at an American consulate for the description and price of a 6-passenger automobile. The would-be purchaser wants a low-priced car of light or medium weight, but with sufficient power to climb steep hills with a full load. Manufacturers who are interested should send descriptions and prices to the consulate in question for transmission to the inquirer.

No. 11600, Household articles and kitchen utensils.—A manufacturers' agent in France informs an American consular officer that he desires to obtain agencies for American manufacturers of household articles, such as are sold in department stores. He particularly specifies glassware, enameled and aluminum goods and small tools.

No. 11560, Sanitary lavatories.—Inquiries have been made at an American consulate by a member of a Latin American municipal council regarding the manufacturers or washing basins in which the water spouts up from the center in such a way that a person can wash in running water. Catalogues and price lists should be sent to the inquirer at once.

No. 11502, Steam tug.—The Harbor Board, Santander, Spain, invites tenders for steam tug for dredgers at an estimated cost of \$18,193. Particulars may be obtained of Junta de Obras del Puerto.

No. 11563, Oil tanks, machinery, and tools.—An American consular officer in a Latin American country reports that there is now being constructed a plant for the extraction of petroleum from wells, and the storage of it in tanks. Other projects are contemplated, and any American houses wishing to become listed as possible bidders should send their names to an official named in the report. Copy of the complete report, as well as the latest official reports on the oil exploitations may be obtained from the Bureau of Foreign and Domestic Commerce.

No. 11567, Sewage works.—The Egyptian Ministry of Public Works, on behalf of the municipality of Port Said, invite tenders for the construction of the disposal work in connection with the drainage of Port Said, including detritus tanks, sedimentation tanks, four circular bacterial filters, humps

tanks, and all necessary pipes, chambers, and channels. Tenders will be received until October 11 by the Controller General, Main Drainage Department, Ministry of Public Works, Cairo, at whose office conditions of tender plans, etc., may be seen or obtained on payment of \$15, which will not be returned.

No. 11568. Electric lighting machinery and plant.—Tenders are invited by the Egyptian Ministry of the Interior for supplying the machinery and plant required for the installation of electric light in the town of Sannanour. The contract will be divided into two parts, (1) generating plant and equipment and the lighting of the central station (2) the distributing system. The offer may be for the complete installation or for either section. Sealed tenders will be received until October 31.

No. 11569. Water Supply.—The municipality of Rio Grande do Sul Brazil is calling for tenders for a concession for the provision of a water supply, sewerage, and rainwater drainage system in the town at an estimated cost of \$1,946,600 to \$2,433,250. Tenders, accompanied by a deposit of about \$1,621, will be received until December 15 by Sr. Coronel Intendente Municipal, Directoria de Obras, Rio Grande do Sul, Brazil.

No. 11570. Supplies of various kinds.—Tenders are invited by the municipality of Alexandria for supply of various articles required for the use of the Service du Nettoiement during 1913-14, including oils and colors, wood, steel and iron bars, angle iron, bolts and nuts, screws, rivets, brooms, hammers, wire, etc. Sealed tenders will be received until September 30 by the Director General de la Municipalite d'Alexandria, Egypt.

REGARDING THE CROSS ON ST. PAUL'S.

Four hundred feet above the pavement of St. Paul's churchyard a gang of men is at present engaged upon a task of unique interest. About ninety years ago the ball and cross which surmount the great dome of St. Paul's Cathedral were gilded, and the work apparently was of such an excellent character that it has withstood the wear and tear of time until lately, when it was decided to repaint the cathedral cross.

From the pavement the ball looks little larger than a football and the cross but three or four feet high. As a matter of fact, however, the latter, which is said to weigh 3260 pounds, is no less than thirty feet in height, while the ball on which it is mounted is six feet in diameter and old hollow ten or twelve pounds.

Only the best English "blonde gold" leaf, as it is technically described, will be used—that is, pure gold beaten out and placed on tranfer paper treated with paraffin wax and double the thickness ordinarily employed for outdoor work—from which it will be obvious that the regilding process will be a very costly one. As a matter of fact, the total cost of the job, which will take a couple of months to complete, will be considerably over £1000.

The scaffolding which is being used is extraordinarily simple, consisting of little more than a few ladders set up by a firm of experts in the fixing of lightning conductors. A different

method, however, was employed when the original ball and cross set up by Wren, were gilded in 1821. On that occasion they were removed, and apparently the scaffolding was not fixed as it should have been; for it has been told how, according to the boisterous weather, scarcely a day passed without some part of the scaffolding or the machinery connected with it being damaged.—London Tid-Bits.

CHINESE IRON COMPETITION.

The proposed placing of pig iron on the free list has brought one of the Pennsylvania Senators to the front with doleful anticipations of the closing of our merchant furnaces by the rush of imports from China. His figures as to wages and other costs in that country make a striking contrast to those of the Pennsylvania iron makers; but when we come down to actual facts, the prospects of any real competition seems sufficiently remote. China has certainly large resources in iron ore and coal, but there development so far has been exceedingly slow and does not seem to increase. The largest iron works in China are those at Hanyang, and in this country the plant would rank as a small one, moreover, its total production is far below the consumption of the country. What foreign trade it has is chiefly with Japan, and that country takes more iron ore than pig or finished ore, preferring to do the smelting in its own furnaces.

One attempt was made on the Pacific Coast to import Chinese pig regularly under contract, but that resulted in a rather disastrous failure. The exports of iron ore from China reached their highest figure in 1911, with 68,620 tons, but in 1912 fell to a little less than 8,000 tons. In both years little or none of the exported iron went further than Japan. Even if it had all come to this country the quantity would have been less than .002 per cent of our consumption.

We are not advocating free pig iron especially; but its opponents, to secure success, must find some better argument than Chinese competition. The awakening of industrial China is slow and must be slow, in the nature of things. Forty or fifty years from now iron from the East may be a factor in our industrial situation, and then it may be time to protect ourselves. At the present time, however, it seems simply a waste of time to talk about it. —Engineering and Mining Journal.

BANK CLEARINGS.

Bank clearings as reported to the California Development Board by the several clearing house cities for the week ending September 11, follows: San Francisco, \$47,351,902; Los Angeles, \$21,574,113; Oakland, \$2,811,501; Sacramento, \$1,265,600; San Diego, \$2,360,415; Fresno, \$1,055,919; Stockton, \$974,902; San Jose, \$591,553; Pasadena, \$822,187; Bakersfield, \$608,235.

SALE OF SCHOOL AND SEWER BONDS.

The City Treasurer sold during the last week \$105,000 of 5 per cent school and sewer bonds. Since August 14 the treasurer has disposed of \$500,000 worth of bonds in denominations of

\$1000 to citizens of San Francisco. The Treasurer has now \$6163,000 remaining to be sold and applications and deposits made for \$62,000 of that amount will be delivered soon.

PROGRESS ON EXPOSITION WORK.

Director of Works Harris D. H. Connick, in a report just submitted to President Charles C. Moore of the 1915 International Exposition, tells of the activities on the Exposition site at Harbor View. He re-affirms the promise of the Exposition directorate made one year ago in positively declaring that every one of the exhibit palaces will be completed nine months before February 20th, 1915, the date of opening the Exposition gates. "Up to date, 25,100 feet of pipe for the high pressure water system has been laid, and the work is about forty per cent completed," said Director Connick.

About 235 head of stock with necessary scrapers, plows, wagons, etc., are engaged in grading the Exposition site. "About 48 head of stock with proper equipment are now employed in grading the race track and drill ground and 235 head of stock are grading the railway yards, Lyon street, the band concourse, the Fine Arts Pool, and spreading loam in the South Gardens and storing loam on the site of the old Pacific Nursery." "The contract for the Service water supply system on the Exposition grounds called for 63,173 feet of pipe of which 54,830 feet have actually been laid. Eighty per cent of the work on the Machinery Palace has been completed. During the month of August, 1,070,000 feet of lumber was erected in place. All the heavy framing for the Machinery Palace is completed with the exception of a small amount in the east entrance, and there still remains to be done about 200,000 feet of light work consisting of studding, sheathing, flooring and furring.

"About 16,000 feet of the finished roofing has been completed. The staff work for the north end and the north end of the building is rapidly nearing completion, about 25,000 square feet have been set since my last report. The work on the plumbing, high pressure system and sprinkler system for the great building is progressing rapidly. "All lumber for the Palace of Education has been received and since August 1st, 375,000 feet of lumber have been placed in position. The wall and roof framing is being conducted along with the heavy framing. All concrete work has been finished to the first floor line. Centering for the fire wall has been completed to the height of heavy framing and concrete will be poured within a few days.

Nearly all the structural work for the Food Products Building has been completed but the assembling is progressing slowly due to a lack of steel. The traveler used for the erection of material is in place and the erection work started immediately upon the receipt of steel. "The conduit system for the Exposition building section is nearly half completed. Nearly two million feet of lumber have been used below the first floor in the construction of the Agricultural Palace. The timing of timbers has commenced."

BOOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking. **IS YOUR ADVERTISEMENT AMONG THESE?**

Frank Neidick

Carpenter and Builder

Phone Mission 5126

2669A Howard St., Bet. 22 nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Editorial Comment.

Spain has accepted the invitation to exhibit at the World's Fair in 1915. As a matter of sentiment it is eminently proper that such an exhibit should be made. Although the Andalusian government has fallen from the high estate it occupied four hundred years ago when Balboa discovered the Pacific ocean, yet it has left its name and impress upon the continent of America and especially upon the South and Central American sections. California itself will always bear the imprint of the colonization and language of Spain. Here are Andalusian skies and an Andalusian climate. Here are the traditions of old Spain. And it was the caravels of Columbus under the flag of Spain that first sought the way by water to the western world.

So that now the western passage to Cathay has at last been found and the nations of the world are to meet in commemoration of the event, it is eminently fit that the nation first to blaze the way should be represented

"Drink no water with your meals," one self styled "dietetic expert" advises. "Eat only the whole wheat and shun white bread," says another. And so on, and so on, and so on.

This flood of fake advice from unskilled men who are simply trying to make a living by exploiting the public has caused the investigation by the Department of Agriculture. The conclusions are eminently sane. The best diet for the ordinary person is wholesome ordinary fare.

Persons with indigestion, of course, should go to the best doctor they can find, and follow his instructions. But the normal human animal can eat about what he likes—in moderation—and thrive on it.

The report of the Interstate Commerce Commission shows that during the months of October, November, December, 1912, 260 people were killed and 4,324 were injured in train accidents. Casualties of all classes amounted to 2,967 killed and 61,323 injured. The total number of collisions and derailments for this quarter compared with those for corresponding quarters of the four previous years show that with the exception of 1911, the number has increased, there being for the current quarter an increase of 188 per cent over the corresponding quarter of 1909.

The Commissioners of Patents has filed his report to Congress in which is published many facts and statistics relative to the progress of inventions. The report covers the year ending December 31, 1912, and among other things shows the receipts of the Office

from all sources to have been \$2,118,158.29, and the expenditures \$2,022,066.11, leaving a surplus of \$96,092.19 and the amount of the total net surplus, being earnings of the Patent Office, deposited in the Treasury of the United States, to be \$7,160,017.95.

In proportion to population more patents were issued to citizens of Connecticut than to those of any other State—one to every 1,150. Next in order are the following: District of Columbia, one to every 1,229; California, one to every 1,434; New Jersey, one to every 1,508; Massachusetts, one to every 1,509; Illinois, one to every 1,539; Colorado, one to every 1,711; New York, one to every 1,786, while South Carolina is last in the list of States with one patent issued during the year to every 18,040.

It is interesting to note that California is third in the list of patents granted in proportion to population. Here where there is such a wide range of activity and wide opportunity compared to the Eastern States, the fact that California is beaten by only two states, and those Connecticut and the District of Columbia, it goes to show that the people of this state are progressive and abreast of the times. All things considered the state can be said to be at the head of any state in the Union in proportion to population of any state that has diversified and agricultural resources.

Among many statistical facts the report also includes some statistical tables covering a comparison of the receipts of the Patent Office from 1837 to 1912; the first patent and the number of patents issued in each year; the number of patents issued by the United States and foreign countries from the earliest period to December 31st, 1912, and an interesting comparison between the receipts, expenditures and volume of business done in the years ended December 31st, 1899, and the year 31st, 1912, which shows the percentage of increase is greatest in every item except the number of employees, indicating an increase in receipts and in mass of work without a proportionate increase, but rather with a proportionate decrease in the number of employees of the Office.

Altogether it is an interesting publication, as are all facts that show the progress of invention and the wonderful advances that have been made in our mechanical age.

An Experimental Study of Ventilation Problems will be carried on for the next four years by a commission having at its disposal a fund of \$50,000, which is part of a gift made by Mrs. Elizabeth Milbank Anderson to the Association for Improving the Condition of the Poor. The chairman of the Commission is Dr. Charles Edward A. Winslow of New York

STYLE IN AMERICAN ARCHITECTURE.

An Address by Ralph Adam Cram.

This paper is based upon an address before the Contemporary Club of Philadelphia, reprinted through courtesy of the Yale Review, July, 1913.

The various followings in architecture today are so many and so manifest that he who runs may read, and parenthetically, he who reads very certainly often runs—from some of the strange aberrations that beset his path. I am minded therefore, in writing under the above title, to say less about style and styles and half a style, than of the impulse—or the impulses, for they are legion—behind them, and of the goal to which in devious ways they are all tending.

There is nothing accidental in our stylistic development or in the universe, for that matter. There was once a very wise man who, on speaking of a miracle to a friend, and being confronted by the assertion that the event was not that but rather a coincidence, devoutly said that he thanked God he was not so superstitious as to believe in coincidences. So chaotic and illogical as our devious wanderings under the strange goals of style may be, there are grounds for thinking that even here we may find evidences of design, of a Providence that overrules all things for good; "an idea," as Chesterton would say, not without humor.

For chaos is the only word that one can justly apply to the quaint and inconsequent conceits in which we have indulged since that monumental moment in the early nineteenth century when, architecturally, all that had been since the beginning ceased, and that which had never been before on land or sea began. A walk up Fifth Avenue from Madison Square to the Park, with one's eyes open, is an experience of some surprise, and equal illumination, and it leaves an indelible impression of that primal chaos that is certainly without form, if it is not wholly void. Here one may see in a scant two miles (count, but how replete with experience!), treasure-trove of all peoples and all generations: Roman temples and Parisian châteaux, Gothic of sorts (and out of sorts), the "Carpenter-Gothic" of 1815, the Victorian of that ilk, the most modern and competent recasting of ancient forms and restored ideals; Venetian palaces, and Louis Seize palaces, and Roman palaces, and more palaces from wherever palaces were ever built, delicate little Georgian ghosts, sinking in their unpremeditated contrast with Babylonian skyscrapers that pierce their towering masses of plain de masonry on an unconvincing sub-structure of plate glass. And it is all contemporary, the oldest of it dates back not two generations, while it is all wildly and improbably different.

The experience prompts retrospection, and we turn over the dog-eared leaves of the immobile past. Apparently it was the same, only less so, back to

the decade between 1820 and 1830, and there we find a reasonably firm foothold. Here at last, at the beginning of the century, we discover actual unanimity, and with some relief we go back century after century, tracing variations, but discovering no precedent for the chaos we have left. From time to time, even to the first Olympiad, we suddenly find ourselves at some brief period where a light is manifestly going on, but there were never more than two parts to the contest, and this once passed, we have another four or five centuries of peaceful and unified development. Our own Colonial merges without a shock in English Georgian; this, through Inigo Jones, in the Renaissance of the Continent. A generation of warfare lands us in Flamboyant Gothic, and so to real Gothic, that stretches back through logical vicissitudes to the twelfth century. Another upheaval, and in a moment we are with the Romanesque that touches Rome itself—and behind lies Hellas. No chaos here; definite and lawful development; infinite variety, infinite personality, and a vitality that demands a more illimitable word than "infinite." What happened, then, in 1825, what is happening now, what is going to happen, and why?

We all know what our own Colonial was like; perhaps we do not fully realize how varied it was as between one section and another, but at least we appreciate its simplicity and directness, its honesty, its native refinement and delicacy, its frequent originality. It isn't the same as English Georgian; sometimes it is distinctly better, and, however humble or colloquial, it is marked always by extreme good taste. If anything, it improved during the almost two centuries of Colonial growth, and when the nineteenth century opened it was still instinct with life. A half-century later where were we? Remember 1850, and all that dates connotes of structural dishonesty, stylistic barbarism, and general ugliness! Here is the debatable period, and we may narrow it; for in 1810 and in 1820, good work was still being done, while in 1830, yes in 1820, the sodden savagery diluted with shameless artifice was widely prevalent. To me, this decade between 1820 and 1830 is one of the great moments in architectural history, for then the last flicker of instinctive art amongst men died away, and a new period came in. Such a thing had never happened before; it is true Rome never matched Greece in perfection of art; the Dark Ages after her fall were dark indeed; the second Dark Ages after the death of Charlemagne were equally black; while the transition from Gothic to Renaissance was not without elements of disappointment, but at none of these transitional moments were people absolutely wrong-headed, never was the work of their hands so positively disgraceful. Even now we put their poor products in our art museums, where they are not outshined by the splendid monuments of the great and crescent epochs. In a

word, what happened about 1825 was anomalous; it happened for the first time; and for the first time whatever man tried to do in art was not only wrong, it was absolutely and unescapably bad.

I should like to deal with this matter in detail, but the labor would prolong itself unduly. Briefly, what happened was, it seems to me, this. The Renaissance had struck a wrong note—and in several things besides architecture; for the first time man self-confidently set to work to invent and popularize a new and perfectly artificial style. I am not concerned here with the question whether it was a good style or not, the point is that it was done with malice aforethought; it was invented by a cabal of painters, goldsmiths, scenic artists, and literary men, and railroaded through a stunned society that, busied with other matters, took what was offered it, abandoned its old native ways, and later, when time for thought offered, found it was too late to go back. Outside Italy there was at first as little desire for the new-fangled mode as there was for the doctrinal Reformation outside Germany. In France and England good taste still reigned supreme, and though the dogmatic iconoclasts took good care that the best of the old work should be destroyed, and that suspicion should be cast on what—from sheer exhaustion—they allowed to remain, though for one reason and another the new Classic style came in, the good taste of the people still remained operative, and while Italy and Germany were mired in Rococo and Baroque, they continued building lovely things that were good in spite of their artificial style, because their people had not yet lost their senses or their taste.

It could not last, however; certain essentials had been lost out of life during the Renaissance and the Reformation; the Revolution—third act in the great melodrama—was a foregone conclusion; it completed the working out of the foreordained plot, and after it was over and the curtain had been rung down, whatever had been won, good taste had been lost, and remained only the memory of a thing that had been born with man's civilization and had accompanied it until that time.

Alberti and Palladio and Inigo Jones had dissolved and disappeared in the slim refinements of American Colonial. What followed? For a brief time, and in one or two categories of activity, the spurious and delusive imitations that Jefferson ore or less popularized, the style sometimes known as neo-Grec, but more accurately termed—because of its wide use for Protestant meeting-houses in country districts—the Greco-Baptist style. It cannot be mistaken, front porches of well-designed, four-foot classical columns made of seven-eighths inch pine stock neatly nailed together, painted white, and echoing like a drum to the incontinent kick of the feet, slab sides covered with clapboards, green blinds

to the round-topped windows, and a little bit of a brick chimney sticking up at the stern where once, in happier days, stood the little cote that housed the Sanctus bell.

Then came what is well called Carpenter-Gothic, marked by the same high indifference to structural integrity, and with even less reliance on precedent for its architectural forms; a perfectly awful farrago of libelous details—pointed arches, clustered columns, buttresses, parapets, pinnacles—and all of the ever present pine lumber painted gray, and usually sanded as a final refinement of verisimilitude. And with these wonderful monuments, cheek by jowl, Italian villas, very white and much balconied, Swiss chalets, and every other imaginable thing that the immortal Batty Langley, or later the admirable Mr Downing could invent, with, for evidence of sterling American ingenuity, the "jig-saw-and-batten" refinement of crime. We really could not be expected to stand all this, and when the Centennial finally revealed us as, architecturally speaking, the most savage of nations, we began to look about for means of amendment. We were not strikingly successful, as is evidenced by the so-called "Queen Anne" and "Eastlake" products of the morning after the celebration; but the Ruskinian leaven was working, and a group of men did attempt to produce something that at least had some vestiges of thought behind it. It is generally considered very awful indeed—and so it is, but it was the first sincere and enthusiastic work for generations, and demands a word of recognition. Its vivid ugliness is due to the fact that in the space of seventy-five years the last, faintest flicker of sense of beauty had vaniished from the American citizen; its intensity of purpose bears witness to the sincerity of the men who did it, and I for one would give them praise, not blame.

We are approaching—in our review—another era in the development of our architecture; let us gather up the many strands in preparation therefor. Here are the "wild and whirling words" of Hunt, Eldritch, Furness; here is the grave old Gothic of Upjohn's following, Renwick, Congdon, Haight; admirable, much of it, especially in little country churches; here is the Ruskinian fold, Cummings, Sturgis, Cabot—rather Boston you will note, here is the old Classical tradition that had slipped very, very far from the standards of Thornton, Bullfinch, McKim, now flaring luridly in the appalling forms of Mullet's Government buildings and the Philadelphia City Hall. Let us pursue the subject no further; there are others, but let them be harmless; we have enough to indicate a condition of some complexity and uncertain lack of conviction, or even total unity. Then the event occurred, and its name was H. H. Richardson. The first great genius in American architecture, he rolled like an aesthetic juggernaut over the prostrate bodies of his peers and the public, and in ten years we did have substantial unity. We were like the village fisherman who didn't care what color they painted the old tub, "so as they painted her red"; we didn't care what our architecture was, so long as it was Romanesque. For another ten years we had a love-feast

of cavernous arches, quarry-faced ashlar, cyclopean voussiors, and seaweed decoration; village schools, railway stations, cottages—all, all were of the sacrosanct style of certain rather barbarous peoples in the south of France at the close of the Dark Ages.

And in another ten years Richardson was dead, and his style, which had followed the course of empire to the prairies and the alkali lands and the lands beyond the Sierras, and a few years ago I found some of it in Japan! It was splendid, and it was compelling, as its discoverer handled it; but it was alien, artificial, an impossible, equally with the bad thing it displaced. But it did displace them, and Richardson will be remembered, not as the discoverer of a new style, but as the man who made architecture a living art once more.

Eighteen hundred and ninety, and we start again. Two tendencies are clear and explicit. A new and revived Classic with McKim as its protagonist, and a new Gothic. The first splits up at once into three lines of development: pure Classic, Beaux Arts, and Colonial, each vital, brilliant, and beautiful in varying degrees. The second was, and remains, more or less one, a taking over of the late Gothic of England and prolonging it into new fields, sometimes into new beauties. So matters ran on for another ten years; at the end of that time the pure Classic has won new laurels for its clean and scholarly beauty, the Beaux Arts following has abandoned most of its banality of French bad taste and has become better than the best contemporary work in France, while the neo-Colonial has developed into a living thing of exquisite charm. I feel too near the Gothic development to speak of it without prejudice, but its advance has been no less than that of its Classical rival—or should I say, bedfellow?

And now two new elements enter: steel-frame construction on the one hand, and on the other the Secessionist. The steel-frame is the **enfant terrible** of architecture, but like so many of the genius it may grow up to be a serious-minded citizen and a good father. It isn't that now, it is a menace, not only to architecture, but to society; but it is young and it is having its fling. If we can make it realize that it is a new force, not a substitute, we shall do well. When it contents itself in its own sphere, and the municipality says kindly and firmly, "thus far and no further"—the "thus far" being about one hundred and twenty-five feet above street level—as in the very wise town of Boston—then it may be a good servant. Like all good servants it makes the worst possible master; and when it claims as its chiefest virtue that it enables us to reproduce the Baths of Caracalla, vaults and all, at half the price, or build a second Chartres Cathedral with no danger from thrusting arches, and with flying buttresses that may be content beautifully to exist, since they will have no other work to do, then it is time to call a halt.

The Secessionist—one might sometimes call him Post-Impressionist, Cubist even—is the latest element to be introduced, and in some ways he is the most interesting. Unlike his confreres in Germany, Spain, and Scan-

dinavia, he shows himself little except in minor domestic work—for at heart we are a conservative race, whatever individuals may be—but here he is stimulating. His habitat seems to be Chicago and the Pacific Coast; his governing conviction a strongly developed enmity to archaeological terms of any kind. Some of the little houses of the Middle West are striking, quite novel, and inordinately clever; some of the work on the Pacific Coast, particularly around Pasadena, is exquisite, no less. Personally, I don't believe it is possible wholly to sever oneself from the past, its forms and expression; and it certainly would be undesirable; on the other hand, the astute archaeology of some of our best modern work, whether Classic or Gothic, is stupefying and leads nowhere. Out of the interplay of these two tendencies much of value may arise.

And there you are: three kinds of Classic, two kinds of Gothic, skeleton-frame, and Secessionist—all are operative today, each, one admits, consummately clever and improving every day, for there is no architectural retrogression in America, there is steady and startling advance, not only in facility for handling and developing styles, but in that far more important affair, recognition of the fact that styles matter far less than style. From a purely professional standpoint the most encouraging thing is the breadth of culture, the philosophical insight into the essence of things, the liberality of judgment that mark so many of the architectural profession today. Gone are the old days of the "Battle of the Styles"; the swords are beaten into pruning-hooks, and these are being used very efficiently in clearing away the thicket of superstitions and prejudices that for so long choked the struggling flower of sound artistic development. The Goth and the Pagan can now meet safely in street or drawing room without danger of acute disorder; even the structural engineer and the artist preserve the peace (in public); for all have found out that architecture is much bigger than its forms, that the fundamental laws are the same for all good styles, and that the things that count are structural integrity, good taste, restraint, vision, and significance. No one now would claim with the clangor of trumpets that the day of victory was about to dawn for the Beaux Arts, Gothic, or steel-frame styles, or for any other, for that matter, each is contributing something to the mysterious alembic we are creating; and all we hope is that out of it may come the philosopher's stone, that touching inert matter, shall turn it into refined gold—which by the way is the proper function of architecture out of all the arts.

Does then confronts us, in that case, is no single architectural following, but legion; and in that fact lies the honor of our art, for neither a society one, or ever at one with itself. This is one of those great five-hundred year periods of boiling activity, one of those nodes that periodically divide the vast vibrations of history, when all things are in a flux, when all that has been for four centuries is plunging downward in disintegration, while all that shall be for another equal period is surging up-

wards towards its culmination. Architecture is nothing unless it is intimately expressive, and if utterly different things clamor for voicing, different also must be their architectural manifestation. You can't build a Roman Catholic or Episcopal Church in the the Beaux Arts vernacular (it has been done, but it is extremely silly) because the Church is the eternal and fundamentally immutable thing in the world of change and novelty and experiment; and it has to express this quality through the connotation of the forms it developed through a thousand years to voice the fullness of its genius that was developing simultaneously. Neither can you use the steel-frame or reinforced concrete to the same ends, though this very sordid wickedness has also been perpetrated. I have grounds for believing. On the other hand, think of using the consummate art of the Chartres Cathedral for a railway terminal, or the Sainte Chapelle for a stock exchange, or Haddon Hall for an Atlantic City hotel, or the Ducal Palace in Venice for a department store, or the Erechtheum for a fire engine house. The case has merely to be stated to be given leave to withdraw, and with it goes, for the time, the talk we once heard of an "American Style." Styles come from unity of impulse; styles come from a just and universal estimate of comparative values; styles come where there is the all-developing influence and the vivid stimulus of a clear and explicit and compelling religious faith; and these occur, not at the moment of wild confusion when one epoch of five centuries is yielding to another, but after the change in dynasty has been effected, and the new era begins its ascending course. The only premeditated architecture I know the only style that was deliberately devised and worked out according to preconceived ideas, the style of the Renaissance, was yet not half so artificial as it looks, and as some of us would like to think), for in a sense it was inevitable, granting the postulates of the humanists and the thirteenth dogmas of the materialists of the sixteenth century. It did not develop, suddenly and instinctively like Hellenic and Byzantine and Gothic and Chinese Buddhist art; the really great arts in history but once, the great parabola of medieval civilization curved downward to its end, once Constantinople fell, something of the sort was not to be escaped.

Now I do not feel that we shall be content with an art of the scope of that of the Renaissance. I do not feel that we shall be content with a new era of civilization, an Renaissance era. There are better ways of life, and sooner. I believe that a wonderful new forces now working, suddenly, revealing themselves so rapidly, with assurance to new synthesis that will give rise in a great epoch of civilization, as much as ours is disunited, as contradicted, as ours is contrifical, as spiritual, efficient as ours is material, efficient and that then will come, and come naturally and inevitably, the inevitable art that will be glorious and great, because it shows forth a new and a greater, a grander life that is also great and good.

Reduced to its simple form, Ameri-

can architecture is seen to have had two epochs. First, the attempted conservation of a definite style (which, whatever its genesis, had become an essential part of our racial character), and its complete disappearance exactly at the time when the serious and conservative nature of the people of the United States gave place, with almost suddenness, to a new quality born partly of political independence, partly of new and stimulating natural conditions, partly of the backlash from Continental revolution, and above all of the swift working out, at last, of powers latent in the Renaissance-Reformation itself. Second, the confused activities of many men of many minds, who had cut loose from tradition become moribund. Communal interests, the sense of solidarity, inherited from the Middle Ages and persisting in strange new forms even though the Renaissance epoch itself, had yielded to a crescent individualism, and architecture, like good art, followed close to heel.

This is really all there is to our architectural history, and I have used many words in saying what might have been expressed in a sentence. What lies before us? More pigeon-holes, more personal followings, more individualism, with anarchy at the end? I do not think so, but rather exactly the reverse. Architecture is always expressive; sometimes it reveals metaphysical and biological truth, when in itself there is no truth whatever. If we built Independence Hall in Philadelphia, there was something in us of the same nature, and we glory in the fact. If we built the City Hall in the same town, there was something in us like that, arresting as the thought must be. If we are doing three Classics, and two Gothics, and steel-frame, and Post-Impressionism (not to mention others) at the present moment, then that is because our nature is the same. Now, can we again prove the truth of the saying, "Ex pede Herculeum," and, using our present output as the foot, come admits the connotation is of the centipede, create the Hercules? I mean, can we, from what we are doing today, predict anything of the future? Not of our future style—that will be what our society makes it, but of society itself. For my own part I think we can, for all that we are doing in architecture indicates the accuracy of the deduction we draw from myriad other manifestations, namely, that we are at the end of an epoch of materialism, rationalism, and intellectualism, and at the beginning of a wonderful new epoch, when once more we shall achieve a just estimate of comparative values, when material achievement becomes the slave again, and no longer the slave driver, when spiritual intuition drives more intellect back into its proper and very circumscribed sphere, and when religion, at the same time dogmatic, sacramental, and mystic, becomes, in the ancient and sounding phrase, "One, Holy, Catholic, and Apostolic," and assumes again its rightful place as the supreme element in life and action, the golden chain on which are strung, and by which are bound together, the varied beads of action.

Everywhere, and at the very moment when our material activity and

our material triumphs seem to threaten the high stars, appear the evidences that this wonderful thing is coming to pass, and architecture adds its medium of proof. What else does it mean that on every hand men now demand in art better things than ever before, and get them, from an increasing number of men, whether they are Pagans, Goths, or Vandals? What is the meaning of the return to Gothic, not only in form, but "in spirit and in truth"? Is it that we are pleased with these forms and wearied of others? Not at all. It is simply this, that the Renaissance - Reformation - Revolution having run its course, and its epoch having reached its appointed term, we go back, deliberately or instinctively, as life goes back, as history goes back, to restore something of the antecedent epoch, to win back something we have lost, to return to the work in the roads, to gain again the old lumps we credulously bartered for new. Men laugh—or did, they have given it over of late—at what they call the reactionary nature and the affectation of the Gothic restoration of the moment, and they would be right if it meant what they think it means. Its significance is higher than their estimate, higher than the conscious impulses of those who are furthering the work; for back of it all lies the fact that we need today in our society, in the State, in the Church, is precisely what we abandoned when, as one man, we arose to the cry of the leaders and abettors of the Renaissance. We lost much, but we gained much, now the time has come for us to conserve all that we gained of good, slough off the rest, and then gather up again the priceless heritage of medievalism, so long disregarded to our pain and loss.

Still we rest there? Shall we re-tire a style, and a way of life, and a mode of thought? Shall we re-create an amorphous medievalism and live hopelessly in that fool's paradise? On the contrary. When a man finds himself confronting a narrow stream, with no bridge in sight, does he leap convulsively on the very brink and then project himself into space? If he does he is very apt to fall of his immediate object which is to get across. No; he retraces his steps, gains his running start, and clears the obstacle at a bound. This is what we architects are doing when we fall back on the great past for our inspiration; this is what, especially, the Gothicists are particularly doing. We are getting our running start. We are retracing our steps to the great Christian Middle Ages, not that the e we may remain, but that we may achieve an adequate point of departure; what follow must take care of itself.

And in following this course we are not alone; we have life with us, for at last life also is going backward, back to gather up the golden apples lost in the wild race for prizes of another sort, back for its running start, that it may clear the cypress, that startlingly has opened before it. Beyond this chasm lies a new field, and a fair field, and it is ours if we will.

The night has darkened, but lightened towards dawn, there is silver on the edges of the hills and promise of a new day, not only for architects, but for every man.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$20,000. Architect, none. Owner, E. A. Schmidt. The building will be erected on the east side of Harrison street near 14th, and has been designed to contain 50 rooms, which will be arranged in two and three room suites. All apartments will have wall beds and private bath rooms. Interior finish will be of pine throughout. Plans provide for steam heat and a hot water plant. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. He can be found on the site.

OAKLAND, CAL.—Apartment house, 5 story and base, Class C construction, \$70,000. Architect, C. W. McCall. Central Bank Bldg., Oakland. Owner's name withheld. Four sets of plans and specifications are available at this office for figuring the following work on the \$70,000 apartment house, which is to be erected from plans of C. W. McCall. Plans may be taken from this office in the order in which application is made. Bids are desired on the following work: Plastering, plumbing, glass and glazing, sheet metal work, painting, electric work, brick and masonry, marble and tile work. Bids must be in the hands of Architect McCall, Central Bank Bldg., Oakland, by Thursday, October 2nd.

LOS ANGELES, CAL.—Apartment house, 4 story and base, Class C construction, \$55,000. Architect, E. R. Hogan, Jr., 1564 West 46th street, L. A. Owner, Ernest C. Hullman. The building will be erected on an inside lot and has been designed to contain a total of 86 rooms besides a large office, lobby, billiard room and amusement rooms. Apartments will be arranged in two and three room suites, all with private baths and wall beds. Interior will be finished of pine and hardwoods. Plans provide for steam heat, elevator service and a vacuum cleaning system. Bath rooms will have tile wainscot and cement floors. Exterior of the building will be faced with glazed pressed brick. Plans are complete and figures will be taken at once.

LOS ANGELES, CAL.—Apartment house, 3 story and base, Class C, \$30,000. Architect, L. L. Jones, 1 W. Hillman Bldg., L. A. Owner, J. P. Cortch. The building will cover an area of 55x115 feet, and has been designed with stores on the first floor. There are 10 rooms arranged in two and three room suites on the upper floors. Bath room finish will be of pine throughout. Plans provide for steam heat. All suites will have private bath rooms and wall beds. There will be eight store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

GLENDALE, LOS ANGELES CO., CAL.—Apartment house, 2 story and

base, brick. Cost not stated. Architect, Paul V. Tuttle, Delta Bldg., L. A. Owner, Mattison E. Jones. The building will contain three stories on the first floor and a number of two and three room apartments on the upper floor. Interior finish will be of pine and elm. Some hardwood floors will be used. There will be steam heat and a hot water system. All suites will have wall beds and private bath rooms. Stores will have patent fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans are being prepared.

IMPERIAL, IMPERIAL CO., CAL.—Apartment house, 2 story and base, brick and frame. Cost not stated. Architects, Nee & Spencer, Union League Bldg., L. A. Owners, Imperial Valley Syndicate. The building will contain stores on the first floor and a number of two and three room suites on the upper floors. All suites will have wall beds and private bath rooms. Interior finish will be of pine throughout. Bath rooms will have tile wainscot. Exterior of the building will be covered with cement plaster. Plans are complete and figures are being taken.

Contracts Awarded.

SAN FRANCISCO.—Apartment house, 3 story and base, frame, \$14,000. Architect, Charles J. Rousseau, 16 Kearny St. S. F. Owners, Mr. and Mrs. F. A. Sutherland. Contractor, John C. Kincanon, 1675 Fulton St., S. F. Contract price, \$14,000.

BRIDGES, DAMS AND HARBOR WORK.

REID'S FERRY, SHASTA CO., CAL.—Bridge, steel and reinforced concrete. Cost not stated. Engineers, Thomas & Post, Los Angeles. Owners, Shasta County. The Supervisors of Shasta County have tentatively accepted plans and specifications for a steel and concrete highway bridge prepared by Engineers Thomas & Post of Los Angeles. The bridge is to be erected over the Sacramento River at Reid's Ferry, and is one of the connecting links in the State Highway. Plans and specifications were submitted to the State Highway Commission for approval.

CHURCHES.

WALLA WALLA, WASH.—Church, 2 story and base, steel brick and stone, \$65,000. Architects, Becker Bros., Northern Bank Bldg., Seattle. Owners, First Congregational Church. The building will be erected on a corner site and will cover an area of 90x70 feet. The design is in the Classic style, with the exterior faced with pressed brick and elm stone. Besides the main auditorium, which will have a seating capacity of 1,000 people, there will be Sunday school rooms, social parlors, a large banquet room and kitchen. Interior finish will be of pine and hardwoods with considerable

ornamental plaster. Plans provide for central heating system, probably steam heat. Several large art glass windows are to be installed. Working drawings are complete and figures are being taken.

Contracts Awarded.

SAN FRANCISCO.—Church, steel and brick, \$100,000. Architect, John J. Foley, 16 Kearny St., S. F. Owners, St. Joseph church. The following additional contracts have just been awarded: Plain and ornamental plastering to Herman Bosch at \$12,100, and metal furring and lathing to the Atlantic Fireproofing Co. at \$4,625.

FACTORIES & WAREHOUSES.

MILWAUKEE, WIS.—Factory, 2 story and base, reinforced concrete, \$25,000. Architect, P. Chapell Brown, Mohawk Bldg., Portland. Owners, Beaver State Motor Car Co. The building will cover a considerable ground area and is to be erected on a corner. Construction will be fireproof. Interior of the office portion will be finished in pine. There will be a cement floor and metal window sash and frames. Exterior of the building will be faced with cement plaster. Over \$50,000 will be expended in the purchase of machinery. Plans are now being prepared.

PEARL HARBOR, HAWAII.—Cold storage plant, 1 story and base, reinforced concrete, \$10,000. Engineers, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Plans have been completed for the construction of a cold storage and ice making plant which is to be erected at the Naval Station at Pearl Harbor. Bids are now being taken and will be opened in Washington, D. C., on November 1st. Plans can be secured from the Bureau of Yards and Docks or from the Commandant at Pearl Harbor. The sum of \$9,000 is available for construction.

Contracts Awarded.

OAKLAND, CAL.—Warehouse, 2 story and base, brick and steel. Cost not stated. Architects, Oliver Duval & Son, First National Bank Bldg., Oakland. Owner, Mrs. Hattie Lehnhardt. Contractors, Oliver Duval & Son, First National Bank Bldg., Oakland. Contract price not stated.

FLATS.

SAN FRANCISCO.—Flats, 3 story and base, frame, \$11,000. Architects, Welch & Carey, Merchants' National Bank Bldg., S. F. Owner, A. Pakidini. The building will be erected on Ellbert street near Stockton, and has been designed to contain three large flats and a garage. Interiors will be finished in pine and redwood. Some hardwood doors and elm panels will also be used. There will be a large open fire place in each of the living rooms. Mantels will be of tile. Bath rooms will have tile wainscot and composition floors. Entrances will be finished in marble and terrazzo. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO.—Flats, 2 story and base, frame, \$1,000. Architect, C. O. Clausen Pichan Bldg., S. F. Owner, F. Barabotto. The building will be erected on Brazil near Madrid street,

and will have a frontage of 25 feet and a depth of 55. Plans provide for one store and a flat on the first floor and a flat of six rooms on the upper floor. Interior finish will be of pine throughout. An open fire place with tile mantel will be installed in the upper flat. Bath room and kitchen will have tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Flats, 2 story and base, frame, \$6,900. Architect, C. H. Jordan, 742 Market St., S. F. Owner, N. Andrew, 153 Stuart street, S. F. The building will be erected on Lewiston avenue north of Alcatraz, and will contain two modern flats of five rooms and bath. Interior finish will be of pine throughout. Hardwood floors will be used in the living rooms and dining rooms. There will be open fire places and tile or brick mantels. Tile will be used in the bath rooms. Exterior of the building will be covered with shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

GARAGES.

PORTLAND, ORE.—Garage, 2 story and base, reinforced concrete, \$10,000. Architect, George Rea, Portland. Owners, Francis & Kaddery. The building will be erected at the northeast corner of 13th street and Hawthorne, and will cover an area of 95x110 feet. A concrete floor and metal window sash and frames will be used. Interior finish will be of pine. There will be special storage tanks for gasoline. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be called for shortly.

GOVERNMENT WORK AND SUPPLIES.

Benedic Arsenal Storehouse.

The House Committee on Appropriations refused to insert in the urgent deficiency bill an item for a storehouse at Benedic Arsenal to replace the one destroyed by fire in October of last year. General Crozier has estimated that the building and equipment and connection with existing railroad tracks, which it was proposed to install, would cost \$120,000, a saving of some \$80,000 in the estimate which was originally submitted immediately after the fire. The question arose in the committee as to the character of this item, and it was maintained that it was not, properly speaking, a deficiency, although technically it might be considered so. It was pointed out by General Crozier that it could be considered by the committee on account of its urgency, and there was a precedent for such an appropriation at this time in the item made some years ago in the deficiency bill to replace a storehouse and material, \$2,000,000 in amount, at the Rock Island Arsenal. It was recalled by Chairman Fitzgerald in the Rock Island case the building had been destroyed and the estimate was submitted to be considered in a deficiency bill. In the case of the Benedic Arsenal building the estimates had been sent in when it could have been considered in connection with the sundry civil bill and

at that time the committee declined to recommend the estimate. The same position was taken on the item when it was presented by General Crozier as an urgent deficiency.

Honolulu, H. T., Quarantine Station.

The contract for the construction of latrine buildings, sewage purification tank, etc., at the U. S. quarantine station, Honolulu, was awarded to W. N. Concanon Co., San Francisco, who will use fixtures manufactured by the following firms: Range closets, wash sinks, and iron urinals, Standard Mfg. Co.; floor trap, L. Wolf Mfg. Co.; shower heads, Wm. Buckel Co.; centrifugal pumps, American Well Works; motors for pumps and agitator, General Electric Co.; flexible joint pipe, American Cast Iron Pipe Co.; Portland Cement, "Standard."

Reclamation Work.

The Secretary of the Interior has authorized the Reclamation Service to execute contract with MacArthur Bros. Co., of New York City, for the construction of the Piskun reservoir supply canal and tunnels and Sun River slope canal of the Sun River irrigation project, Mont. The work involves the excavation of 2,400,000 cubic yards of material and the construction of 3,215 linear feet of concrete-lined tunnel. The contract price is \$858,615.

Reclamation Service Discharge Pipes.

The following bids were received at the office of the U. S. Reclamation Service, Los Angeles, Cal., for furnishing semi-steel discharge pipes for balanced valves, Arrowrock dam, Boise project, Idaho:

Minneapolis Steel & Machinery Co., Minneapolis, Minn., item 1, \$2,852.54; 2, \$2,940.89; 3, \$3,747.29; 4, \$2,940.89; 5, \$6,446.54; 6, \$492.27.

Nordberg Mfg. Co., Milwaukee, Wis., item 1, \$2,830; 2, \$3,235; 3, \$4,245; 4, \$3,235; 5, \$7,430; 6, \$630.

U. S. Cast Iron Pipe & Foundry Co., San Francisco, Cal., item 1, \$3,142.80; 2, \$3,843.75; 3, \$4,763.40; 4, \$3,843.75; 5, \$8,335.95; 6, \$420.

Queen City Foundry, Denver, Colo., item 1, \$3,364; 2, \$3,650; 3, \$4,127; 4, \$3,686; 5, \$7,748; 6, \$598.

Pittsburgh Valve Foundry Construction Co., Pittsburgh, Pa., item 1, \$3,560; 2, \$3,525; 3, \$4,400; 4, \$3,525; 5, \$7,700; 6, \$435.

Independent Foundry Co., Portland, Ore., item 1, \$3,649; 2, \$3,860; 3, \$4,463; 4, \$3,860; 5, \$7,819; 6, \$806.

Rosedale Foundry & Machine Co., Pittsburgh, Pa., item 1, \$3,750; 2, \$3,840; 3, \$5,070; 4, \$4,260; 5, \$9,080; 6, \$880.

S. Morgan Smith, York, Pa., item 1, \$5,350; 2, \$5,540; 3, \$7,150; 4, \$5,540; 5, \$12,500; 6, \$972.

Power & Mining Machine Co., Canby, Wis., item 1, \$4,214; 2, \$4,175; 3, \$5,554; 4, \$4,175; 5, \$9,570; 6, \$494.

Fulton Engine Works, Los Angeles, Cal., item 1, \$5,588; 2, \$5,867; 3, \$7,433; 4, \$5,797; 5, \$12,930; 6, \$871.80.

Puget Sound Extension to Pier.

The following bids were received by the chief, bureau of yards and docks, Navy Department, Washington, D. C., for the construction of a crosscotted pile and timber extension to pier No. 8 at the navy yard, Puget Sound, Wash.

Item 1. Net price for pier extension

complete, in accordance with plans and specifications; item 2, net price to be added to the price named under item No. 1 for each interior bay of 8 ft added to length of pier, assuming outer portion of pier to be moved outward; item 3, net price to be deducted from the price named under item No. 1 for each interior bay of 8 ft deducted from length of pier, assuming outer portion of pier to be moved toward shore.

J. A. McEachern Co., 521 Railway Exchange Building, Seattle, Wash., item 1, \$9,865; 2, \$823; 3, \$823.

Johnson-Oden & Co., 447 Henry Building, Seattle, Wash., item 1, \$9,985; 2, \$900; 3, \$700.

San Jose, Cal., Vault Shelving.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for installing metal vault shelving in the U. S. post office at San Jose, Cal.

The H. H. Shults Co., Gowanda, N. Y., \$143.

The Berger Mfg. Co., Canton, Ohio, \$199.

Crown Metal Construction Co., Jamestown, N. Y., \$196.

Art Metal Construction Co., Jamestown, N. Y., \$204.70.

The Von Dorn Iron Works, Cleveland, Ohio, \$385.

Casper, Wyo., Post Office.

All bids received April 7 by the supervising architect, Treasury Department, Washington, D. C., for the construction, complete, of the U. S. post office at Casper, Wyo., have been rejected. The specifications have been revised and the work readvertised.

Puget Sound, Shipfitters' Shop, Etc.

The following bids were received by the chief, bureau of yards and docks, Navy Department, Washington, D. C. for shipfitters' shop, mold loft, boiler shop, and structural steel storage building at the navy yard, Puget Sound, Wash.:

Item 1. Net price for the steel frame work of the building erected complete in accordance with plans and specifications. Under this item are included all columns, trusses, beams, girders, purlins, girts, stairs (without the concrete), crane runways, removal of end framing of building No. 107, and connection of new steel work with old. It shall include all bolt holes for connection of sash, nailing strips, and woodwork to steel, except where otherwise specifically enumerated, but shall not include bolts for such connections. It shall not include rolling doors nor guides nor holes for their connection. It shall not include holes for hinges of doors directly connected to steel work. It shall not include any woodwork of permanent structure. It shall not include sash, corrugated expanded siding, flashing, corrugated roofing, gutters, down spouts, cornices, nor corrugated siding.

Item 2. Net price for the building except for the steel framework supplies, as specified under item 1, complete in accordance with plans and specifications. Under this item is included all that is not under item 1 for the completion of the building. It includes all concrete work, except as specified in paragraph 11, all woodwork, all sash, and door work, all

roofing, all gutters and cornice work, all exterior work for concrete, all corrugated, galvanized metal siding, all roof work, all extensions to building No. 167, and all between this building and building A, and all corrugated siding, all on extensions.

Item 3. Net price for the framework as under item 1, except that both extensions to building No. 167 shall be omitted, and the projecting open sides of building "A" resulting from this omission shall be completed similar to the projection of building "B."

Item 4. Net price for the completion of the building as under item 1, except that both extensions to building No. 167 shall be omitted, and the projecting open sides of building "A" resulting from this omission shall be completed similar to the projection of building "B."

Item 5. Net price per bay to be deducted from item 3 for the omission of one or more bays of building "A" under this item the bay or bays omitted would be of those projecting beyond the present building No. 167. The end framing would be transferred to the new ends and the projecting sides of building "B" would be framed in the same manner as required for similar sides.

Item 6. Net price per bay to be deducted from item 4 for the omission of one or more bays of building "A." Under this item the bay or bays omitted would be those projecting beyond the present building No. 167.

Puget Sound Bridge & Dredging Co., Seattle, Wash., item 1, \$173,765; and \$96,724; 2-A, \$99,474; 2-B, \$94,215; 3, \$151,194; 4, \$95,828; 4-A, \$98,757; 5, \$874; 6, \$564; 6-A, \$312; 6-B, \$757; 6-C, \$270.

Butler Construction Co., Seattle, Wash., item 1, \$168,500; 2, \$1,250; 3, \$159,900; 4, \$99,900; 5, \$975; 6, \$975.

C. R. Adrich & L. R. Lutz, Seattle, Wash., item 1, \$151,194; 2, \$98,757; 3, \$144,854; 4, \$88,577; 5, \$1,250; 6, \$100.

American Bridge Co. of New York, 600 Continental Building, Baltimore, Md., item 1, \$149,640; 2, \$94,215; 3, \$50.

W. N. Concanon, San Francisco, Cal., item 1, \$160,600; 2, \$88,134; 3, \$144,854; 4, \$88,577; 5, \$1,250; 6, \$100.

Ritter-Sonley Co., Philadelphia, Pa., item 1, \$173,765; 2, \$96,724; 3, \$144,854.

Belmont Iron Works, 2227 Washington avenue, Philadelphia, Pa., item 1, \$153,994; 2, \$144,700; 3, \$1,250; 4, \$100.

Pearson Construction Co., New York Building, Seattle, Wash., item 1, \$181,262; 2, \$99,955; 3, \$173,765; 4, \$98,757; 5, \$1,200; 6, \$1,200.

Phoenix Bridge Co., Walnut street, Philadelphia, Pa., item 1, \$162,500; 2, \$154,000; 3, \$99.

Army Construction in Hawaii.

Considerable interest is manifested by some members of the House and Senate Military Committee in the progress of work on Army buildings in the Hawaiian Islands. There is a possibility that some work will be made during the winter at the Army hill at the next session concerning the cost and progress of the type of construction at the Army stations in Hawaii. The subject has reached Washington to the effect

that the arrangements of the living quarters for the purpose of carrying out the idea of the concentrated posts is not altogether satisfactory, in addition to which it is stated that the cement buildings are not conducive to comfort in that climate. It is asserted that the buildings should be protected of frame, with wide verandas. The startling assertion has been made that some of the barracks will be found uninhabitable when they are completed, largely for the reason that the military authorities have not made a best use of architectural features and types of construction which will contribute to the comfort of those who live at these stations. It is confidently expected that the officers of the quartermaster's department, who have to do with this work and who are responsible for the situation in the Hawaiian Islands, will be fully capable of defending themselves against any sort of criticism. It has been understood that whatever was being done in the Hawaiian Islands, or in recent years in the Philippines, was only after a full consideration of the prevailing conditions and took into account the influences of climate upon the construction of Army buildings, especially those to be used as quarters and barracks.

Steel Highway Bridge.

The following bids were received by Commissioners of Indian Affairs, Washington, D. C. for the erection of a steel highway bridge across the San Juan River, Navajo Indian reservation, N. Mex.

Monarch Engineering Co., Fall City, Neb., for pin construction, \$18,399, unit prices, additional concrete 15c per cu yd add, 10c per cu yd deduct.

Pueblo Bridge Co., Pueblo Colo., pin construction, \$11,235; riveted construction, \$14,725; add for additional concrete, 15c deduct.

Des Moines Bridge and Iron Co., Des Moines, Iowa, riveted construction, \$17,300; concrete additional, 15c deduct \$10.

Clinton Bridge Works, Clinton, Iowa, superstructure only, \$17,850; pin construction, \$27,700; riveted construction, \$27,700; for additional concrete, add \$25; for the omission of concrete, deduct \$25.

Omaha Structural Steel Works, Omaha, Neb., pin construction, \$16,355; riveted construction, \$17,494; add for concrete, \$12; deduct for concrete, \$8.50.

Wielita Construction Co., Wichita, Kans., pin construction, \$21,250; add or deduct for concrete, \$10.

Midland Bridge Co., Kansas City, Mo., pin construction, \$17,064; alternate, \$14,947; riveted construction, \$17,662; alternate, \$15,448; additional concrete, 15c; for concrete omitted, deduct \$10.

El Paso Bridge and Iron Works, El Paso, Tex., pin construction, \$14,250; riveted construction, \$14,725; B, \$14,475; for additional concrete, add \$8.50; for omitting concrete, deduct \$8.50.

Patterson & Butkapi Bridge and Iron Co., Denver, Colo., riveted construction, \$16,085; for additional concrete below water, \$25; above water, \$12.50; for omitting concrete, deduct \$7.

Transformers.

Abstract of bids for Truckee-Carson project, opened at Los Angeles, Cal., for transformers:

Wagner Electric & Mfg. Co., St. Louis, Mo., \$732.04; St. Louis, Mo., \$732.04; St. Louis, Mo., \$732.04.

Westinghouse Electric & Mfg. Co., Los Angeles, Cal., and Pittsburgh, Pa., \$744; East Pittsburgh, Pa., \$744.

Allen-Chalmers Co., Los Angeles, Cal., \$744; East Norwood, Ohio, \$744.

General Electric Co., Los Angeles, Cal., \$850; Pittsfield, Mass., \$850.

J. P. Kierulff, Jr. & Co., Los Angeles, Cal., \$896.62; Fort Wayne, Ind., \$896.62.

Mare Island Channel Problem.

The Comptroller of the Treasury has advised the Navy Department that he will be constrained to hold that the Secretary of the Navy in contracting for the dredging of the Mare Island navy yard channel, authorized by the naval appropriation act of March 4, 1907, is restricted to the plans set forth in the report mentioned in that act, that is the report dated June 8, 1905, of the board of Army and Navy engineers, of which Colonel John Biddle was senior member, and could not, without further legislative authority, contract for a wider channel than that described in the report, although the cost thereof would actually be less than the authorized cost of the narrower channel. The Comptroller was informed of Chairman Padgett's assurance that so far as the legislative department was concerned, there would be no obstacle to the secretary's proceeding with the dredging of the 600-foot channel within the limit of the cost fixed by the act, but the comptroller said that while he could see the advantages to be derived from contracting for the wider channel and while the amount of cost would not be exceeded in doing so, he could not consider the question of public policy involved, but would be bound to interpret the law according to the language and meaning thereof. An effort will be made to have the necessary legislative authority incorporated in the urgent emergency bill in the Senate. The Navy Department will award the contract, under these circumstances, for the dredging on the basis of 600 feet over the bar, 400 feet past Commission Rock and 1,000 feet in front of the new wharf upon the condition that when authorization shall have been received from Congress additional dredging will be required of the contractors. The proposals received ranged between \$248,000 and \$128,860, showing such variation in the estimates of the cost of this work that the department was counsel a new investigation to be made into the conditions, and as a result received new bids as follows: S. G. Hinder, 400-foot channel, \$218,000; additional for 600-foot channel, \$128,860; H. G. Plummer, 400-foot channel, \$252,500; additional for 600-foot channel, \$69,000; R. A. Perry, 400-foot channel, \$197,000; additional for 600-foot channel, \$16,000. As a result of these bids the contract for this dredging will be awarded to the lowest bidder at \$197,000. The additional \$16,000 provided for the 600-foot channel is less than the total amount available. The Congress will be appealed to for authority to dredge the wider channel without increase in the appropriation. A comparison of the lowest bid of the first and second set shows that Mr.

Daniels has effected a saving of \$35,000 to the government, which saving will be even greater should Congress authorize the 600-foot channel.

Mare Island, Cal., Dredging.

The contract for dredging the channel and basin at Mare Island, Cal., on bids opened by the chief of the bureau of yards and docks has been awarded to R. A. Perry, San Francisco, at \$197,000.

Puget Sound, Gunners' Quarters, Etc.

The contract for the construction of gunners' quarters and billing houses at the navy yard, Puget Sound, Wash., has been awarded to Ericsson & Larson, Seattle, Wash., at \$5,896.

Grand Junction, Colo., Post Office.

The supervising architect, Treasury Department, Washington, D. C., has rejected all bids received June 24 for the construction, complete, of the U. S. post office at Grand Junction, Colo.

Subtreasury, San Francisco, Cal., Vault.

The contract for the construction, complete, of all the vault entrances for the new building for the U. S. subtreasury at San Francisco has been awarded to the York Safe and Lock Co., York, Pa., at \$37,895; time March 10, 1914.

HALLS AND SOCIETY BUILDINGS.

MERCED, MERCED CO., CAL.—Hall of Records, 1 story, base and mezzanine, reinforced concrete, \$35,000. Architect, C. H. Russell, Humboldt Bank Bldg., S. F. Owners, Merced County. The building is designed in the Classic style, and will be erected in the Civic Center. Construction will be fireproof. Interior will be finished in pine and hardwood with considerable tile and ornamental plaster work. Metal shelves will be installed. Plans provide for a fireproof vault. A central heating system and modern plumbing and electric work are specified. Exterior of the building will be faced with cement plaster. Plans are complete and now out for figures. Bids will be opened on November 10th. Plans can be secured from the architect.

AUBURN, PLACER CO., CAL.—Club house, 2 story and base, reinforced concrete, \$13,000. Architect, Frank S. Holland, 100 Haight St., S. F. Owners, Auburn Tahoe Club. W. G. Lee, J. M. Francis and H. M. Hooper, Building Committee. This work has been mentioned here before. There will be two stories on the first floor and lodge rooms above. Interior will be finished in pine and redwood. There will be steam heat. Exterior of the building will be faced with cement plaster. Plans are in the hands of the Building Committee and figures are now being taken.

HOSPITALS.

SEATTLE, WASH.—Hospital, 2 story and base, reinforced concrete, \$10,000. Architect, Daniel Huntington, Seattle. Owners, City of Seattle. This work was mentioned here when the architect was first selected to prepare plans. The building will be erected in Richmond Heights, and is to be the

first unit of a large institution. The main building will be 37x59 feet, with two wings each 21x73 feet. Interior will be finished in pine, white enamel and hardwoods. There will be steam heat and modern hospital plumbing. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be called for in a few days.

HOTELS.

SAN FRANCISCO—Hotel, 6 story and base, reinforced concrete, \$45,000. Architect, Frank S. Holland, 100 Haight street, S. F. Owner's name withheld. The building will be erected on the south side of Sutter street near Taylor, and will have a frontage of 27½ feet by a depth of 100 feet. A large office and lobby will occupy the entire first floor. Upper floors will contain in the neighborhood of 50 rooms, all of which will have private baths. Interior finish will be of pine with hardwood floors. Considerable ornamental plaster will be used in the lobby. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water plant. Exterior will be faced with pressed brick trimmed with sandstone. Working drawings are being prepared.

SAN FRANCISCO—Hotel, 6 story and base, reinforced brick, \$65,000. Architect, G. Albert Lansburgh, 709 Mission street, S. F. Owner, A. Eisenberg. The building will be erected on Sutter street near Leavenworth, covering an area of 46½x125 feet. There will be a store besides the main hotel office and lobby on the first floor. Upper floors will contain about 75 rooms and baths. Interior finish will be of pine and hardwood with ornamental plaster used in the office and lobby. There will be steam heat, elevator service and a vacuum cleaning system. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architects, Eisen & Son, Wilcox Bldg., L. A. Owners, Blumenthal Co. The building will be erected on a corner lot and will contain two stores besides the hotel office and lobby on the first floor. Upper three floors will be subdivided into about 50 guest rooms and a number of public and private baths. Interior finish will be of pine and hardwoods. There will be steam heat and elevator service. Hot and cold running water will be supplied to all rooms. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor. A number of subcontracts will be let.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architects, Maine Building and Investment Co., Thorpe Bldg., L. A. Owner, M. J. Priester. The building will be erected on Wall street, and has been designed for a hotel of 85 guest rooms, a number of private baths and several public baths. There will be steam heat, elevator service and a hot water supply. Interior finish

will be of pine and redwood. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are being prepared and when complete the general construction will be carried on by the Maine Building and Investment Co. Subcontracts on some parts of the work will be let.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Victor Ponew. The building has been designed to contain stores on the first floor and a large number of guest rooms and baths on the upper floors. Plans will include steam heat, elevator service, hot water supply and a vacuum cleaning system. Interior finish will be of pine throughout. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

LOS ANGELES, CAL.—Hotel, 7 story and base, Class A construction, \$125,000. Architect, Walter Webber, Ferguson Bldg., L. A. Owners, Pico Street Improvement Co. Only preliminary plans have been prepared for this building, which is to be erected at the southwest corner of Pico and Figueroa streets. The owner contemplates the construction of but one wing of the building at this time. The cost of this work is estimated at \$125,000. Further mention will be made as the plans progress.

Contracts Awarded.

CARLTON, ORE.—Hotel, 2 story and base, brick. Cost not stated. Architect, E. M. Larry, McMinnaville. Owner's name withheld. Contractor, Martin Johnson, Carlton. Contract price not stated.

LOS ANGELES, CAL.—Hotel, 12 story and base, reinforced concrete, \$267,000. Architect, Frederick Noonan, Wright and Callender Bldg., L. A. Owner, N. W. Stowell. Contractor, Carl Leonardt, H. W. Hellman Bldg., L. A., all work except painting, marble and tile. Contract price, \$267,000.

LIBRARIES.

COALINGA, FRESNO CO., CAL.—Library, 2 story and base, reinforced concrete, \$26,000. Architects, Swartz, Hotchkiss & Swartz, Rowell Bldg., Fresno. Owners, City of Coalinga. The building is designed in the Classic style and will cover a considerable ground area. There will be two large reading rooms, librarian's office and stack room. Metal shelves will be used. Interior finish will be of pine and hardwood. A maple floor is specified. There will be a central heating system. Exterior of the building will be faced with cement plaster. Plans have been approved by the Library Trustee and bids will be called for as soon as the approval of the Carnegie people is secured.

POST OFFICES.

CASPER, WYO.—Post office, 1 story, base and mezzanine, brick, stone and steel. Cost not stated. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. This building has been mentioned here before when bids were first taken or

the work. All figures received have been rejected and plans revised. The building covers an area of approximately 4,000 square feet. It will be of semi-dreproof construction. Interior finish will be of pine and hardwoods. Plans provide for a steam heating system and metal wall, base, and frames. Exterior will be faced with cut stone and pressed brick. Bids are now being taken and will be opened on October 24th. Plans can be secured from the Supervising Architect at Washington or from the Custodian of the site at Casper, Wyo. An official proposal appears in another column of this issue.

GRAND JUNCTION, COLO.— Post office, 1 story, base and mazzanine, brick and steel construction. Cost not stated. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. All bids received for this work have been rejected and new plans are now nearly ready for figures. The building will be finished in pine and hardwoods. There will be steam heat and metal window sash and frames. Exterior will be faced with cut stone, pressed brick trimmed with cut stone. Plans can be secured from the Supervising Architect or from the Custodian of the site at Grand Junction, Colo.

Contracts Awarded.

SAN FRANCISCO—Interior painting, Custom House, \$22,000. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. Contractor, J. R. Kissell, 1723 Polk street, S. F. Contract price, \$22,000.

RAILROAD CONST., STATIONS AND EQUIPMENT.

RICHMOND, CONTRA COSTA CO., CAL.—Passenger station, 1 story and base, reinforced concrete. \$7,000. Engineer, G. W. Harris, L. A. Owners Santa Fe Railroad Co. Plans are being prepared for an extensive Mission style depot, which is to replace the present structure in Richmond. There will be two waiting rooms, baggage and express office and office of the agent. Interior finish will be of pine and hardwoods. A steam boiler will be used. Exterior of the building will be faced with cement plaster. A clay tile roof will be used. Preliminary plans are being prepared.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$10,000. Architect, Henry C. Smith, Hume and Biddle, S. F. Owner, E. F. H. The dwelling will be erected on Alameda street, and will be designed in English half-timber style. Plans provide for about ten rooms and a bath. Interior will be finished in pine and various hardwoods. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Composition floors and tile wainscoting will be used in the bath rooms. An automatic water heater will be installed. Exterior of the dwelling is to be covered with cement plaster and half-timbering. Plans are now being prepared.

SAN FRANCISCO—Residence, 1 story and base, frame, \$3,000. Architect, Edward E. Young, 101 Keit-

ny St., S. F. Owner, Thomas Seeley. These houses are to be erected on Hill avenue near Balboa street. Each dwelling will contain six rooms and a bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be a large open fire place in each of the living rooms. The tile and brick mantels will be used. The wainscot will be used in the bath rooms and kitchens. Exterior will be covered with cement plaster and half-timbering. Plans are complete and the work is to be done by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, James Welsh, 244 20th street, S. F. The dwelling will be erected on 22nd avenue near Lake, and has been designed for a seven-room house with a bath. All interior finish will be of pine. Hardwood floors will be used in the living and dining rooms. There will be a large open fire place and brick mantel. Composition floor will be used in the bath room and tile wainscot in the bath and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$10,000. Architect, Frank S. Holland, 100 Haight St., S. F. Owner's name withheld. This work has been mentioned here before. The building has been designed for a duplex residence. Each house will contain seven rooms and a bath. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the principal rooms. Provision has been made for a central heating system, but this will not be included in the general contract. Bath rooms will have tile wainscot. Automatic water heaters will be installed. There will be open fire places and tile mantels. Tile will be used in the kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans have been revised and new figures are now being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$7,500. Architect, none. Owners, United Home Builders, 1762 Broadway, Oakland. These houses will be erected on Flaming avenue near Seminary avenue, and have been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine and hardwoods with hardwood floors in the principal rooms. Open fire places and tile and brick mantels will be used. Bath rooms will have composition floors and tile wainscot. Tile will also be used in the kitchens. Exterior will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

PIEDMONT ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$7,000. Architect, Joseph T. Smith, Balboa Bldg., S. F. Owner, George Wallace. The dwelling has been designed to contain seven rooms, two baths and sleeping porch. A garage will also be erected on the same lot. Interior finish will be of pine and various hardwoods. Hardwood floors will be used in the principal rooms. Plans provide for a central heating

system of heating and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Working drawings are nearly complete and figures will be called for shortly.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$3,000. Architect, none. Owners, Patrick Nelson Co., 2925 Addison street, Berkeley. The dwelling will be erected on the Northbrae Tract. There will be seven rooms, bath and sleeping porch. Interior finish will be of pine and some elm panels. Hardwood floors will be used in the living room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the bungalow will be covered with cement plaster on metal lath. Plans are in the hands of the owners and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base. Cost not stated. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, Thomas C. Huxley. The dwelling, which has been designed for an eight-room house, will be erected in Elmwood Park. Interior finish will be of pine and hardwoods. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have composition floors and tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

OAKLAND, CAL.—Bungalow, 1 story and base, frame. Cost not stated. Architect, A. W. Smith, 1004 Broadway, Oakland. Owner's name withheld. The dwelling will be erected in Havenswood and has been designed to contain seven rooms and a bath. Interior will be finished in pine throughout. Hardwood floors will be used in the living room, dining room and reception hall. There will be a large open fire place in the living room with tile and brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic. Plans are complete and out for figures.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,000. Architect, none. Owners, Patrick Nelson Co., 2925 Addison street, Berkeley. The dwelling is to be erected on Thousand Oaks and will contain seven rooms, baths and sleeping porch. Interior finish will be of pine, white oak and hardwoods. There will be furnace heat and open fire places. Mantels will be of brick and tile. Composition floors will be used in the bath rooms. The wainscot will be used in the bath rooms and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame,

\$2,000. Architect, none. Owners, F. R. Peake Co., 2127 University avenue, Berkeley. The dwelling will be erected on Yolo avenue near Alhila, and will contain seven rooms, bath and sleeping porch. Interior finish will be of pine and redwood with hardwood floors in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Miss L. G. Reider. The dwelling will be erected in Bushnell Place, and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine, redwood and hardwood. Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to locality. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCE—2 story and base, frame, \$10,000. San Francisco Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, R. F. Ball. The dwelling will be erected on Ashbury street, and will be designed in the English half-timber style. Plans provide for about ten rooms and three baths. Interior will be finished in pine and various hardwoods. Hardwood floors will be used in the principal rooms. There will be fireplace and open fire places. Mantels will be of tile and brick. Composition floors and tile wainscoting will be used in the bath rooms. An automatic water heater will be installed. Exterior of the dwelling is to be covered with cement plaster and half-

timber. Plans are now being prepared.

BUNGALOWS—6, 1 story and base, frame, \$2,000 each. San Francisco Architect, Edward R. Young, 251 Kearny St., S. F. Owner, T. J. Jones. These houses are to be erected on 44th avenue near 1st of street. Each dwelling will contain six rooms and bath. Interior masonry will be of pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be a large open fire place in each of the living rooms. Tile and brick mantels will be used. The wainscot will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster and tile and stucco. Plans are complete and the work is to be done by Day Linn. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, James Welch, 2112 1/2 street, S. F. The dwelling will be located on 22nd avenue near Lake, and has been designed for a seven-room house with bath. All interior finish will be of pine. Hardwood floors will be used in the living and dining rooms. There will be a large open fire place and brick mantel. Composition floor will be used in the bath room and tile wainscot in the bath and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$10,000. San Francisco. Architect, Frank S. Holland, 100 Haight St., S. F. Owner's name withheld. This work has been mentioned here before. The building has been designed for a duplex residence. Each house will contain seven rooms and bath. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the principal rooms. Provision has been made for a central heating system, but this will not be included in the general contract. Bath rooms will have tile wainscot. Automatic water heaters will be installed. There will be open fire places and tile mantels. Tile will be used in the kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans have been revised and new figures are now being taken.

RESIDENCE—2 story and base, frame, \$12,000. San Francisco. Architect, Edward T. Foulkes Crocker Bldg., S. F. Owner, J. Brock, Jr. The dwelling will be erected at the corner of Presidio and 18th avenues, and has been designed for a big class city residence. The dwelling will contain in the neighborhood of ten rooms, three baths and sleeping porch. Interior finish will be of pine and hardwoods. Hardwood floors will be used in the principal rooms. Plans provide for a central heating system and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

COLD STORAGE PLANT—1 story and base, reinforced concrete, \$10,000. Pearl Harbor, Hawaii. Architects, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Plans have been prepared for the construction of a cold storage and ice making plant which will be located at the Naval Station at Pearl Harbor. Bids are now being received and will be opened in Washington, D. C., on November 1st. Plans will be secured from the Bureau of Yards and Docks or from the Custodian of the site at Pearl Harbor. The estimated cost is available for construction.

FLATS—3 story and base, frame, \$11,000. San Francisco. Architects, Welsh & Carey, 400 Commercial Bank Bldg., S. F. Owner, J. J. J. The building will be located on Alameda Street near Stockton, and is designed to contain twelve flats, and a garage. Interiors will be finished in pine and redwood. Some hardwood

floors and elm panels will also be used. There will be a large open fire place in each of the living rooms. Mantels will be of tile. Bath rooms will have tile wainscot and composition floors. Entrances will be finished in marble and terrazzo. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

FLATS—2 story and base, frame, \$13,000. San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, P. Barbarotto. The building will be erected on Brazil near Madrid, and will have a frontage of 25 feet and a depth of 55. Plans provide for one store and a flat on the first floor and a flat of six rooms on the upper floor. Interior finish will be of pine throughout. An open fire place with tile mantel will be installed in the upper flat. Bath rooms and kitchens will have tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

HOTEL—6 story and base, reinforced concrete, \$15,000. San Francisco. Architect, Frank S. Holland, 100 Haight street, S. F. Owner's name withheld. The building will be erected on the south side of Sutter street near Taylor, and will have a frontage of 17 1/2 feet by a depth of 100 feet. A large office and lobby will occupy the entire first floor. Upper floors will contain in the neighborhood of 50 rooms, all of which will have private baths. Interior finish will be of pine with hardwood floors. Considerable ornamental plaster will be used in the lobby. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water plant. Exterior will be faced with pressed brick trimmed with sandstone. Working drawings are being prepared.

HOTEL—6 story and base, reinforced brick, \$65,000. San Francisco. Architect, G. Albert Lansburgh, 700 Mission street, S. F. Owner, A. Eisenberg. The building will be erected on Sutter street near Leavenworth, covering an area of 162x125 feet. There will be a store beside the main hotel office and lobby on the first floor. Upper floors will contain about 75 rooms and baths. Interior finish will be of pine and hardwood with ornamental plaster used in the office and lobby. There will be steam heat, elevator service and a vacuum cleaning system. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

POST OFFICE—1 story, base and mezzanine, brick stone and steel, cost not stated. Casper, Wyo. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. This building has been mentioned here before when bids were first taken on the work. All figures received were rejected and plans revised. The building covers an area of approximately 1,000 square feet, and will be of semi-detached construction. Interior finish will be of pine and hardwoods. Plans provide for a steam heating system and metal window sash and frames. Exterior will be faced with pressed brick and pressed brick. Bids are now being taken and will be opened on October 24th. Plans can be secured from the Supervising Architect at Wash-

ington or from the Custodian of the site at Casper, Wyo. An official proposal goes in another column of this paper.

POST OFFICE—1 story, base and mezzanine, brick and steel construction, cost not stated. Grand Junction, Colo. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. All bids received for this work have been rejected and new plans are now nearly ready for figures. The building will be finished in pine and hardwoods. There will be steam heat and metal window sash and frames. Exterior will be faced with pressed brick trimmed with cut stone. Plans can be secured from the Supervising Architect or from the Custodian of the site at Grand Junction, Colo.

LOFTS—7 story and base, reinforced concrete, cost not stated. San Francisco. Architects, Reid Bros., California-Pacific Bldg., S. F. Owners, Sharon Estate. This building, covering an area of 68 feet square, will be erected on the property at the corner of Anne and Jessie streets. Adjoining property owned by the same estate has but recently been improved. The entire new building has been leased for a long term through the offices of A. J. Rich & Co. Construction will be fireproof with reinforced concrete floors, walls and interior partitions of metal lath and plaster. Interior finish will be of pine and metal. Plans provide for steam heat, elevator service and a vacuum cleaning system. There will be metal window sash and frames. Exterior of the building will be faced with cement plaster. Working drawings are being prepared.

STORES—1 story and base, brick, \$10,000. San Francisco. Architect, Frederick D. Boese, 45 Kearny St., S. F. Owners, Meyer & Rehnstedt. The building will be erected at the southwest corner of Market and Stuart streets, covering an area of 45x67 feet. There will be two stores. Interior finish will be of pine. There will be pattern store fronts and marble base. Exterior of the building will be faced with pressed brick. Plans have been out for figures and a contract will be let within a day or two.

THEATRE—2 story and base, brick or steel, \$35,000. San Francisco. Architects, Rousseau & Rousseau, Markham Bldg., S. F. Owner, Nellie Harris. This work has been mentioned here several times before. The building will be erected on Broadway near Grant avenue, and will contain two stories besides the theatre. Construction will be fireproof with a complete steel frame and exterior walls of reinforced concrete. Exterior will be faced with cement plaster. Plans have been revised and are now out for figures. A contract will be awarded shortly.

Contracts Awarded.

APARTMENT HOUSE—2 story and base, frame, \$14,000. San Francisco. Architect, Charles J. Rousseau, 16 Kearny St. S. F. Owner, Mr. and Mrs. A. Sutherland. Contractor, John C. Shannon, 1676 Fulton street, S. F. Contract price, \$14,000.

CHURCH—Steel and brick, \$10,000. San Francisco. Architect, John J. Shea, 16 Kearny St. S. F. Owners, St. Joseph Church. The following contracts have just been awarded: Brick and ornamental plastering to

Herman Bosch at \$13,400, and metal furring and lathing to the Atlantic Fireproofing Co. at \$4,685.

INTERIOR PAINTING: CUSTOM HOUSE—\$22,000. San Francisco. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. Contractor, J. R. Kissell, 1723 Polk St., S. F. Contract price, \$22,000.

PIPE LAYING—\$5,100. San Francisco. Engineer, City Department of Engineering, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Contractors, Contra Costa Construction Co., S. F. Contract price, \$5,100.

City Bids Opened.

High Figure Received for Geary Street Car Advertising, Laying Pipe Bring Out Six Bidders.

R. C. Scott was the highest bidder for the privilege of selling advertising in the Municipal Geary Street cars. A bid of \$111 per car per year was received. The Geary street line is operating a total of 40 cars and at the figure submitted by R. C. Scott the city will receive something over \$12 per day from the advertising firm.

Bids were also opened on Wednesday afternoon by the Board of Public Works for laying pipe in Bay street and Van Ness avenue through Fort Mason. Six firms submitted bids, the lowest being received from the Contra Costa Construction Co. at \$5,400. The following figures were submitted:

Laying Pipe.

Massachusetts Bond Co.	\$5,982
R. C. Storrie & Co.	6,400
Gorrill Bros.	5,785
Edward Malley	6,275
Contra Costa Constr. Co.	5,400
F. Rolandi	5,800

OAKLAND AND ALAMEDA

RESIDENCES—2, 2 story and base,
frame, \$3,800 each. Oakland, Cal. Ar-
chitect, none. Owners, United Home
Builders, 1742 Broadway, Oakland.
These houses will be erected on Flem-
ing avenue near Seminary avenue, and
have been designed to contain seven
rooms, bath and sleeping porch. In-
terior finish will be of pine and red-
wood with hardwood floors in the prin-
cipal rooms. Open fire places and tile
and brick mantels will be used. Bath
rooms will have composition floors and
tile wainscot. Tile will also be used
in the kitchens. Exterior will be cov-
ered with cement plaster on metal
lath. Plans are complete and the work
will be done by Day Labor.

RESIDENCE—2 story and base,
frame, \$7,000. Piedmont, Alameda Co.,
Cal. Architect, Joseph T. Carter, Bal-
boa Bldg., S. E. Owner, George Wall-
ace. The dwelling has been designed
to contain seven rooms, two baths and
sleeping porch. A garage will also be
erected on the lot. Interior finish will
be of pine, redwood and various hard-
woods. Hardwood floors will be used in
the principal rooms. Plans provide for
a hot water system of heating and
open fire places. Mantels will be of
brick and tile. An automatic water
heater will be installed. Bath rooms
will have composition floors and tile
wainscot. Exterior of the building
will be covered with cement plaster on
metal lath. Working drawings are
nearly complete and figures will be
called for shortly.

BUNGALOW—1 story and base,
frame, \$3,000. Berkeley, Alameda Co.,
Cal. Architect, none. Owners, Patrick
Nelson Co., 2025 Addison street, Berke-
ley. The dwelling will be erected in
the Northbrae Tract. There will be
seven rooms, bath and sleeping porch.
Interior finish will be of pine with
some elm panels. Hardwood floors will
be used in the living room, dining
room and reception hall. Plans provide
for furnace heat and open fire places.
Mantels will be of brick. Tile will be
used in the bath room and kitchen.
An automatic water heater will be in-
stalled. Exterior of the bungalow will
be covered with cement plaster on
metal lath. Plans are in the hands
of the owners and the work will be
done by Day Labor.

RESIDENCE—1 story and base,
frame. East north street, Berkeley,
Alameda Co., Cal. Architect, Olin S.
Grove, 2241 Telegraph avenue, Berke-
ley, owner, Thomas C. Huxley. The
dwelling, which has been designed for
an eight-room house, will be erected
in Elmwood Park. Interior finish will
be of pine and hardwoods. Hardwood
floors will be used in the principal
rooms. Plans provide for furnace heat
and open fire places. Mantels will be
of tile and brick. Bath rooms will have
composition floors and tile wainscot.
An automatic water heater will be in-
stalled. Exterior of the dwelling will

be covered with a thin plaster on metal lath. Plaster is complete and figures are now ready to be

[illegible]

RESIDENCE—A new house, frame, \$9,000. Backus, Atlantic City, Cal., Architect; home owner, Patrick Nelson Co., 2075 Atlantic City, Backus. The dwelling is to be a single-story, two-and-a-half-bath, with eight rooms, baths and sleeping porches. Interior finish will be cream, white enamel and linoleum. There will be furnace heat and radiators. Minutels will be of fir, oak and maple. Composition floor will be used in the bath rooms. The water will be raised in the bath rooms and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement and steel metal roof. Plans are complete and work will be done by Day Bros.

LUNGKAW—The new hotel, base, frame \$30,000. Lockley, A. Smith, Col. Col. Archt., 1111 Broadway, S. F. R. Peake, Col. 217, 15th Avenue, Berkeley. The hotel is to be erected on Yolo street, between 11th and 12th streets, and will contain seven rooms, bath and sleeping porch. Interiors will be of pine and polished oak and wood floor in the living room, dining room and reception. The new furniture set and one of the Mansel's will be of the type. The room used in the hotel room. Kitchen. An automatic refrigerator will be installed. Exterior of the building will be covered with cement and metal roof. Plans are to be made for the lands of the town and to be worked by the 1910.

tels will be of tile and cork floors in the principal rooms with oak parquetry. Composition flooring in the wainscot will be used in the smaller rooms. Tile will also be used in the kitchen. Automatic water closets will be tiled. Exterior staircases will be covered with asphaltum and plaster on metal lath. Plans are complete and in the hands of the architect who will do the work in December.

RESIDENCE—A 2-story brick home, 1200 S. George Anderson, 5450 S. 47th Ave., Oakland, owner, T. Anderson. The dwelling will be erected on Loring Avenue, and has been designed to contain seven rooms, bath and sleeping porch. Interior finish, walls of tile and hardwood. Floors of tile. Kitchen, rest and oven are placed. Stairways will be of tile or brick. Hardwood floors will be used in the principal rooms. Bath room and kitchen will have tile walls and floor in the rest room will be of composition. An attached garage for two will be installed. Estimated cost, \$10,000. Plans are being completed and the work will be done by Berg Bros. Architects, 1200 S. George Anderson.

PLANING — 1 story and base-
ment, \$2,575. Oakland, Cal. At-
tends, Newcomb & Dixon, 1814 5th Avenue,
Oakland. Owner, P. A. McWilliam.
The house will contain six
rooms and 100 sq. ft. interior ma-
tial will be pine. Hardwood floors will
be used in the living and dining
rooms. There will be a large open fire
place in the living room with back of
tile manted. The west end will be
used in the out room and kitchen.
Exterior of the house will be stucco
with cement plaster on north side.
Plans are complete and in the hands
of the owner who will do the work of
the lot or. All materials are now be-
ing purchased.

[illegible][illegible]

at \$3,000. San Leandro, Alameda
Architects, Newsum & Dixon,
15th avenue, Oakland, owner.
J. L. Smith. The house will contain
four rooms and bath. Interior finish
is largely of pine with some
wood veneer and hardwood floor.
to provide for furnace heat and
fire place. Mantel will be of the
dark. An automatic water heater
will be installed. Bath room and
kitchen will have tile wainscot. Ex-
terior of the house will be covered
with cement plaster on metal lath.
Plans are now being prepared.

APARTMENT HOUSE—A two-story and one frame, \$20,000, oakland, California, home. Owner E. A. Schmidt. The building will be erected on the east side of Harrison street near 14th. It has been designed to contain 50 rooms, which will be arranged in two and three room suites. All apartments will have wall beds and private bathrooms. Interior finish will be of the highest. Plans provide for a swimming pool and a hot water plant. The rooms will have composition floors and tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. The owner is on the site.

APARTMENT HOUSE—Esty and
son, C. L. Class 1 Construction, \$70,000.
Kland, C. H. Architect, c. W. Mc
Call, Central Bank Bldg., Oakland.
Plans and specifications are availa
ble. Plans are offered for hearing the fol
lowing work on the \$70,000 apartment
house which is to be erected in Oak
land from plans by W. McCall. Plans
may be taken from this office in the
afternoon in which application is made.
Plans are desired on the following
work: Plastering, plumbing glass and
tile, sheet metal work, painting
interior work, brick and masonry
work and tile work. Bids must be
deposited in the hands of Architect McCall, Cen
tral Bank Bldg., Oakland, by Thurs
day, October 2nd.

PLANS: 2-story and 1-base, frame structure, Perkyco, Alameda Co., Calif., 100 E. of Jordan 742 Market St., Alameda. Owner N. Andrew, 153 Stuart Street, S. F. The building will be located on Lewiston avenue north of Alameda, and will contain two modern flats of five rooms and bath. Interiors will be of pine throughout. On second floor will be used in living rooms and dining rooms. There will be open the place and the of the kitchen. The will be used in the living rooms. Exterior of the building will be covered with angles of concrete and in the hands of the owner will do the work by the contractor. All materials are now being purchased.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

RESIDENCE ADDITIONS—1 story.
 Frame \$2,000. San Anselmo, Marin Co.,
 Cal. Architect, Maxwell G. Bugbee,
 135 Lark Bldg., S. F. Owner, George
 Brock. This work will include the
 construction of a garage and conserva-
 tory and a frame water tower. The
 tower will contain a tank with a ca-
 pacity of 3,000 gallons. Mr. Brock has
 expended in the neighborhood of \$15,-
 000 on his property, and has one of
 the finest homes in Yolanda Park.
 Plans for the above described work
 will be completed this week and fig-
 ures will be taken.

PASSENGER STATION—1 story and
 base, reinforced concrete, \$39,000.
 Richmond, Contra Costa Co., Cal. En-
 gineer, G. W. Harris, L. A. Owners,
 Santa Fe Railroad Co. Plans are be-
 ing prepared for an attractive Mission
 style depot which is to replace the
 present structure in Richmond. There
 will be two waiting rooms, baggage
 and express office and office of the
 agent. Interior finish will be of pine
 and hardwoods. A cement floor will
 be used. Exterior of the building will
 be faced with cement plaster. A clay
 tile roof will be used. Preliminary
 plans are being prepared.

TELEPHONE EXCHANGE—3 story
 and base. Class A construction. Cost
 not stated. Richmond, Contra Costa
 Co., Cal. Architect, Architectural De-
 partment Pacific Tel. and Tel. Co., 333
 Grant avenue, S. F. Owners, Pacific
 States Tel. and Tel. Co. Announcement
 has been made that this company has
 selected a site on the principal busi-
 ness street of Richmond, and that pre-
 liminary plans are being prepared for
 a modern telephone exchange. The
 entire building will be occupied by the
 company. Further than the fact that
 the structure will be of the Class A
 type, no details can be secured. Fur-
 ther mention will be made of the work
 as plans progress.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

BUNGALOW—1½ story and base,
 frame, \$1,500. Madera, Madera Co.,
 Cal. Architect, Ralph P. Morrell, Odd
 Fellows Bldg., Stockton. Owner, Mrs.
 J. P. Daulton. The house has been de-
 signed to contain seven rooms, bath
 and sleeping porch. Interior finish
 will be largely of pine with some hard-
 wood and white enamel. Hardwood
 floors will be used in the principal
 rooms. There will be furnace heat
 and open fire places. Mantels will be
 of tile or brick. The wainscot will be
 used in the bath room and kitchen.
 There will be an automatic water
 heater. Exterior of the dwelling will
 be faced with cement plaster and
 cast iron. Plans are complete and fig-
 ures are being taken.

HALL OF RECORDS—1 story, base
 and mezzanine, reinforced concrete,
 \$35,000. Merced, Merced Co., Cal. Ar-
 chitect, C. H. Russell, Humboldt Bank
 Bldg., S. F. Owners, Merced County.
 The building is designed in the Classic
 style and will be erected in the Civic
 Center. Construction will be fireproof.
 Interior will be finished in pine and
 hardwood with considerable tile and
 ornamental plaster work. Metal

The "Wybro" Stamp means Panel Service

Every time you want a panel that is as good as it looks, be sure you look for the "Wybro" stamp on the back.

This stamp insures your getting the best panels made---panels that mean service to you and lasting quality.

shelves will be in-talled. Plans provide for a fireproof vault. A central heating system and modern plumbing and electric work are specified. Exterior of the building will be faced with cement plaster. Plans are complete and are now out for figures. Bids will be opened on November 10th. Plans can be secured from the architect.

LIBRARY—2 story and base, reinforced concrete, \$20,000. Coalinga, Fresno Co., Cal. Architects, Swartz, Hotchkiss & Swartz, Rowell Bldg., Fresno. Owners, City of Coalinga. The building is designed in the Classic style, and will cover a considerable ground area. There will be two large reading rooms, librarian's office and stack room. Metal shelves will be used. Interior finish will be of pine and hardwood. A maple floor is specified. There will be a central heating system. Exterior of the building will be faced with cement plaster. Plans have been approved by the Library Trustees and bids will be called for as soon as the approval of the Carnegie people is secured.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

BRIDGE—Steel arch reinforced concrete. Cost not stated. Reid's Ferry, Shasta Co., Cal. Engineers, Thomas & Post, Los Angeles. Owners, Shasta County. The Supervisors of Shasta County have tentatively accepted plans and specifications for a steel and concrete highway bridge prepared by Engineers Thomas & Post of Los Angeles. The bridge is to be erected over the Sacramento River at Reid's Ferry, and is one of the connecting links in the State Highway. Plans and specifications were submitted to the State Highway Commission for approval.

CLUB HOUSE—2 story and base, reinforced concrete, \$13,000. Auburn, Placer Co., Cal. Architect, Frank S. Holland, Ten Eight Street, S. F. Owners, Auburn Trolley Club, W. G. Lee, J. M. Francis and H. M. Hooper, Building Committee. This work has been mentioned once before. There will be two stores on the first floor and lodge rooms above. Interior will be finished in pine and redwood. There will be steam heat. Exterior of the building will be faced with cement plaster. Plans are in the hands of the Building Committee and figures are now being taken.

SCHOOL—1 story and base, frame. Cost not stated. Upper Lake, Lake

Co., Cal. Architect, Department of Indian Affairs, Washington, D. C. Owners, United States Government. Bids will be opened on October 6th at Washington, D. C., for the construction of a one story frame building to be erected at the Round Valley Indian School. Plans are on file at the office of the local Indian Agency, 268 Market Street. An official proposal appears in another column of this issue.

EXCAVATING, ETC.—Cost not stated. Canal work. Engineers, United States Reclamation Service, Orland, Cal. Owners, United States Government. Plans have been approved for the construction of about 6½ miles of irrigation canal in Colusa County. The work involves the excavating of about 200,000 cubic yards of materials. The canal will be constructed in Colusa County about 23 miles from Siles. Plans can be secured from the U. S. Reclamation Service Engineers in Orland. Bids will be opened on October 15th. An official proposal appears in another column of this issue.

One of the buildings will be 74x176 feet and will contain five classrooms, assembly hall, study rooms, offices and domestic science and manual training departments. The other two buildings will each cover an area of 65x165 feet, and will each contain 12 class rooms and an auditorium. Interior finish and floors will be of pine. Plenum heating systems will be installed. Exteriors will be faced with pressed brick. Working drawings are complete and figures will be called for shortly.

STOGEES AND LOFTS—1 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architect, Fred D. Bohn, Douglas Bldg., L. A. Owner's name withheld. The building will have a frontage of 80 feet and a depth of 136 feet. Construction will be of reinforced concrete and fireproof. Interior finish will be of pine and metal. Plans provide for team heat, three elevators and a vacuum cleaning system. There will be metal window sash and frames and fireproof doors. There will be stores on the first floor and upper floors will be arranged for light lifts. Exterior of the building will be faced with cement plaster. Plans will be completed and all contracts awarded by January 1st.

HOTEL, 7 story and base. Class A construction. \$125,000. Los Angeles, Cal. Architect, Walter Webber, Ferguson Bldg., L. A. Owners, Pico Street

Improvement Co. Only preliminary plans have been prepared for this building, which is to be erected at the southwest corner of Pico and Ferguson streets. The owners contemplate the construction of but one wing of the building at this time. The cost of this work is estimated at \$125,000. Further mention will be made as the plans progress.

Contracts Awarded.

RESIDENCE—2 story and base, frame, \$18,000. Oak Knoll, Los Angeles Co., Cal. Architects, Frohman & Martin, Shavin Bldg., L. A. Owner, Judge C. J. Willitt. Contractor, E. D. Tyler, 539 South Pasadena street, L. A., general construction only. Contract price, \$18,000.

SCHOOL—2 story and base, brick and steel, \$11,928. Los Angeles, Cal. Architects, Allen & Allison, Hibernian Bldg., L. A. Owners, State of California. Contractors, Alta Planning Mill Co., 830 McGuffey St., L. A., general construction. Contract price, \$11,928.

STORES AND LOFTS—2 story and base, brick, \$35,000. Los Angeles, Cal. Architects, Morgan, Wallis & Morgan, Van Nuys Bldg., L. A. Owner, Mr. H. Van Nuys. Contractor, National Fireproof Building Co., Central Bldg., L. A. Contract price, \$35,000.

HOTEL—12 story and base, reinforced concrete, \$267,000. Los Angeles, Cal. Architect, Frederick Noonan, Wright and Callender Bldg., L. A. Owner, N. W. Stowell. Contractor, Carl Leonardt, H. W. Hellman Bldg., L. A., all work excepting painting, marble and tile. Contract price, \$267,000.

PORTLAND AND OREGON.

FACTORY—1 story and base, reinforced concrete, \$25,000. Milwaukie, Ore. Architect, P. Chapell Brown, Mohawk Bldg., Portland. Owners, Beaver State Motor Car Co. The building will cover a considerable ground area, and is to be erected on a corner. Construction will be fireproof. Interior of the office portion will be finished in pine. There will be a cement floor and metal window sash and frames. Over \$20,000 will be expended in the purchase of machinery. Plans are now being prepared.

GARAGE—2 story and base, reinforced concrete, \$10,000. Portland, Ore. Architect, George Rea, Portland. Owners, Francis & Kaddery. The building will be erected at the northeast corner of 13th street and Hawthorne and will cover an area of 56x110 feet. A concrete floor and metal window sash and frames will be used. Interior finish will be of pine. There will be special storage tanks for gasoline. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be called for shortly.

STORE AND OFFICES ADDITION—1 story, reinforced concrete, \$10,000. Portland, Ore. Architect, George Rea, Lumber Exchange Bldg., Portland. Owners, Kaddery and Francis. This work will include new interior finish, plumbing, painting, electric work and plastering. The new portion of the building will be arranged for offices. Exterior will be faced with cement plaster. Plans are complete and figures are being taken.

STORES—1 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architect, Aaron H. Gould, Worcester Bldg., Portland. Owner, J. C. Costello. The building will occupy a corner site and will cover an area of 100x152 feet. There will be a number of modern stores lined in pine and hardwoods. Construction will include a cement floor, marble base, patent store fronts, plate glass windows and metal window sash and frames. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be called for at once.

STORE AND GARAGE—1 story and base, brick and steel. Cost not stated. Portland, Ore. Architect, Charles W. Fritz, Northwest Bldg., Portland. Owner, J. C. Bird. The building will cover an area of 100 feet square, and has been designed to contain several stores and a public garage. Interior finish will be of pine throughout. There will be a cement floor and metal window sash and frames. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for shortly.

STORES AND OFFICES—2 story and base, brick and steel. Cost not stated. Corvallis, Ore. Architect, A. C. Jenkins, Stark Bldg., Albany. Owners, Wells and Foster. The building will be erected on a corner lot and will contain stores on the first floor and a number of modern offices on the upper floor. Interior finish will be of pine throughout. There will be a central heating system and metal window sash and frames. Patent store fronts will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

Contracts Awarded.

HOTEL—2 story and base, brick. Cost not stated. Carlton, Ore. Architect, E. N. Lury, McMinnville. Owner's name withheld. Contractor, Martin Johnson, Carlton. Contract price not stated.

STORES AND OFFICES ALTERATIONS—Brick construction, \$10,000. Portland, Ore. Architect, none. Owners, Western Realty Co., Board of Trade Bldg., Portland. Contractor, Hurley-Mason Co., Board of Trade Bldg., Portland. Contract price, \$10,000.

SEATTLE AND WASHINGTON.

CHURCH—2 story and base, steel, brick and stone, \$65,000. Walla Walla, Wash. Architects, Beezer Bros., Northern Bank Bldg., Seattle. Owners, First Congregational Church. The building will be erected on a corner site and will cover an area of 50x120 feet. The design is in the Classic style, with the exterior faced with pressed brick and cut stone. Besides the main auditorium, which will have seating capacity of 1,000 people, there will be Sunday school rooms, social parlors, a large banquet room and kitchen. Interior finish will be of pine and hardwood with considerable ornamental plaster. Plans provide for a central heating system, probably steam heat. Several large art glass windows are to be installed. Working drawings are complete and figures are being taken.

HOSPITAL—2 story and base, reinforced concrete, \$40,000. Seattle, Wash.

Architect, Daniel H. H. in Seattle. Owners, City of Seattle. This work was mentioned as a new architectural was first selected for plans. The building will be located in Richmond Highlands, and is the first unit of a large project. The main building will be 175 feet long with two wings each 214 feet long. The interior will be finished in pine, oak and hardwoods. There will be a central heat and modern electric lighting. Exterior of the building will be faced with cement plaster, and will be complete and figures will be set for in a few days.

HOUSE MOVED IN SECTIONS.

An enterprising contractor in West Somerville, Mass., has made it practically impossible to move a three-story dwelling as it stood, by cutting it straight down through the middle in a gable, and carted it away in two sections. Each section was a complete floor high. The lase, however, was 10 feet in length by twenty feet in width. The result, of course, was that the moment it threatened to topple over. To obviate this, the brickwork of the chimneys and the stone base of the foundations were loaded down with heavy stones for ballast.

While the work of sawing was going on, braces, of course, were applied to hold the parts firmly in place. When the two parts were separated, the two miles away from the original site, the workmen put them back so well that, with a new coat of paint over the whole, no one would ever suspect the remarkable feat that had been achieved.

The house at its old location stood ten feet above the street level. This was the reason for the peculiar method of transportation used to be resorted to.

C. ROMAN CO. NOW AGENTS FOR THE LOWRIE SAFE COMPANY.

The Lowrie Safe & Vault Co. have just appointed C. Roman Co. their agents in Seattle and the adjacent territory. It is well known that Mr. Roman's company could make a great success of the Wall Safe which should be in every office and every up-to-date apartment house.

PURE WATER NECESSARY FOR ICE MAKING.

The rapid growth of the city of Vancouver, British Columbia, has made it necessary to erect a water works. The reports of the city engineer show that the water supply is inadequate for the needs of the city.

In the manufacture of ice, the water used must be of the highest quality. It is important that the water be free from all impurities, and that it be of a pure, transparent quality. The water must be of a pure, transparent quality, and must be free from all impurities.

In the plate system of ice making, it is becoming more and more common to use distilled water. This is because the distilled water is free from all impurities, and is of a pure, transparent quality. The water must be of a pure, transparent quality, and must be free from all impurities.

the greater part of the material and mineral matters in it, which are excluded from the food of the fish. It is insufficient ground for the fish to make directly from the water. The water is filtered and water is added. It is called that water pure and clean. It is drinking is pure and clean. It is called that water pure and clean. It is drinking is pure and clean. It is called that water pure and clean. It is drinking is pure and clean.

FOREIGN TRADE OPPORTUNITIES.

Where addresses are omitted they may be obtained from the Bureau of Foreign and Domestic Commerce, Washington, D. C. In applying for addresses refer to file number. Persons are requested to contribute to this department, and in doing so should in each instance state in what language correspondence should be conducted.

No. 11576. Machinery for unloading vessels.—A foreign railway company

controlling a large percentage of the facilities of a certain port, also operating lines of steamers and handling freight from a large number of vessels other than those operated by it. It is, if any, improved machinery for the loading and unloading of cargo. As the shipping of the port is steadily increasing, and it is expected to be added to considerably by the opening of the Panama Canal, it is no question that this company is in the market in the near future for machinery of this kind. It is, if any, improved machinery for the loading and unloading of cargo. As the shipping of the port is steadily increasing, and it is expected to be added to considerably by the opening of the Panama Canal, it is no question that this company is in the market in the near future for machinery of this kind. It is, if any, improved machinery for the loading and unloading of cargo. As the shipping of the port is steadily increasing, and it is expected to be added to considerably by the opening of the Panama Canal, it is no question that this company is in the market in the near future for machinery of this kind.

No. 11622. Motor cars.—A letter has

been received by an American consul in India stating that a business man in India stating that he requires over a dozen commercial motor cars of 32 seats for passenger service and also some lorries for carrying goods. He desires to be supplied with the best makes of American cars, and also mentions that he would like to purchase such cars on a hire-purchase system. He states that he is prepared to give sufficient references and corresponds in English.

No. 11663. Stoves and office appliances for burning crude oil.—A

request from an American consular officer at a local firm, which furnishes references, has made inquiries as to whether there are manufactured in the United States domestic cooking and heating stoves and furnaces fitted for burning crude oil, or grates or other appliances that could be fitted in for the purpose, and if so, it would like to know what manufacturers in the United States would be willing to purchase direct or act as agents in the local territory. As the demand for fuel on vessels and houses and in manufacturing plants and offices is increasing very rapidly, it is of the opinion that there is a large sale for stoves or grates fitted as above described, and that for an appliance that could be fitted into furnaces already installed in residences.

No. 11665. Paying contract.—A cable-

message has been received from an American consular officer stating that a foreign consular officer desires to contract with an American firm for eight years' term. Copy of the telegram containing full particulars, will be sent to interested firms by the Bureau of Foreign and Domestic Commerce. This contract it is stated, will amount to \$1,000,000.

BOOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

Price 50 Cents

The Ascension of Cities Skylines.

Most of the great skyscrapers distinguishing American cities that have sprung up during the last few decades, owe their very existence to

Otis Elevators

These are the Elevators that have removed the limit from the height of buildings so far as the speedy and safe transportation of passengers is concerned.

If you are not familiar with the many types of Otis Elevators that meet every condition of passenger and freight transportation, write to us. We will cheerfully supply you with full information.

Frank Neidick

Carpenter and Builder

Phone Mission 5126

2669A Howard St., Bet. 22 nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Longitudinal Section of Self-Sentering. Actual Size.

Concrete Floors

can be built without form work

if you make use of the new form of expanded metal which is a centering and reinforcing combined.

Self-Sentering is a material perfected after years of study and experiment in reinforced concrete construction. It consists of a series of heavy, cold-drawn ribs connected with the most efficient form of expanded metal.

Self-Sentering is adaptable to practically every type of concrete construction. It affords

the simplest and most economical method of building concrete, floors, roofs, ceilings, side walls, and partitions. It is adaptable for both flat and curved construction. It can be used for roofs of any type, as it supplies a bond which will hold the concrete until set on any inclined surface.

Write for our Fireproofing Handbook on low cost fire-proof construction with Self-Sentering. We shall be glad to send you a complimentary copy on request. Write today.

Editorial Comment.

Figures given out by the government estimate on the income tax show some interesting facts in regard to the distribution of wealth. It is determined the 425,000 citizens will be subject to the tax by reason of being possessed of an income of \$2000 a year or more. Of this 425,000 fortunate ones 126,000 belong to the first class with incomes of from \$2000 to \$5000 per year. The tax on such incomes is comparatively small and the income estimated from this source is about \$630,000. The next class embraces those whose income is from \$5000 to \$10,000 and it is figured that 175,000 people will be subject to this tax. The estimated revenue from the second class is \$5,340,000. The next class are those whose income amounts to from \$25,000 to \$50,000 a year which will pay \$9,000,000 a year.

If we divide the income tax payers at the \$25,000 line it is found that 292,000 or nine-tenths of the entire number of income tax payers have less than \$25,000 income. There are only 35,000 persons who have an income of more than \$25,000 per year which is less than one-tenth of the whole number coming under the provisions of the law. Yet this one-tenth will pay more than four-fifths of the entire income tax. Four hundred and fifty people have an income of more than \$500,000 a year, and these will pay \$22,961,500 or more than one-fourth of the entire amount. The total revenue to the government from this source is estimated at \$82,000,000. It will be paid by about one-fourth of the population. And of this one-fourth the great amount of the tax will be paid by a very small number of persons.

The tax is a discriminatory tax on wealth graded on the greatest fortunes. It is just and equitable, as the burden of taxation should fall upon those able to bear it.

At the meeting of the old-time Telegraphers' Historical Association of the United States at Mount Clemens, Michigan, on August 28th, Thomas A. Edison sent a message over the wire to President Wilson. The occasion was of special interest, because Mr. Edison stood upon the same site where he stood when he sent his first message as a telegraph operator, and used the same instrument he used fifty-one years ago when, as a boy of fourteen, he sent his first message over the lines of the Grand Trunk Railway.

Back in the pre-telegraphic days, when Edison was only a newspaper boy on the Grand Trunk Railway, he saved his youthful enterprise by printing and selling a small newspaper containing the news about his route. He kept a little font of type in the

baggage-car and printed the paper on the train, so its items were strictly up to the minute. It was during this period that a trainman lifted him by the ears, later causing the deafness that now blurs his hearing.—Scientific American.

Tabulated facts are often interesting reading when properly arranged. As a case in point the statistics relative to the mortality rate in the Panama Canal zone is illustrative. The following taken from Leslie's Weekly shows in a striking way what can be effected by scientific sanitation:

"Panama, prior to American occupation in 1904, was known as a death hole.

Colonel William C. Gorgas of the Army medical corps was appointed by President Roosevelt to clean up the 181 miles.

When he began work the death rate in the Canal Zone, Colon and Panama was 19.91 per 1000 of population.

In 1915 for the same places it was 21.18, or cut down more than one-half.

Among American employes the death rate in 1906 was 8.14 per 1000, and in 1911, an average year, it was reduced to 5.34 per 1000 for both disease and accidents.

His methods in the main have been twofold. First, clean up the cities; and second, kill the mosquitoes and enforce rigid quarantine.

To the passage of the first ship in October 5718 employes have died.

Of the total 1192 have been killed by violence.

The largest number killed in one year was 175.

An average of eleven employes has been killed every month since American occupation.

The only epidemic of yellow fever was from April to September, 1905, when thirty-seven employes died.

Smallpox, the plague and other virulent diseases have been banished.

Each employe is entitled to thirty days' sick leave on pay, with free medical attention.

About twenty-four out of every 1000 employes are constantly sick, and the hospitals have a capacity of 1200 patients.

The Department of Sanitation has 700 employes.

It has cost to date \$16,500,000."

Sixteen and one-half million dollars is a good deal of money and yet that expenditure has been the only means of making possible the completion of the great work of the canal. Here is a concrete example of what can be accomplished by proper sanitation and strict health precautions. It demonstrates that money expended in this direction is wisely spent, for the first requisite of all things is health, and health is primarily secured by the prevention of disease.

Building Stone. Color In Selecting Materials For Building Purposes.

Wm. A. Parks, B.A., Ph.D., in the Architect, Builder and Engineer.

In deciding the sort of stone to be used for a particular building the question of color will be one of the first to arise. No stone will be selected which falls below the requirements in strength and durability, but many varieties may be submitted from among which the most desirable color will be chosen. In the selection of color, architects are controlled more or less by the prevailing style, at certain times brown sandstone has been deemed the only "correct" material for many kinds of buildings. At present there seems to be a strong tendency towards the use of the lightest colored stone possible, with regard to the intrinsic suitability of certain colors to certain types of building, the present writer does not feel competent to speak. It will suffice to point out to the general reader that architects clearly recognize the adaptability of certain colors to certain purposes and that a transgression of the rules of harmony in color is as fatal to the appearance of a building as to that of any other work of art. Another factor that should be considered in choosing the color of stone is the conditions to which it is to be exposed, for instance, it does not seem wise to expose a light colored and porous stone to the smoke and fumes of a railway station.

The colors presented by various kinds of stone are so variable that general remarks are of little value. Uniformity of color is desirable and, on a broad scale it is essential, but if the variation of color manifests itself only as minute streaks and spots, the stone is still acceptable for the tone of the whole building will be uniform at a short distance. For instance, the yellowish and streaked Nepean sandstone, so largely employed in public buildings in Ottawa, loses little by the lack of uniformity in color, and the same may be said of the purplish streaked sandstone quarried near Perth, Ont. On the other hand, the using of individual blocks of stone of a different color among a more uniform lot produces a very unsightly effect. In many of the limestone quarries the different beds are used indiscriminately, with disastrous results as to color. This desire to utilize at once the whole product of a quarry is more destructive of uniformity of color in buildings than any cause with which I am acquainted. If the various beds in a quarry vary in color, the product should be classified, and the stone from a single bed used for an individual purpose. There are, however, several good reasons why this is not done. In the first place, in most of the smaller quarries, the stone for a building is actually quarried for that particular building, frequently by contract. It is therefore difficult, in fact, economically impossible, to supply stone from a single bed alone; the result being that all the beds are used frequently with unsightly effect. The only cure for this evil lies in more extensive operations and accumulation of stock of the

various kinds of stone. A second practical reason why stone of different color is employed in the same structure lies in the fact that certain of the beds are of the proper thickness for the making of sills, lintels, etc. Differences of color are almost universally overlooked in the construction of the smaller buildings in order to make use of stone of convenient thickness. The only remedy for this practice lies in the willingness of builders to pay more for the stone. From the above remarks it will be seen that a quarry which presents the same color throughout the various beds is very much more valuable than one which does not.

While many of the colors presented by stone are acceptable, at least for certain purposes, some tints are in themselves objectionable, particularly muddy shades of yellow and green. There are also differences in appearance, which cannot be described as mere color. For instance, many of the gray sandstones are bright and cheerful in color while others present a dull or "dead" aspect. Two limestones, not materially different in color, may nevertheless differ greatly in the "liveliness" of their appearance. In this connection it is well to bear in mind that it is a somewhat difficult matter to form a conception of the artistic effect of a whole building from the inspection of the color of a small specimen of stone. The aspect if not the real color of stone, also varies greatly according to the manner of dressing; a building of bush-hammered stone will present a very different color from a structure of the same stone with rock face. Finally, there are few stones which maintain their original color for a long series of years, in fact it is often more important to ascertain the eventual color that a stone will assume than to learn its hue when freshly quarried. Any description of color is inadequate to convey to the mind of a reader an exact conception of the appearance unless accompanied by a reference to some well-known tint.

Color of Granites.—In the case of the granites, composed as they are of different minerals, the color effect is necessarily spotted or speckled. The coarse grain of the granite the more pronounced is this appearance. The very fine granites, in which the individual minerals are about seven one-hundredths of an inch long, lose this speckled appearance and appear almost homogeneous when viewed from a short distance. A granite in which the feldspars measure less than one-fifth and two-fifths of an inch the stone is "medium"; if the feldspars exceed two-fifths of an inch in length the tone is "course".

As already seen, the actual color of the component minerals of a granite varies greatly. The quartz may be clear or milk white, or slightly tinted; the feldspar in the Kingston granite has a quartz-like bluish tint. It is to the color of the feldspar, however, that most

granites owe their characteristic appearance. This material usually makes up the bulk of a granite, so that its color, modified by that of the other materials, determines the color of the rock. The commoner colors of feldspar are red and white and we have in consequence red and white granites, but the latter are grey rather than white, owing to the effect of the other minerals in modifying the white of the feldspar. Light grey and dark grey varieties differ only in the degree that the white of the feldspar is reduced by the presence of black mica. In the red granites the feldspar itself varies greatly in the intensity of its color showing tints from a light pink to a deep blood red. As in the case of the grey granites, the red of the feldspar is modified by the presence of varying amounts of black mica. The uniform appearance of granites is frequently marred by the presence of "knots," which are segregations of the original magma in which a much higher percentage of black mica is present. The development of an indistinct banded structure or parallel arrangement of the individual components detracts from the appearance of a granite. Many of the Ontario granites show this peculiarity, which is an evidence of their gradual passage into gneisses.

The feldspar individuals, more particularly in the syenites, possess other colors than white or red. Grey, blue and blueish grey are the commoner tints, but an almost endless number of colors may occasionally be recognized. Many of these feldspars possess a pronounced iridescence, so that the polished surface of the stone presents a sheen when viewed from different positions. The beautiful monumental syenites from Norway owe their chief charm to this peculiarity of the feldspar.

Whatever the color of the granite, the stone usually presents a much lighter color when bush-hammered than when polished, this difference of color between the polished and the hammered work is taken advantage of in order to form a strong contrast in finishing monuments.

The so-called black granites which are really igneous rocks of very different composition, including such stones as diabase, gabbro, diorite, etc., derive their dark color from the large amount of black hornblende or augite present.

Color of Sandstone.—The constituent grains of the better grades of sandstone are nearly always quartz, although other minerals may be present in small amounts. As the quartz grains are normally either colorless or white, it is to the color of the cementing material that we must look for the general color of the rock. This material is commonly either clay or iron oxide or lime. The lighter colored white and grey sandstones are cemented by clay or lime or an admixture of both, but those in which lime predominates are not only brighter in ap-

Wednesday Oct. 8, 1914.

pearance but more durable. Very argillaceous sandstones are dull in appearance and are liable to such disintegration. Sandstones containing iron oxide as a cementing material usually show some tone of red or brown. If the whole of the cement is ferric oxide the stone is bright red, but when admixture with other substances may fade to a pinkish color, or may change through shades of chocolate to dark brown.

Sandstones frequently present a banded structure showing variations in color. The stone from Perth, Ont., for instance, is of a white color with purple bands, and much of the Nepean sandstone is banded with yellow. In a finer way, the lines of original sedimentation are manifest on the face of blocks of sandstone as fine parallel streaks of slightly different color; much of the Medina sandstone from the Forks of the Credit river is marked in this way (credit). It is seldom that all the beds in a quarry of colored sandstone present the same tint, and even the same bed frequently shows a different color in different places. Not only by banding is the uniformity of sandstones marred, but also by the presence of spots or blotches usually of a lighter color than the main portion of the rock. The mottled Medina sandstone at Grimsby and at Merriton, Ont., shows a brown base with regular white blotches scattered through it.

While the majority of sandstones present a color from white to grey or from pink to dark brown, some well known stones are of an entirely different tint. For instance, the "blue-stone" of the state of New York is a sandstone in which quartzites and tel-spathic grains are cemented by a matrix of hornblende fibres together with less important substances. The "sillery" sandstone of Quebec is greenish in color, and yellowish tints are given by the stone from many localities.

Color of Limestones.—Perfectly pure limestone is white in color and is distinguished from white marbles by its impurities due to the presence of some kind of impurity. The colored material may be chemically combined with the carbonate of lime in the form of carbonate of iron or manganese or it may be present as a foreign material mingled with the particles of lime carbonate.

By far the commonest variety of limestone is clay, where the color is altered to the familiar "green" or "stone" color. Carbonaceous matter is frequently present, resulting in some of a very dark color as in the case of many of the Black River limestones of Eastern Canada. Much of the so-called blue limestones owes their color to the same ingredient. Yellow limestones are dependent for their color on some form of iron, and some are generally true of greens, stone. Red limestone is of less frequent occurrence, but examples are not unknown, the color in this case is owing to the presence of iron in a thoroughly oxidized condition. Although many different tints are occasionally met with in limestones, white, yellow and bluish-grey must be regarded as by far the most common.

Color of Marbles.—Pure marble is pure white, but its derivation from this color are so numerous as to be so many different causes of general

remarks are of little value. The question of color in marbles is therefore more easily discussed when specific cases are considered.

CONSTRUCTION OF HIGHWAYS.

By Hon. Ernest Lister, Governor, State of Washington.

Address delivered at the Three States Good Roads Rally at Eureka, Cal., Aug. 19-20-21, 1913, which resulted in the permanent organization of the Pacific Coast Good Roads Association.

The subject assigned to me, "The General Necessity of Good Roads," is one upon which there is so little difference of opinion, and upon which the public is so united, that there appears to be little to be added to what has already been said regarding it.

There has been a marked change in sentiment in recent years along this line. Until a short time ago, the appeal of a farmer for a road that would enable him to deliver his products to the market at a reasonable cost for transportation, received little encouragement from the city man; and if the city man appealed to the county authorities for the construction or improvement of a road that would enable him to enjoy a trip to the country districts by automobile, he usually found the farmer against him. In the matter of road construction, each considered the other his enemy.

The secret of the new order of things rests in the constant agitation that has been carried on by the good roads' enthusiasts, in emphasizing the great benefits to be derived by the farmer through the construction of good roads, and in educating the motorist to see that the road benefitting the farmer, and making it possible for the farmer to further improve and develop his lands, is, in almost every instance, the best road for the motorist or automobile owner.

Today we find the city man and the farmer working hand in hand for good roads, and as a result of this united effort, more and better results have been accomplished in the past five years in road construction than in any ten-year period previously. Today the road that will make it possible for the farmer to transport his produce to the town or city at a minimum cost, has the support of the city tradesman; for it also enables him to reach the farmer with his wares at the lowest possible cost. All who desire the pleasure of automobilizing, enjoy traveling through a thickly settled, well-improved and prosperous farming district.

As a result of the united effort now being made, a better class of roads is being constructed than ever before. Formerly, in road construction, the lines of least resistance were too often followed, regardless of the value of the road for service, after completion. Roads with grades of 10, 12 and 15 per cent were formerly built, when by making cuts or fills or short detours, these excessive grades could have been eliminated. No matter how good the road may be with such excessive grades the load-drawing ability of a team has to be figured on the basis of the heaviest grade over which the load can be hauled. Even though, over a

road 35 miles in length it might be necessary to haul a load of three tons over one of the 10 miles, if the grades over the rest of the mile permit the hauling of a load of only one ton, one ton is the maximum load that can be handled over the entire distance of 10 miles. This is the drawing capacity of a team is reduced to one-third of what it would be with easy grades established along the one mile of the 10 miles to be covered.

With the development of road construction in recent years, one of the important matters considered has been and will continue to be, the cost per mile of hauling. Railroads are constantly engaged in reducing grades their lines, for the sole purpose of reducing the cost per ton mile in the hauling of freight; and today this is also considered one of the most important elements in highway construction.

In the State of Washington a rule has been adopted in the laying out of all new roads, fixing the maximum grades at not to exceed 5 per cent. Only in exceptional cases is there deviation from this rule. The benefits derived from adoption of this rule, can readily be seen when comparison is made with the grades on roads constructed under the old system.

I have found that a great deal of the opposition to road construction on the part of taxpayers has been caused by a feeling that oftentimes money has been wasted in this line of work. While realizing the necessity for good roads, they have felt that money has been expended in large amounts for temporary work, from which they have received no real and lasting benefit. What the taxpayer desires is road construction of a permanent character, and to be convinced that a dollar's worth of value is received for every dollar expended. He is ready to pay the bills if convinced that the public funds are not being wasted. To have his full confidence, whenever road work is undertaken, it must be work along lines that will not have to be done over again the next year as a result of inefficient and incompetent engineering or construction.

For a number of years I was engaged in road building, and were I asked to give my views regarding the most important part of highway construction, I would answer: "Drainage." Roads, otherwise of good construction have oftentimes been ruined in a short time as a result of insufficient drainage. No matter how much care may be exercised in the grading of a roadway, if proper provision is not made to carry away the water that comes as a result of heavy rainfall or from side-silt drainage, there will be endless expense incurred in the effort to maintain it. In constructing a road, even though it be but the natural soil or gravel roadway, the drainage should be of permanent character. Terra cotta or concrete pipes, and concrete culverts if properly built and placed will remain forever, while wooden boxes of culverts must be replaced frequently, necessitating tearing up the surface of the road.

Next in order, it appears to me, comes the question of proper grades. As I have stated before, in our state we are better at all times to fix grades at not to exceed 5 per cent, even on our mountain roads. This makes it

possible to handle heavy loads over every portion of the road. It is also important that the permanent grade be established when the work is first done, so that when the time arrives to place a hard or metal surface on the road, it will not be necessary to re-grade the roadbed, and entirely destroy the work previously done.

The proper crowning of a road is also important, so that the water will not remain on the traveled surface, but will drain into the ditches at each side of the road. Too often the drainage ditches are the ruts made in the roads by the wagon wheels.

At the last session of our legislature an appropriation equal to 3 per cent of the total appropriation made for highway construction, was set aside for maintenance. A small amount of work, done at the proper time in the maintenance of a highway, means much in the life of the road. Recent investigations have convinced me that a road drag, used when the road is in condition to get the best results, is one of the cheapest and most effective methods that can be adopted to keep a road in good condition. The road drag is one of the cheapest of all road machines, and with it one team will cover several miles of 16 or even 24 foot roadway in a day. Wherever it has been used intelligently in our state, the results have been eminently satisfactory.

I have endeavored to place before you a few of my ideas regarding the construction of good roads. I have done this, knowing that there are men here today who have had much more experience than I in this work, and who are more able to present these matters to you. My suggestions have been made with the hope that they may be of some small benefit in the great work in which, not only we of California, Oregon and Washington are interested, but in which the people of every state in the Union are interested. I feel that next in importance to our public school system, in the proper development of our country, comes the question of good roads.

Before closing I desire to say that the state of Washington is putting forth every effort in the construction of a highway from the northern boundary of our state to the southern boundary at the Columbia River, that will be a part of the great Pacific Highway. By 1915, the year during which the Panama-Pacific International Exposition is held, we will have this highway in excellent condition for automobile travel from one boundary of the state to the other, and we of Washington hope that our California and Oregon neighbors will visit us and see the wonderful resources of the great Pacific Northwest.

INCREASING EXPORTS OF CLAY PRODUCTS.

The effect of domestic clay products from the United States in 1912 were valued at \$5,999,895, an increase of \$1,335,175 or 26.4 per cent; in 1911 they increased \$1,021,118, or 23.6 per cent. Of these exports, 75.45 per cent was brick and tile and 23.55 per cent was pottery. Brick and tile exports increased \$1,335,175 or 68.84 per cent, in 1912.

Weber Memorial, Stockton, Cal.

CONDITIONS FOR ALL CONTESTANTS.

Notice is hereby given that the Weber Memorial Committee of the City of Stockton, invites architects to submit competitive designs for a Colicrete Pavilion to be erected as a memorial to Captain C. M. Weber, the founder of Stockton, and this competition shall be subject to the terms and conditions herein set forth.

The author of the design awarded first place in the competition will receive a cash prize of Fifty Dollars (\$50.00), and will be appointed architect of the structure, provided that in the judgment of the jury of award the merit of the designs submitted justifies such award. The compensation for full architectural services to be rendered by the architect awarded first prize shall be determined in accordance with paragraph one (1) of the schedule of proper minimum charges adopted by the American Institute of Architects.

The competition is open to all architects of the state.

The committee reserves the right to retain the drawings awarded first prize for such a time as may be necessary to secure sufficient funds to complete the structure, and shall be entitled to publish said drawings in pamphlet form, newspapers, magazines, etc. Drawings to remain the property of the author, however, and to be returned to him on completion of the project.

The structure is to be situated at or near the center of Hunter Square and is intended for band concerts, public speaking, etc. It shall contain approximately 750 square feet of floor space and be provided with a store room for furniture, etc; also public lavatories—male and female—completely equipped with the latest sanitary device.

An appropriate setting of lawn and shrubbery, also an adequate and decorative lighting scheme shall be included in the design. No restrictions are placed on the designer as to the material to be used in the construction, except that it shall be fireproof. Economy of cost is one of the elements of importance in this competition and in awarding the prize, consideration will be given to simplicity in design, and convenience in arrangement.

Hunter Square is rectangular in shape, extends north and south 303 feet, facing Main street on the south and Weber avenue on the north. In width it is 152 feet between curbs. The County Court House, surrounded by lawn and palms, occupies the entire eastern frontage, and unbroken line of stores and office buildings bounds it on the west. The square is asphaltum paved and approximately level.

Two drawings will be required as follows:

One block plan drawn to a scale of 1/2 inch to one foot, rendered in India ink.

One elevation drawn to a scale of 1/2 inch to one foot rendered in a medium suitable for reproduction. In case one elevation is not sufficient to properly express the design, a second elevation—in pencil—may be submitted.

Each design may be accompanied by a brief typewritten description, consisting of a memorandum specification and such other information as the author may find desirable in elucidating his drawings.

No competitor shall submit more than one design.

All drawings together with the accompanying papers, must be delivered at the office of the secretary, Mr. J. P. Irish, Jr., Chamber of Commerce, Weber avenue, Stockton, California, on or before November 1st, 1913, at 5 o'clock.

Each design must be accompanied by an opaque sealed envelope containing the author's card and address. Neither the drawings nor any papers accompanying them, nor any marks upon the package shall in any manner, directly or indirectly, disclose the identity of the competitor. All drawings and other papers accompanying each design must be securely enclosed in one flat, sealed package plainly marked: "Weber Memorial Competition." Plans received after the hour last named above, cannot be considered and will be held unopened subject to call.

A violation of any of the above conditions by any competitor will exclude his design from the competition. For further information address JOHN P. IRISH, JR., Secretary, Chamber of Commerce, Stockton, Calif.

NO BISMUTH MINED.

So far as known to the United States Geological Survey no bismuth was produced in this country in 1912, although a little ore taken from a mine at Leadville, Colo., in 1911 was sold in 1912. The ore was rich in gold and carried 15.47 per cent of bismuth. A considerable quantity of bismuth was produced as a by-product of smelters, and it appears entirely possible that in time enough bismuth may be produced from the various smelters to supply the domestic market. The imports of bismuth in 1912 amounted to 152,540 pounds, valued at \$316,140.

Metallic bismuth is employed in making low-fusing alloys or cliché metals which are used in automatic fire sprinklers, fuses for electric wiring, and solder. Some of the salts have a smooth, unctuous feel and are used in face and toilet powders and in medicinal preparations. Bismuth is also employed to a small extent in making optical glasses.

WANTS \$10,000 FOR FALL.

SACRAMENTO, Oct. 4.—Harry Redman, a structural iron worker, has filed suit against the California Construction Company for \$10,000 damages as a result of a fall. While Redman was employed on the State Armory in August, he alleges he was forced to climb a gin-pole by means of cleats imperfectly nailed to the pole. One of the cleats came off, and he fell twenty feet below. He says the injuries he received are permanent.

Firms desiring news on special classes of buildings, such as Banks, Churches, schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 6 story and base, brick and steel, \$250,000. Architects, Falk & R. H. Heister. Bldg., S. F. Owner, J. H. H. Merchants' Exchange Bldg., S. F. This building is to be erected on the E. 11th line of Sutter street west of Folsom and will have a street frontage of 28 feet 9 inches by a depth of 140 feet. The structure will contain a total of 54 suites arranged in two, three and four rooms. Interior finish, white oak, pine, elm and mahogany. Hardwood floors will be used in the main living rooms. All suites will have connecting bath rooms and wall beds. Plans provide for steam heat, electric service and a vacuum cleaning system. Bath rooms will have cement floors and tile wainscoting. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor. All details are now being purchased.

SAN FRANCISCO—Apartment house, 3 story and base, brick and steel, \$200,000. Architect, Louis M. Thompson. Plan Bldg., S. F. Owners, J. H. Heister and Diston. Heister Bldg., S. F. This building will be erected on the west side of Hyde street south of Post, containing an area of 32456 feet. There will be 14 suites of two and three rooms. Interior finish will be of pine throughout. All suites will have wall beds and private bath rooms. There will be steam heat and a hot water system. Bath rooms will have cement floors and tile wainscoting. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by the owners who are now employing contractors and will carry out the construction by Day Labor.

OAKLAND, CAL.—Apartment house, 3 story and base, brick and steel, \$175,000. Architect, Chas. N. Parnell. Albany Bldg., Oakland. Owners, same. This building will be erected on Harrison street, extending to the large ground area. Plans provide for a total of 115 rooms, which will be arranged in suites of two, three and four rooms. All interior finish, wall beds, etc. Some hardwood floors will be used. There will be steam heat, vacuum cleaning system and electric service. All suites will have wall beds and private bath rooms, connecting hall rooms and tile wainscoting will be used in the bath rooms. Entrance will be finished in marble and tile. Exterior of the building will be a vacuum cleaning system. Plans are complete and the work will be done by the owners who are now employing contractors and will carry out the construction by Day Labor.

SANTA MONICA, LOS ANGELES, CAL.—Apartment house, 3 story and base, brick. Cost not stated. Architect, Almer C. Martin. Bldg., Santa Monica, Cal. Owner, Martin. This building will be erected on the E. 11th line of Sutter street west of Folsom and will have a street frontage of 28 feet 9 inches by a depth of 140 feet. The structure will contain a total of 54 suites arranged in two, three and four rooms. Interior finish, white oak, pine, elm and mahogany. Hardwood floors will be used in the main living rooms. All suites will have connecting bath rooms and wall beds. Plans provide for steam heat, electric service and a vacuum cleaning system. Bath rooms will have cement floors and tile wainscoting. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor. All details are now being purchased.

our. All suites will have connecting bath rooms and wall beds. Plans provide for steam heat and a hot water system. Bath rooms will have cement floors and tile wainscoting. Exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick and steel, \$55,000. Architect, E. B. Hogan. 154 West 46th street, L. A. Owner, Ernest C. Hillman. The building will be erected on Ingram street near Hill and will cover an area of 54 feet by 120 feet. There will be a total of 56 rooms, which will be arranged in two and three room suites. Plans also provide for amusement rooms, boy's hall room and billiard hall. Interior finish will be of pine with some elm panels. There will be steam heat, elevator service, hot and cold running water and a vacuum cleaning system. All suites will have connecting bath and wall beds. Bath rooms will have cement floors and tile wainscoting. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor. Charles Armstrong, 2714 East 4th street will be in charge.

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick and steel, \$60,000. Architects, M. S. Yeager & Co., Trust and Savings Bldg., L. A. Contractors, E. W. Smith & Sons, Trust and Savings Bldg., L. A. Contract price, \$60,000.

BANKS.

BEAVERTON, ORE.—Bank and office, 2 story and base, brick, \$20,000. Architects, Claussen & Claussen, Mackey Bldg., Portland. Owner's name withheld. The building will be erected on a corner site and will contain, beside the banking rooms, one store on the first floor and a number of offices on the second floor. Interior finish will be of pine and hardwoods. There will be fireproof coin and safe deposit vaults. Some ornamental plaster and iron will be used. Plans provide for steam heat. Exterior of the building will be faced with pressed brick. Plans are being prepared.

BRIDGES, DAMS AND HARBOR WORK.

MARYSVILLE, WASH. CO., CAL.—Bridge, reinforced concrete, \$200,000. Engineer, City Engineer, Marysville. Owners, City of Marysville. The following bids were received by the Council of Marysville, for the construction of the reinforced concrete bridge over the Feather River at Marysville: Ross Construction Co., Sacramento, original plans, \$127,000. Revised plans, \$11,750. \$138,750. W. Martin & Son, Sacramento, original plans, \$29,900. Portland Cement Co., San Francisco, original plans, \$28,000. 31st Gorrell Bros., San Francisco, original plans, \$28,500. W. W. Conannon, Co., San Francisco, original plans, \$27,000.

design, \$23,960. All bids have been taken under advisement until the next meeting of the City Council.

Contracts Awarded.

PORTLAND, ORE.—Concrete retaining wall, \$14,036. Engineer, City Department of Engineering, Portland. City of Portland. Contractor, J. S. Winters Co., Portland, Contract price, \$14,036.

CHURCHES.

SAN FRANCISCO—Church, 1 story, frame, \$12,000. Architects, O'Brien & Co. Bldg., S. F. Owners, Japanese Mission. This building has been mentioned here before when the architectural plans were first commissioned to prepare the plans. The building will cover an area of 50x100 feet, and has been designed in the Greek Classic style. Interior will be finished in pine throughout. A central heating system will be installed. Ornamental plaster and art glass will be used. Exterior of the building will be covered with cement plaster on metal lath. Plans are now out for figures.

LOS ANGELES, CAL.—Church, Class A construction, \$200,000 to \$250,000. Architects, Imbs & Comes, St. Louis Mo. Owners, St. Vincent's Roman Catholic Church, Rev. Father Glass. Father Glass and Mr. Imbs have just returned from a European tour of working drawings will shortly be started for a handsome new edifice which is to be erected at the corner of West Adams and Figueroa streets. No details of the construction are being determined upon. Further mention will be made of this work as the plans progress.

LOS ANGELES, CAL.—Church, 1 story, frame. Cost not stated. Architect, Harold Cross, Consolidated Realty Bldg., L. A. Owners, Grace Presbyterian Church. A new building containing an area of 34x60 feet will be erected for the Grace Presbyterian Church. Design is in the classic style. Exterior will be faced with cement plaster. There will be Sunday school rooms besides the main auditorium. Interior finish will be of pine throughout. Some art glass will be used. Plans are complete and the work will be done by Day Labor. H. B. Menzies, 1142 Mt. Pleasant street will be in charge of the work.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Foundry equipment and spark catcher. Cost not stated. Architect, City Department of Architecture. Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans are complete and bids are being called for by the Board of Public Works for furnishing and installing a spark catcher and other foundry equipment in the Polytechnic High School. Full particulars can be secured from the Board of Education, Temporary City Hall. Bids will be received on October 7th.

PORTLAND, ORE.—Warehouse, 2 story and base, brick and steel, \$80,000. Architects, Emil Schmidt & Son, Commercial Bldg., Portland. Owners, J. C. Thompson Estate. The building will be erected on the East Side and will have a frontage of 200 feet by a depth of 100 feet. Construction will be of the heavy mill type. Spur track

facilities have been provided. No interior finish will be used. Plans provide for metal window sash, fireproof doors and an automatic sprinkler system. Exterior of the building will be faced with stock brick. Plans are complete and figures are now being taken by the architects.

LOS ANGELES, CAL.—Brewery addition, brick and steel. Cost not stated. Architect, John E. Kunst, Higgins Bldg., L. A. Owners, Mathie Brewing Co. This work will be done at the company's plant on North Main street. Construction will be of steel and brick. Work includes several large tanks and a 90-foot water tower. No interior finish will be required. Exterior of the building will be faced with red pressed brick. Plans are now being prepared.

TOURNAI, LOS ANGELES CO., CAL.—Factory, 2 story and base, brick. Cost not stated. Architects, J. Martyn Haenke and W. J. Dodd, Story Bldg., L. A. Owners, National Mosaic Tile Co. The building will cover an area of 200x400 feet. Considerable structural steel will be used in the building and roof trusses. There will be metal window sash and frames and a cement and tile floor. Roof will be of tile. Interior of the office portion of the building will be finished in pine. Exterior will be faced with pressed brick. Plans are being prepared.

Contracts Awarded.

SACRAMENTO, CAL.—Grain elevator, reinforced concrete. Cost not stated. Architect, P. J. Herold, Forum Bldg., Sacramento. Owners, Phoenix Milling Co. Contractors, Northern Construction Co., S. F. Contract price not stated.

FIRE HOUSES.

SAN FRANCISCO—Fire house, 2 story and base, brick and steel. Cost not stated. Architects, Ward & Blohme, Alaska Commercial Bldg., S. F. Owners, City and County of San Francisco. Plans for a new fire station to be erected at the corner of East and Commercial streets have been completed by the architects and turned over to the Board of Public Works. The structure will contain the usual apparatus room, and upper floor will be arranged for quarters for the men. Interior finish will be of pine and hardwoods. Special plumbing and electric work will be installed. Plans provide for steam heat. Exterior of the building will be faced with pressed brick. Bids will be called for as soon as the plans receive final approval. Further mention will be made of the work at that time.

FLATS.

OAKLAND, CAL.—Flats, 2 story and base, frame, \$1,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, Mr. Healy. The building will be erected on 29th street near Richmond Boulevard, and has been designed to contain two modern flats of five rooms and bath. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be a large open fire place in each living room. Mantels will be of the Bath rooms and kitchens will have tile wainscot. Exterior of the building will be covered with cement plaster on metal

lath. Plans are now being prepared. Bids will be called for in about two weeks.

GARAGES.

OAKLAND, CAL.—Garage, 1 story and base, reinforced concrete. Cost not stated. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Pacific Coast Agency, Kissell Car. This work has been mentioned here before when plans were first started. The building will be erected at the corner of 24th street and Broadway and will be classic in design. Interior of the front portion of the structure which is to be used for a sales room will be handsomely finished in pine and hardwoods. Rear portion will contain storage space and shipping department. Construction will be fireproof. Considerable ornamental plaster and marble and tile will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

GOVERNMENT WORK AND SUPPLIES.

Prospective Bidders.

Supervising Architect.

Specifications for work under the office of the supervising architect have been furnished to the following firms in addition to those previously noted in these columns:

Casper, Wyo., Construction, October 24.
Robert L. La Fontaine, Cheyenne, Wyo.

W. D. Lovell, 1415 8th street southeast, Minneapolis, Minn.
J. H. Wiese, City National Bank Building, Omaha, Neb.
J. H. Esmay Co., Douglas, Wyo.
J. F. Jenkins & Co., Ocala, Fla.
King Lumber Co., Charlottesville, Va.

Ice Plant, Pearl Harbor.

The Chief, Bureau of Yards and Docks, Navy Department, is calling for bids to be opened November 1, for ice-making and cold-storage plant at the naval station, Pearl Harbor, Hawaii. The building is to have a concrete foundation, reinforced concrete pilasters, with terra cotta curtain walls and partitions, steel trusses and corrugated steel roofing. The building shall be 75 feet 10 inches long by 51 feet wide. An alternate proposition is requested if roof is sheathed and covered with asbestos slate in place of corrugated steel roofing. There is available for the work \$9,000.

Pipes and Valves, Arrowrock Dam.

The Secretary of the Interior has directed the Reclamation Service to execute contract with the Minneapolis Steel and Machinery Co., of Minneapolis, Minn., for furnishing semisteel discharge pipe for balancing valves for the Arrowrock dam, Boise Irrigation project, Idaho. The contract price is \$19,120.12.

San Francisco, Cal., Painting Custom House.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for interior painting of the U. S. custom house, San Francisco, Cal.:

Grohne Construction Co., Joliet, Ill., \$10,700.
D. Zelinsky, San Francisco, Cal., \$12,300.
Isidor Kissel, San Francisco, Cal., \$8,300.
Elting A. Hansen, San Francisco, Cal., \$11,650.
Wm. Bernstein, San Francisco, Cal., \$14,350.
Max Cohn, San Francisco, Cal., \$10,170.
W. R. Eaton, \$8,600; bid not signed.

Heating, Port D. A. Russell.

The contract for the heating in the Q. M. storehouse at Port D. A. Russell, Wyo., has been awarded to W. W. Keefe, of Cheyenne, Wyo., at \$1,625.

Tunnel for Grand Valley.

The Secretary of the Interior has authorized the Reclamation Service to construct tunnel No. 3 on the highline canal of the Grand Valley irrigation project, Colo. Tunnel No. 1 is practically completed, and the force and equipment will be transferred to tunnel No. 3. This tunnel will be 7,280 feet in length, 11 feet 6 inches wide, and 11 feet high. An allotment of \$415,000 has been made for the work.

Cost of Battleships.

The report of the naval board of inspections for shore stations contains an allusion to the difference in cost in the construction of battleships at navy yards and at private plants in order to show it was necessary to make some important installations at the New York navy yard in anticipation of work on battleship No. 39. It is stated that the "hull work on the Florida, which was built at the New York navy yard, cost more than the both the hull and machinery equipment of the Utah, the sister ship, which was built at the works of the New York Shipbuilding Company." It is a fact that the cost of the hull and machinery of the Florida was much more than that of the Utah. The expenditure amounted to \$6,286,143, of which sum \$4,193,598 was expended on the hull as against less than \$4,000,000, which was the contract price of the Utah. No such difference, however, will exist between the cost of battleship No. 39, to be built at New York, and the Pennsylvania, of identical design, under construction at Newport News by contract. The contract price of the Pennsylvania is \$7,260,000, or within \$165,000 of the limit of cost imposed by Congress. This increase in contract price is due directly to the eight-hour law, which places the shipbuilder on a par with the navy yard when it comes to building battleships.

Structural Steelwork, Pearl Harbor.

Bids are to be opened October 18 at the bureau of yards and docks, Navy Department, Washington, D. C., for structural steelwork for coaling plant at the naval station, Pearl Harbor, Hawaii, estimated cost of the work being \$350,000.

General Description.—The work comprises a steel trestle on the main wharf for carrying the rails to support coal-hoisting towers, of 30-foot gage, center to center of rails, and a standard-gage railway track, supported by brackets extending beyond the outboard trestle columns. There are also trestles on the approach piers carrying

the standard-gage railway track and connecting with shore trestles, which in turn connect with eight lines of single track over the coal basins. On the shore, with the exception of the trestles over the coal basins, the track girders are supported on braced steel towers. Girder ends over the coal basins are to be carried by concrete piers to be built by the government. At the inshore end of the straight portion of the track running parallel to the southerly side of the coal basin there shall be a steel trestle ramp connecting the elevated track with the surface track. Two large portable coal chutes hung to steel frames supported on wheels running upon a rail on the wharf floor are to be built and installed; the chute frames to be held near their upper end by trolleys bearing against the flanges of a horizontal longitudinal girder fastened to the outboard column brackets. The power for operating the chutes shall be manual.

General Dimensions.—The trestle on the main wharf is 460 feet long, center to center of end posts on the wharf.

The curved trestle on the south approach wharf to the main pier is about 200 feet long and 15 feet wide, center to center of columns.

The trestle on the north approach to the main pier is about 200 feet long and 15 feet wide, center to center of columns.

On the shore side of the coal basin there is about 1,500 feet of straight elevated track and about 1,100 feet of curved track; over the basin there is about 3,600 feet of straight elevated track and about 2,600 feet of curved track. The total amount of elevated trackage, including wharf and approaches, is about 9,600 feet.

Pumping Units, Salt River Project.
Under advertisement No. 224 the following bids were received by the U. S. Reclamation Service, Los Angeles, Cal., for pumping units for the Salt River project, the unit to consist of 3 1½-inch pumps, direct-connected motors.

Byron Jackson Iron Works, Los Angeles, Cal., \$564, weight 500 pounds time 30 days; G. E. motor; West Berkeley delivery.

C. F. Braun & Co., San Francisco, Cal., \$575, weight 575 pounds each, time 10 days; Alberger pump and 2-H. P. G. E. motor; delivery Newburgh, N. Y.

United Iron Works, Los Angeles, Cal., delivery Oakland, Cal., \$580, weight 600 pounds, time 30 days; 2-H. P. G. E. motor.

Vertical Pumping Unit.

The following bids were opened under advertisement No. 228, for vertical pumping unit for the Truckee-Carson project, being a readvertisement of No. 225, original date of opening September 11:

Byron Jackson Co., Los Angeles, Cal., shipping point, West Berkeley, Cal., \$839, with 10-H. P. motor, deduct \$140.47 for 7½-H. P. motor, delivery at West Berkeley, 70 days.

United Iron Works, Los Angeles, Cal., \$893 1/10 7½-H. P. motor, Solenoid starter, 75 days at Los Angeles, eight 1,500 pounds, or \$760 with 7½-H. P. motor, Schreman float switch starter, 75 days, weight 1,100 pounds.

Doors and Windows, Minidoka Project.

The following bids were opened at

the office of the U. S. Reclamation Service, Los Angeles, Cal., for furnishing 8 windows, 1 pair of doors, and 1 single door, all complete with frames.

Pacific Sash and Door Co., Los Angeles, Cal., \$125; weight 1,800 pounds, delivery, 10 days, Los Angeles.

Morrison, Merrill & Co., Salt Lake City, Utah, \$191.65; weight, 3,200 pounds; delivery, 10 days, Salt Lake.

Pearl Harbor, H. T. Magazine Buildings.

The following bids were received at the bureau of yards and docks, Navy Department, Washington, D. C., for constructing seven magazine buildings at the U. S. naval station, Pearl Harbor, H. T.:

Spalding Construction Co., Chamber of Commerce Building, Portland, Ore., \$109,800.

W. N. Concanon, Monadnock Building, San Francisco, Cal., \$111,637.

B. T. Owsley, 311 Sharon Building, San Francisco, Cal., \$111,500.

Lord-Young Engineering Co., Ltd., Honolulu, H. T., \$109,400.

Penn Bridge Co., Washington, D. C., \$149,800.

Puget Sound Compressors, Filters, Etc.

The bid of the Laidlaw-Dunn-Gordon Co., 115 Broadway, New York City, \$39,800 in amount, has been accepted for furnishing compressors, filters, etc., for the Puget Sound navy yard, bids for which were opened August 20.

Wire and Conduit.

Bids were opened at the U. S. Reclamation Service, Los Angeles, Cal., for furnishing copper wire and conduits Burley substation, Minidoka project, Idaho:

John A. Roebbling's Sons Co., Los Angeles, Cal., item 1, \$269.45; 30 days; delivery, Trenton, N. J.

Western Electric Co., Los Angeles, Cal., \$218.50; not on material called for; 7 days delivery, Los Angeles.

Pacific States Electric Co., Los Angeles, Cal., item 2, \$82.15; 2 days; Los Angeles.

HALLS AND SOCIETY BUILDINGS.

SACRAMENTO, CAL.—Lodge hall 4 story and base, brick and steel. Cost not stated. Architect, Washington J. Miller, 45 Kearny street, S. F. Owners, Native Sons of the Golden West. The building will be erected on one of the down town business streets and will have a considerable frontage. The entire building will be devoted to the order. There will be a large lodge room, banquet hall, reception rooms, ladies' and gentlemen's parlors, smoking room and billiard hall. Interior finish will be of pine and hardwoods. Plans provide for steam heat and a vacuum cleaning system. Exterior of the building will be faced with pressed brick. Plans are being prepared.

BERKELEY, ALAMEDA CO., CAL.
Lodge hall, 3 story and base, reinforced concrete. Cost not stated. Architect, W. H. Ratchiff, Jr., First National Bank Bldg., Berkeley. Owners, Berkeley Elks' Hall Association. This work has been mentioned here before when plans were first started. Working drawings are now complete and bids are being taken. The building will be erected at the corner of

Albion and Harrold streets, and when completed will be the finest lodge hall in Berkeley. Interior will be finished in pine and hardwoods. Plans include several large lodge rooms, ball room, banquet hall, library, ladies' and gentlemen's parlors, billiard room and living apartments. There will be steam heat, a vacuum cleaning system and hot water supply. Exterior of the building will be faced with cement plaster.

HOSPITALS.

SAN FRANCISCO.—Hospital shades and linoleum. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids will be received on October 8th by the Board of Public Works for furnishing and installing window shades and linoleum in the eight principal buildings of the San Francisco Hospital group. Full particulars can be secured from the Board of Public Works, Temporary City Hall Building.

LOS ANGELES, CAL.—Hospital administration building, 4 story and base, brick and steel. Cost not stated. Architects, Garrett & Farrell, Currier Bldg., L. A. Owners, Methodist Hospital Association. Plans for the administration building, which will cover an area of 111,000 feet have been completed and have received the approval of the Building Committee. Contractors are now figuring the excavating and concrete work. Other parts of the work will be let in segregated contracts. Plans can be secured from the architects.

HOTELS.

SAN FRANCISCO.—Hotel, 3 story and base, frame, \$12,000. Architect, Joseph Cohen, 45 Kearny St., S. F. Owner, Isidor Rosenberg. The building will be erected on the east side of Larkin street north of California, and will contain a store on the first floor and about 40 guest rooms on the upper two floors. Interior finish will be of pine throughout. Besides the guest rooms there will be a number of public baths. Tile wainscot will be used in the bath rooms. Plans provide for hot water supply. Exterior of the building will be covered with white Modus cement. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Hotel, 7 story and base, steel and brick, \$110,000. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Friedman Realty Co. This work has been mentioned here before. The structure will be erected at the southwest corner of Clay and 10th streets, having a frontage on one street of 100 feet and of 60 feet on the other. There will be four stories below the hotel lobby on the first floor. Each of the upper floors will contain 10 guest rooms and 12 private baths. Interior will be finished in pine and wood. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with grey pressed brick. Plans are complete and figures are being taken.

OAKLAND, CAL.—Hotel addition, brick and steel construction, \$10,000. Architect, Clay N. Lurriel, Albany

Bldg., Oakland. Owners, Morris & Muller. An addition of a large banquet room is to be made to the hotel building recently erected by Morris & Muller. Plans for the work include interior finish, plastering, painting, plumbing and electric work. Details are complete and the work is now being done by Day Labor.

LOS ANGELES, CAL.—Hotel, 12 story and base, reinforced concrete. Cost not stated. Architect, Lyman Farwell, Story Bldg., L. A. Owners, Ira W. Byrnes and associates. Mr. Byrnes has secured a fifty year lease of the property at the northwest corner of Franklin and Spring streets, 120x 215 feet, from the Phillips Estate. Preliminary plans have been prepared for a modern hotel structure containing 700 guest rooms. The building is to be erected by a syndicate of which F. L. Spaulding, 1160 Dana street, L. A., is a member. Construction will be carried on by Mr. Spaulding.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel, \$50,000. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, Consolidated Realty Co. The building will be erected at the southwest corner of 14th and Hill streets on property having a frontage of 60 feet on one street and 97 feet on the other. There will be three stores on the first floor besides the hotel lobby. Upper floors will be arranged for 50 guest rooms and 18 baths. Interior finish will be of pine and elm. All rooms will have hot and cold running water. There will be steam heat and elevator service. Bath rooms will have cement floors and tile wainscot. There will be patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Hotel, 11 story and base. Class A construction, \$100,000. Architects, Barnett, Haynes & Barnett, Wright and Callender Bldg., L. A. Owner, Fred Grass, S. F. This building will be erected on Main street, between 5th and 9th streets, covering an area of 36x75 feet. The building will have a complete steel frame and exterior walls of brick, faced with terra cotta. Floors will be of reinforced concrete. First floor will be arranged for the lobby, office, a public dining room and kitchen. Upper floors will contain a total of 150 guest rooms, all of which will have private baths. Interior finish will be of pine and hardwoods. Bath rooms will have the floors and tile wainscot. There will be three elevators, two passenger and one freight, steam heat, a vacuum cleaning system and hot water supply. The floors will be used in the lobby and halls. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

LIBRARIES.

LEAMONT RIVERSIDE CO., CAL. Library, 1 story and base, reinforced concrete, \$10,000. Architect, E. L. Hopkins, Delta Bldg., L. A. Owners, City of Leamont. Plans have been approved for a one-story, reinforced concrete library building. Funds for the construction of which have been donated by the Carnegie Library Asso-

ciation. The building will cover an area of 30x60 feet, and will contain a reading room, office and stack room. Interior finish will be of pine and oak with maple floors and cork linoleum. Metal shelves will be used. There will be furnace heat and modern plumbing. Exterior of the building will be faced with cement plaster. Plans are being prepared.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Fine Arts Building, steel and fireproof construction. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans and specifications are now out for figures for the general construction of the Fine Arts Building. This will be of fireproof construction with a complete steel frame. A contract for the steel work has already been awarded. Bids will be opened for the general construction on October 23rd by the Buildings and Grounds Committee. Plans can be secured from the Director of Works. An official proposal appears in another column of this issue.

RAILROAD CONST., STATIONS AND EQUIPMENT

SEATTLE, WASH.—Car barns, 1 story and base, brick and steel, \$50,000. Architect, City Architect, Daniel Huntington, Seattle. Owners, City of Seattle. Plans have been completed for a building 47x161 feet with an L 28x 40 feet, which will house the municipal cars and the administrative offices of the system. Construction will be of brick and steel. Plans will receive the official approval at once, and bids will probably be called for about October 10th. Plans and specifications can be secured from the City Architect's office.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$12,000. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, J. Black, Jr. The dwelling has been designed for ten rooms, three baths and a sleeping porch. Interior finish will be of pine, hardwoods and white enamel. There will be hardwood floors in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot will be used in the bath rooms and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. A fine site has been selected on 15th avenue near the Presidio wall. Plans are complete and figures are being taken.

SAN FRANCISCO—Residences, 4, 2 story and base, frame, \$2,500. Architect, none. Owner, E. Nelson, 39 Presidio Terrace, S. F. These houses will be erected on 16th avenue north of California street, and each will contain six rooms and bath. Interiors will be finished in pine and redwood. Hardwood floors will be used in the living rooms and dining rooms. Each living room will have an open fire place with brick or tile mantel. Tile will be used in the bath rooms and kitchens. Exteriors will be covered

with cement plaster, rustic and shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$5,000. Architect, E. E. Young, 251 Kearny street, S. F. Owner, Thomas Scoble, 363 14th avenue, S. F. These houses will be erected on the east side of 25th avenue north of Lake street. Each house will contain seven rooms and bath. Interior finish will be of pine and hardwoods with some elm panels. Hardwood floors will be used in the living rooms, dining rooms and reception halls. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Tile wainscot will be used in the bath rooms and kitchens. Automatic water heaters will be used. Exterior of the houses will be covered with rustic, cement plaster on metal lath and brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Bungalows, 2, 1 story and base, frame, \$1,200 each. Architect, none. Owner, O. Swanson, 1060 18th street, S. F. The houses will be erected on Athens near Excelsior street, and each house will contain six rooms and bath. All interior finish will be of pine or redwood. Some hardwood floors will be used. Each living room will have a large open fire place. Mantels will be of tile. Tile wainscot will be used in the bath rooms and kitchens. Exteriors will be covered with rustic. Plans are complete and work will be done by Day Labor.

SAN FRANCISCO—Residences, 6, 2 story and base, frame, \$2,500 each. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owner, J. P. Fletcher. The house will be erected on property on Fulton street near 25th avenue, and each house has been designed to contain seven rooms and bath. Interiors will be finished in pine, redwood and some elm panels. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be an open fire place in each living room. Mantels will be of brick and tile. Bath rooms and kitchens will have tile wainscot. An automatic water heater will be installed. Exteriors will be covered with cement plaster on metal lath and rustic. Work will be done by Day Labor. Mr. Fletcher controls building lots in this section and will eventually improve all of them.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, E. E. Mansueti, 164 Parnassus avenue, S. F. The house will be erected on 25th avenue north of Irving, and will contain seven rooms and bath. Interior finish will be of pine throughout. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Residence, 1 story and base, frame, \$5,000. Architects, J. E. Kraft & Sons, Pfeiffer Bldg., S. F. Owner, Lena Winkler Farewell. The

dwellings, which has been designed for an eight-room house, will be erected at the corner of Ralph and Paris streets. Plans show a private garage in connection. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile wainscoting will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with shingles. Plans are complete and a contract will be let at once.

SAN FRANCISCO—Residence, 2 story and base, frame, \$5,000. Architect, Walter Volden, 1915 Cole street, S. E. Owners, Thomas Volden & Son, 1915 Cole street. The dwelling has been designed for a seven-room house and will be erected on 18th avenue near Lake. Interior finish will be entirely of pine. There will be hardwood floors and some hardwood veneer. Plans provide for furnace heat and open fireplaces. Mantels will be of tile. Tile wainscoting will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$12,000. Architect, J. A. Leonard, Phelan Bldg. S. F. Owner's name withheld. The dwelling will be erected at the corner of Moncada Way and Cedro street, and has been designed for a ten-room house with three bath rooms and sleeping porch. Interior will be finished in pine, white enamel and hardwoods. Hardwood floors will be used in the principal rooms. There will be a central heating system, probably hot water, and open fire places. Mantels will be of brick and tile. A garage will also be erected on the property. Considerable tile work is included in the plans. An automatic water heater and vacuum cleaning system will be installed. Exterior of the dwelling will be covered with cement plaster. Plans are being prepared.

SAN FRANCISCO—Residence, 2 story and base, frame, \$12,000. Architects, Ward & Bidme, Alameda Commercial Bldg., S. F. Owner, H. L. Harrison. This house will be erected in St. Francis Wood, and has been designed to contain ten rooms, three bath and sleeping porch. A garage will also be erected on the lot.
